Re: ViaSat, Inc.
File No. SAT-LOA-20070302-00042

Dear Mr. Janka:

This letter refers to the above referenced application filed on March 2, 2007, for authority to launch and operate a satellite using portions of the Ka-band at the 77° W.L. orbital location. At the time this application was filed, the Commission had not announced that the 77° W.L. orbital location was available for assignment.¹ Consequently, the application is premature and is dismissed without prejudice to refiling.

Sincerely,

Robert G. Nelson
Chief, Satellite Division
International Bureau
