**Report No. SAT-00108**

**Tuesday April 23, 2002**

## SATELLITE POLICY BRANCH INFORMATION

### Satellite Space Applications Accepted for Filing

The applications listed below have been found, upon initial review, to be acceptable for filing. The Commission reserves the right to return any of the applications if, upon further examination, it is determined the application is not in conformance with the Commission's rules or its policies. Petitions, oppositions and other pleadings filed in response to this notice should conform to Section 25.154 of the Commission's rules, unless otherwise noted. 47 C.F.R. § 25.154.

---

**SAT-AMD-20020326-00055** CS91004 PanAmSat Licensee Corp.  
Amendment

PanAmSat Licensee Corp. has filed an amendment to its pending application for modification for its PAS-5 satellite (See File No. SAT-MOD-19980928-00078). In the modification application, PanAmSat requested authority to downlink signals from the Australia beam on PAS-5 for the purpose of monitoring the performance of the satellite from an earth station located at PanAmSat's teleport in Napa, California.

PanAmSat has filed this amendment seeking to make commercial use of the signals that are received by the Napa earth station. PanAmSat is not seeking permission to downlink these signals to any PanAmSat or customer earth station in the United States other than the Napa earth station.

### **CORRECTIONS**

**SAT-PDR-20020321-00027** Telesat Canada

The description contained in Public Notice, Report No. SAT-00106 (released March 25, 2002), incorrectly described this application as a Petition for Declaratory Ruling to be included on the "Permitted Space Station" list. Satellites operating in the Ka-band were not included in this list created by the Commission in the DISCO II First Reconsideration Order. [See Amendment of the Commission's Regulatory Policies to Allow Non-U.S. Licensed Space Stations to Provide Domestic and International Satellite Service in the United States, Order, IB Docket No. 96-111, FCC 99-325 (released Oct. 29, 1999) (DISCO II First Reconsideration Order).]

**CORRECTED DESCRIPTION:** The Petition for Declaratory Ruling seeks permission to use the Ka-band capacity on Anik F2, a Canadian-licensed satellite, for the provision of two-way broadband communication services in the United States, providing market access for Telesat Canada pending resolution of the establishment a fee schedule for blanket Ka-band earth station license applications and manufacturer development of Ka-band earth stations.

The comment dates remain unchanged.

For more information concerning this Notice, contact the Satellite and Radiocommunication Division at 202-418-0719; TTY 202-418-2555.
