ERRATUM

Released: June 9, 2003

By the Chief, Satellite Division:

We are issuing this erratum to correct a typographical error in the Commission's Memorandum Opinion and Order in this proceeding released on June 4, 2003.¹ The rule provision mentioned in the second sentence in Paragraph 23 should have been identified as Section 25.161(a), rather than Section 25.216(a).

The second sentence of Paragraph 23 is therefore revised to read as follows:

The Bureau held in that case that waivers of Section 25.161(a) and of a construction-commencement requirement were equitably justified because the licensee had been materially hindered from meeting the requirement by an erroneously-imposed license condition.
