Federal Communications Commission
CAF - A-CAM 2.3.2 - Report Version 11.0
May 2, 2018

The report utilizes A-CAM 2.3.2 output; the table below provides specific details on the individual report.

Report Reference Number	Report Basis
11.1	A-CAM Support and Broadband Obligations -Revised Offer at $ 146.10 for Authorized January 24, 2017 Carriers Only

The Commission directed the Bureau to provide a revised offer of support and obligations utilizing the existing ACAM 2.3.2 model with a $ 52.50 benchmark and $ 146.10 support maximum cap.

All scenarios utilize a funding threshold of $52.50 and $146.10 funding cap per location for rate-of-return carriers.

Report 11.1, Column F shows the number of residential and small business locations in the census blocks for which support is calculated, will receive model-based funding. Model based support is provided in column E.

The report can be filtered by the user by clicking on the drop down menu in row 10 to focus on results for a subset of carriers. If only one carrier is selected, the results for that carrier are shown in row 7. If multiple carriers are selected, the results are shown in row 7. Row 8 will display state rate-of-return totals when selecting a single state or multiple states. Row 9 is the total of the data on the report.

Please note:

1 A-CAM 2.3.2 Solution Set, SSACAM20161031v232 utilized in the production of the report results.

2 Report 11.1 shows the A-CAM Offer for rate-of-return carriers that meet the eligible locations served condition and were authorized for ACAM support with an authorization date of January 24, 2017. The offer is associated with census blocks with average costs per location greater than $52.50 per month, exclusion of areas competitively served by wired or fixed wireless (voice and 10/1 broadband), exclusion of areas where ILEC or affiliate reports it is using either FTTP or cable to offer 10/1 broadband, and support per funded location limited to $146.10 per month. Utilizes a Funding Benchmark of $52.50, Extremely High-Cost Threshold Not Applicable, Funding Cap Max $146.10 per Location, Wired and Wireless equal True. Results are presented on a holding company basis, reflecting transactions that have closed prior to release of A-CAM 2.3.2.

5 Unit costs are calculated on a per-location-passed basis.

6 A-CAM 2.3.2 Solution Set SSACAM20161031v232 utilized the coverage toggle v2.3.2 reflecting streamlined challenge process and the final broadband coverage data for purposes of the voluntary election of model-based support. Broadband reported by each rate-of-return carrier or its affiliates (based on the published “holding company number”) in its self-reported footprint (i.e., within its study-area boundaries) is treated as ILEC-served, but FTTP and Cable is excluded from support calculations. Other reports of broadband are classified according to the technology as either wired or wireless. DSL or FTTP broadband reported by companies other than the in-region rate-of-return ILEC or its affiliate that previously were classified as telco-served are now classified as wired served. Also, for in-region rate-of-return ILECs and their affiliates, all FTTP and Cable broadband of at least 10/1 are classified as wired broadband in the support module and excluded from support calculations.
