Requests for Extension of the Five-Year) See Attachment A for All File Numbers and
Construction Deadline for 2,132 Part 22) Associated Call Signs
Geographic Area Paging Service Licenses)

ORDER

Adopted: October 17, 2016

Released: October 17, 2016

By the Chief, Mobility Division, Wireless Telecommunications Bureau:

I. INTRODUCTION

1. This Order addresses the requests of Intelligent Transportation & Monitoring Wireless LLC (ITL), Skybridge Spectrum Foundation (Skybridge), and V2G LLC (V2G) (collectively, "Paging Licensees" or "Licensees") filed on November 3, 2015, to extend the five-year construction deadline for 2,132 Part 22 Economic Area paging licenses an additional five years from November 3, 2015, to November 3, 2020 (Extension Requests).¹ For the following reasons, we deny the Extension Requests and notify the Licensees that their paging licenses terminated automatically as of November 3, 2015.

II. BACKGROUND

2. The Paging Licensees were the winning bidders in Auction 87 (Lower and Upper Paging Bands) for the 2,132 licenses that are the subject of the Extension Requests. Most of the licenses were authorized to provide service in the 35 and 43 MHz paging bands, several were authorized to provide service in the 931 MHz paging band, and seven were authorized to provide service in the 929 MHz paging band.²

¹ See, e.g., ULS File No. 0007013592 et al., filed by ITL, Attach. "Extension Request" (Nov. 3, 2015); ULS File No. 0007013900 et al., filed by Skybridge, Attach. "Extension Request" (Nov. 3, 2015); and ULS File No. 0007012589 et al., filed by V2G, Attach. "Extension Request" (Nov. 3, 2015) (collectively, "Extension Requests"). ITL filed Extension Requests for 999 licenses; Skybridge filed Extension Requests for 133 licenses; and V2G filed Extension Requests for 1,000 licenses. The Paging Licensees state that they filed "the same extension request presented herein for all of their FCC Part 22 'paging' licenses obtained in Auction 87." Id. at 1. Attachment A to this Order lists the file numbers for each Extension Request, along with the associated call sign, channel block, and market area.

² The lower paging band licenses (radio service code CP – Part 22 VHF/UHF Paging (excluding 931 MHz)) were authorized to operate in Basic Economic Areas scattered throughout the country and the 931 MHz band paging

(continued....)

3. Section 22.503(k) of the Commission's rules sets forth the construction requirements for geographic area paging licenses. In particular, no later than three years after the initial grant of the license, a geographic area paging licensee must construct sufficient facilities to cover one-third of the population in the paging geographic area.³ Alternatively, the licensee may notify the Commission at the end of the three-year period that it plans to provide substantial service no later than five years after the initial grant of the license.⁴ No later than five years after initial grant, the licensee must construct sufficient facilities to cover two-thirds of the population or demonstrate that it is providing substantial service in the paging geographic area.⁵

4. The paging licenses at issue in this proceeding were granted on November 3, 2010,⁶ and the three-year construction deadline for the licenses was November 3, 2013. At that deadline, Licensees elected to demonstrate substantial service at the five-year deadline. The five-year construction deadline was November 3, 2015, and on that day, the Paging Licensees filed their Extension Requests seeking an additional five years to November 3, 2020, to complete construction. The Licensees do not claim to have constructed any facilities or provided any service between the grant date of the licenses and the five-year construction deadline. We further note that the Extension Requests were filed prior to November 16, 2015, the date on which the Superior Court of Alameda County, California appointed Susan L. Uecker as Receiver to take control and possession of all property and assets, in relevant part, of the Paging Licensees.⁷ On November 18, 2015, Ms. Uecker filed her oath and bond with the Superior Court, and on that date assumed control, in relevant part, over the Paging Licensees and the paging licenses at issue in this proceeding. On December 17, 2015, the Receiver filed involuntary transfer of control applications for the Licenses from ITL, Skybridge, and V2G, to Susan L. Uecker, Receiver.⁸ Those applications were accepted in February 2016.

5. On November 19, 2015, the Wireless Telecommunications Bureau (Bureau) sought comment on the Extension Requests.⁹ The deadline for filing comments was December 21, 2015, and the deadline for filing reply comments was January 5, 2016.¹⁰ The Enterprise Wireless Alliance (EWA) filed comments On December 21, 2015, opposing the requests,¹¹ and the Receiver replied on January 5, 2016.¹²

(Continued from previous page) _____

licenses (radio service code CZ – Part 22 931 MHz Paging) were authorized to operate in Major Economic Areas (MEAs) also scattered throughout the country. The 929 MHz licenses (radio service code GC – 929-931 MHz Band, Auctioned) were authorized to operate in the San Francisco, Los Angeles, and New York City MEAs.

¹¹ Comments of the Enterprise Wireless Alliance (Dec. 21, 2015) (EWA Comments).

Skybridge filed comments on March 14, 2016,¹³ more than two months after the reply comment filing deadline.

III. DISCUSSION

A. Skybridge Post Bankruptcy Notice

6. We first address the late-filed comments submitted by Skybridge in this docket. Skybridge filed its comments, entitled “Post Bankruptcy Petition Notice, Supplemental Filing, and Notice of Subsequent Filing,” shortly after it filed a petition for voluntary bankruptcy with the U.S. Bankruptcy Court, Delaware District.¹⁴ The Post Bankruptcy Petition Notice asserts that Skybridge “was previously restrained from acting before the FCC,”¹⁵ and contends that “the bankruptcy causes an automatic stay of the restraint.”¹⁶ The U.S. Bankruptcy Court, however, dismissed the Skybridge petition on May 6, 2016.¹⁷

7. As noted above, Skybridge filed its comments on March 14, 2016, more than two months after the reply comment due date. Skybridge includes, in its comments, a “Request to Accept” its filing stating that “[f]or good cause shown in the Petition, [Skybridge] requests that the FCC accept this filing and the noted further material to be filed, even though [sic] it is after the end of the pleading cycle.”¹⁸ As provided in Section 1.46(a) of the Commission’s rules, it is the policy of the Commission that motions to accept late-filed pleadings are not to be granted routinely.¹⁹ In support of its request to accept its filing, Skybridge contends that “the subject licenses were not sought by any one [sic] else over three FCC auctions for many years, and for that and other reasons, there is no urgency with regard to the FCC making a decision on the subject applications and relief requests.”²⁰ We find this statement does not provide an adequate basis for making an exception to the Commission’s policy on late-filed pleadings under Section 1.46(a).²¹ Nor does this statement demonstrate justification for a waiver to permit the filing of an untimely comment in this proceeding.

8. The Post Bankruptcy Petition Notice further states that Skybridge “plans to submit in this docket, in the near further [sic], materials in support of grant” and includes an exhibit that, according to Skybridge, supports grant of its Extension Requests.²² The exhibit is provided in two parts and includes presentations and articles on Meteor Burst technology, precision Position, Navigation & Timing (pPNT),

¹⁸ Post Bankruptcy Petition Notice at 3.

¹⁹ 47 CFR § 1.46(a).

²⁰ Post Bankruptcy Petition Notice at 3.

²¹ See *Hughes Network Systems, Limited, Assignor, and HNS Licensee Sub, LLC Consolidated Application for Consent for Assignment of Earth Station Licenses and Associated Special Temporary Authorizations*, Order and Authorization, 20 FCC Rcd 8080, 8082-83, paras. 3-6 (IB 2005) (dismissing late-filed comments because the commenter did not address the Commission’s policy in Section 1.46(a) on whether to accept late-filed pleadings) (*Hughes Network Systems*).

²² Post Bankruptcy Petition Notice at 2.

Global Navigation Systems (GPS), and Global Navigation Satellite Systems (GNSS).²³ While we acknowledge that we have discretion to grant requests to accept late-filed pleadings, we have exercised that discretion when we find the information in the late-filed pleading is particularly helpful in resolving one or more issues in a proceeding.²⁴ In this case, we note that part of the Post Bankruptcy Petition Notice exhibit consists of articles already filed confidentially in Exhibit 4 to the Licensees' Extension Requests.

9. After reviewing the two-part exhibit attached to the Skybridge comments, we find that the Post Bankruptcy Petition Notice is not helpful in resolving any issues in this proceeding because it does not provide information that would call into question our finding in this Order, as explained below, that the failure to construct the paging licenses was because of voluntary business decisions, and it has no bearing on whether Skybridge has satisfied the Commission's standards for granting either an extension or waiver of the applicable construction requirements. Accordingly, and regardless of any restraint on Havens' ability to communicate with the Commission between March 11, 2016, the date on which Skybridge filed its voluntary bankruptcy petition, and May 6, 2016, the date on which the Bankruptcy Court dismissed the petition, we deny Skybridge's "Request to Accept" its late-filed comments and dismiss the Post Bankruptcy Petition Notice in its entirety.²⁵

B. Licensees' Extension Requests

10. After careful review of the record in this proceeding, including the arguments presented by the Licensees, EWA, and the Receiver, we deny the Extension Requests filed by ITL, Skybridge, and V2G because the Licensees have not constructed any facilities or provided any actual service in their licensed areas and the failure to do so was because of voluntary business decisions made by the Licensees. If a licensee fails to meet the construction requirements under Section 22.503(k) of the Commission's rules by the expiration of the construction period, its license terminates automatically without specific Commission action on the date the construction period expires, unless the Commission grants an extension of the deadline for completing construction or waives the construction requirements.²⁶ We may grant a waiver request, pursuant to Section 1.925 of the Commission's rules, if it is shown that: (1) the underlying purpose of the rule would not be served or would be frustrated by application to the instant case, and that a grant of the requested waiver would be in the public interest; or (2) in view of unique or unusual factual circumstances of the instant case, application of the rule would be inequitable,

²³ *Id.* at Exh. 1. According to Skybridge, the articles in the exhibit describe "technologies, systems, applications, and market needs" that "are proven and compelling as to the current generation," ... and "[b]ackward-looking and stagnant perspectives and actions on modern-day wireless and radio location is not viable and should not be supported by the nations' authority over radio spectrum, the FCC." *Id.*

²⁴ See *Hughes Network Systems*, 20 FCC Rcd at 8082-83, para. 6 (stating that while we have discretion to grant motions to accept late-filed pleadings, we have exercised that discretion when we find that the information in the late-filed pleading is particularly helpful in resolving one or more issues in the proceeding ... but that the commenter in this case was mistaken in assuming it had provided helpful and sufficient information in its late-filed comments to do so).

²⁵ See *BDPCS, Inc. v FCC*, 351 F.3d 1177, 1182-84 (D.C. Cir. 2003) (explaining that a court must affirm an agency decision properly dismissing a suit on procedural grounds regardless of the agency's consideration of the substantive merits).

²⁶ 47 CFR § 1.946(c); see *id.* §§ 1.955(a)(2) (providing that "authorizations automatically terminate (in whole or in part as set forth in the service rules), without specific Commission action, if the licensee fails to meet applicable construction or coverage requirements (citing § 1.946(c))"; 22.503(k) (providing that failure by an MEA or EA licensee to meet either the three-year or five-year coverage requirements, or alternatively, the substantial service requirements no later than five years after initial grant of the authorization, will result in automatic termination of authorizations for those facilities that were not authorized, constructed, and operating at the time the geographic area authorization was granted).

unduly burdensome or contrary to the public interest, or the applicant has no reasonable alternative.²⁷

11. Pursuant to Section 1.946 of the Commission's rules, licensees may request an extension of time to meet the applicable construction requirements,²⁸ and the requests may be granted if the licensee shows that failure to meet the construction deadline is because of an involuntary loss of site or other causes beyond the licensee's control.²⁹ Section 1.946 also lists specific circumstances where extension requests will not be granted, including delays caused by a failure to obtain financing, because the license undergoes a transfer of control, or because the licensee fails to order equipment in a timely manner.³⁰ The applicable extension standard must be considered in conjunction with Section 309(j) of the Communications Act, as amended, which states that the Commission shall include performance requirements to ensure prompt delivery of services, to prevent stockpiling and warehousing of spectrum by licensees, and to promote investment and deployment of new technologies and services.³¹

12. In this proceeding, Licensees state that they have conducted due diligence and now need an additional five years to implement a service plan that would combine their paging licenses with spectrum from authorizations held by other Warren Havens licensees in a nationwide multi-cell system based on Meteor Burst propagation technology deployed in the 35-50 MHz range.³² Licensees state that, over several years, they have obtained multiple "sub-GHz range spectrum licenses" in "the lower 900 megahertz band" (Location Monitoring Service (LMS), Multiple Address Service (MAS), and some Part 22 licenses), "lower 200 megahertz band" (Automated Maritime Telecommunications System (AMTS) licenses), and "the 35 and 43 megahertz bands"³³ that they could use to support technologies and systems for providing, for example, nationwide delivery of Network Real-Time Kinematic (NRTK) "GPS/GNSS correction data for high occupancy location (HALO)/precise Position, Navigation and Timing (pPNT)."³⁴ Noting that Skybridge is a non-profit entity, Licensees assert that by combining their paging spectrum with other services, the paging spectrum "can be put to the best and most robust uses," including "for non-profit services in support of federal and other governmental agency programs and goals of nationwide scope."³⁵

13. We initially note that the business strategies and arguments presented in the Extension Requests are similar, and in some ways identical, to the business strategies and arguments presented in numerous filings that Warren Havens licensees made from 2007 to 2013, with respect to requests to extend construction deadlines in the 220 MHz service. In each 220 MHz proceeding, the licensees presented a business strategy to combine spectrum from various Warren Havens' licenses to provide wide-area service in the future that relied on the potential of certain technologies, including Intelligent

²⁷ *Id.* § 1.925(b)(3)(i)-(ii).

²⁸ *Id.* § 1.946(e). The request must be filed before the expiration of the coverage period. *Id.*

²⁹ *Id.* § 1.946(e)(1).

³⁰ *Id.* § 1.946(e)(2)-(3).

³¹ 47 U.S.C. § 309(j)(4)(B).

³² Extension Requests at 4-9. The other licensees referenced in the Extension Requests include Environmental, Telesaurus Holdings GB LLC and Verde. *Id.* at 3. According to Exhibit 2 included with the Extension Requests, Meteor Burst or Meteor Scatter communication systems reflect radio waves off small meteor trails the size of dust particles as they burn up in the upper atmosphere. *Id.*, Exh. 2 at 1. The Exhibit further explains that powerful transmitters send short signals (probes) into space and if by chance a meteor trail appears in the right place and the right time, the signal is reflected toward the Earth's surface and a remote station is able to receive the signal at a distance of up to 1500 kilometers (approximately 932 miles). *Id.*

³³ *Id.* at 6.

³⁴ *Id.* at 9.

³⁵ *Id.* at 5.

Transportation System and specifically NRTK technology,³⁶ and LTE-like technology. The licensees also stated that Skybridge, in particular, would use the licenses in support of “federal and other government goals.”³⁷ The Division denied the requests in each of the 220 MHz proceedings finding that the licensees had not built any facilities or provided any actual service in their licensed areas, and that the licensees’ failure to meet their construction requirements was because of voluntary decisions to pursue business plans based upon unsupported technology instead of obtaining equipment and meeting their obligations under Commission rules.³⁸

14. As was the case in the Warren Havens 220 MHz proceedings, the Paging Licensees in this proceeding did not construct any of their paging licenses or provide any service, substantial or otherwise, in their licensed areas over the five-year construction period allowed under Commission rules. Nor do they specifically plead any of the elements required for an extension under Section 1.946 or a waiver under Section 1.925 of the Commission’s rules. Rather, the Paging Licensees contend that they have conducted due diligence and found “Meteor Burst or [Meteor Burst] radio services, to be unique, highly cost effective, and compelling for ... many reasons.”³⁹ In particular, the Licensees argue (1) that their plan “should be deemed to be for new, advanced nationwide services” that warrant a 10-year construction period; (2) there is currently no demand for paging licenses, including in the secondary market; (3) the only effective spectrum for Meteor Burst radio services is in the 35-50 MHz range and an

³⁶ Real Time Kinematic (RTK) satellite navigation is a technology used to enhance the precision of position data derived from satellite-based positioning systems (global navigation satellite systems, GNSS) such as GPS. Wikipedia, https://en.wikipedia.org/wiki/Real_Time_Kinematic (last visited April 27, 2016).

³⁷ Under Commission rules, 220 MHz licensees are required to meet five- and ten-year construction deadlines. In 2004, the Bureau extended the initial five-year construction deadline from November 5, 2004, to November 5, 2007, for many licenses, including 220 MHz authorizations held by the Warren Havens licensees. *Request of Warren C. Havens for Waiver or Extension of the Five-Year Construction Requirement for 220 MHz Service Phase II Economic Area and Regional Licensees*, Memorandum Opinion and Order, 19 FCC Rcd 12994 (WTB 2004). As the three-year extension expired, certain Warren Havens licensees – Telesaurus VPC, LLC (Telesaurus), Verde and Skybridge – filed several pleadings seeking further extension of the five-year deadline for 394 licenses authorized in the 220 MHz service. Those licensees argued that they had conducted “extensive due diligence” with respect Terrestrial Trunked Radio (TETRA), Digital Mobile Radio (DMR), and other Intelligent Transportation Systems (ITS), and specifically NRTK services; that the future use of spectrum in conjunction with 900 MHz LMS licenses held by Havens-affiliated entities constituted the best use of the spectrum; and that Skybridge, “a nonprofit corporation that is legally required to use licenses in direct support of government agency needs and other public interest purposes,” would use the licenses. *Warren C. Havens, Skybridge Spectrum Foundation, Verde Systems, LLC and Its Predecessors In Interest, Telesaurus VPC, LLC Applications for Waiver and/or Extension of the Five and Ten Year Construction Deadlines, Applications for Renewal*, Order, 27 FCC Rcd 5841, 5844-47, paras. 5, 8-9, 12 and 5851, ¶ 23 (WTB 2012) (*Havens 220 MHz Termination Order*), recon. denied, Order on Reconsideration, 29 FCC Rcd 1019 (WTB 2014) (*Havens 220 MHz Reconsideration Order*), pet. for reconsideration pending, Petition for Reconsideration of February 3, 2014 Order on Reconsideration (Mar. 5, 2014).

In 2013, another licensee controlled by Warren Havens, Environmental, sought a 45-month extension of the construction deadline for its 220 MHz licenses to match the construction deadline for the AMTS licenses held by Environmental and ITL. Environmental argued that an extension was necessary to “implement a joint business plan” along with other Warren Havens licensees – Telesaurus, Verde, ITL, V2G, and Skybridge – that would result in “the highest and best use of the spectrum;” and that it merited the extension to implement “LTE-like technology ... in the lower narrow bands (in this joint plan, principally 217-222 MHz)” in support of “federal and other government goals of smart transport, smart energy, and environmental-protection systems.” *Environmental LLC Applications for Extension of the Five Year Construction Deadlines*, Order, 29 FCC Rcd 2942, 2943-44, paras. 3, 7 (WTB 2014) (*Environmental 220 MHz Order*), pet. for reconsideration pending, Petition for Reconsideration of March 20, 2014 Order (Apr. 21, 2014).

³⁸ *Havens 220 MHz Termination Order*, 27 FCC Rcd at 5848-52, paras. 17-25; *aff’d*, 29 FCC Rcd at 1034, para. 35; *Environmental 220 MHz Order*, 29 FCC Rcd at 2944, para. 5.

³⁹ Extension Requests at 6.

extension is needed to put the assembly of sub-GHz spectrum (900, 200, 35 and 43 MHz bands) to “the highest and best use;” and (4) Licensees are researching various technologies and systems to provide “NRTK GPS/GNSS correction data for high accuracy location (HALO)/pPNT,” and in 2015, they purchased “transceivers and associated data logger devices” that “will be used to test” Meteor Burst technical characteristics.⁴⁰

15. We initially find Licensees’ argument that the services they plan to provide constitute “new, advanced services” and should therefore be granted 10-year construction periods⁴¹ is without merit. The Commission, through rulemaking proceedings, has deliberately created separate rules for each of the services it oversees and has determined the construction deadlines for each service purposefully through those rulemaking proceedings.⁴² Moreover, while the Commission has allowed licensees significant flexibility in how they choose to use paging spectrum, Licensees have not provided any precedent demonstrating that the Commission has adjusted construction or coverage deadlines for paging services based on those choices.

16. We also reject Licensees’ argument that an extension is needed to put the assembly of sub-GHz spectrum to the highest and best use. Regardless of whether their plan is technologically or economically viable, Licensees made a voluntary business decision not to construct their licensed facilities using available paging equipment. Instead, Licensees voluntarily decided on a business plan that requires coordination with several other entities using various types of licenses with different regulatory requirements, in a wide range of spectrum bands with differing construction deadlines. In fact, Licensees expressly dismiss using technology that currently supports the provision of service in paging bands,⁴³ a clear example of a voluntary business decision.

17. As EWA states, “[t]he decision to construct no facilities and provide no service within the prescribed period was a business choice with entirely predictable consequences”⁴⁴ and “the Commission has declined to protect licensees from the entirely predictable results of their own business decisions.”⁴⁵ We find that Licensees made a voluntary business decision to pursue business strategies that depend on the potential merits of Meteor Burst or NRTK technology to provide wide-area service in the paging bands,⁴⁶ and we have repeatedly denied licensees’ requests for relief from their construction requirements for the consequences of voluntary business decisions.⁴⁷ In fact, we have consistently found

⁴⁰ *Id.* at 7-9.

⁴¹ *Id.* at 7.

⁴² See *Environmental 220 MHz Order*, 29 FCC Rcd at 2946-47, para. 13 (stating same in rejecting Environmental’s argument that 10 years was the proper construction period for 220 MHz licenses because the Commission had established ten-year construction deadlines for other services, including AMTS).

⁴³ See Extension Requests at 7 (stating that the due diligence Licensees have performed “creates more value to the ‘public interest’ ... than construction and operation with current technology for current applications”).

⁴⁴ EWA Comments at 5.

⁴⁵ *Id.* at 3.

⁴⁶ An important aspect of Licensees’ business plan is to provide wide-area (ultimately nationwide) service. Licensees expressly state in their Extension Requests that lower band paging spectrum (35 and 43 MHz) “cannot be controlled in wide-area multi-cell systems, where the same spectrum is reused in a cellular reuse plan, due to its long-range propagation over land, and its skywave ‘skip’ propagation that can cause co-channel (and some adjacent channel) interference.” Extension Requests at 4. The Licensees contend they have performed due diligence and that they can overcome the propagation and interference issues posed by lower frequency bands, *id.* at 6, but provide no evidence that they can do so.

⁴⁷ See *Havens 220 MHz Termination Order*, 27 FCC Rcd at 5851-52, para. 24 (stating same with respect to the Warren Havens 220 MHz licensees after finding an extension in that proceeding would not serve the underlying purpose of the construction rules or the public interest under Section 1.925 of the Commission’s rules).

that voluntary business decisions are not circumstances beyond the licensee's control within the meaning of Section 1.946 and, as such, do not constitute a valid basis for regulatory relief.⁴⁸ For the same reasons, we find that Licensees have not shown any unique circumstances that would warrant a waiver nor would a waiver of the construction deadline serve the underlying purpose of the construction rules or the public interest within the meaning of Section 1.925. As in the Warren Havens 220 MHz proceedings, the Licensees in this proceeding have voluntarily chosen not to construct facilities within their licensed areas, and they have not provided sufficient evidence that their plans for the use of the paging licenses would lead to near term use of the spectrum in question.⁴⁹

18. We also find Licensees' claim of "due diligence" regarding the future use of Meteor Burst or NRTK technology is irrelevant because no material progress has been made toward actual construction or the provision of services.⁵⁰ Licensees discuss technologies and potential service⁵¹ and attach exhibits to their Extension Requests intending to show that they have engaged in due diligence on technologies and systems that would put their licensed paging spectrum to its highest and best use.⁵² The

⁴⁸ *Havens 220 MHz Termination Order*, 27 FCC Rcd at 5849, para. 19. See e.g., *Alligator Communications, Inc.*, Memorandum Opinion and Order, 30 FCC Rcd 2823, 2826-27, para. 13 (WTB 2015) (*Alligator Communications*) (assurance to develop and deploy Shared Use Repeater Station technology amounted to an after-the-fact promise to construct such that grant of a waiver would undermine the public interest safeguards of establishing construction requirements); *Longhorn Communications Inc.*, Letter, 26 FCC Rcd 6716 (WTB 2011) (licensee's claim that it was exploring software defined radio (SDR) solutions for encryption data and that critical infrastructure entities were expressing interest were speculative options that failed to demonstrate or provide material evidence that further regulatory relief would result in the licenses being put to use in the near term); *Redwood Wireless Minnesota, L.L.C.*, Order, 17 FCC Rcd 22416 (WTB 2002) (*Redwood*) (construction delays resulting from business disputes were exercise of business judgment and were not outside licensee's control); *Eldorado Communications LLC*, Order, 17 FCC Rcd 24613 (WTB 2002) (*Eldorado*) (licensee's determination to initially deploy TDMA system and subsequently to adopt GSM with months remaining before construction deadline was business decision within its control); *Bristol MAS Partners*, Order, 14 FCC Rcd 5007 (WTB 1999) (equipment installation or delivery not delayed for some unique reason and licensee failing to obtain equipment was business decision); *AAT Electronics Corporation*, Memorandum Opinion and Order, 93 F.C.C. 2d 1034 (1983) (decision not to market service aggressively because of equipment uncertainties is within licensee's control); *Business Radio Communications Systems, Inc.*, Memorandum Opinion and Order, 102 F.C.C. 2d 714 (1985) (construction delay caused by zoning challenge not a circumstance beyond licensee's control); *Texas Two-Way, Inc.*, 98 F.C.C. 2d 1300 (1984), *aff'd sub nom.*, *Texas Two-Way, Inc. v. FCC*, 762 F.2d 138 (D.C. Cir. 1985) (licensee is responsible for delay resulting from interference caused by construction adjacent to construction site because site selection was an independent business decision).

⁴⁹ See *Havens 220 MHz Termination Order*, 27 FCC Rcd at 5848, para. 17 and 5852, para. 24 (stating same with respect to the Warren Havens 220 MHz licensees).

⁵⁰ See *Havens 220 MHz Termination Order*, 27 FCC Rcd at 5850, para. 20 (stating that the Warren Havens 220 MHz licensees' claimed "due diligence" regarding "the future use of ITS, TETRA, and N-RTK services is irrelevant because no material progress was made towards actual construction or provision of services").

⁵¹ See, e.g., Extension Requests at 9 (explaining that "[t]he technologies described in Exhibit 4 [which was filed as confidential] are in large part deployed around the world, and [are] also being further developed for various forms of radio services, from radio astronomy by government agencies to two way radio for commercial services" ... and, according to Licensees, "these new technologies apply advanced computer hardware and software for phased antenna arrays and other advancements, achieving major improvements over past radio technologies and systems, including far greater spectrum efficiencies and reduction of RF power levels and noise"); *id.* at 5, n.6 (stating that "only sub-GHz spectrum ... is suitable for cost effective very wide area coverage wireless networks ... that is needed for the main 'mission critical' systems and services: 'smart' or 'intelligent' transportation systems, energy production and distribution systems, precision efficient agriculture and natural resource industries [forestry, mining, etc.], natural environment monitoring and protection"). As already noted, Licensees also state that "the best use" of the paging spectrum is for non-profit services in support of federal and other governmental agency programs and goals of nationwide scope." *Id.* at 6.

⁵² See *id.* at Exhs. 2 and 3.

submissions, however, do not address issues relevant to the disposition of this case. The exhibits include a European paper on Meteor Burst technical characteristics as well as a copy of a United States Patent for a system for transmitting RTK satellite positioning system data by using paging spectrum.⁵³ Neither the Licensees' discussions on technology nor the exhibits, however, amount to a showing that the Licensees have actually deployed any such technology or system, or satisfied the elements of the applicable extension or waiver standard.⁵⁴

19. The only objective evidence of an attempt at progress toward some type of technology development is the Licensees' purchase of "transceivers and data logger devices." That purchase, however, occurred in 2015, several years after grant of the licenses and within months of the second construction deadline.⁵⁵ We have previously found that a licensee's purchase of equipment two months before its construction deadline demonstrated an overall lack of diligence toward meeting its construction deadline.⁵⁶ Moreover, in this case, Licensees state that they purchased equipment for purposes of testing Meteor Burst propagation technology.⁵⁷ They do not state that they intend to use the purchased equipment to construct any facilities or provide any service. Licensees simply explain that they are "researching" technologies and systems⁵⁸ and we are not inclined to grant an extension based on a general statement of intent to use Meteor Burst, NRTK, or some other type of technology when Licensees have done little toward constructing their licensed market areas.⁵⁹

20. Licensees' assertion that some of the best uses of the paging spectrum would be "for non-profit services in support of federal and other governmental agency programs of nationwide scope"⁶⁰ is also irrelevant, once again, because no material progress has been made toward actual construction or the provision of services. The Extension Requests also note that Skybridge is a non-profit corporation

⁵³ Exhibit 2 of the Extension Requests includes a European Conference of Postal and Telecommunications Administrations (CEPT) European Radiocommunications Committee (ERC) paper entitled "Meteor Burst Applications" dated June 2000, discussing characteristics of Meteor Scatter communication systems. *Id.* at Exh. 2. Exhibit 3 to the Extension Requests includes a copy of the United States Patent held by Trimble Navigation Limited filed on February 21, 2003, for a method and system for transmission of RTK satellite positioning system data by paging. *Id.* at Exh. 3 at 1.

⁵⁴ See *Havens 220 MHz Reconsideration Order*, 29 FCC Rcd at 1033, para. 33 (stating same with respect to the Warren Havens 220 MHz licensees). The Licensees also attached Exhibits 1 and 4 as confidentially filed materials. While we do not discuss the materials provided in those exhibits, we reject them for the same reasons.

⁵⁵ See Extension Requests at 6 (stating that the "Licensees have due diligence performed [sic] ... the HC Licensees purchase *earlier this year* of a large stock of MB radio communications equipment" (emphasis added)).

⁵⁶ *Redwood*, 17 FCC Rcd at 22420-21, paras. 8-9; *c.f.* *Eldorado*, 17 FCC Rcd at 24616-17, paras. 8-9 (denying extension of the five-year construction deadline for failure to demonstrate the level of diligence expected of a licensee in meeting construction requirements where the licensee had made little more than preliminary progress, including selecting only *potential* equipment, toward constructing its system).

⁵⁷ Extension Requests at 8-9.

⁵⁸ *Id.* at 9.

⁵⁹ See *Redwood*, 17 FCC Rcd at 22421, para. 9. In *Redwood*, the licensee intended to provide high speed data services in rural areas. The Commercial Wireless Division (CWD) found that "[w]hile we agree that the provision of high speed data services would provide benefits to rural customers, the Petitioners simply state that they are 'developing' plans to introduce high speed services." *Id.* CWD concluded that "we are not inclined to grant a waiver based on a general statement of intent to serve rural areas or provide high speed data services when the Petitioners have done little toward constructing in the Brainerd and Grand Forks BTAs." *Id.*; see *Eldorado*, 17 FCC Rcd at 24617, para. 9 (declining, where the licensee did not serve any percentage of the population in its licensed area, to grant a waiver "based on a general statement of intent to serve rural areas when Eldorado has done little towards constructing" in the market).

⁶⁰ Extension Requests at 6-7.

committed “to engage only in public interest wireless [sic] to help meet federal and other government agency goals for . . . mission critical applications.”⁶¹ The mere fact that Licensees are considering providing non-profit services or that one of the Licensees is a non-profit organization does not entitle the Licensees to an extension or a waiver of the construction deadlines. A choice to provide non-profit services is yet another example of a voluntary business decision and the Commission makes no distinction between for-profit and non-profit entities for purposes of determining compliance with construction requirements and the Licensees have provided no precedent to support a deviation from that policy.⁶²

21. With regard to the appropriate use of spectrum, Licensees correctly state that the Commission is concerned with ensuring the highest and best use of radio spectrum. As the Division stated in the Warren Havens 220 MHz proceeding, one of the ways the Commission promotes putting spectrum to its highest and best use is through rules that require licensees to actually construct facilities and deploy service.⁶³ While licensees are free to investigate, invest in, and pursue a wide range of technologies and service options, regulatory compliance is ultimately demonstrated by material accomplishments in the use of the spectrum resource to provide service.⁶⁴ Licensees focus solely on their own interpretation of the highest and best use of the paging spectrum, to use Meteor Burst and NRTK technology, while ignoring the essential requirement to provide service within the timeframe set forth in the Commission’s rules.⁶⁵

22. We also reject Licensees contention that the Division’s decision in *Jamestown Manufacturing Corporation* supports grant of their Extension Requests.⁶⁶ In that case, the Division granted Jamestown Manufacturing Corporation (Jamestown) a waiver that extended the five-year construction deadline for its Part 22 paging licenses by three years.⁶⁷ Jamestown stated that it intended to use its paging licenses to provide to critical infrastructure groups a “precision-based GPS service called RTK GPS” that would cover over 50 percent of the lower 48 states including large portions of rural areas.⁶⁸ Licensees argue that their requests involve not only the same facts – that they plan on providing NRTK service to critical infrastructure groups on a nationwide basis – but that their plans are now “far more needed and feasible.”⁶⁹

23. Both EWA and the Receiver state in their comments that *Jamestown Manufacturing Corporation* is not factually analogous to this case.⁷⁰ We agree. While the Division took into consideration Jamestown’s proposed customers and geographic coverage, it did not grant Jamestown a waiver of the construction requirements based on sweeping statements suggesting possible ways to use

⁶⁸ *Id.* at 764-66, 769, paras. 2, 6-7, 14.

⁶⁹ Extension Requests at 11-12.

⁷⁰ EWA Comments at 2, n.2; Receiver Reply at 5. In Reply Comments, the Receiver contends that “[a]lthough not factually analogous, Jamestown exemplifies Commission recognition of the challenges involved in enforcing build-out requirements for licensees while encouraging the deployment of viable wireless services utilizing novel technologies.” Receiver Reply at 5.

spectrum. Rather, the Division granted Jamestown waiver of the construction deadline, first, because Jamestown had “demonstrated diligence toward constructing its system *since the beginning of its license term*.”⁷¹ The Division also found that Jamestown demonstrated its commitment to using its spectrum by actually constructing facilities in one market near the end of the coverage period within two months of receiving a reliable amplifier, and once it secured the necessary equipment, Jamestown promptly adopted an aggressive build-out schedule that called for the licensee to construct almost 700 licenses within a three-year period.⁷² The Licensees in this proceeding have not attempted to construct any facilities under their licenses, nor have they demonstrated progress that would be considered diligence toward actual construction. Thus, *Jamestown Manufacturing Corporation* is factually and legally distinct from the Extension Requests and the Division’s actions in that proceeding have no precedential effect here.

24. We also reject the Licensees’ argument that extensions should be granted because of current demands in the paging market. Again, Licensees made a voluntary business decision to obtain paging licenses through the Commission’s auction process. We also agree with EWA, that the condition of the paging market “is hardly new information in 2015 and was not new information in 2010 when the [Licensees] purchased the EA licenses”⁷³ and “a failure to utilize spectrum is not justified based on a lack of competitive demand for a particular channel.”⁷⁴ Moreover, we note that prior to the auction, potential bidders received clear notice that they must evaluate the risks of obtaining licenses in an auction and that they would be expected to comply with regulations, including the construction requirements set forth in the Commission’s rules, regardless of the business plans or strategies they ultimately chose to pursue. In its public notice setting forth the procedures for Auction 87, the Bureau reminded potential bidders that:

they are solely responsible for investigating and evaluating all technical and marketplace factors that may have a bearing on the value of the licenses being offered in this auction. The Commission makes no representations or warranties about the use of this spectrum for particular services. Applicants should be aware that a Commission auction represents an opportunity to become a licensee subject to certain conditions and regulations. The auction does not constitute an endorsement by the Commission of any particular service, technology or product, nor does a Commission license constitute a guarantee of business success. Applicants should perform their individual due diligence before proceeding as they would with any new business venture.⁷⁵

The public notice later repeated its warning that potential bidders “are solely responsible for identifying associated risks and for investigating and evaluating the degree to which such matters may affect their

⁷¹ *Jamestown Manufacturing Corporation*, 23 FCC Rcd at 768, para. 13 (emphasis added). As the Division further explained, “Jamestown entered into negotiations to have a customized amplifier built almost five years prior to its construction deadline and ordered the amplifier more than four years prior to its construction deadline.” *Id.* The Division continued “[a]lthough Jamestown encountered several setbacks throughout the process of having a customized amplifier developed, based on the facts before us, we find that Jamestown acted responsibly and diligently to resolve the problems that it faced.” *Id.*

⁷² *Id.* at 768-69, para. 14.

⁷³ EWA Comments at 3 (citing Extension Requests at 4).

⁷⁴ *Id.* at 4.

⁷⁵ *Auction of Lower and Upper Paging Bands Licenses Scheduled for May 25, 2010 Notice and Filing Requirements, Minimum Opening Bids, Upfront Payments, and Other Procedures for Auction 87*, Public Notice, 25 FCC Rcd 6333, 6344, para. 41 (WTB 2010) (*Auction 87 Procedures Public Notice*). This same reminder was set forth as early as 1997, in the Commission’s proceeding implementing competitive bidding in the paging bands. *Revision of Part 22 and Part 90 of the Commission’s Rules to Facilitate Future Development of Paging Systems, Implementation of Section 309(j) of the Communications Act – Competitive Bidding*, Second Report and Order and Further Notice of Proposed Rulemaking, 12 FCC Rcd 2732, 2737 para. 2 (1997).

ability to bid on, otherwise acquire, or make use of licenses being offered.”⁷⁶

25. Finally, we reject the Receiver’s argument that “the recent assumption of control over the licensees by Ms. Uecker” constitutes “changed business circumstances” that can be the basis for an extension of the construction period in this case.⁷⁷ The Receiver cites *MariTEL, Inc.*⁷⁸ to support her argument. We again find this case is not factually analogous to the instant proceeding. In *MariTEL, Inc.*, the licensee decided to transition its established business from voice to data network communications well ahead of the construction deadline because Commercial Mobile Radio services were overtaking the demand for maritime VHF Public Coast voice services. The Receiver has not shown that a specific change in the business circumstances of the Paging Licensees justifies an extension. The Receiver argues only that a change in control of the Licensees *after* expiration of the five-year construction deadline constitutes a basis for extending the coverage deadlines for those licenses. We disagree. Moreover, Section 1.946 of the Commission’s rules expressly states that extension requests will not be granted because the license undergoes a transfer of control, and extension requests will not be granted solely to allow a transferee to complete facilities that the transferor failed to construct.⁷⁹

26. The Bureau is charged with exercising its judgment to determine if it is in the public interest to allow licensees to retain their licenses consistent with Commission rules, policies and goals for the use of these public resources. In our judgment, more time is not warranted by the demonstration provided; Licensees made a business decision to obtain the paging licenses and had adequate time to provide service, but chose instead not to build and to seek more time to construct.⁸⁰ We have given serious consideration to Licensees’ Extension Requests, despite the fact that Licensees did not plead the elements of the Commission’s extension standard in those requests by identifying any causes beyond their control that prevented them from meeting the Commission’s construction requirements. Nor did the Licensees plead the elements of the Commission’s waiver standard by showing that an extension would serve the underlying purpose of the construction and coverage requirements, or that they were faced with unique or unusual circumstances that would warrant a waiver of the construction requirements. As the Division stated in the Warren Havens 220 MHz proceeding, the public interest cannot be served by promises of future deployment.⁸¹ At some point, theory must give way to action and “due diligence” must yield tangible results.⁸²

27. We therefore find that the arguments raised by the Paging Licensees do not justify further extension of the construction deadlines for the 2,132 paging licenses at issue in this proceeding. Granting the Licensees’ Extension Requests would harm the public interest because it would run counter to established Commission precedent and could encourage other present and future licensees to voluntarily pursue regulatory relief instead of providing actual service in their licensed areas.⁸³ Indeed, we believe that granting the Extension Requests would undermine the fundamental goals of the Commission’s

⁷⁶ *Auction 87 Procedures Public Notice*, 25 FCC Rcd at 6345, para. 45; *c.f. Alligator Communications*, 30 FCC Rcd at 2826, para. 11 (finding that the pace of development of the MAS market, by itself, is not a relevant consideration for granting an extension because the decision to enter was a business decision made by the licensee).

⁷⁷ Receiver Reply at 5.

⁷⁸ *MariTEL, Inc. Request to Extend Construction Deadline for Certain VHF Public Coast Station Geographic Area Licenses*, Memorandum Opinion and Order, 22 FCC Rcd 14074 (2007).

⁷⁹ 47 CFR § 1.946(e)(3).

⁸⁰ *See Environmental 220 MHz Order*, 29 FCC Rcd at 2949, para. 18 (finding same).

⁸¹ *Havens 220 MHz Reconsideration Order*, 29 FCC Rcd at 1033, para. 35.

⁸² *Id.*

⁸³ *See Havens 220 MHz Termination Order*, 27 FCC Rcd at 5852, para. 24 (stating same with respect to the Warren Havens 220 MHz licensees).

performance requirements, specifically the promotion and rapid deployment of services to the public and the prevention of spectrum warehousing.⁸⁴ Finally, we note that our action today is consistent with our treatment of other Auction 87 Part 22 geographic area licensees that, rather than taking any steps toward construction of their licenses, sought additional relief from their coverage requirements.⁸⁵

IV. CONCLUSION

28. Accordingly, we find that: (1) Licensees have not provided actual service in their licensed areas; (2) this failure was not caused by circumstances beyond their control; (3) extensions would not serve the underlying purpose of the construction and coverage requirements and Licensees have not shown unique or unusual circumstances that would warrant waiver of the construction deadlines; (4) the claimed due diligence, conceptual plans, and other factors described in Licensees' filings are voluntary business decisions that do not support an extension of the construction deadlines; and (5) allowing Licensees to continue to hold the paging licenses without constructing facilities or providing any actual service would undermine the purpose of the Commission's rules and Section 309(j) of the Communications Act.

V. ORDERING CLAUSES

29. Accordingly, IT IS ORDERED that, pursuant to Sections 4(i) and 303(r) of the Communications Act, as amended, 47 U.S.C. §§ 154(i), 303(r), and Sections 0.131, 0.331, 1.3, and 1.46(a) of the Commission's rules, 47 C.F.R. §§ 0.131, 0.331, 1.3, 1.46(a), the Request to Accept the Post Bankruptcy Petition Notice, Supplemental Filing, and Notice of Subsequent Filing filed on March 14, 2016, by Skybridge Spectrum Foundation IS DENIED.

30. IT IS FURTHER ORDERED that, pursuant to Sections 4(i) and 303(r) of the Communications Act, as amended, 47 U.S.C. §§ 154(i), 303(r), and Sections 0.131, 0.331, 1.3, and 1.46(a) of the Commission's rules, 47 C.F.R. §§ 0.131, 0.331, 1.3, 1.46(a), the Post Bankruptcy Petition Notice, Supplemental Filing, and Notice of Subsequent Filing filed on March 14, 2016, by Skybridge Spectrum Foundation IS DISMISSED.

31. IT IS FURTHER ORDERED that, pursuant to Sections 4(i) and 303(r) of the Communications Act, as amended, 47 U.S.C. §§ 154(i), 303(r), and Sections 0.131, 0.331, 1.925 and 1.946(c) and (e), 1.955(a)(2), and 22.503(k) of the Commission's rules, 47 C.F.R. §§ 0.131, 0.331, 1.925,

⁸⁴ See *id.* at 5849, para. 17 (stating same with respect to the Warren Havens 220 MHz licensees); *Havens 220 MHz Reconsideration Order*, 29 FCC Rcd at 1033, para. 32 (finding that granting a waiver or extension would undermine the very purpose of the construction obligations, contradict Commission precedent, encourage spectrum warehousing, and run counter to the public interest); *Environmental 220 MHz Order*, 29 FCC Rcd at 2944, para. 5 (stating same with respect to the Environmental licenses).

⁸⁵ See ULS File No. 0007033496 (WQMS687), filed by PHI Service Company, Attach. "Notice of Dismissal" (June 30, 2016); and ULS File Nos. 0007012446 (WQTH949), 0007012473 (WQTH941), and 0007012498 (WQUY374), filed by the State of Tennessee Department of Safety, Attach. "Notice of Dismissal" (June 30, 2016) (Notices dismissing construction notifications, denying requests for extension of time to complete construction, and terminating licenses automatically); see also, ULS File Nos. 0007135353 (WQNI737); 0007135356 (WQNI740); 0007135357 (WQNI741); 0007135358 (WQNI742); 0007135359 (WQNI743); 0007135372 (WQNI744); 0007135373 (WQNI745); 0007135378 (WQNI750); 0007135379 (WQNI751); and 0007135380 (WQNI752), filed by PacifiCorp, Attach. "Notice of Dismissal" (July 12, 2016); and ULS File Nos. 0007066625 (WQPU479); 0007066645 (WQPU480); 0007066659 (WQPU481); 0007066685 (WQPU483); 0007066692 (WQPU484); 0007066747 (WQPU485); 0007066756 (WQQC579); and 0007066761 (WQQC581), filed by the State of Missouri, Attach. "Notice of Dismissal" (July 26, 2016) (Notices dismissing construction notifications and terminating licenses automatically). In addition, KAMO Electric Cooperative, Inc. withdrew its requests for extension of time to complete construction for the five licenses, where it did not take any steps toward constructing any facilities or providing any service prior to the November 3, 2015 construction deadline, and cancelled the licenses. ULS File Nos. 0007236111 (WQMT887); 0007236113 (WQMT891); 0007236115 (WQMT895); 0007236117 (WQMT896); and 000723610 (WQMT897), filed by KAMO Electric Cooperative, Inc. (Apr. 19, 2016).

1.946(c), 1.946(e), 1.955(a)(2), and 22.503(k), the 2,132 requests for extension of time to complete construction of the Part 22 paging licenses listed in Attachment A filed on November 3, 2015, by Intelligent Transportation & Monitoring Wireless LLC, Skybridge Spectrum Foundation, and V2G LLC ARE DENIED. Accordingly, all licenses listed in Attachment A to this Order TERMINATED AUTOMATICALLY AS OF NOVEMBER 3, 2015.
