ORDER

Adopted: September 28, 2021

Released: September 28, 2021

By the Chief, Wireline Competition Bureau:

I. INTRODUCTION

1. In this Order, we resolve, in part, a petition filed by Nucla Naturita Telephone Company (NNTC) seeking a waiver of section 54.316 of the Commission's rules.¹ NNTC seeks a waiver to avoid non-compliance with its Connect America Fund (CAF) A-CAM filing obligations resulting from its failure to (a) timely upload certain buildout data into the HUBB and (b) certify certain location data that was properly filed in the HUBB.²

2. We find that NNTC has established good cause to waive our rules as to NNTC's failure to certify location data that was timely filed in the HUBB. Accordingly, as discussed below, we grant, in part, NNTC's petition for waiver. However, this Order does not address NNTC's petition for waiver regarding its failure to timely upload location data into the HUBB, and that issue remains pending.

II. BACKGROUND

3. In the *USF/ICC Transformation Order*, the Commission comprehensively reformed and modernized the high-cost component of the Universal Service Fund by, among other things, establishing the CAF to support explicitly broadband-capable networks.³ In the 2016 *Rate-of-Return Reform Order*,

the Commission adopted significant reforms to the rules governing the provision of universal service support to rate-of-return carriers.⁴ The Commission adopted a voluntary path by which rate-of-return carriers may elect model-based support, known as the Alternative Connect America Cost Model (A-CAM), for a term of 10 years in exchange for meeting defined build-out obligations of voice and broadband services.⁵

4. NNTC is a rate-of-return carrier that has received \$956,121 in annual A-CAM support to provide telecommunications services in Colorado since 2017.⁶ This support is conditioned upon NNTC meeting its deployment milestones: NNTC must deploy to 40% of its total locations by December 31, 2020; to 50% of its total locations by December 31, 2021; to 60% of its total locations by December 31, 2022; to 70% of its total locations by December 31, 2023; to 80% of its total locations by December 31, 2024; to 90% of its total locations by December 31, 2025 and to 100% of its total locations by December 31, 2026.⁷ The Commission's rules require A-CAM carriers, including NNTC, to report in the HUBB portal, maintained by the Universal Service Administrative Company (USAC), annually by March 1, the locations to which it deployed in the prior calendar year and certify that "by the end of the calendar year, it was offering broadband meeting the requisite public interest obligations . . . to the required percentage of its supported locations in each state."⁸ The Commission allowed recipients to report pre-existing locations in the HUBB to be counted towards the interim and final milestones.⁹

5. In February 2021, NNTC submitted a waiver petition stating that it failed to properly certify nearly 300 locations in its March 2019 HUBB filing.¹⁰ Specifically, NNTC uploaded 293 locations in the HUBB. However, only 11 were properly certified and 282 were not certified.¹¹ NNTC explained that it discovered this error during a 2021 internal review.¹² The failure to properly certify these 282 locations caused NNTC to fail to meet its first interim milestone requirement. The *NNTC Petition* asks the Commission to allow NNTC to certify and count towards its interim and final milestones the 282 locations that NNTC timely reported but failed to properly certify.¹³ NNTC argues that strict

compliance with the Commission's rules is not in the public interest, because NNTC "actually had qualifying service available to a substantial portion of eligible locations, well in advance of the Commission's milestone requirement," and that preventing the correction would undermine the purpose of the reporting rules to track progress and determine whether the funds are being used appropriately.¹⁴ Moreover, NNTC argues that this was simply an administrative error that should be allowed to be corrected pursuant to precedent.¹⁵ NNTC states there was no way for it to have known this mistake occurred until its recent internal audit, and the company argues the accuracy of the data warrants deviation from strict compliance with the Commission's rules.¹⁶

6. In May and June 2021, NNTC met with the Wireline Competition Bureau (Bureau) to provide updated figures on the impact of its error in meeting its interim and final buildout milestones.¹⁷ Specifically, NNTC explained that, if allowed to certify and count the uncertified locations towards its deployment milestones, the company easily meets and exceeds the interim milestone, and would be in compliance with the buildout requirements.¹⁸

7. In August 2021, NNTC provided further clarification by providing the specific list of locations it timely uploaded but did not timely certify.¹⁹ This list is included in Exhibit A.

III. DISCUSSION

8. Generally, the Commission's rules may be waived for good cause shown.²⁰ Good cause is shown, and waiver is appropriate, only if special circumstances warrant a deviation from the general rule, and such deviation will serve the public interest.²¹ The Commission may, on an individual basis, take into account considerations of hardship, equity, or more effective implementation of overall policy.²² The Commission has consistently held that requests to waive or extend construction obligations will not be routinely granted.²³ Consistent with Commission precedent, support recipients should be aware that employee issues, vendor problems, equipment issues, inclement weather, and last minute delays occur in the regular course of business, and that these circumstances alone will not support waiver of Commission

deadlines.²⁴ Additionally, the Bureau has reminded recipients that it remains the carrier's responsibility to familiarize itself with any applicable regulations and ensure that its filings are timely received, regardless of the time and method of their filings.²⁵ The Bureau now expects that, after the initial reporting and certification deadline, carriers are familiar with their reporting requirements and the HUBB interface.²⁶

9. We find that NNTC has established special circumstances that warrant granting its petition, in-part, to allow certification of the locations that were timely reported but not properly certified. We have confirmed that NNTC uploaded into the HUBB all of the identified locations by March 1, 2019. Additionally, based on consultations with USAC, we believe that NNTC mistakenly certified only the first page of its location submission instead of certifying each page of its submission. Because each page in the HUBB system only displays up to ten entries, certifying the first page meant that NNTC only properly certified the first ten entries (representing 11 locations) instead of the intended 282 locations reflected in the entire submission. As NNTC did in fact timely upload the remaining 282 locations in the HUBB database, and certified some of the reported locations, we find that NNTC made a good faith effort to timely certify all reported locations.

10. We agree with NNTC that strict compliance with Commission rules in this case does not serve the public interest. The certification error appears to be an inadvertent administrative oversight discovered through proactive internal review by the company, and NNTC took immediate action to resolve the error by contacting USAC and filing a waiver petition with the Commission.²⁷ Most importantly, NNTC uploaded these 282 locations into the HUBB by the March 1 deadline. Compliance with the Commission's location filing deadlines is critical to ensuring that the Commission can accurately track broadband deployment and can update the CAF Broadband map, which allows the public to see where broadband deployment has occurred in the prior year. Accordingly, we believe NNTC has demonstrated good cause to allow all 282 timely-filed locations to be certified and to be counted towards

NNTC's interim and final milestones.

11. Therefore, we conclude that the public interest will be served by granting, in part, NNTC's petition and waiving Commission rules to the extent described herein.²⁸ NNTC's petition for waiver regarding its failure to timely upload location data into the HUBB remains pending.

IV. ORDERING CLAUSES

12. Accordingly, IT IS ORDERED that, under the authority contained in sections 1, 2, 4(i), 5, 10, 201-206, 214, 218-220, 251, 252, 254, 256, 303(r), 323, and 603 of the Communications Act of 1934, as amended, 47 U.S.C. §§ 151, 154(i), 155, 160, 201-206, 214, 218-220, 251, 252, 254, 256, 303(r), 332, 403, 503, 1302, and sections 1.1 and 1.3 of the Commission's rules, 47 CFR §§ 1.1, 1.3, the *Nucla Naturita Telephone Company Request for Waiver of Section 54.316*, as discussed herein, is hereby GRANTED IN PART.

13. IT IS FURTHER ORDERED that a copy of this Order SHALL BE transmitted to the Universal Service Administrative Company.

14. IT IS FURTHER ORDERED that, under section 1.103(a) of the Commission's rules, 47 CFR § 1.103(a), this Order SHALL BE effective upon release.
