PARTIES ASKED TO REFRESH RECORD REGARDING PROMOTION OF COMPETITIVE NETWORKS IN LOCAL TELECOMMUNICATIONS MARKETS

WT Docket No. 99-217
CC Docket No. 96-98

Comment Date: [60 days after publication in the Federal Register]

The Commission invites interested parties to update the record pertaining to issues raised in the Commission's *Competitive Networks* proceeding in light of marketplace and industry developments. In October 2000, the Commission issued a Further Notice of Proposed Rulemaking as part of its efforts under the Telecommunications Act of 1996 to foster competition in local communications markets and to promote the continued deployment of competitive and advanced telecommunications services by implementing measures and requesting comment on potential additional actions to ensure that competing telecommunications providers are able to provide services to customers in multiple tenant environments (MTEs).¹ Among other issues, the Commission sought comment on the status of the market for the provision of telecommunications services in MTEs, and on whether the prohibition on exclusive access contracts in commercial MTEs should be extended to residential MTEs.²

When the Commission released the *Competitive Networks FNPRM* in 2000, the real estate industry had just begun to undertake a number of voluntary commitments aimed at improving MTE owners' processing of tenant requests for service from alternative telecommunications carriers and carrier requests for access to MTEs to serve tenants. An update on the progress of those efforts is appropriate at this time. In addition, since the release of the *FNPRM*, intervening industry developments may have rendered the record developed in this proceeding stale. In particular, the market appears to be shifting

The Commission is currently reviewing a related issue concerning the use of exclusive contracts for the provision of video services to multiple dwelling units or other real estate developments. from competition between stand-alone services to competition between service bundles including broadband, local exchange, and long distance services. The industry structure has also changed with the mergers of service providers.³ For these reasons, the Wireline Competition Bureau requests that parties update the record with any new information or arguments they believe to be relevant to issues raised in the *Competitive Networks FNPRM*. This will enable the Commission to undertake appropriate review of the status of the deployment of competitive and advanced telecommunications services in MTEs and to determine whether additional action is necessary to address the ability of premises owners to discriminate unreasonably among competing telecommunications service providers.

Interested parties may file comments on or before **[60 days after publication in the Federal Register]**, and reply comments on or before **[90 days after publication in the Federal Register]**.
