Downloadable Security Technology Advisory Committee Meeting Scheduled for August 4, 2015

The sixth meeting of the Downloadable Security Technology Advisory Committee (DSTAC) has been scheduled for August 4, 2015.

Meetings of the full DSTAC committee will be open to the general public and streamed at www.fcc.gov/live. The meeting on August 4, 2015, will run from 9:30 a.m. to 4:00 p.m., at FCC Headquarters, 445 12th Street, Washington, DC.

At the meeting, the committee will discuss reports from the Security Requirements for Downloadable Security Working Group (WG3) and the Device Platforms, Variability, And Interfaces Working Group (WG4). The Committee will also consider any other issues related to the DSTAC's work that may arise. The agenda is as follows:

9:30 AM Opening remarks and administrative issues

9:35 AM Presentation of the Security Requirements for Downloadable Security Working Group report, with an overview of each recommended system's:

- Baseline assumptions,
- Ability to work with different devices, user interfaces, MVPDs, operating systems, Digital Rights Management (DRM)/Conditional Access Systems (CAS), and
- Ability to achieve the goals of Section 629

10:15 AM Discussion of the Security Requirements for Downloadable Security Working Group report

10:45 AM Presentation of the Device Platforms, Variability, And Interfaces Working Group report, with an overview of each recommended system's:

- Baseline assumptions,
- Ability to work with different devices, user interfaces, MVPDs, operating

systems, DRM/CAS, and

- Ability to achieve the goals of Section 629

11:25 AM Discussion of the Device Platforms, Variability, And Interfaces Working Group report

11:55 AM Lunch Break

12:55 PM Discussion of how to coordinate WG3 recommended systems and WG4 recommended systems for the final report

- Discussion of whether each of the two WG3 recommended systems will work with WG4's recommended systems
- Discussion of whether any recommended system will require an application-programming interface (API)
 - If so, what existing APIs, protocols, and standards help with this task?
 - If not, how could such APIs, protocols, and standards be created?

3:00 PM Timeline and process to write the final report

3:45 PM Comments from the Public

4:00 PM Meeting Adjourned
