In the Matter of Amendment of Section 73.622(j), Table of Allotments, Television Broadcast Stations (Elko, Nevada)

MB Docket No. 23-78
RM-11946

REPORT AND ORDER
(Proceeding Terminated)

Adopted: July 19, 2023
Released: July 19, 2023

By the Chief, Video Division, Media Bureau:

1. The Video Division, Media Bureau (Bureau), has before it a Notice of Proposed Rulemaking1 issued in response to a Petition for Rulemaking filed by Reno (KENV-TV) Licensee, Inc. (Reno Licensee or Petitioner),2 the licensee of television station KENV-DT (KENV-DT or Station), channel 10, Elko, Nevada. The Petitioner has requested the substitution of UHF channel 20 for VHF channel 10 in the Table of TV Allotments.3 The Petitioner filed comments in support of the petition, as required by the Commission’s rules (rules),4 reaffirming its commitment to apply for channel 20.5 No other comments were received.

2. We believe the public interest would be served by substituting channel 20 for channel 10 at Elko, Nevada. In support of its channel substitution request, the Petitioner states that the Commission has recognized that VHF poses challenges for stations providing digital television service on those channels due to propagation characteristics that allow undesired signals and noise to be receivable at relatively far distances and result in large variability in the performance of indoor antennas available to viewers, with most antennas performing very poorly on high VHF channels.6 According to the Petitioner, the Station “has received numerous complaints from local viewers who can receive signals from other local stations but are unable to receive the Station’s over-the-air signal on Channel 10.”7 Thus, the Petitioner asserts that its channel substitution proposal will serve the public by resolving the over-the-air reception problems and enhancing viewer reception in the Station’s service area.8 An analysis conducted using the Commission’s TVStudy software tool indicates that no persons within the Station’s current noise

limited contour will lose service and an additional 1,367 persons are predicted to gain service from the Station.9

3. As proposed, channel 20 can be substituted for channel 10 at Elko, Nevada, in compliance with the principal community coverage requirements of section 73.625(a) of the rules,10 at coordinates 40° 41' 58.8" N and 115° 54' 10.9" W. The Petitioner’s proposal will serve the public interest as there is no loss of service. The channel substitution will resolve the over-the-air reception problems, enhance viewer reception in KENV-DT’s service area, and provide new service to 1,367 persons not currently able to receive the Station.11 In addition, we find that this channel change meets the technical requirements set forth in sections 73.616 and 73.623 of the rules with the following specifications:

We also conclude that good cause exists to make this channel change effective immediately upon publication in the Federal Register, pursuant to section 553(d)(3) of the Administrative Procedure Act.12 An expedited effective date is necessary in this case to ensure that KENV-DT can operate with improved service to its viewers as quickly as possible.
