In the Matter of
Satellite Cable Services, Inc.
Operator of Cable Systems in:
Delmont, South Dakota
Geddes, South Dakota
Pickstown, South Dakota
Request for Waiver of Section 11.11(a) of the
Commission's Rules
File No. EB-03-SE-188

ORDER

Adopted: August 15, 2003

Released: August 19, 2003

By the Chief, Spectrum Enforcement Division, Enforcement Bureau:

1. In this Order, we grant Satellite Cable Services, Inc. ("Satellite Cable") temporary, 36-month waivers of Section 11.11(a) of the Commission's Rules ("Rules") for the three above-captioned cable television systems. Section 11.11(a) requires cable systems serving fewer than 5,000 subscribers from a headend to either provide national level Emergency Alert System ("EAS") messages on all programmed channels or install EAS equipment and provide a video interrupt and audio alert on all programmed channels and EAS audio and video messages on at least one programmed channel by October 1, 2002.

2. The Cable Act of 1992 added new Section 624(g) to the Communications, Inc. Act of 1934 ("Act"), which requires that cable systems be capable of providing EAS alerts to their subscribers. In 1994, the Commission adopted rules requiring cable systems to participate in EAS. In 1997, the Commission amended the EAS rules to provide financial relief for small cable systems. The

2 Cable Television Consumer Protection and Competition Act of 1992, Pub. L. No. 102-385, § 16(b), 106 Stat. 1460, 1490 (1992). Section 624(g) provides that "each cable operator shall comply with such standards as the Commission shall prescribe to ensure that viewers of video programming on cable systems are afforded the same emergency information as is afforded by the emergency broadcasting system pursuant to Commission regulations" 47 U.S.C. § 544(g).

3 Amendment of Part 73, Subpart G, of the Commission's Rules Regarding the Emergency Broadcast System, Report and Order and Further Notice of Proposed Rule Making, FO Docket Nos. 91-171/91-301, 10 FCC Rcd 1786 (1994) ("First Report and Order"), reconsideration granted in part, denied in part, 10 FCC Rcd 11494 (1995).

4 Amendment of Part 73, Subpart G, of the Commission's Rules Regarding the Emergency Broadcast System, Second Report and Order, FO Docket Nos. 91-171/91-301, 12 FCC Rcd 15503 (1997) ("Second Report and

Commission declined to exempt small cable systems from the EAS requirements, concluding that such an exemption would be inconsistent with the statutory mandate of Section 624(g).⁵ However, the Commission extended the deadline for cable systems serving fewer than 10,000 subscribers to begin complying with the EAS rules to October 1, 2002, and provided cable systems serving fewer than 5,000 subscribers the option of either providing national level EAS messages on all programmed channels or installing EAS equipment and providing a video interrupt and audio alert on all programmed channels and EAS audio and video messages on at least one programmed channel.⁶ In addition, the Commission stated that it would grant waivers of the EAS rules to small cable systems on a case-by-case basis upon a showing of financial hardship.⁷ The Commission indicated that waiver requests must contain at least the following information: (1) justification for the waiver, with reference to the particular rule sections for which a waiver is sought; (2) information about the financial status of the requesting entity, such as a balance sheet and income statement for the two previous years (audited, if possible); (3) the number of other entities that serve the requesting entity's coverage area and that have or are expected to install EAS equipment; and (4) the likelihood (such as proximity or frequency) of hazardous risks to the requesting entity's audience.⁸

3. On September 25, 2002, Satellite Cable filed a request for permanent waivers of Section 11.11(a) for the three-captioned cable systems. In support of this request, Satellite Cable states the three cable television systems were recently acquired. Moreover, Satellite Cable states that the three small, rural cable systems serve together approximately 165 subscribers. Based on price quotes provided by EAS equipment manufacturers, Satellite Cable estimates that it would cost between \$7,500 and \$10,000 per headend to install EAS equipment at these systems. Satellite Cable asserts that this cost will impose a substantial financial hardship on it and provides its financial statement for the four-month period ending December 2001 in support of this assertion. In addition, Satellite Cable submits that its subscribers will continue to have ready access to national EAS information from other sources, including its cable systems. Satellite Cable also asserts that its subscribers will have access to EAS information through over-the-air reception of broadcast television and radio stations.

4. Based upon our review of the financial data and other information submitted by Satellite Cable, we find that permanent waivers of Section 11.11(a) for the three captioned cable systems are not warranted. However, we conclude that temporary waivers of Section 11.11(a) for these systems from October 1, 2002 until October 1, 2005 are warranted.⁹ In particular, we find that the estimated \$7,500 to \$10,000 per headend cost of EAS equipment for these small cable systems could impose a financial hardship on Satellite Cable.

5. We note that the Commission recently amended the EAS rules to permit cable systems serving fewer than 5,000 subscribers to install FCC-certified decoder-only units, rather than both
