**MEMORANDUM OPINION AND ORDER**

**Adopted: January 26, 2015**

**Released: January 28, 2015**

By the Senior Deputy Chief, Policy Division, Media Bureau:

**I. INTRODUCTION AND BACKGROUND**

1. By this Order, we grant six unopposed petitions for a finding of effective competition. The unopposed petitions set forth on Attachment A were filed by various cable companies (the “Petitioners”) seeking determinations of effective competition in their local franchise areas pursuant to Sections 76.7, 76.905(b)(2), and 76.907 of the Commission’s rules.<sup>1</sup> The Petitioners allege that their cable systems are subject to effective competition in their local franchise areas (the “Attachment A Communities”) pursuant to Section 623(l)(1)(B) of the Communications Act of 1934, as amended (“Communications Act”) and Section 76.905(b)(2) of the Commission’s rules,<sup>2</sup> and are therefore exempt from cable rate regulation, principally because of the competing service provided by two direct broadcast satellite (“DBS”) providers, DIRECTV, Inc., and DISH Network.

2. In the absence of a demonstration to the contrary, cable systems are presumed not to be subject to effective competition<sup>3</sup> as that term is defined by Section 623(l) of the Communications Act and Section 76.905 of the Commission’s rules.<sup>4</sup> The cable operator bears the burden of rebutting the presumption that effective competition does not exist with evidence that effective competition is present within the relevant franchise area.<sup>5</sup> For the reasons set forth below, we conclude that Petitioners have carried that burden. We grant these unopposed petitions based on our finding that Petitioners are subject to effective competition in the Communities listed on Attachments A .

**II. DISCUSSION**

**A. The Competing Provider Test**

3. Section 623(l)(1)(B) of the Communications Act provides that a cable operator is subject to effective competition if its franchise area is (a) “served by at least two unaffiliated multichannel video programming distributors [(“MVPDs”)] each of which offers comparable video programming to at least 50 percent of the households in the franchise area,” and (b) “the number of households subscribing to programming services offered by [MVPDs] other than the largest [MVPD] exceeds 15 percent of the

households in the franchise area.”<sup>6</sup> This test is referred to as the “competing provider” test.

4. We have reviewed each of the Attachment A petitions in full. We find that each petition provides sufficient and reliable evidence to establish that both elements of the competing provider test for effective competition are satisfied consistent with the Communications Act, our implementing rules, and over 20 years of effective competition adjudicatory precedent. Specifically, we find that each of the Attachment A Communities is served by at least two unaffiliated MVPDs each of which offers comparable video programming to at least 50 percent of the households in the franchise area. We further find that the number of households subscribing to programming services offered by MVPDs other than the largest MVPD exceeds 15 percent of the households in each of the Attachment A Communities. Each of the Petitioners has demonstrated the presence of effective competition in their respective franchise areas. In so doing, Petitioners have satisfied their burden of rebutting the presumption that effective competition does not exist with evidence that effective competition is present within the relevant franchise areas.

### III. ORDERING CLAUSES

5. Accordingly, **IT IS ORDERED** that the petitions for a determination of effective competition set forth in Attachment A **ARE GRANTED**.

6. **IT IS FURTHER ORDERED** that any certification to regulate basic cable service rates granted to any of the Attachment A Communities **IS REVOKED**.

7. This action is taken pursuant to delegated authority pursuant to Section 0.283 of the Commission’s rules.<sup>7</sup>
