FOURTH QUARTER 2001 INFLATION ADJUSTMENT FIGURE FOR CABLE OPERATORS USING FCC FORM 1240 NOW AVAILABLE

As described in the instructions for FCC Form 1240, cable operators may adjust the non-external cost portion of their rates for inflation based on quarterly figures released by the Commission. The Fourth Quarter 2001 Inflation Factor for operators using FCC Form 1240 is -0.11%.

The negative inflation adjustment factor of -0.11% is a measure of the annualized change in prices occurring over the period from October 1, 2001 to December 31, 2001. The factor is based on the changes in the quarterly Gross National Product Price Index (GNP-PI) published by the Bureau of Economic Analysis (BEA) of the United States Department of Commerce. The indexes used were the Gross National Product: Chain-type price indexes for the third quarter of 2001 and the fourth quarter of 2001. These indexes were obtained from Table 5 of the BEA news release dated March 28, 2002 (BEA 02-08).

The inflation adjustment factor is calculated by taking the GNP-PI from the fourth quarter of 2001 (109.74) and dividing by the GNP-PI for the third quarter of 2001 (109.77). The result of this calculation is converted from a quarterly change measurement factor to an annual change measurement factor by raising it to the fourth power.

Operators calculating the Inflation Factor for a True-Up Period which includes some portion of the fourth quarter of 2001 should enter the negative inflation factor on the appropriate lines of Worksheet 1 of FCC Form 1240 as "-0.0011." Operators using this factor for calculating the Projected Period Inflation Segment of FCC Form 1240 should enter this number on Line C3 (January, 1996 version) or Line C5 (July, 1996 version) as "0.9989" (1 plus -0.0011 = 0.9989).

To date, the Commission has released twenty-six quarterly inflation factors for use with FCC Form 1240. The following table lists these factors:

The Commission releases a new quarterly inflation factor for operators using FCC Form 1240 four times each year. The inflation factor for a given quarter is usually released between three and four months after the end of the quarter, depending on the schedule of the Department of Commerce. The release of a new factor is posted on the Commission's Internet site at: <http://www.fcc.gov/mb/csinflat.html>.
