PUBLIC SAFETY AND HOMELAND SECURITY BUREAU SEEKS COMMENT ON REGION 9 (FLORIDA) 800 MHZ NPSPAC REGIONAL PLAN AMENDMENT

PR Docket No. 90-119

Comments Due: [August 11, 2014] Reply Comments Due: [August 21, 2014]

Introduction. On March 7, 2014, the Region 9 (Florida)¹ 800 MHz National Public Safety Plan Advisory Committee (NPSPAC) Regional Planning Committee (RPC) submitted a proposed modification (Plan Amendment)² to amend its 800 MHz Public Safety Plan.³

Background. In accordance with the National Public Safety Plan, each region is responsible for planning its use of the public safety radio frequency spectrum (rebanding to the 806-809/851-854 MHz segment).⁴

Review of the Region 9 Plan 800 MHz NPSPAC Plan Amendment. The Plan Amendment consists of six modifications approved by the regional membership, and coordinated with the adjacent regions, Region 1 (Alabama), Region 10 (Georgia) and Region 23 (Mississippi).⁵

¹ The Region 9 (Florida) 800 MHz regional planning area consists of the entire state of Florida.

² See Letter from Ray Carlson, Chair, Region 9 (Florida) 800 MHz Regional Planning Committee, to the Federal Communications Commission, Public Safety and Homeland Security Bureau (PSHSB), PR Docket No. 93-119 (filed Mar. 7, 2014) (Plan Amendment). On May 29, 2014, Region 9 emailed staff to correct a reference to Section 6.2.5 to read Section 6.2.5 (C)(D)(E).

³ The Region 9 (Florida) 800 MHz NPSPAC Plan was amended in 2009, see Public Safety and Homeland Security Bureau Approves Region 9 (Florida) NPSPAC Regional Planning Committee Non-Streamlined Amendment to Reflect 800 MHz Band Reconfiguration in the 806-809/851-854, WT Docket No. 02-55, PR Docket No. 90-119, *Public Notice*, 24 FCC Rcd 13840 (PSHSB 2009).

⁴ See Development and Implementation of a Public Safety National Plan and Amendment of Part 90 to Establish Service Rules and Technical Standards for Use of the 821-824/766-869 MHz Bands by the Public Safety Services, General Docket No. 87-112, *Report and Order*, 3 FCC Rcd 905 (1987). The band was modified by the Commission in the *Rebanding* proceeding, WT Docket 02-55, by shifting the NPSPAC band down by 15 megahertz to 806-809/851-854 MHz. See *Improving Public Safety Communications in the 800 MHz Band*, WT Docket No. 02-55, *Report and Order*, *Fifth Report and Order*, *Fourth Memorandum Opinion and Order*, and *Order*, 19 FCC Rcd 14969 (2004).

⁵ Plan Amendment, Appendix F – Adjacent Region Concurrence with the Florida Plan at 80-82.

- Section 3.5(A)(5) – Relationship with Other Organizations - adds Region 23 (Mississippi) to the list of adjacent regions for liaison and coordination of frequency use.⁶
- Section 3.5(C) –The Adjacent Regions of Georgia, Alabama, and Mississippi – explains that two northern Florida counties are located less than 70 miles from Region 23 (Mississippi). Florida thus considers Region 23 as an adjacent region for adjacent region coordination purposes. Florida also expects adjacent regions to respond to concurrence requests within 45 calendar days.⁷
- Sections 5.1.8 (B) and (D)(a) – Channel Loading Requirements – clarifies loading requirements for County/Municipality Systems and Trunked Systems to include loading criteria for systems requesting new or expansion frequencies that are utilizing multiple slot Time Division Multiple Access (TDMA), or Frequency-Division Multiple Access (FDMA) trunking. Specifically, Region 9 proposes that loading shall be calculated using the number of time slots versus the number of 25 kHz frequencies (*e.g.* 400 mobiles qualify for one 25 kHz frequency when the applicant is using 4-slot modulation technology).⁸
- Section 6.1 (A) – Mutual Aid Calling Channel – clarifies that use of 8CALL90 channel may aid the Incident Command System (ICS) process as a coordination channel during emergencies.⁹
- Section 6.2.5 (D)(E)(F) – Mutual Aid Channel Equipment Requirements - is modified by adding three new subsections:
 - D. Repeat disable default upon power up shall be programmed in each mobile relay station (repeater).
 - E. Repeater inactivity timer of 180 minutes (maximum) shall be programmed in each mobile relay station (repeater).
 - F. Repeater hang-time of 2 seconds shall be programmed in each mobile relay station (repeater).¹⁰
- Section 8.3 – Applications for Special Temporary Authority - notes that the table in new Appendix G identifies the Region 9 submittal requirements for STAs in contrast to regular applications for permanent authority.¹¹
- Appendix G – Region 9 Application(s) Submittal Requirements - identifies the documentation required for Region 9 review of proposed STA and permanent applications as well as cross references to the applicable sections in the Region 9 Plan.¹²
