On September 28, 1998, the Federal Communications Commission (Commission) released the *Pennsylvania Numbering Order*,<sup>1</sup> which delegated authority to state public utility commissions to order number rationing in jeopardy situations and encouraged state commissions to seek further limited delegations of authority to implement number conservation methods.

On March 31, 2000, the Commission released the *Numbering Resource Optimization First Report and Order*.<sup>2</sup> In the *Numbering Resource Optimization First Report and Order*, the Commission granted state commissions the authority to engage in certain number conservation measures. The Commission also reiterated that the state delegations of authority to implement number conservation measures were interim in nature and would be superseded by forthcoming decisions in the *Numbering Resource Optimization* proceeding. The Commission, however, continued its delegation to the

Common Carrier Bureau (Bureau) to rule on state petitions for additional delegation of numbering authority when no new issues are raised.

In paragraph 170 of the *Numbering Resource Optimization First Report and Order*, the Commission required that state commissions seeking thousands-block number pooling authority demonstrate that: (1) a numbering plan area (NPA) in its state is in jeopardy; (2) the NPA in question has a remaining life span of at least a year; and (3) the NPA is in one of the largest 100 Metropolitan Statistical Areas (MSAs), or alternatively, the majority of wireline carriers in the NPA are LNP-capable. The Commission also determined that a state commission may expand pooling to another MSA only after pooling had been implemented in the initial MSA and after providing carriers sufficient time to adjust their networks for thousands-block number pooling.

On May 9, 2001, the Florida Public Service Commission (Florida Commission or Petitioner) filed a petition requesting additional delegated authority to implement thousands-block number pooling in the 941 NPA.<sup>3</sup> Petitioner contends that special circumstances justify a grant of thousands-block number pooling authority for this NPA. Petitioner believes that pooling would allow numbering resources to be used more efficiently as well as extend the life of the 941 NPA. Petitioner has also established public hearings to discuss plans for area code relief in the 941 NPA.

We hereby seek comment on the Florida Commission's request for delegated authority to implement thousands-block number pooling in the 941 NPA. A copy of the petition will be available during regular business hours at the FCC Reference Center, Portals II, 445 12th Street, S.W., Suite CY-A257, Washington, D.C. 20554, (202) 418-0270.
