DA 14-1459

Released: October 7, 2014

WIRELINE COMPETITION BUREAU PROVIDES INFORMATION REGARDING USAGE ALLOWANCE AND PRICING TO ASSIST APPLICANTS FOR RURAL BROADBAND EXPERIMENTS

WC Docket Nos. 10-90, 14-58

In the *Rural Broadband Experiments Order*, the Commission allocated \$75 million for the construction of networks capable of delivering 100 Mbps downstream/25 Mbps upstream, while requiring the funding recipients offer at least one service plan that provides 25 Mbps downstream/5 Mbps upstream (25 Mbps/5 Mbps) to all locations within the selected census blocks, also referred to as category one funding.¹ The Commission required that funding recipients in category one “provide usage and pricing that is reasonably comparable to usage and pricing for comparable wireline offerings (i.e., those with similar speeds) in urban areas.”² Applicants are required to include in their application a description of their planned service offerings.³

To assist applicants as they prepare their applications, we conclude it would be useful to provide bidding parties seeking category one funding with data regarding the types of pricing and usage allowance that are generally available in urban areas for broadband offerings with speeds at or above 25 Mbps/5 Mbps.⁴ Attached to this Public Notice is a list of the responses from the urban rate survey for service offerings in urban areas meeting a minimum speed of 25 Mbps /5 Mbps or faster. These data will assist parties in truthfully certifying in their applications they will meet the threshold service requirements with a usage allowance and pricing reasonably comparable to those in urban areas.

Usage Allowance. Based on a review of the data received from the urban rate survey,⁵ of the 109 responses received relating to offerings of 25 Mbps/5 Mbps, the vast majority (87 percent) offer a usage

¹ *Connect America Fund et al.*, WC Docket No. 10-90 et al., Report and Order et al., 29 FCC Rcd 8769, 8779-80, para. 26 (2014) (*Rural Broadband Experiments Order*).

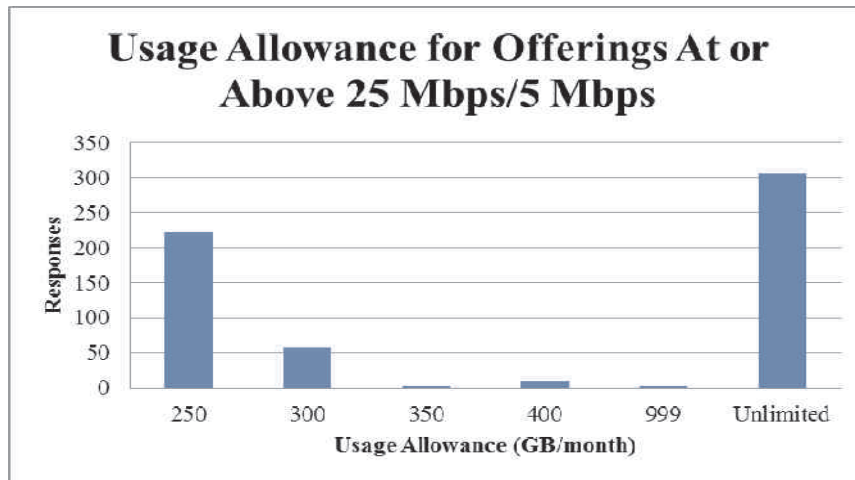

² *Id.*

³ *Id.* at 8785, para. 49. See also *Wireline Competition Bureau Announces Further Details Regarding the Rural Broadband Experiments*, WC Docket No. 10-90, Public Notice, DA 14-1396 (Wireline Comp. Bur. rel. Sept. 26, 2014) (announcing release of Form 5610 and availability of sample proposal listing the usage and pricing of planned broadband offering).

⁴ For purposes of the rural broadband experiments, the Commission established an interim presumption for 10 Mbps downstream/1 Mbps upstream service (i.e., category 2 service and category 3 service) that an entity can charge no more than \$85 for fixed broadband service, pending the adoption of a final benchmark. *Rural Broadband Experiments Order*, 29 FCC Rcd at 8779, para. 25 n.58.

⁵ *Wireline Competition Bureau Announces Posting of Broadband Data from Urban Rate Survey and Seeks Comment on Calculations of Reasonable Comparability Benchmark for Broadband Services*, WC Docket No. 10-90, Public Notice, 29 FCC Rcd 7992 (Wireline Comp. Bur. 2014) (*Urban Rate Survey Public Notice*).

allowance of 250 GB per month. The second most common usage allowance is 300 GB (12 percent). One respondent offers an unlimited usage allowance on its 25 Mbps/5 Mbps offering. As illustrated below, of the 600 responses received related to offerings with speeds *at or above* 25 Mbps/5 Mbps, the majority (51 percent) have unlimited usage allowance.⁶ The second most common offering (37 percent) is 250 GB per month. No respondents list usage allowances below 250 GB per month for their 25 Mbps/5 Mbps or faster offerings.

Pricing. When examining urban rate survey responses for only 25 Mbps/5 Mbps offerings, prices range from \$56.96 to \$74.95.⁷ While the Bureau has not yet finalized the methodology for determining a reasonable comparability benchmark for broadband services, we have sought comment on an approach that would set such benchmarks for broadband service offerings at a point two standard deviations above the average.⁸

To request materials in accessible formats for people with disabilities (braille, large print, electronic files, audio format), send an e-mail to fcc504@fcc.gov or call the Consumer & Governmental Affairs Bureau at 202-418-0530 (voice), 202-418-0432 (tty).

For further information, please contact Heidi Lankau, Telecommunications Access Policy Division, Wireline Competition Bureau at 202-418-7400; or at TTY (202) 418-0484.

- FCC -

⁶ The “at or above” figures only include offerings up to 100 Mbps downstream and 100 Mbps upstream. These figures also include some providers that offer a downstream speed above 25 Mbps, but an upstream speed below 5 Mbps.

⁷ 109 responses were for offerings of 25 Mbps/5 Mbps. The weighted average (mean) rate equals \$64.45, with the median equaling \$64.95.

⁸ *Urban Rate Survey Public Notice*, 29 FCC Rcd at 7994-95.

ATTACHMENT

BROADBAND SERVICE OFFERINGS IN URBAN AREAS (25 TO 100 MBPS DOWNSTREAM)

Variable	Description
Provider	Name of the residential broadband provider reporting the rate.
State	State in which the Census tract is located.
Weight	The product of 1) the sum of weights for broadband providers offering service in the Census tract and 2) the frequency of the Census tract's selection in the survey sample.
Technology	Technology used to provide the residential service.
Download Bandwidth Mbps	The advertised download bandwidth for the reported service in Mbps
Upload Bandwidth Mbps	The advertised upload bandwidth for the reported service in Mbps
Usage Allowance GB	The monthly usage allowance (if any) for the reported service. If the plan has no maximum usage allowance, the field reports "Unlimited"
Monthly Charge	The monthly charge for the service, \$
Other Mandatory Charge	Monthly mandatory charges not included elsewhere, \$
Surcharge	Monthly surcharges not included elsewhere, \$
Total Charge	The total monthly end-user charge which is the sum of monthly charge, other mandatory charge, and surcharge, \$
Outlier	"Yes" indicates that the observation was excluded from analyses because the Total Charge was excessively higher than other rates with comparable levels of service. "No" indicates that the observation was included in analyses.

Notes

1. A sample of 500 urban Census tracts was randomly selected using the "Random Choice" function in Mathematica from a list of 58,331 urban census tracts encompassing the 50 states and Puerto Rico; the selection was weighted proportionately by the number of households in the Census tracts. A service provider was given weight = 1 if the provider had more than 7% of the total residential subscribers in the Census tract. Otherwise, the provider was given the weight = $1/(N+1)$ where N is the number of providers with 7% or less of the total residential subscribers in the Census tract. For each occurrence of a Census tract in the sample, one carrier was randomly selected using the "Random Choice" function in Mathematica with the selection proportional to this weight.

2. In the data file, each row represents the broadband provider's reported rates in a specific Census tract within the state for a specific service. A specific service is defined by its download/upload bandwidth and usage allowance.

3. When providers reported multiple rates for a level of service within a Census tract or a level of service provided through multiple technologies in the same Census tract, the rate values were averaged to generate a single rate for the level of service in that tract.
