Re: Call Sign E030341  
File No. SES-MOD-20060127-00331

Dear Mr. Monahan:

On January 27, 2006, Signal Hill Trading Company, Inc., filed a Fixed Ku-Band<sup>1</sup> Transmit/Receive earth station modification application seeking to relocate its earth station from White Springs, Florida to Titusville, Florida. For the reasons stated below, we dismiss the application as defective, without prejudice to re-filing.<sup>2</sup>

A review of the application reveals that the application does not include the required radiation hazard analysis in response to question 28 of the 312 Main Form. This is required since the Ku-Band application proposes a change in coordinates of greater than 10 seconds. For additional information, also see *International Bureau Eliminates Redundant Filing of Radiation Hazard Studies*, Public Notice, Report No. DS-1492, DA 95-96, 10 FCC Rcd 2256 (rel. February 6, 1995).

---

<sup>1</sup> 11.7-12.2 and 14.0-14.5 GHz bands.

<sup>2</sup> If Signal Hill Trading Company re-files an application identical to the one dismissed, with the exception of supplying the missing information, it need not pay an application fee. *See* 47 C.F.R. § 1.1109(d).

Accordingly, pursuant to Section 25.112(a)(1) of the Commission's Rules, 47 C.F.R. Section 25.112(a)(1), and Section 0.261 of the Commission's rules on delegations of authority, 47 C.F.R. Section 0.261, we dismiss this application as defective without prejudice to refile.

Sincerely,

Scott A. Kotler  
Chief, Systems Analysis Branch
