ERRATUM

Released: August 6, 2004

By the Chief, Satellite Division, International Bureau:

1. On July 6, 2004, the Commission released a First Order on Reconsideration and Fifth Report and Order (FCC 04-147) in the above-captioned proceeding. The second sentence of paragraph 81 is corrected to read as follows:

Those bond amounts are now \$3 million for each GSO satellite and \$5 million for each NGSO constellation as the required bond amounts on a going-forward basis.

2. Footnote 124 is corrected to read as follows:

¹²⁴ We note, however, that if licensees of NGSO/GSO constellation systems frequently seek to modify the license to surrender the NGSO portion while retaining the GSO satellites, we may revisit whether \$ 5 million is the appropriate bond amount for a combined NGSO/GSO system.

3. In Appendix B of the *First Report and Order and Further Notice of Proposed Rulemaking*, the revisions to Section 25.164 are corrected to read as follows:

3. Amend § 25.164 by adding paragraph (g), to read as follows:

§ 25.164 Milestones.

* * * * *

(g) Licensees of satellite systems that include both non-geostationary orbit satellites and geostationary orbit satellites, other than DBS and DARS satellite systems, and licensed on or after **[INSERT DATE 30 DAYS FROM DATE OF PUBLICATION IN THE FEDERAL REGISTER]** will be required to comply with the schedule set forth in

Federal Communications Commission

paragraph (a) of this section with respect to the geostationary orbit satellites, and with the schedule set forth in paragraph (b) of this section with respect to the non-geostationary orbit satellites.
