## **I. INTRODUCTION**

GCI Communication Corp. (“GCI”), its wholly-owned subsidiary Unicom, Inc. (“Unicom”), and ACS Wireless License Sub, Inc. and ACS of Anchorage License Sub, Inc. (together, “ACS License Subs,” and together with GCI and Unicom, the “Applicants”), have filed four separate applications (collectively, the “Applications”)<sup>1</sup> pursuant to Section 310(d) of the Communications Act of 1934, as amended (the “Act”),<sup>2</sup> seeking consent to assign spectrum licenses to a newly formed wholly-owned subsidiary of GCI Wireless Holdings, LLC,<sup>3</sup> The Alaska Wireless Network, LLC (“AWN”). As a result of the Applications, the Applicants would assign to AWN one Advanced Wireless Service license, 21 cellular licenses, eight Personal Communications Service licenses, and a number of microwave and industrial radio licenses, which together cover portions of Alaska’s four Cellular Market Areas (“CMAs”).<sup>4</sup> AWN also has filed an application pursuant to Section 214 for authority to provide global international resale services.<sup>5</sup> The Applicants also seek a declaratory ruling on their status post-transaction as eligible telecommunications carriers under section 214(e) of the Act.<sup>6</sup>

<sup>1</sup> Applications of GCI Communication Corp., ACS Wireless License Sub, Inc., ACS of Anchorage License Sub, Inc., and Unicom, Inc. for Consent to Assign Licenses to the Alaska Wireless Network, LLC, ULS File Nos. 0005257725, 0005257737, 0005259928, and 0005260034 (filed June 18, 2012) (“Applications”).

<sup>2</sup> 47 U.S.C. § 310(d).

<sup>3</sup> GCI Wireless Holdings, LLC is a wholly-owned subsidiary of GCI.

<sup>4</sup> See Applications, ACS-GCI Public Interest Statement (Revised)(“Public Interest Statement”), Appendix A, B and ACS-GCI Spectrum Analysis.

<sup>5</sup> 47 U.S.C. § 214(a).

<sup>6</sup> Applications, ACS-GCI Petition for Declaratory Ruling (Revised)(“Petition for Declaratory Ruling”).

GCI and ACS Wireless Inc. (“ACS Wireless”), a wholly-owned subsidiary of Alaska Communications Systems Holdings, Inc., would contribute substantially all of their respective wireless infrastructures and associated Title III authorizations to AWN. To accomplish this, at closing the ACS License Subs would assign wireless authorizations and associated network facilities to ACS Wireless. GCI then would purchase a portion of ACS Wireless’s assets, potentially including some wireless authorizations, for \$100 million and then contribute these assets to AWN, along with its own wireless assets.<sup>7</sup> ACS Wireless and GCI also would contribute to AWN, either directly or through a combination of service agreements and indefeasible rights of use, network assets, cell site and tower infrastructure, roaming agreements, certain backhaul and fiber facilities, and undersea capacity.<sup>8</sup> After closing, GCI would hold a 66 2/3 percent equity interest in AWN, and ACS Wireless would hold a 33 1/3 percent equity interest in AWN.<sup>9</sup>

Under this structure, AWN would develop and sell to ACS Wireless and GCI wholesale wireless services plans on a non-discriminatory basis using the contributed spectrum and infrastructure.<sup>10</sup> ACS Wireless and GCI propose that they would continue to market and sell standalone wireless retail services, separately branding and pricing their individual wireless offerings, and they say that no retail customers would be transferred to AWN.<sup>11</sup> Further, AWN would support both ACS Wireless’s and GCI’s current retail service plans to existing customers for at least two years. The Applicants contend this transaction would result in savings by minimizing duplicative infrastructure, investment, and operational costs, while providing both ACS Wireless and GCI with access to approximately twice as much spectrum as each holds individually.<sup>12</sup> According to the Applicants, these efficiencies would help sustain and promote the availability of wireless services throughout Alaska, including remote and sparsely populated areas that are costly to serve. Also, the Applicants state that the transaction would enhance their ability to provide advanced wireless broadband services, including Long Term Evolution (LTE) services in Alaska.<sup>13</sup>

Preliminary review of the Applications indicates that the proposed assignment of licenses would result in AWN holding up to 160 megahertz of mobile spectrum in two of the CMAs (CMA 315 Alaska 1 – Wade Hampton and CMA317 Alaska 3 – Haines) and up to 150 megahertz of mobile spectrum in CMA 316 Alaska 2 – Bethel.

Given the expectation that confidential information will be filed in this proceeding to develop a more complete record on which to base a decision, the Wireless Telecommunications Bureau has issued two protective orders.<sup>14</sup>
