**ORDER**

**Adopted: May 2, 2011****Released: May 2, 2011**

By the Chief, Pricing Policy Division, Wireline Competition Bureau:

1. On December 23, 2010, the National Exchange Carrier Association, Inc. (NECA) filed proposed modifications to the current average schedule formulas to be effective from July 1, 2011, to June 30, 2012.<sup>1</sup> NECA's filing was submitted in accordance with Commission rules that require NECA to submit proposed modifications to the average schedule formulas annually or to certify that no modifications are warranted.<sup>2</sup> For the reasons set forth below, we approve the average schedule formulas as requested by NECA.

2. NECA explains that the major factors driving this proposed modification include increasing account growth and significant reductions in some access demand elements.<sup>3</sup> NECA proposes to continue to limit access minute volumes and line haul circuit counts eligible for average schedule settlements.<sup>4</sup> NECA estimates that, under the proposed formula changes, the majority of carriers would receive an increase in settlements, averaging 2.5 percent, given constant demand.<sup>5</sup>

3. By Public Notice issued January 25, 2011, we sought comment on NECA's filing.<sup>6</sup> No comments were filed.

4. We have reviewed the unopposed NECA filing and find that its proposed formulas are reasonable. NECA revised the average schedule formulas using procedures consistent with those used in previous filings.

5. Accordingly, IT IS ORDERED, pursuant to section 69.606(a) of the Commission's rules, 47 C.F.R. § 69.606(b), and pursuant to the authority delegated under sections 0.91 and 0.291 of the
