**WIRELESS TELECOMMUNICATIONS BUREAU, PUBLIC SAFETY AND HOMELAND
SECURITY BUREAU AND OFFICE OF ENGINEERING AND TECHNOLOGY SEEK
COMMENT ON TELECOMMUNICATIONS INDUSTRY ASSOCIATION PETITION FOR
CLARIFICATION AND/OR DECLARATORY RULING REGARDING ORDER WAIVING THE
JANUARY 1, 2013 VHF-UHF NARROWBANDING DEADLINE**

WT Docket No. 99-87

Comment Date: June 27, 2012

Reply Comment Date: July 2, 2012

By this *Public Notice*, comment is sought on the request of the Telecommunications Industry Association (TIA), filed on May 21, 2012,¹ seeking clarification and/or declaratory ruling regarding the April 26, 2012 *Order*² of the Wireless Telecommunications Bureau, Public Safety and Homeland Security Bureau and Office of Engineering and Technology that partially waived the Commission's January 1, 2013 deadline requiring private land mobile radio licensees in the 150-174 MHz and 450-512 MHz bands to operate using channel bandwidth of no more than 12.5 kHz or equivalent efficiency.³ TIA asks whether the April 26, 2012 *Order* waives the ban on 25 kHz (wideband) technologies in the 470-512 MHz band ("T-Band") for equipment authorization applications filed on or after January 1, 2011.

In 2010, the Commission extended the January 1, 2011 deadline for the manufacture or import of wideband-capable equipment to match the January 1, 2013 deadline for Industrial/Business and Public Safety Radio Pool licensees to terminate wideband operations, but specifically declined to extend the January 1, 2011 deadline for certification of new wideband-capable equipment.⁴ In light of subsequent legislation directing the Commission to reallocate spectrum in the 470-512 MHz band, the April 26, 2012

⁴ See Implementation of Sections 309(j) and 337 of the Communications Act of 1934 as Amended; Promotion of Spectrum Efficient Technologies on Certain Part 90 Frequencies, *Order*, WT Docket No. 99-87, RM-9332, 25 FCC Rcd 8861, 8864 ¶¶ 8-9 (2010).

Order waived the January 1, 2013 deadline for licensees to migrate to 12.5 kHz channel bandwidth or utilize a technology that achieves equivalent efficiency.⁵ It also waived the January 1, 2013 deadline for the manufacture or importation of equipment capable of operating with only one voice path per 25 kHz of spectrum in the T-band, and provided that manufacturers could submit permissive change requests to permit the modification of existing wideband-capable models to enable wideband operation only in the 470-512 MHz band.⁶ The April 26, 2012 *Order* did not specifically address whether permissive change requests will be accepted with respect to narrowband-only equipment already approved, or whether new equipment authorization requests for equipment capable of wideband operation in the 470-512 MHz band will be accepted.

In TIA's view, the April 26, 2012 *Order* is ambiguous regarding the extent to which it waives the ban on the inclusion of 25 kHz technology for the T-Band in new equipment, and may lead to confusion. TIA requests a clarification or declaratory ruling that the ban on the inclusion of wideband capability in the 470-512 MHz band in equipment authorization applications is waived. We seek comments evaluating the petition for clarification and/or declaratory ruling. Commenters should address the conditions under which equipment authorizations should be granted for equipment that is capable of wideband operation in the T-band.
