NOTICE OF PROPOSED RULE MAKING

Adopted: November 9, 2005

Released: November 10, 2005

Comment Date: January 3, 2006

Reply Comment Date: January 17, 2006

By the Assistant Chief, Audio Division, Media Bureau:

1. The Audio Division has before it a petition for rulemaking filed by Charles Crawford (“Petitioner”), seeking to amend the FM Table of Allotments by allotting Channel 253A Lometa, Texas, as that community’s second local FM transmission service. In order for Channel 253A to be allotted to Lometa, Petitioner proposes the substitution of Channel 235 for vacant Channel 252A at Richland Springs, Texas. Additionally, to accommodate this allotment, Petitioner also requests the reclassification of Station KELI(FM), Channel 254C, San Angelo, Texas, to specify operation on Channel 254C0,¹ and the reclassification of Station KAMX(FM), Channel 234C, Luling, Texas, to specify operation on Channel 234C0² because each station is operating at below minimum Class C facilities. Petitioner has also certified, as required, that no other Class A channel(s) are available for allotment at Lometa.³ Petitioner filed comments in support of its proposal, pledging to file the necessary applications. No other comments or counterproposals were filed.

¹ Station KELI(FM), San Angelo, Texas, currently operates on Channel 254C with an effective radiated power (“ERP”) of 100 kilowatts (“kW”) at 393 meters height above average terrain (HAAT), which is below the minimum Class C antenna height 451 meters HAAT. The staff has concluded that if Station KELI(FM) operates as a Class C0 facility, any short-spacing between Station KELI(FM) and the proposed use of Channel 253A at Lometa at the proposed site would be eliminated. We issued an *Order to Show Cause* directed to Encore Broadcasting of San Angelo, LLC (“Encore”), licensee of Station KELI(FM) to show cause why its facilities should not be reclassified. Encore did not respond, and therefore, Station KELI(FM)’s license is reclassified to Channel 254C0. See *Various Locations*, DA 05-2940 (released November 10, 2005).

² Station KAMX(FM), Luling, Texas, currently operates on Channel 234C with an effective radiated power (“ERP”) of 100 kilowatts (“kW”) at 398 meters height above average terrain (HAAT), which is below the minimum Class C antenna height 451 meters HAAT. The staff has concluded that if Station KAMX(FM) operates as a Class C0 facility, any short-spacing between Station KAMX(FM) and the proposed use of Channel 235A at Richland Springs to accommodate the use of Channel 253A at Lometa at the proposed site would be eliminated. We issued an *Order to Show Cause* directed to Texas Infinity Radio, L.P. (“Texas Infinity”), licensee of Station KAMX(FM), to show cause why its facilities should not be reclassified. Texas Infinity did not respond, and therefore, Station KAMX(FM)’s license is reclassified to Channel 234C0. See *Various Locations*, DA 05-2940 (released November 10, 2005).

³ See 47 C.F.R. §§ 73.3573, n. 4 and 1.420(g), n.2. See also *Second Report and Order*, 15 FCC Rcd at 21,662, ¶ 26.

2. Petitioner’s proposal warrants consideration because the allotment could provide Lometa with its second local aural transmission service. A staff engineering analysis of the proposal confirms the unavailability of any alternate Class A channel or antenna site to accommodate Petitioner’s proposal at Lometa. The staff analysis also shows that the reclassification of Station KELI(FM), Channel 254C, San Angelo, Texas, to specify operation on Channel 254C0, will eliminate any short spacing to requested Channel 253A at Lometa and the reclassification of Station KAMX(FM), Channel 234C, Luling, Texas, to specify operation on Channel 234C0 will eliminate any short spacing to requested Channel 235A at Richland Springs, Texas. Operation on Channel 253A at Lometa from the restricted site specified also will comply with the requirements of Section 73.315 of the Commission’s Rules to provide 70 dBu coverage over the entire community. Since Richland Springs is located within 320 kilometers of the U.S.-Mexican border, concurrence of the Mexican Government has been requested for the allotment of Channel 235A at Richland Springs.

3. Channel 253A at Lometa can be allotted consistent with the minimum distance separation requirements of the Commission’s Rules at Petitioner’s requested site 11.7 kilometers (7.3 miles) northwest of the community.^{4,5} Channel 235A can be substituted for vacant Channel 252A at Richland Springs consistent with the minimum distance separation requirements of the Commission’s Rules at Petitioner’s requested site 9.4 kilometers (5.8 miles) southwest of the community.^{6,7}

4. Accordingly, we seek comment on the proposed amendment to the FM Table of Allotments, Section 73.202(b) of the Commission’s Rules, with respect to the communities listed below, as follows:

<u>City</u>	<u>Present</u>	<u>Channel No.</u>	<u>Proposed</u>
Lometa, Texas	270A		253A, 270A
Richland Springs	252A		235A

5. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached *Appendix* and are incorporated by reference herein. In particular, we note that a showing of continuing interest is required by paragraph 2 of the *Appendix* before a channel will be allotted.

6. Pursuant to 47 C.F.R. Sections 1.415 and 1.419, interested parties may file comments or counterproposals on or before December 27, 2005, and reply comments on or before January 10, 2006, and are advised to read the *Appendix* for the proper procedures. Comments must be filed with the Federal Communications Commission, Office of the Secretary, 445 Twelfth Street, SW, TW-A325, Washington, D.C. 20554. Any counterproposal filed in this proceeding need only protect Stations KELI(FM), San Angelo, Texas, and KAMX(FM), Luling, Texas, as Class C0 allotments. Additionally, a copy of such comments should be served on Petitioner, as follows:
