Scheduled Maintenance for FCC Information Technology Systems

To ensure the reliability of the FCC web site, periodic routine maintenance of the underlying hardware and software systems is necessary. The FCC has established a weekly schedule to conduct maintenance activities every Sunday evening beginning on June 26, 2005. This means that most FCC Electronic Filing Systems, Public Access Systems, and on-line documents will not be available from Sunday, 10:00 pm to Monday 6:00 am (eastern time). Several systems including ASR, NORS and ULS will not be affected by this maintenance schedule.

Please note that while you may be able to access the systems during the maintenance window, outages will be sporadic. Therefore, you may be working at risk. If maintenance is not required for a specific week, the maintenance window will be cancelled. The notification will be listed on the FCC web site under the FCC Network Infrastructure Status at http://www.fcc.gov/cgi-bin/EFBoards/systemstatus.cgi?index_t=%2e%2e/%2e%2e/pub/e-file/EFBoards.html

Action By: Chief Information Officer
