"Correction" On Report No. SES-00549, dated November 5, 2003, the description was incorrect. Here is the correct description for the modification . Intelsat LLC seeks to modify the license of its Clarksburg, MD C-band transmit/receive earth station (call sign: WA27) to add linear polarization transmit and receive functionality to the existing circular polarization. The polarization functionality will be for linear, vertical and horizontal polarization in both transmit and receive, in addition to the existing right hand circular and left hand circular polarization in both transmit and receive. New emission designators are added and EIRP densities equal to or less than those already licensed will be employed.
