ELECTRONIC FILING OF FCC FORM 603 IN UNIVERSAL LICENSING SYSTEM FOR BROADBAND RADIO SERVICE AND EDUCATIONAL BROADBAND SERVICE IS NOW AVAILABLE

As part of a continuing effort to improve the license application process, the Wireless Telecommunications Bureau (WTB) announces that electronic filing in the Universal Licensing System (ULS) is now available for FCC Form 603 (Wireless Telecommunications Bureau Application for Assignments of Authorization and Transfers of Control), in the Broadband Radio Service (BRS) (formerly known as the Multipoint Distribution Service/Multichannel Multipoint Distribution Service) and in the Educational Broadband Service (EBS) (formerly known as the Instructional Television Fixed Service).

Note: Assignment of Authorization applications involving partition and/or disaggregation must continue to be filed manually. A separate public notice will be released when these types of applications can be filed electronically via ULS.

Applicants can expedite processing of the application by providing the following information in an attachment to the Assignment of Authorization or Transfer of Control application:

- Information concerning the use of facilities to provide multichannel video programming and applicants' interest in an overlapping cable television system (see Section 27.1202)
- A certification that the applicant will comply with the programming requirements contained in Section 27.1203 of the Commission's Rules
- A certification that the applicant will comply with Sections 27.50, 27.55, and 27.1221 of the Commission's Rules

Most Assignment of Authorization and Transfer of Control filings that are currently pending are now available via ULS. The remainder of these filings are in the process of being entered into ULS. As of January 10, 2005, hard copy Assignment of Authorization and Transfer of Control filings in these radio services stopped being forwarded to the Commission's Reference Information Center.
