REMINDER REGARDING VIDEO PROGRAMMING DISTRIBUTORS' OBLIGATION TO MAKE EMERGENCY INFORMATION ACCESSIBLE TO PERSONS WITH HEARING OR VISION DISABILITIES

As the hurricane season begins, the Federal Communications Commission (“Commission”) issues this Public Notice to remind video programming distributors – including broadcasters, cable operators, satellite television services, and “any other distributor of video programming [for example, over fiber] for residential reception that delivers such programming directly to the home”¹ – of their obligation to make emergency information accessible to persons with hearing and vision disabilities in accordance with section 79.2 of the Commission’s rules.² Under section 79.2, emergency information encompasses critical details regarding the emergency and how to respond to the emergency.³ It also provides information for consumers about how to contact their video programming distributor (VPD) or the Commission regarding compliance with the rule.

We stress that the need to comply with section 79.2 and make the critical details of emergency information accessible is not always limited to the immediate geographic areas affected by the emergency because information about the relocation of individuals outside that immediate geographic area also falls within the rule’s mandate.⁴ Accordingly, compliance with section 79.2 could include providing information to non-impacted areas that shelter individuals displaced by a large-scale disaster, such as that which occurred last year with the tornado devastation of Joplin, Missouri or in 2005, when Hurricane Katrina struck the south. In these cases, the need to comply with section 79.2 has extended to areas throughout the country where evacuees were temporarily re-located.⁵ In addition, we note that there are

¹ 47 C.F.R. § 79.1(a)(2) (defining “video programming distributor”).

² See 47 C.F.R. § 79.2. Because of the importance of this issue, we have issued several similar Public Notices in the past. See e.g., Public Notice, 16 FCC Rcd 15348 (2001); Public Notice, 17 FCC Rcd 14614 (2002); Public Notice, 18 FCC Rcd 14670 (2003); Public Notice, 19 FCC Rcd 9882 (2004); Public Notice, 20 FCC Rcd 5918 (2005); Public Notice, 20 FCC Rcd 14619 (2005) (*Hurricane Katrina PN*); Public Notice, 21 FCC Rcd 7994 (2006); Public Notice, 21 FCC Rcd 9066 (2006); Public Notice, 21 FCC Rcd 15084 (2006) (*December 2006 PN*); Public Notice, 24 FCC Rcd 11738 (2009); Public Notice, 25 FCC Rcd 7982 (2011); Public Notice, 26 FCC Rcd. 8550 (2011).

³ See 47 C.F.R. § 79.2(a)(2).

⁴ See 47 C.F.R. § 79.2 Note to paragraph (a)(2): “Critical details include, but are not limited to, specific details regarding the areas that will be affected by the emergency, evacuation orders, detailed descriptions of areas to be evacuated, specific evacuation routes, approved shelters or the way to take shelter in one’s home, instructions on how to secure personal property, road closures, and how to obtain relief assistance.”

⁵ See *Hurricane Katrina PN*.

times when the airing of emergency information pertaining to a matter of national importance will also be of local concern, and therefore should be made accessible.

All VPDs that air emergency information are required to make this information accessible. There are no exemptions to section 79.2. In addition, each local broadcast licensee is responsible for complying with section 79.2 regardless of the technology used to deliver its signal to consumers.

In the case of persons who are blind or visually impaired, emergency information that is provided in the video portion of a regularly scheduled newscast or a newscast that interrupts regular programming must be made accessible.⁶ The Commission expects that, in accordance with existing regulations, VPDs will aurally describe the emergency information in the main audio as part of their ordinary operations; this is similar to providing “open” video description.⁷ In addition, if the emergency information is being provided in the video portion of programming that is *not* a regularly scheduled newscast (*e.g.*, the programmer provides the emergency information through “crawling” or “scrolling” during regular programming) or a newscast that interrupts regular programming, the information must be accompanied by an aural tone.⁸ This tone is intended to alert persons with vision disabilities that the VPD is providing emergency information, and those persons, therefore, should tune to another source, such as a radio, for more information.⁹ Repeating the aural tone at frequent intervals, or at least as often as the content of the crawl or scroll changes, is helpful to viewers reliant on these tones.

Emergency information also must be provided in a manner that is accessible to persons who are deaf or hard of hearing. Commission rules require that emergency information provided in the audio portion of the programming be made accessible using closed captioning *or* other methods of visual presentation, including open captioning, crawls or scrolls that appear on the screen.¹⁰ Emergency

⁶ See 47 C.F.R. § 79.2(b)(1)(ii).

⁷ See *Implementation of Video Description of Video Programming*, MM Docket No. 99-339, Report and Order, 15 FCC Rcd 15230 at 15250, ¶49 (2000). Video description is the insertion of audio narrated descriptions of a television program's key visual elements into natural pauses in the program's dialogue. Twenty-First Century Communications and Video Accessibility Act (CVAA), Pub. L. No. 111-260, § 202(a), 124 Stat. 2751 (2010), amending § 713(h)(1) of the Communications Act of 1934, as amended (Act) *see also* Pub. L. 111-265, 124 Stat. 2795 (2010), making technical corrections to the CVAA.

⁸ See 47 C.F.R. § 79.2(b)(1)(iii).

⁹ We note that as part of its implementation of the CVAA, the Commission must identify methods to convey emergency information in a manner that is accessible to individuals who are blind or visually impaired and promulgate regulations that require video programming providers, distributors, and owners to convey such emergency information in an accessible manner to this population. CVAA § 202 (a), adding new Section 713(g) to the Act. In compliance with the CVAA and to obtain guidance on these methods, the Commission established the Video Programming Accessibility Advisory Committee (VPAAC). See Pub. L. No. 111-260 § 201(e)(2). The VPAAC submitted its report on this matter to the Commission in April 2012. Among other things, the VPAAC recommended that “[i]nformation about emergencies that pose imminent and serious threats to life or property . . . be conveyed audibly as well as visually for the benefit of people with visual disabilities.” *Second Report of the Video Programming Accessibility Advisory Committee on the Twenty-First Century Communications and Video Accessibility Act of 2010*, Access to Emergency Information, at 10 (Apr. 9, 2012). The CVAA directs the Commission to complete its rulemaking on this matter not later than one year after receiving the VPAAC report. CVAA § 202 (a).

¹⁰ See 47 C.F.R. § 79.2(b)(1)(i); *December 2006 PN*, 21 FCC Rcd at 15086.

information provided by these means may not block any closed captioning, and closed captioning may not block any emergency information provided by crawls, scrolls, or other visual means.¹¹ The “pass through” obligation, generally requiring VPDs to ensure that viewers receive closed captions intact under section 79.1, also applies to emergency information encompassed by section 79.2.¹²

Distributors that are not permitted by Commission rules to count captions created using the electronic newsroom technique (ENT)¹³ are required to provide closed captions on all new non-exempt programming, including breaking news and emergency alerts.¹⁴ We recognize that emergency information is the type of information that is typically not available in advance, and that it may be difficult for some stations to obtain closed captioning services on short notice. Nevertheless, we emphasize that during the period in which a station may be making arrangements to obtain closed captioning services, section 79.2 requires emergency information provided by that station to be made accessible by some other visual presentation method, in a manner that ensures the same access to emergency information for persons with hearing loss as for any other viewer.¹⁵

Similarly, entities that are permitted to and are using captions created with ENT for their live programming (for determining compliance with section 79.1)¹⁶ are reminded that if the ENT method does not automatically caption non-scripted news, the provider must either caption or make the emergency information accessible by some other form of visual presentation as required by section 79.2.¹⁷ Lastly, a distributor in a market that is permitted to use ENT, but chooses to use real-time captions rather than ENT for its live programming, must provide closed captions on emergency information contained in that programming.

¹¹ See 47 C.F.R. § 79.2(b)(3)(i).

¹² See 47 C.F.R. § 79.1(c). All video programming distributors are required to pass through any captions that they receive from the originating source and are responsible for maintaining their equipment in working order to ensure the accurate transmission of the closed captions. See *Closed Captioning and Video Description of Video Programming; Implementation of Section 305 of the Telecommunications Act of 1996; Accessibility of Emergency Programming*, MM Docket No. 95-176, Second Report and Order, 15 FCC Rcd 6615 at 6622, ¶13, n.48 (2000) (2000 Order).

¹³ See 47 C.F.R. § 79.1(e)(3). The relevant text of that subsection reads: “Live programming or repeats of programming originally transmitted live that are captioned using the so-called ‘electronic newsroom technique’ will be considered captioned, except that effective January 1, 2000, and thereafter, the major national broadcast television networks (i.e., ABC, CBS, Fox and NBC), affiliates of these networks in the top 25 television markets as defined by Nielsen’s Designated Market Areas (DMAs) and national nonbroadcast networks serving at least 50% of all homes subscribing to multichannel video programming services shall not count electronic newsroom captioned programming towards compliance with these rules.”

¹⁴ See *December 2006 PN*, 21 FCC Rcd at 15084. The Commission’s rules permit the use of “[o]pen captioning or subtitles in the language of the target audience” in lieu of closed captioning. 47 C.F.R. § 79.1(e)(2).

¹⁵ See 47 C.F.R. § 79.2(b)(1)(i).

¹⁶ See 47 C.F.R. § 79.1(e)(3).

¹⁷ See *2000 Order*, 15 FCC Rcd at 6623-24, ¶16.

Consumer Complaints and Enforcement

The Commission will continue to monitor closely complaints alleging violations of section 79.2, and will review for possible enforcement action.

If you are a consumer who has a complaint regarding the lack of emergency information being presented in an accessible format, you may contact the VPD directly for quick resolution of the problem, or you may file a complaint with the FCC. If you do not have contact information for the VPD, you can locate VPD contact information by searching the VPD Registry located on the FCC's webpage at: <http://esupport.fcc.gov/vpd-search/search.action>.

If you decide to complain directly to the FCC, your complaint should include:

- The name of the VPD (e.g., broadcast station, cable company, satellite TV provider, local telephone company) against whom the complaint is alleged;
- The date and time of the transmission of emergency information that was in a format not accessible to persons with disabilities; and
- The type of emergency.

You can file your complaint with the FCC using the on-line complaint Form 2000C found at <http://www.fcc.gov/cgb/form2000c.html>. You also may contact the FCC by letter, facsimile transmission, telephone (voice/TRS/TTY), Internet e-mail, audio-cassette recording, Braille, or any other method that would best accommodate your disability. Send your complaint to:
