WIRELESS TELECOMMUNICATIONS BUREAU RECOMMENDS FILERS IN UNIVERSAL LICENSING SYSTEM UPGRADE BROWSER PLUG-IN TECHNOLOGY BEGINNING MARCH 18, 2005

The Wireless Telecommunications Bureau (WTB) of the FCC is recommending that filers in the Universal Licensing System (ULS) use version 1.4.2_05 or higher of the Java Plug-In, beginning March 18, 2005. This recommendation is issued to ULS filers who file the following forms and applications:

- Form 601 that is filed as a New, Modification, or Renewal/Modification application, and is also in one of the following services: Cellular, Microwave, Paging, Land Mobile, or Coast and Ground.
- Form 603.
- Form 854 for Antenna Structure Registration (ASR).

The FCC strongly recommends that ULS filers who will file these forms and applications change the Java Plug-In utilized by their Internet browsers to version 1.4.2_05 or above.

Instructions for Installing the Upgrade on Windows XP and 2000 Operating Systems¹

1. Remove all versions of Java Plug-In currently installed on your computer.
 - a. From the Settings on your Start menu, select Control Panel.
 - b. Open Add or Remove Programs on the Control Panel.
 - c. An Add or Remove Programs dialog box appears with Change or Remove Programs selected by default in the left-hand menu. Verify that Change or Remove Programs is the selection.
 - d. Select your Java Plug-In under Currently installed programs.
 - e. Select the Remove button.
 - f. Select Yes when a message appears asking you to verify that you want to remove the program.
 - g. Wait while the program is removed. A progress indicator will appear.
 - h. If a dialog box appears asking whether you want to restart your computer now or later, select the option to restart your computer later.
 - i. Repeat steps d-h as needed to remove all versions of Java Plug-In currently installed on your computer.
2. Install the updated version of Java Plug-In.
 - a. Go to the download page for Java Plug-In 1.4.2_05 at:
http://java.sun.com/products/archive/j2se/1.4.2_05/index.html. A link to this

¹ Information on installing Java Plug-In for other operating systems may be found on the ULS Getting Connected page (<http://esupport.fcc.gov/gettingconnected.htm>), along with information on operating system and browser compatibility with ULS.

page appears in License Manager, at the top of the My Licenses and My Applications pages.

- b. Select the Download link in the JRE column.
- c. On the License Agreement page that appears, select Accept, and click the Continue button.
- d. Select Windows Installation, Multi Language, under Windows Platform.
- e. You will be given the option of opening the file or saving it to your computer to open at a later time. Select Open.
- f. Once opened, a license agreement will appear. Select to accept the terms in the agreement and click the Next button.
- g. A Setup Type dialog box appears with Typical setup selected by default. Verify that Typical is the selection and click the Next button.
- h. Wait while the program is installed. A progress indicator will appear.
- i. Click the Finish button when prompted that the InstallShield Wizard is completed.
- j. Close all open applications.
- k. Restart your computer to enable the installation.

Additional Information

For additional information or assistance, you may visit the Web at <http://esupport.fcc.gov>. You may also call FCC Support Center at (877) 480-3201 (TTY 202-414-1255) and select Option #9) for someone to direct your call. Hours are from 8 a.m. to 7:00 p.m. Eastern Time, Monday through Friday (except Federal holidays). To provide quality service and ensure security, all telephone calls are recorded.
