I. INTRODUCTION

1. By this Public Notice, the Office of Economics and Analytics (OEA), in conjunction with the Wireless Telecommunications Bureau (WTB), announces the results of the auction of 28 GHz Upper Microwave Flexible Use Service licenses (Auction 101). Auction 101 raised a total of \$700,309,809 in net bids (\$702,572,410 in gross bids), with 33 bidders winning a total of 2,965 licenses.¹

II. AUCTION 101 RESULTS

2. Bidding in Auction 101 concluded on January 24, 2019, and certain bidding results data, including gross winning bids for each license, were made available shortly thereafter.² Under the limited information procedures established for Auctions 101 and 102, certain detailed Auction 101 results data remained non-public until after the close of bidding in Auction 102.³ With the close of bidding in the assignment phase of Auction 102 on May 28, 2019,⁴ we now announce the availability of detailed Auction 101 application and bidding information that was previously withheld, including bidders' license selections, upfront payment amounts, bidding eligibility, bids, and other bidding-related actions.

3. This section of this Public Notice highlights important information regarding the Auction 101 results data. More detailed bidding results and information are available in the "Results" section of the Auction 101 website (www.fcc.gov/auction/101), and attachments to this Public Notice summarize the results, as described below.

¹ "Gross bids" refers to the total amount of winning bids at the close of bidding and does not reflect any small business or rural service provider bidding credits claimed by eligible winning bidders that may be awarded after the auction. "Net bids" refers to the total amount of winning bids as adjusted for any small business or rural service provider bidding credits claimed by winning bidders.
