NOTICE OF PROPOSED RULE MAKING

Adopted: February 21, 2001

Released: March 2, 2001

Comment Date: April 23, 2001  
Reply Comment Date: May 8, 2001

By the Chief, Allocations Branch:

1. The Commission considers herein a petition for rule making filed on behalf of Hualapai Broadcasters, Inc. (“petitioner”), licensee of Station KRCY,<sup>1</sup> Kingman, Arizona, requesting the substitution of Channel 224C for Channel 224C1 at Kingman, the reallocation of Channel 224C to Dolan Springs, Arizona, and modification of the license of Station KRCY accordingly. Petitioner stated its intention to apply for Channel 224C if allotted to Dolan Springs, as requested.

2. Petitioner filed its request pursuant to Section 1.420(i) of the Commission’s Rules which permits the modification of a station’s authorization to specify a new community of license without affording other interested parties an opportunity to file competing expressions of interest. See Modification of FM and TV Authorizations to Specify a New Community of License (“Change of Community R&O”), 4 FCC Rcd 4870 (1989), recon. granted in part (“Change of Community MO&O”), 5 FCC Rcd 7094 (1990).

3. Petitioner advises that the requested reallocation of Channel 224C to Dolan Springs (pop. 1,090),<sup>2</sup> a community not located within any Urbanized Area, is mutually exclusive with its modification to Channel 224C1 at Kingman. The distance between the two communities is 62.6

<sup>1</sup> Station KRCY was modified from Channel 290C1 to Channel 224C1 at its existing site in MM Docket No. 99-271. See Boulder City, Nevada, Bullhead City, Lake Havasu City, and Kingman, Arizona, and Ludlow, California, (DA 00-1331), released June 16, 2000. However, action taken in that proceeding does not nullify the petitioner’s obligation to file a license application (FCC Form 302) for the modified facilities on Channel 224C1 at Kingman, as directed in MM Docket No. 99-271. Therefore, petitioner is directed to file its license application to specify Channel 224C1 at Kingman within 30 days of the release date of this Notice. Final action in this proceeding will not be taken until Station KRCY has received an authorization on Channel 224C1 at Kingman.

<sup>2</sup>Population figures reported herein were taken from the 1990 U.S. Census.

kilometers (38.9 miles) whereas a minimum distance of 270 kilometers (167.8 miles) is required in this instance. In further support of its proposal petitioner states that the reallocation of Channel 224 as a Class C channel at Dolan Springs will result in a preferential arrangement of allotments by providing Dolan Springs with its second local FM station and its first competitive service.<sup>3</sup> By way of contrast Kingman will continue to be served locally by three other aural services – Stations KAAA(AM), KFLG(FM) and KGMN(FM). Additionally, petitioner states that its reallocation proposal would enable Station KRCY to expand its coverage area. Petitioner advises that Station KRCY(FM) presently provides 1 mV/m service to 98,850 persons and an area of 15,975 square kilometers, whereas its proposal would potentially provide such service to 317,970 persons and 26,517 square kilometers, representing an increase of 221.6% in population and a 63.7% increase in area served.

4. We believe that the petitioner's proposal warrants consideration as the reallocation request could provide Dolan Springs with its second local aural transmission service without depriving Kingman of local aural transmission service. As Station KRCY proposes to change its transmitter site to accommodate its proposal, it will create gain and loss areas. Our engineering study has determined that the loss area of Channel 224C1 at Kingman contains 27,874 people and covers 5,533 square kilometers. The gain area of Channel 224C at Dolan Springs contains 100,564 people and covers 15,661 square kilometers. Therefore, petitioner's proposal would produce a net service gain of 72,690 people and 10,128 square kilometers. Further, our engineering analysis has determined that the entire loss area of Channel 224C1 at Kingman would be served by at least five existing full-time reception services, and thus is considered a well served area. Moreover, our analysis of the gain area reveals that, based upon the petitioner's specified site at Dolan Springs, there are a few sections that are presently underserved. Specifically, we find that 448 people in an area of 775 square kilometers currently receive four full-time services; 235 people in an area of 1,486 square kilometers receive three full-time services; 825 people in an area of 3,598 square kilometers receive two full-time services; an area receiving only one full-time service (gray area) contains 230 square kilometers, but is devoid of any population; and an area receiving no full-time services (white area) covering 242 square kilometers, is likewise uninhabited. As petitioner's modification request is consistent with the provisions of Section 1.420(i) of the Commission's Rules, we will not accept competing expressions of interest in the use of Channel 224C at Dolan Springs, Arizona.

5. Channel 224C can be allotted to Dolan Springs, Arizona, consistent with the minimum distance separation requirements of Section 73.207(b) of the Commission's Rules, utilizing the Dolan Springs city reference, as specified by the petitioner, at coordinates 35-35-31 NL and 114-16-21 WL.<sup>4</sup>

<sup>3</sup> Channel 289C was substituted for Channel 274C at Bullhead City, Arizona, and reallocated to Dolan Springs, in the context of MM Docket No. 99-271, supra, as requested by Mag Mile Media, L.L.C. licensee of Station KBYE(FM). An authorization has been issued to Mag Mile Media, L.L.C. at Dolan Springs (see File No. BPH-20000918AGF).

<sup>4</sup> Channel 224C at Dolan Springs conflicts with Channel 224C2, Lake Havasu City, Arizona, licensed to Station KJJJ at coordinates 34-33-06 NL and 114-11-37 WL. However, Channel 272C2 was substituted for Channel
