Dear Mr. Becci:

On March 31, 2006, NTELOS Media, Inc. (NTELOS) filed the above-captioned application to register a Receive-Only Fixed-Satellite Service (FSS) earth station proposing to communicate with ALSAT-designated satellites in the C-band.¹ Pursuant to Section 25.112(a)(1) of the Commission's rules, 47 C.F.R. §25.112(a)(1), we dismiss the application as defective, without prejudice to refileing.

A review of the application reveals that the Frequency Coordination and Interference Analysis Report, as submitted, does not fulfill the requirement(s) of Section 25.203(c) of the Commission's rules, 47 C.F.R. §25.203(c), because the report does not demonstrate that the earth station was coordinated with existing terrestrial users and with previously-filed applications for terrestrial stations. Therefore, the application is incomplete.

While we dismiss the application on the above basis, we take the opportunity to apprise you of other concerns we have should NTELOS choose to re-file the application. In Schedule B of FCC Form 312, we calculate that the Earth Station Azimuth Angle Eastern Limit (Question E56) should be 141.9° rather than 162°, the Antenna Elevation Angle Eastern Limit (Question E57) should be 51.1° rather than 15.69°, the Earth Station Azimuth Angle Western Limit (Question E58) should be 256.9° rather than 250°, and the Antenna Elevation Angle Western Limit (Question E59) should be 15.3° rather than 45.15°.

¹ 3700-4200 MHz band.

Accordingly, pursuant to Section 25.112(a)(1) of the Commission's rules, 47 C.F.R. §25.112(a)(1), and Section 0.261 of the Commission's rules on delegations of authority, 47 C.F.R. §0.261, we dismiss your application without prejudice to refiling.²

Sincerely,

Scott A. Kotler
Chief, Systems Analysis Branch

² If NTELOS Media, Inc. refiles an application identical to the one dismissed, with the exception of supplying the missing information, it need not pay an application fee. *See* 47 C.F.R. §1.1109(d).
