THE FCC'S OFFICE OF ENGINEERING AND TECHNOLOGY RELEASES REPORT ON TESTS OF PROTOTYPE TV WHITE SPACE DEVICES

ET Docket No. 04-186

The Federal Communication Commission's Office of Engineering and Technology (OET) today released a report entitled *Evaluation of the Performance of Prototype TV-Band White Space Devices*. The report includes detailed results of laboratory and field interference tests of several prototype TV band white space devices. The report also makes a number of general observations about the overall results.

The Commission conducted laboratory and field tests of prototype white spaces devices as part of the above captioned rule making to consider authorizing the operation of new low power devices in the TV broadcast spectrum at locations where individual channels/frequencies are not being used for authorized services (TV white spaces) (ET Docket Nos. 04-186 and 02-380). The testing was open to the public. The test plan was initially released on January 17, 2008. See http://hraunfoss.fcc.gov/edocs/public/attachmatch/DA-08-118A1.doc

The report has been inserted into the record for the above-captioned proceeding. Parties may submit ex parte comments if they choose to do so. For questions concerning OET's test report, please contact Alan Stillwell, (202) 418-2925, e-mail Alan.Stillwell@fcc.gov.
