TAC Mobile Device Theft Prevention Mission Statement

The TAC Mobile Device Theft Prevention Working Group, to fulfill its charge of exploring the problem of mobile device theft and developing industry-wide recommendations for the FCC to deter and mitigate mobile device theft, should (1) define key terms that are central to this matter; (2) develop best practices for consumer engagement and education; (3) explore stakeholder coordination and data sharing; (4) ensure appropriate considerations of cybersecurity concerns; (5) identify gaps with existing solutions; (6) analyze the potential necessity and value of new technical and operational solutions to deter thefts and enable the recovery of stolen devices; and (7) identify standards organizations and industry fora to implement solutions. The Working Group has the opportunity to bring together diverse perspectives to analyze the problem and provide recommendations that address the unique scale of mobile device theft.
