

**Appendix B: Initial Incumbent Aggregated Holdings**

**I. AGGREGATED HOLDINGS FILE DATA DESCRIPTION**

**A. Introduction**

The file, `initial_aggregated_holdings.csv`, describes the initial consolidated and aggregated holdings of 39 GHz licensees. These data have been created using the existing license holdings as found in the Universal Licensing System (ULS) and aggregated according to the methodology described in the Initial 39 GHz Reconfiguration Procedures Public Notice.<sup>1</sup> These data are being released for licensees to review to determine whether any changes to ULS should be made no later than **April 15, 2019**. Allowed changes to the licensee information are described in the Public Notice. After any changes have been completed, the updated data will be announced by public notice and used for determining the reconfiguration proposed by the FCC, as well as other options available during the Initial Commitment process described in the Public Notice.

**B. Field Descriptions**

| Field                               | Description                                                                                                                                                                                                                                                                                                                                                     | Type               | Example                                               |
|-------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|-------------------------------------------------------|
| <code>consolidated_incumbent</code> | Consolidated Incumbent name. This is also the licensee name where there is a single named 39 GHz licensee. If multiple 39 GHz licensees are commonly controlled, all licenses held within the PEA by such licensees are consolidated under one name. A table mapping all 39 GHz licensee FRN's to the <code>consolidated_incumbent</code> name is listed below. | String             | "AT&T, Inc.",<br>"Mountain Microwave Inc"             |
| <code>market_number</code>          | The PEA number for the aggregated holdings                                                                                                                                                                                                                                                                                                                      | String             | PEA001,<br>PEA126                                     |
| <code>market_description</code>     | The locality name for the PEA                                                                                                                                                                                                                                                                                                                                   | String             | "New York, NY",<br>"Baltimore, MD-<br>Washington, DC" |
| <code>market_mhz_pops</code>        | The total number of MHz-Pops for one 100 MHz block in this PEA                                                                                                                                                                                                                                                                                                  | Integer            | 302219200,<br>272241100                               |
| <code>agg_mhz_pops</code>           | The aggregated holdings in MHz-Pops in this PEA for all licenses under the <code>consolidated_incumbent</code>                                                                                                                                                                                                                                                  | Integer            | 8211210,<br>42247120                                  |
| <code>num_blocks</code>             | The calculated number of 100 MHz block equivalents of the aggregated holdings                                                                                                                                                                                                                                                                                   | Numeric<br>{5}     | 3,<br>4.0122                                          |
| <code>round_up</code>               | Indicates whether the consolidated incumbent's partial holdings in a PEA are at least 99% of the total MHz-Pops of the PEA and therefore eligible to be rounded up to a whole license                                                                                                                                                                           | String<br>{Yes No} | Yes,<br>No                                            |

|------------------|---------------------------------------------------------|----------------|----------------|
| final_num_blocks | Total number of blocks after rounding up partial blocks | Numeric<br>{5} | 3,<br>4.0122   |

**C. Consolidated Incumbents**

The 39 GHz reconfiguration procedures require that commonly controlled 39 GHz band licensees be considered one entity for purpose of quantifying their 39 GHz band holdings. Each licensee FRN will be listed under a single consolidated incumbent name. The table below maps each current 39 GHz licensee FRN and name from ULS with the consolidated\_incumbent name that will be listed in the initial\_aggregated\_holdings.csv file.

| <b>incumbent_licensee FRN</b> | <b>incumbent_licensee name</b>                        | <b>consolidated_incumbent name</b>                    |
