ANTENNA STRUCTURE REGISTRATION SERVICE INFORMATION

ENVIRONMENTAL ASSESSMENTS ACTION

The Wireless Telecommunications Bureau (Bureau) finds that the wayside poles listed below will not have any significant impact upon the environment based on an independent review of the Environmental Assessments (EAs) filed for these poles. Accordingly, we issue a Finding Of No Significant Impact (FONSI). See 47 C.F. R. § 1.1308(d).

The EAs were filed by GTC Spectrum Corporation (GTCSC), a subsidiary of Canadian Nation Railway, Inc., pursuant to a condition on Experimental License WG2XVJ, issued to GTCSC by the Office of Engineering and Technology, ELS File No. 0389-EX-PL-2013.¹ Grant of the authorization was “conditioned upon GTCSC’s subsequent completion of all environmental review processes for these antenna structures that were required under Part 1, Subpart 1 of the Commission’s rules to have been completed before these antenna structures were constructed.” The Bureau processed the referenced EAs through its environmental review process, encompassing those sites covered by the Experimental License that were determined to require an EA.
