FEDERAL COMMUNICATIONS COMMISSION ENCOURAGES DEBRIS REMOVAL AND UTILITY REPAIR TEAMS TO AVOID DAMAGING COMMUNICATIONS INFRASTRUCTURE IN AREAS AFFECTED BY HURRICANE LEE

The Federal Communications Commission (FCC) encourages all entities involved with debris clearing operations and utility repairs related to the effects of Hurricane Lee to take all steps necessary to avoid damaging critical communications facilities and infrastructure.

Hurricane Lee may cause widespread damage and significant impacts to communications services and infrastructure. Hurricanes and other natural disasters present numerous challenges for those working to restore essential phone and Internet services. For example, debris clearing operations to remove downed trees, replace damaged utility poles, and open roadways can result in significant, non-storm related damage to critical communications infrastructure. Such damage may disrupt communications that support the safety and life and property, including 911 calls and first responder communications.

The FCC encourages those entities working to clear debris, repair utility lines, and restore services to ensure their activities do not damage critical communications. Crews clearing downed trees and damaged utility poles should exercise caution to not cut or damage telephone or television cables that may be entangled in the debris. Similarly, entities conducting debris and restoration efforts that require digging are reminded to coordinate with appropriate authorities to ensure buried utilities can be located to avoid damage. Teams on the ground should take proactive steps to preserve and maintain critical communications and take immediate action, if necessary, to mitigate the effects of any damage that may occur to facilities or infrastructure.

For assistance, please contact the FCC Operations Center at 202-418-1122 or by e-mail at FCCOPS@fcc.gov.
