WIRELESS TELECOMMUNICATIONS BUREAU SEEKS COMMENT ON DROCK GAMING LLC REQUEST FOR WAIVER TO USE AIRPORT TERMINAL USE FREQUENCIES

File No. 0007192091

Comment Date: June 2, 2016

Reply Comment Date: June 17, 2016

On March 17, 2016, Drock Gaming LLC (Drock) filed the above-referenced application and request for waiver of Section 90.35(c)(61) of the Commission's Rules¹ to operate an Industrial/Business (I/B) communications system using Airport Terminal Use (ATU) frequencies within 16 kilometers of McCarran International Airport in Las Vegas, Nevada.² We seek comment on the request.

Drock operates conventional I/B Pool Station WQXC361 in the 450-470 MHz band, at its hotel and casino approximately 10 kilometers from McCarran International Airport. It filed the above-referenced application to modify its license to authorize trunked operation and add ATU frequencies 460/465.7625 MHz and 460/465.8625. Section 95.35(c)(61) provides ATU frequencies are available within 16 kilometers of the listed airports (including McCarran) only to entities furnishing commercial air transportation service for use in connection with servicing and supplying of aircraft. Drock states that its frequency coordinator performed exhaustive searches and located no I/B channels available for its trunked system.³ It also states that these channels will be used to support the safety and welfare of its employees and resort customers.⁴

We seek comment on Drock's request. Commenters should address whether the public interest would be served by granting a waiver to allow Drock to operate on ATU frequencies. In particular, we seek comment from parties whose operations could be impacted by grant of the waiver.
