I. ATTACHMENT E

HOW TO MONITOR THE FCC AUCTION ON-LINE

The auction announcements and round results for Auction 33 will be accessible through the FCC Wide Area Network, the Internet, and the FCC's Automated Round Results System. You can check on round results and also read any material released by the Commission during the course of the auction. In the sections that follow, Options 1 and 2 list the information needed to track the auction from your computer; Option 3 lists an alternate method.

Conventions

The instructions in this section use the following typographical conventions:

bold Represents objects on the screen that you click with the mouse pointer, including

buttons, Internet links, icons, tabs, menu items (e.g., Cancel button, Auctions

link, Save option in the File menu).

italic Represents field names or areas of a screen (e.g., Location field, Selected Licenses

area of a screen).

bold italic Represents characters that you must type exactly as they appear in the instructions.

For example, if you are instructed to type http://wtbwww01.fcc.gov, you should

type all of the characters shown in bold italic exactly as they are printed.

SMALL CAPS Represents keys on the keyboard (e.g., ENTER, CTRL, ESC).

Note: Throughout these instructions, "enter" means to type the appropriate information and then press the ENTER key.

A. Option 1: Tracking the Auction via the FCC Wide Area Network

The FCC has implemented a Remote Access System that allows users to dial in directly to the FCC to view round results, auction announcements, and messages, and to make suggestions to the FCC regarding the FCC auction process.

1. Minimum Hardware and Software Requirements

The following minimum hardware and software is required to use the FCC Remote Access System:

a. Hardware Requirements

- CPU: Intel Pentium
- RAM: 16 MB (more recommended if you have multiple applications open)
- Modem: 28.8 Kbps Hayes compatible modem or faster (recommend 56.6 Kbps)
- Monitor: VGA or above
- Mouse or other pointing device

b. Software Requirements

- Operating System: Microsoft Windows 95/98
- Point-to-Point Protocol (PPP) Dialer: Use the Dial-Up Networking feature included with Windows 95/98
- Web Browser: Netscape® CommunicatorTM 4.73 is recommended. However, you can also use Netscape Communicator 4.5, 4.51, 4.61, 4.7, or 4.72 (Internet web browser software).

Note: To download Netscape Communicator 4.73 free of charge, access the Netscape download site at *http://home.netscape.com/download/*

2. Connecting to the FCC Network

To use the FCC Remote Access System, you must first connect to the FCC Network using Dial-Up Networking.

Dial-Up Networking connects to a 900 number telephone service at a charge of \$2.30 per minute. The first minute of connection time to the 900 number service is at no charge.

Dial-Up Networking establishes a point-to-point connection from your PC to the FCC Network. *This point-to-point connection is not routed through the Internet.*

For instructions regarding how to connect to the FCC Network using Dial-Up Networking, see the *Accessing the FCC Network Using Windows 95/98* attachment.

For technical assistance with installing or using FCC software, contact the FCC Technical Support Hotline at (202) 414-1250 (V) or (202) 414-1255 (TTY). The FCC Technical Support Hotline is generally available Monday through Friday from 7 a.m. to 10 p.m. ET, Saturday from 8 a.m. to 7 p.m. ET, and Sunday from 12 p.m. to 6 p.m. ET. *All calls to the FCC Technical Support Hotline are recorded*.

3. Using the FCC Remote Access System

After you have connected to the FCC Network, start your Netscape Web browser. In your browser's *Location* field, enter *http://wtbwww03.fcc.gov* and then click **Round Results Viewer**, **Suggestion Box**, or **Announcements**

Note: If you cannot access the preceding site, and you suspect there is a problem with your Domain Name Server (DNS), refer to *Accessing FCC Sites In Case of DNS Problems* at the end of this document. Or you can use the alternate location, *http://wtbwww26.fcc.gov*.

When you have finished, exit your Web browser, then disconnect from the FCC Network.

B. Option 2: Tracking the Auction via the Internet

You may use your Web browser to download announcements and round results from *wtbwww01.fcc.gov* – or from either of two secondary locations, *wtbwww13.fcc.gov* or *www.fcc.gov/wtb/auctions/* – as described in the following sections.

1. Downloading from wtbwww01.fcc.gov or wtbwww13.fcc.gov:

- 1. Connect to your Internet service provider and start your Web browser.
- 2. In the *Location* field of the Web browser screen, enter one of the following locations: *http://wtbwww01.fcc.gov* or *wtbwww13.fcc.gov*

Note: If you cannot access either of the preceding sites, and you suspect there is a problem with your Domain Name Server (DNS), refer to *Accessing FCC Sites In Case of DNS Problems* at the end of this document.

3. Click **Auction 33**.

• For auction announcements, click **Announcements**.

- To download a bid import template file, click **Announcements**, then select **template.txt**.
- For auction round results, click **Results** and then click the subdirectory for the type of files you want to use:

mdb - Microsoft Access database files in *zipped* form (for use in the Auction Tracking Tool)
txt - text files
dbf - dBASE database files

- 4. Click the file you want to download.
- 2. Downloading from www.fcc.gov/wtb/auctions/:
- 1. Connect to your Internet service provider and start your Web browser.
- 2. In the *Location* field of the Web browser screen, enter the following location: *http://www.fcc.gov/wtb/auctions/*
- 3. Do the following:
 - a. In the *Auctions* section on the right, click **700 MHz Guard Band #33** under *In Progress*.
 - b. Then click Announcements, Programs, or Results.
 - For auction announcements, click **Announcements**.
 - To download a bid import template file, click **Announcements**, then select template.txt.
 - For auction round results, click **Results** and then click the subdirectory for the type of files you want to use:

mdb - Microsoft Access database files zippedtxt - text filesdbf - dBASE database files

4. Then click the file you want to download.

3. Announcement Files

The announcement files will use the naming convention $aa_xxx.nn$, where aa is the auction number, xxx is the round number and nn is the announcement number. For example, 33_002.07 would represent an announcement for Auction 33 that was posted during round two and was the seventh announcement for the auction.

4. Round Results Files

For each round, dBase-compatible database files will be uploaded with the following naming conventions (where *xxx* represents the round number):

- 33_xxxS.DBF contains all bids submitted in a particular round
- 33 xxxW.DBF contains all bids withdrawn in a particular round
- 33_xxxE.DBF contains the maximum eligibility and remaining number of waivers for each bidder
- 33_xxxH.DBF contains the high bids in a particular round and the minimum accepted bids for the next round

For those who cannot use the dBase-compatible database files, we will also upload the ASCII text (.TXT) version of these files with the same filenames as above (e.g., 33_xxxS.TXT, 33_xxxE.TXT).

In addition, if you want to use Microsoft Access or you are using the FCC-provided Auction Tracking Tool (ATT), we upload the MDB access version of the round results files as a zipped file with a name of the form 33_xxx .ZIP.

In the event an error occurs with the MDB file creation process only, the zipped file will not be generated. However, if such a failure occurs, we will upload text files that contain the MDB round results data. For details, refer to *Round Results Text Files Produced In Case of ATT Processing Failure* at the end of this section.

File Formats: For a description of the internal formats of the round results files, refer to *Round Results File Formats* at the end of this document.

a. Locations of Uploaded Files

The newest round results are uploaded to the *Results* directory based on type of file format: dbf, mdb (zip files), and txt.

On the primary location, wtbwww01.fcc.gov:

- http://wtbwww01.fcc.gov/700_MHZ/Auction_33/Results/dbf/
- http://wtbwww01.fcc.gov/700_MHZ/Auction_33/Results/mdb/
- http://wtbwww01.fcc.gov/700_MHZ/Auction_33/Results/txt/

If you cannot access these files at the preceding primary location, you can access the same files at either of the following secondary locations: wtbwww13.fcc.gov or www.fcc.gov/wtb/auctions/.

b. Archive Directories

After every 50 rounds, files will be moved from the Results directory to archive directories. The following listings show an example of the directory structure for an auction in round 102. Note that the results for rounds 101 and 102 would be in the *Results* directories.

On the primary location, wtbwww01.fcc.gov:

http://wtbwww01.fcc.gov/700_MHZ/Auction_33/Results/dbf/D001_050
http://wtbwww01.fcc.gov/700_MHZ/Auction_33/Results/dbf/D051_100
http://wtbwww01.fcc.gov/700_MHZ/Auction_33/Results/dbf/
http://wtbwww01.fcc.gov/700_MHZ/Auction_33/Results/mdb/M001_050
http://wtbwww01.fcc.gov/700_MHZ/Auction_33/Results/mdb/M051_100
http://wtbwww01.fcc.gov/700_MHZ/Auction_33/Results/mdb/
http://wtbwww01.fcc.gov/700_MHZ/Auction_33/Results/txt/T001_050
http://wtbwww01.fcc.gov/700_MHZ/Auction_33/Results/txt/T051_100
http://wtbwww01.fcc.gov/700_MHZ/Auction_33/Results/txt/

If you cannot access the files at the preceding primary location, you can access the same files at either of the following secondary locations: wtbwww13.fcc.gov or www.fcc.gov/wtb/auctions/.

c. Round Results Text Files Produced In Case of ATT Processing Failure

In the event an error occurs with the MDB file creation process, and the MDB files are not created, we will initiate a backup process to provide a temporary solution for bidders who normally would rely on the Auction Tracking Tool data to analyze round results. Specifically, we will upload tab-delimited ASCII (.txt) files that contain the same round results data as the MDB files, but in a flat file format.

There will be one .txt file for each Auction Tracking Tool table, and they will have names of the following general forms (where *xxx* is the round number):

All Bids: 33_xxxa.txtBidders: 33_xxxb.txt

• Bidders Raising Own High Bid: 33_xxxc.txt

Bidders Who Reduced: 33_xxxr.txt
Increment Statistics: 33 xxxi.txt

• Markets: 33_xxxm.txt

Round Statistics: 33_xxxu.txt
Waiver Statistics: 33_xxxv.txt
Withdrawal Statistics: 33_xxxd.txt

For example, 33_001a.txt is the All Bids table file for Round 1.

These text files will be uploaded to the same location as the MDB zipped file, as described under the preceding section titled *Locations of Uploaded Files*. Bidders will then have all of the table data that is normally supplied with the MDB files. However, bidders will not be able to import the .txt file into the Auction Tracking Tool. Instead, they will have to use Notepad, Wordpad, Excel, or some other application that can work with text files.

Once the processing error has been corrected, the MDB files will be created and posted to the Internet, replacing the temporary text files. Bidders will receive a message that the files have been updated. The updated zip file can then be loaded into the Auction Tracking Tool.

C. Option 3: Tracking the Auction via the FCC's Automated Round Results System

High Bid round results are also available from a touch-tone phone, using the FCC's Automated Round Results System. To access this system, dial 800-432-2110 from outside the Washington DC area and 202-414-1260 from within the Washington DC area. Once the system has been activated, you will follow the voice prompts. You will need to know the name of the license you want by market and frequency block, such as MEA001 A.

D. Accessing FCC Sites In Case of DNS Problems

When you enter a URL into your browser, the system must convert this alphanumeric text (e.g., www.fcc.gov/wtb/auctions/) into its associated numeric IP address (192.104.54.3, in this case). To make this conversion, the system checks URL-to-IP-address "lookup" tables in two different places.

First, it looks at the table contained in a file called **hosts** in the c:\windows directory on your computer's hard drive. If the URL is not in that table, the system looks in the database on your Domain Name Server (DNS). However, if your DNS is unavailable for some reason, the system will not be able to find the IP address you requested.

The following procedure is intended to help ensure that you can access auction results files on the FCC's Web and FTP sites if your designated DNS has problems. Note the following:

- The IP addresses shown in the following procedure are correct as of the date this document was created. They may have changed subsequently. In case of problems, please check with Tech Support at (202) 414-1250.
- Make entries in the **hosts** file *only* to work around DNS problems. We do not recommend leaving these entries in permanently; please remove them when your DNS problem has been resolved.

To add FCC-related URL entries to your computer's hosts file, do the following:

1. Using Windows Explorer, ensure that the hosts file exists in your c:\windows directory. If c:\windows has no **hosts** file, use the Windows *Rename* function to change the name of the **hosts.sam** file to **hosts** (with no extension).

To do this, use your *right-hand* mouse button to click the **hosts.sam** file, then click the Rename option in the menu that appears.

2. Using a text editor of your choice, such as Wordpad or Notepad, open the hosts file in your c:\windows directory.

This file will already contain the following entry:

```
127.0.0.1 localhost
```

3. Using the same format (with at least one space between each number and its corresponding URL), add the following entries to the bottom of the file:

```
192.104.54.3 ftp.fcc.gov
192.104.54.3 www.fcc.gov
208.245.40.194 wtbwww13.fcc.gov
207.123.193.68 wtbftp01.fcc.gov
207.123.193.68 wtbwww01.fcc.gov
```

4. Save the file and exit your text editor.

Be sure that the file name has not changed to *hosts.txt* or *hosts.doc* or similar. It must remain just **hosts** (with no extension).

E. Round Results File Formats

This section describes the formats for the round results files that will be uploaded to the FCC Internet site after each round of the auction. There are three sets of results files. The first set of

files is in Microsoft Access 97 *mdb* format and contains the data tables for the FCC Auction Tracking Tool. The other files are in *dbf* and *txt* format and contain the raw output of the auction data.

1. Auction Tracking Tool File Format

There will be a single Auction Tracking Tool .*zip* file for each round of the auction. The following layout describes the tables and fields within the mdb round file. The mdb files are for use with the FCC Auction Tracking Tool.

a. All Bids table

Auction ID	Long Integer
	0 0

F. Help

For technical assistance with installing or using FCC software, contact the FCC Technical Support Hotline at (202) 414-1250 (V) or (202) 414-1255 (TTY). The FCC Technical Support Hotline is generally available Monday through Friday from 7 a.m. to 10 p.m. ET, Saturday from 8 a.m. to 7 p.m. ET, and Sunday from 12 p.m. to 6 p.m. ET. *All calls to the FCC Technical Support Hotline are recorded*.
