2. On September 9-10, 2025, based on a complaint, agents of the Enforcement Bureau's Dallas Office inspected the Station and observed the following violations:

- a. 47 CFR § 74.1231(b): "An FM translator may be used for the purpose of retransmitting the signals of a primary AM or FM radio broadcast station or another translator station the signal of which is received directly through space, converted, and suitably amplified, and originating programming to the extent authorized in paragraphs (f), (g), and (h) of this section." At the time of monitoring and inspection, the Station was not retransmitting its primary station, which its license lists as KJOZ, in Conroe, Texas (Facility ID No. 20625).
b. 47 CFR § 74.1251(b)(2): "Formal application on FCC Form 349 is required of all permittees and licensees for any of the following changes: (2) A change in the transmitting antenna system, including the direction of radiation or directive antenna pattern." The Station is authorized to operate with a log periodic SCA Two Skewed CL-FM (V) S antenna at azimuths of 30° and 270°. At the time of inspection, agents observed the Station operating with a two bay circularly polarized omni directional antenna that is different from its authorized antenna system. The Station did not file an FCC Form 349 application to change its transmitting antenna system from the Commission-authorized system.
