FCC ANNOUNCES TECHNOLOGICAL ADVISORY COUNCIL MEETING

The FCC today announced the next meeting of the Technological Advisory Council (TAC). The Council, comprised of a diverse array of leading technical experts, helps to provide the technical expertise the Commission needs to identify important areas of innovation and develop informed technology policies supporting America's competitiveness in the global economy. The TAC is helping the Commission to continue the momentum of ideas and recommendations in the National Broadband Plan, such as how broadband communications can be part of the solution for the delivery and cost containment of health care, for energy and environmental conservation, for education innovation and in the creation of jobs.

At its initial meeting held on November 4th, 2010, TAC members had identified a number of technology areas that could influence the creation of jobs or were issues affecting the nation's economic competitiveness. Since that initial meeting of the TAC, members have helped to further prioritize and develop some of these ideas. The Technical Advisory Council members will discuss this work, outline progress to date and discuss possible further work.

The next meeting of the TAC will be held on Tuesday, September 27th 2011, from 1:00 pm to 4:00 pm in the Commission Meeting Room, 445 12th Street, S.W., Washington, D.C. The public is invited to attend.

Tom Wheeler, Managing Director, Core Capital Partners, serves as Chairman of the Council. Walter Johnston, Chief of the Electromagnetic Compatibility Division, serves as the Designated Federal Officer. Julius Knapp, Chief of the Office of Engineering and Technology is the Alternate Designated Federal Officer.

For further information, contact Walter Johnston at 202-418-0807 voice, walter.johnston@fcc.gov. Email or visit the FCC website at <http://www.fcc.gov/oet/tac/>.
