Incumbent C-Band Earth Station List – Explanatory Notes

This Appendix is based on current information in IBFS as of July 31, 2020. The List represents staff determinations about which earth stations have satisfied the criteria for incumbent earth station status set forth in *Expanding Flexible Use of the 3.7 to 4.2 GHz Band*, Report and Order and Order of Proposed Modification, 35 FCC Rcd 2343, 2392, para. 116 (2020) (*3.7 GHz Report and Order*). This List relates only to operations in the 3700-4200 MHz band, and is limited to earth stations located in the contiguous United States, which may elect the lump sum option under the terms of the *3.7 GHz Report and Order*.

ApplicantName – the name in IBFS of the Applicant in the case of a pending Application, or the Licensee or Registrant in the case of a current authorization.

Callsign, FileNumber, & Filing State – the callsign that designates a particular authorization. The associated FileNumber identifies the Application that includes the details of the current authorization. Filing State is either "current" or "pending."

Red Light – as presented here, the "red light" status of a pending Application. Under its "red light" rules, the Commission may not grant license applications from Applicants who have outstanding debts to the U.S. Government. *See* 47 CFR § 1.1910(b)(2). The applicant is informed that action will be withheld on the application until full payment or arrangement to pay any non-tax delinquent debt owed to the Commission is made and/or that the application may be dismissed. *Id.* Normal practice regarding pending Applications from parties with "red light" issues is to include such Applications on Accepted for Filing Public Notices, but withhold grant of the application until the red light issue is resolved. This List follows that practice by including pending Applications that have satisfied the requirements for Incumbent Earth Station status, but marking those subject to the "red light" rules in the "Redlight" column. Any Commission action taken prior to the payment of delinquent non-tax debt owed to the Commission is contingent and subject to rescission. *Id.*

AppType & Accepted for Filing PN –AppTypes available in IBFS for this Band. The information included in IBFS for pending Modification applications (MOD & MFS) to current authorizations depends on the status of its review. If a pending Modification application has not been placed on Accepted for Filing Public Notice, the specific modifications requested are not reflected in IBFS in the MOD application but only in an Attachment to the Modification application. Once the Modification application is placed on Accepted for Filing Public Notice, the modifications requested are included in the IBFS data fields.

Class of Earth Station – which of the two classes of earth stations that may qualify for Incumbent status -- Fixed Earth Stations (FES) and Temporary Fixed Earth Stations (TFE).

SiteID – the designation by the Applicant of a particular site for the location of antennas under the specific Callsign.

AntennaID & Quantity – the designation by the Applicant of a particular antenna or antenna type. Often, an AntennaID represents a particular Manufacturer and Model of antenna – information that also is in IBFS. The quantity represents the number of antennas associated with that AntennaID at that site.

Site Address and GPS Coordinates – the address and the GPS coordinates of the particular SiteID.

List of Incumbent Earth Stations - CONUS (alphabetical by Applicant Name)
