WIRELESS TELECOMMUNICATIONS BUREAU SEEKS COMMENT ON REQUEST OF ASCEND PERFORMANCE MATERIALS FOR WAIVER OF SECTION 90.209(B) OF THE COMMISSION'S RULES TO PERMIT WIDEBAND OPERATION INDEFINITELY

WT Docket 99-87

Comment Date: July 10, 2013

Reply Comment Date: July 25, 2013

By this *Public Notice*, comment is sought on the request for waiver of Section 90.209(b) of the Commission's Rules filed by Ascend Performance Materials LLC (Ascend).¹ Section 90.209(b)(5) provides that, as of January 1, 2013, private land mobile radio stations in the 150-174 MHz and 421-512 MHz bands must operate on 12.5 kHz or narrower channels unless the operations meet the efficiency standards of Section 90.203(j)(3) of the Commission's Rules.² Ascend seeks a waiver for Station KD28206, Cantonment, Florida, because its 25 kHz equipment does not support the data rate of 4800 bits per second per 6.25 kHz of channel bandwidth set forth in Section 90.203(j)(3).³

Station KD28206 is authorized to operate with two watts effective radiated power on twenty 450-470 MHz band frequencies (mostly Group C low-power frequencies). Ascend uses the frequencies to operate approximately twelve radio-controlled Automated Guided Vehicles (AGVs) (wheel-based robotic transport vehicles that operate under computer control without the need for human drivers) at its manufacturing facility outside Pensacola, Florida. Ascend modified its license to add narrowband emission designators in August 2012,⁴ but later requested a six-month extension of the January 1, 2013 narrowbanding deadline to obtain additional time to convert the system to narrowband operation because the proprietary software was incompatible with narrowband channels.⁵ On December 18, 2012, the

² See 47 C.F.R. §90.209(b)(5) note 3. The January 1, 2013 deadline for converting to 12.5 kHz technology has been waived for licensees in the 470-512 MHz segment of the UHF band. See Implementation of Sections 309(j) and 337 of the Communications Act of 1934 as Amended, *Order*, WT Docket No. 99-87, 27 FCC Rcd 4213, *on recon.*, *Order on Reconsideration*, 27 FCC Rcd 14770 (WTB/PSHSB/OET 2012).

Wireless Telecommunications Bureau's Mobility Division granted an extension of the narrowbanding deadline until June 30, 2013.⁶

Subsequently, Ascend requested an indefinite waiver of the narrowbanding deadline because it determined that its AGV system cannot reasonably be modified to comply with Section 90.209(b). Ascend states that modifying its AGV system to meet the narrowband-equivalent data efficiency standard would cost as much as \$400,000 and take the better part of a year, without benefiting other users because the system would continue to use 25 kHz channels.⁷ Ascend also argues that grant of a waiver is unlikely to harm other users because the equipment operates indoors with low power.

We seek comment on Ascend's waiver request. Commenters should address whether the public interest would be served by granting a waiver to allow Ascend continue for an unlimited period of time to operate on 25 kHz channels a low-power mobile-only system that does not support a minimum data rate of 4800 bits per second per 6.25 kHz of channel bandwidth. In particular, we seek comment from parties whose operations could be impacted by grant of the waiver.
