Media Bureau Announces Release of Low Power FM Spectrum Availability Program and Data Files

The Low Power FM (LPFM) *Fourth Report and Order*¹ includes an LPFM spectrum availability analysis of core areas in 156 studied markets. A description of the Media Bureau's (Bureau) methodology and the summary results of its analysis appear in the *Fourth Report and Order's* Appendices A and B. The Commission relied on this same methodology to fashion new processing rules for FM translator applications that remain pending from the 2003 Auction 83 window. These include the requirement to protect identified LPFM channel/point combinations within the pertinent 31x31 or 21x21 market grid to avoid application dismissal. The Bureau is making available the spectrum availability analysis program and data files to help translator applicants identify within-the-grid protected channel/point combinations. To minimize burdens on applicants and facilitate the efficient processing of translator applications and amendments, protected channel/point combinations shall consist of all but only those combinations identified by this program and the CDBS records used to generate the final versions of Appendices A and B shortly prior the adoption of the *Fourth Report and Order*.

The following path provides access to the code, center-city coordinates for each market and other related files. http://www.fcc.gov/Bureaus/MB/Databases/source_code/lpfm/lpfm6.20120416.zip. Users should pay particular attention to the Readme.txt file in the zip file that describes the contents of the package.

For additional information on this proceeding, contact Peter Doyle, Tom Hutton or Kelly Donohue, Audio Division, Media Bureau, (202) 418-2700. For further information regarding the LPFM spectrum availability program, contact Jorden Brinn or Jim Bradshaw, Audio Division, Media Bureau at (202) 418-2700. Press inquiries should be directed to Janice Wise, (202) 418-8165. TTY: (202) 418-7172 or (888) 835-5322.
