DIRS remains activated in the following areas:

FLORIDA: Bay, Calhoun, Citrus, Dixie, Escambia, Franklin, Gadsden, Gulf, Hernando, Holmes, Jackson, Jefferson, Leon, Levy, Liberty, Okaloosa, Santa Rosa, Taylor, Wakulla, Walton, Washington

¹ DIRS is a voluntary, web-based system that communications providers, including wireless, wireline, broadcast, cable and Voice over Internet Protocol providers, can use to report communications infrastructure status and situational awareness information during times of crisis.

The FCC appreciates the cooperation of all the communications providers that have voluntarily submitted data to DIRS in the aftermath of Hurricane Michael. In disaster situations, information on the operational status of communications services provides critical situational awareness and supports effective emergency response and restoration efforts. The FCC expects to continue to publish daily communications status reports while DIRS remains active for any area in connection with Hurricane Michael.
