REPORT AND ORDER
(Proceeding Terminated)

Adopted: April 28, 2003

Released: May 8, 2003

By the Chief, Video Division:

1. At the request of C-22 FCC Licensee Subsidiary, LLC (“C-22”), licensee of station WVNY-TV, NTSC channel 22, Burlington, Vermont, the Commission has before it the Notice of Proposed Rule Making, 17 FCC Rcd 7259 (2002), proposing the substitution of DTV channel 13 for station WVNY-TV’s assigned DTV channel 16. Comments were filed by C-22 and Mt. Mansfield Television, Inc. (“Mt. Mansfield”), licensee of WCAX-TV, Burlington, Vermont. Reply comments were filed by C-22 and Vermont ETV, Inc. (“VETV”), licensee of four noncommercial education television stations (WETK, WVER, WVTB, and WVTA) in Vermont.¹

2. In its comments, C-22 asserts that it is severely constrained in its ability to increase WVNY-DT’s service due to the presence of Canadian television allotments and assignments. C-22 states that adoption of its proposed channel change would allow WVNY-DT to increase its audience by 29,000 persons over its present DTV allotment on channel 16. C-22 maintains that the allotment of DTV channel 13 meets all technical requirements with respect to pertinent domestic and Canadian television stations.

3. We believe the public interest would be served by substituting DTV channel 13 for DTV channel 16 since it will enable station WVNY-DT to increase the population its serves. DTV channel 13 can be allotted to Burlington, Vermont, as proposed, in compliance with the principle community coverage requirement of Section 73.625(a) at coordinates 44-31-40 N. and 72-48-58 W. Since the community of Burlington is located within 400 kilometers of the U.S.-Canadian border, concurrence from the Canadian government was obtained for this allotment. In addition, we find that this channel is acceptable under the 2 percent criterion for *de minimis* impact that is applied in evaluating requests for modification of initial DTV allotments under Section 73.623(c)(2) for Station

¹ Mt. Mansfield and VETV filed comments dealing with Canadian coordination issues. Both parties assert that the Commission should take steps to expedite the Canadian coordination process, noting that delays in receiving Canadian concurrences presents a major obstacle to the deployment of DTV throughout the United States.

We need not discuss Mt. Mansfield or VETV’s comments since such issues are more appropriately addressed in established processes existing between the United States and Canada and are beyond the scope of this proceeding. *See, Letter of Understanding (“LOU”) between the Commission and Industry Canada*, released September 29, 2000.
