OFFICE OF ENGINEERING AND TECHNOLOGY
RELEASES PATCH TO FINAL VERSION OF *TVStudy*

GN Docket No. 12-268
ET Docket No. 13-26

The Office of Engineering and Technology (OET) is today releasing a patch to the final version of the *TVStudy* software (Version 1.3.2). Since the release of *TVStudy* version 1.3.2, OET has both experienced and received reports of a few minor issues related to software performance and behavior as relates to XML scenario imports and switch settings.[1] This patch is designed to correct those issues, and does not affect any of the results of the initial baseline released by OET in June.[2] However, all users of *TVStudy* are strongly encouraged to apply this patch.

The patched version of *TVStudy* is available on the Commission's LEARN website under the Repacking Section at http://wireless.fcc.gov/incentiveauctions/learn-program/repacking.html.   A "Change Log" showing all revisions to *TVStudy* (TVStudy v1.3.2 (Patched) Installation & Upgrade Guide) and other materials relevant to *TVStudy* are accessible on the FCC's LEARN website.[3]

For further information regarding this matter, contact Mark Colombo at (202) 418-7611, e-mail Mark.Colombo@fcc.gov or Martin Doczkat at (202) 418-2435, e-mail at Martin.Doczkat@fcc.gov.
