PUBLIC SAFETY AND HOMELAND SECURITY BUREAU SEEKS COMMENT ON REGION 6 (NORTHERN CALIFORNIA) 700 MHZ REGIONAL PLAN

PS Docket No. 06-229; WT Docket No. 02-378

Comments Due: September 14, 2009

Reply Comments Due: September 24, 2009

Introduction. On January 5, 2009, the Region 6 (Northern California)¹ 700 MHz Regional Planning Committee (RPC) (Region 6) submitted a proposed 700 MHz Public Safety Plan (Plan) for General Use² spectrum in the 769-775/799-805 MHz band for review and approval.³ On March 16, 2009, Region 6 submitted a certification, pursuant to Section 90.527(a)(8) which requires that all planning meetings held were open to the public.⁴ On May 12, 2009, Region 6 notified the Commission that it was rescinding its plan in order to review and revise, as needed, its channel loading criteria and channel allotments.⁵ Lastly, on June 29, 2009, Region 6 resubmitted a new updated regional plan.⁶

Background. In 1998, the Commission established a structure to allow RPCs optimal flexibility to meet state and local needs, encourage innovative use of the spectrum, and accommodate new and as yet unanticipated developments in technology and equipment.⁷ Each of the fifty-five (55) RPCs is required to

¹ The Region 6 (Northern California) 700 MHz regional planning area includes forty-eight (48) counties in the state of California situated north of the northernmost borders of San Luis Obispo, Kern, and San Bernardino counties.

² The General Use spectrum is administered by RPCs and is licensed for public safety services on a site-by-site basis in accordance with the relevant Commission-approved regional plan and frequency coordination.

submit its plan for the General Use spectrum.⁸ The Commission's role in relation to the RPCs is limited to (1) defining the regional boundaries; (2) requiring fair and open procedures, *i.e.*, requiring notice, opportunity for comment, and reasonable consideration; (3) specifying the elements that all regional plans must include; and (4) reviewing and accepting proposed plans (or amendments to approved plans) or rejecting them with an explanation.⁹

The Commission expects RPCs to ensure that their committees are representative of all public safety entities in their regions by providing reasonable notice of all meetings and deliberations. Further, regional plans must include an explanation of how all eligible entities within the region were given such notice.¹⁰ For the initial meeting, called by the convenor to form the RPC and hold elections, the Commission requires at least sixty days notice.¹¹ In developing their regional plans, RPCs must ensure that their proposed plans comply with the rules and policies governing the 700 MHz public safety regional planning process.¹² We also encourage the RPCs to consider utilizing the guidelines developed by the Public Safety National Coordination Committee (NCC).¹³ RPCs may approach the assignment of the spectrum differently, *e.g.*, by making specific assignments to eligible public safety entities, or by establishing an allotment pool approach based on political boundaries such as counties.

On July 31, 2007, the Commission adopted a *Second Report and Order* revising the rules governing wireless licenses in the 700 MHz band.¹⁴ The Commission adopted a plan for the 700 MHz band to establish a nationwide, interoperable public safety broadband communications network for the benefit of state and local public safety users. The Commission designated the lower half of the 700 MHz public safety band for broadband communications (763-768/793-798 MHz) and consolidated existing narrowband allocations in the upper half of the public safety 700 MHz band (769-775/799-805 MHz).

The Region 6 700 MHz Plan. The Region 6 Plan pre-allocates the consolidated narrowband General Use spectrum by county.¹⁵ The Plan was coordinated with all three adjacent regions to Region 6,

⁸ See 47 C.F.R. § 90.527. Each RPC must incorporate certain common elements into its 700 MHz plan. A list of 700 MHz RPCs and region activities is available at <http://www.fcc.gov/pshs/public-safety-spectrum/700-MHz/>.

¹³ The NCC was a federal advisory committee established by the Commission in 1999 to address and advise the Commission on operational and technical parameters for use of the 700 MHz public safety band. In addition, the NCC was tasked with providing voluntary assistance in the development of coordinated regional plans, and developed a *Regional Planning Guidebook*. Following the sunset of the NCC's charter on July 25, 2003, the National Public Safety Telecommunications Council (NPSTC) agreed to continue to provide assistance to regional planners. A copy of the 700 MHz Regional Planning Guidebook is available at <http://www.npstc.org/nccsubcom.jsp>.
