## **I. INTRODUCTION**

SprintCom, Inc. (“SprintCom”), a wholly-owned subsidiary of Sprint Corporation (together with SprintCom, “Sprint”), Shenandoah Personal Communications, LLC (“Shentel PC”), a wholly-owned subsidiary of Shenandoah Telecommunications Company (together with Shentel PC, “Shentel”), and NTELOS Holdings Corp. (“NTELOS” and together with Sprint and Shentel, the “Applicants”) have filed applications pursuant to Sections 214 and 310(d) of the Communications Act of 1934, as amended,<sup>1</sup> seeking Commission consent to: (i) the assignment to Sprint from NTELOS of Advanced Wireless Services (“AWS-1”), Broadband Radio Service (“BRS”), Personal Communications Service (“PCS”), Common Carrier Fixed Point to Point microwave, and Private Point to Point microwave licenses; (ii) the assignment to Sprint from NTELOS of grandfathered BRS and Educational Broadband Service (“EBS”) spectrum leases; and (iii) the transfer of control to Shentel from NTELOS of an international section 214 authorization (collectively, the “Applications”).<sup>2</sup> In addition, NTELOS’s approximately 297,500 subscribers, along with wireless network equipment and other assets, would be transferred to Shentel as part of the proposed transaction.

According to the Applicants, Shentel is the exclusive wireless communications affiliate of Sprint in primarily rural portions of Pennsylvania, Maryland, Virginia, and West Virginia. As of June 30, 2015, Shentel provided digital wireless service to more than 440,000 customers. The Applicants further maintain that NTELOS is a regional provider of digital wireless communications services to its approximately 297,500

<sup>1</sup> 47 U.S.C. §§ 214, 310(d).

<sup>2</sup> The Applicants also filed applications for the transfer of control to Shentel from NTELOS of BRS, PCS, 800 MHz Specialized Mobile Radio Service and 1910-1915/1990-1995 MHz radio service spectrum leases. The Applicants represent that those leases would be terminated at the closing of the proposed transaction.

customers primarily in Virginia and West Virginia, but also in the parts of Maryland, North Carolina, Pennsylvania, Ohio, and Kentucky that are all the subject of the proposed transaction.

In the proposed transaction, NTELOS would become a wholly-owned subsidiary of Shentel. As a result of the transaction, Shentel would acquire all of NTELOS’s operations, including its wireless network assets and spectrum, retail stores, and retail subscribers. Shentel would, immediately after consummation of the transaction, assign to Sprint all of the Commission spectrum licenses currently held by NTELOS, as well as grandfathered BRS and EBS spectrum leases acquired from NTELOS. Shentel would convert NTELOS’s retail wireless customers into Sprint-branded customers. Post-transaction, Shentel would offer Sprint-branded wireless service in NTELOS’s services areas, as well as in the areas in which Shentel currently acts as Sprint’s affiliate marketing a Sprint-branded service.

The Applicants assert that the proposed transaction will promote competition and improve service for rural customers. They represent that, post-transaction, Shentel would upgrade the remainder of NTELOS’s current network to Sprint’s enhanced LTE architecture. The Applicants further represent that Shentel would invest approximately \$350 million and deploy approximately 150 additional cell sites to expand coverage in the NTELOS service area.

Our preliminary review of the spectrum exhibit submitted by the Applicants indicates that as a result of the proposed transaction, Sprint would be assigned or would lease up to an additional 135 megahertz of spectrum, in 153 counties covering all or parts of 38 Cellular Market Areas in portions of Kentucky, Maryland, North Carolina, Ohio, Pennsylvania, Virginia, and West Virginia. Post-transaction, Sprint would be attributed with a maximum of 240.5 megahertz of spectrum in total in those geographic areas.
