**WIRELESS TELECOMMUNICATIONS BUREAU AND PUBLIC SAFETY AND HOMELAND
SECURITY BUREAU SEEK COMMENT ON LAND MOBILE COMMUNICATIONS COUNCIL
PETITION FOR RULEMAKING REGARDING CONDITIONAL LICENSING AUTHORITY
ABOVE 470 MHZ, AND DENY REQUEST FOR EXTENSION OF TEMPORARY WAIVER**

RM-11722

Comment Date: July 23, 2014

Reply Comment Date: August 7, 2014

On May 15, 2014, the Land Mobile Communications Council (LMCC) filed a petition for rulemaking seeking expansion of conditional licensing authority under Section 90.159(b)¹ of the Commission's Rules to the 470-512 MHz, 806-824/851-866 MHz, and 896-901/935-940 MHz bands.² With this *Public Notice*, we seek comment on LMCC's petition for rulemaking. We also deny LMCC's request for a blanket waiver pending the resolution of the rulemaking proceeding.

Pursuant to Section 90.159(b), most applicants proposing to operate a new private land mobile radio (PLMR) station or modify an existing PLMR station below 470 MHz that are required to include a showing of frequency coordination are permitted to operate the proposed station during the pendency of the application for a period of up to 180 days, beginning ten days after the application is submitted to the Commission.³ This conditional authority is not available for applicants in the PLMR frequency bands above 470 MHz. When the Commission enacted the rule granting conditional authority below 470 MHz,

¹ 47 C.F.R. § 90.159(b).

² Land Mobile Communications Council, Petition for Rulemaking In the Matter of Expansion of Conditional Licensing Authority Under FCC Rule Section 90.159 of Part 90 Bands: 470-512 MHz, 800 MHz, and 900 MHz (filed May 15, 2014) (Petition).

³ See 47 C.F.R. § 90.159(b), (b)(6). This conditional authority applies only to applications that meet the following requirements: the proposed station location is south of Line A and west of Line C; the proposed antenna structure has previously been determined by the Federal Aviation Administration to pose no hazard to aviation safety, or the proposed structure height does not exceed 6.1 meters above ground level or above an existing man-made structure; grant of the application does not require a waiver of the Commission's rules; the proposed facility will not have a significant environmental effect; and the proposed station is not in a quiet zone. 47 C.F.R. § 90.159(b)(1)-(5).

it stated that it was being conservative in the implementation of conditional authority, and could consider expanding the concept in the future if experience demonstrated that such action was appropriate.⁴

LMCC asserts that the rules governing frequency assignments in the bands below 470 MHz no longer justify distinguishing between below- and above-470 MHz for authorizing conditional licensing, because over time the rules governing frequency assignments below 470 MHz have become more technically challenging than the separation criteria in the 800/900 MHz bands, and certain rules requiring individualized review of 800/900 MHz applications have been eliminated for many systems. It argues that expansion of conditional authority above 470 MHz is now appropriate.

LMCC also states that recent experience with conditional licensing authority in the PLMR bands above 470 MHz supports the proposed rule change. Specifically, in 2013, the Mobility Division (Division) of the Wireless Telecommunications Bureau (WTB) granted the request of the Enterprise Wireless Alliance (EWA) for a temporary waiver request of Section 90.159 to permit applicants for new or modified Industrial/Business Pool stations in the 470-512 MHz, 806-824/851-866 MHz, and 896-901/935-940 MHz bands to operate while the applications are pending.⁵ The Division granted the waiver until December 31, 2013 in order to provide relief to Industrial/Business Pool applicants that were incurring hardship due to unusually long WTB processing times resulting from applications related to the January 1, 2013 narrowbanding deadline.⁶ The Division subsequently extended the waiver until June 30, 2014 because WTB's processing times, while improved, had not returned to normal.⁷

In addition, LMCC requests that the waiver remain in effect pending the resolution of its rulemaking petition, and be extended to Public Safety Pool applicants.⁸ We deny this request. The waiver granted in response to the EWA request was a temporary waiver addressing a temporary situation. As LMCC acknowledges, WTB's processing times are no longer substantially longer than normal.⁹ Consequently, no further extension of the waiver is warranted. Industrial/Business Pool applications filed on or before June 30, 2014 will be authorized for up to 180 days of conditional authorization in accordance with the Division's orders, but applications filed thereafter will receive no waiver relief.

We seek comment on LMCC's petition for rulemaking. Commenters should address whether the public interest would be served by allowing qualified applicants in the frequency bands above 470 MHz conditional licensing authority. They should also address whether any rule change should apply to both the Industrial/Business Pool and the Public Safety Pool.
