## FEDERAL COMMUNICATIONS COMMISSION RELEASES *STATISTICS OF COMMUNICATIONS COMMON CARRIERS*

Washington, D.C. – Each year since 1939, the FCC has published the *Statistics of Communications Common Carriers*, a reference work widely used by academics, consultants, and other researchers in the field of telecommunications. This report includes a wealth of data on telecommunications costs, revenues, prices, and usage.

In order to expedite release of the information, the FCC is making all of the data available electronically at this time, before the report's formal publication in December 2005. A second notice will be issued when printed versions can be purchased from the U.S. Government Printing Office.

The electronic version of the publication is available to the public free of charge. The 160-page volume is divided into the following five sections:

- Part 1 contains general information on industry structure.
- Part 2 contains financial and operating data relating to telephone carriers.
- Part 3 contains data on international communications.
- Part 4 contains historical financial and operating statistics.
- Part 5 contains data on industry trends.

The full report is available for public inspection and copying during regular business hours at the FCC Reference Information Center, Portals II, 445 12th Street SW, Room CY-A257, Washington, DC 20554. This report may be purchased from the Commission's duplicating contractor, Best Copy and Printing, Inc., Portals II, 445 12th Street SW, Room CY-B402, Washington, DC 20554, telephone 800-378-3160 or via their website at [www.bcpweb.com](http://www.bcpweb.com). The publication also may be downloaded from the Wireline Competition Bureau's Internet site at [www.fcc.gov/wcb/stats](http://www.fcc.gov/wcb/stats).

# **Statistics of Communications Common Carriers**

**2004/2005 Edition**

**Federal Communications Commission  
Washington, DC 20554**

---

## Statistics of Communications Common Carriers

### Introduction and Overview

The *Statistics of Communications Common Carriers (SOCC)*, which has been published annually since 1939, is one of the most widely used reference works in the field of telecommunications. It is the only permanent record of common carrier activity published by the Government Printing Office and sent to repository libraries. The most recent edition may be purchased by mail from the Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954, or by calling GPO's Order and Inquiry Desk at (866) 512-1800.

### Sources of Information

Much of the material contained in this volume is available well before the *SOCC* is published by the Government Printing Office.

#### *Internet*

The Wireline Competition Bureau has a home page on the World Wide Web. This home page can be accessed directly at [www.fcc.gov/wcb/](http://www.fcc.gov/wcb/) through a link from the main FCC home page at [www.fcc.gov](http://www.fcc.gov). The materials available include orders, notices of proposed rulemaking, statistical reports, public notices, news releases, fact sheets, and answers to frequently asked questions (FAQs). The Wireline Competition Bureau Statistical Reports web pages include all of the files contained in the *SOCC* and a variety of other reports that are used in the preparation of the *SOCC*. It can be reached directly at [www.fcc.gov/wcb/stats/](http://www.fcc.gov/wcb/stats/). The annual carrier submissions that are used in developing many of the tables in this publication can also be found at [www.fcc.gov/wcb/armis/](http://www.fcc.gov/wcb/armis/).

#### *Duplicating Contractors and Reference Information Center*

Several private firms specialize in locating, duplicating, and distributing FCC documents. The Commission's current duplicating contractor is Best Copy and Printing, Inc. Documents may be purchased by calling Best Copy and Printing, Inc., 1-800-378-3160, or via e-mail at [FCC@bcpiweb.com](mailto:FCC@bcpiweb.com). Reports and the summaries used in the preparation of the *SOCC* are also available in the FCC's Reference Information Center, located on the Courtyard Level, 445 12th Street S.W., Washington, D.C.

### Coverage

#### *Local Telephone Companies*

There are approximately 1,300 companies that have historically provided local telephone service in the United States. These companies, often referred to as incumbent local exchange carriers (ILECs), range in size from rural cooperatives serving fewer than 100 customers to large holding companies serving millions of telephone lines. In most cases, only larger companies (those with more than \$125 million in annual revenues in 2004) are required to file information with the FCC, and only telephone companies affiliated with the four largest holding companies are required to file the most extensive information. New telephone service providers, referred to as competitive local exchange carriers (CLECs), and providers of wireless telephone service are not required to file detailed statistical data with the Commission.

In 2004, as shown in the detailed statistics in Table 2.8, there were 28 reporting large ILECs required to file the ARMIS USOA Report 43-02. In addition to these large carriers, 28 mid-sized ILECs report less detailed data in

## Statistics of Communications Common Carriers

the ARMIS Annual Summary Report 43-01, and statistical tabulations based on this report are shown in Tables 2.9 through 2.17. While these 56 companies account for more than 90% of the local telephone lines served by ILECs, they do not reflect a complete census of the industry.

### *Long Distance Companies*

Over 900 firms buy access from local telephone companies in order to provide long distance service, and a limited amount of information on the larger long distance companies is contained in various tables throughout the *SOCC*. Among long distance carriers, only AT&T and Alascom, which once were regarded as dominant carriers possessing market power, were ever required to file detailed reports. These data are contained in earlier editions of this publication. The reporting requirements, however, were eliminated when the FCC determined that AT&T was no longer a dominant carrier.

### **Accounting Standards**

A new Uniform System of Accounts (USOA) for the telephone industry became effective at the beginning of 1988. The detailed tables in this report are based on that system. Full Class A reporting requirements are imposed only where the aggregate revenues of an ILEC and its affiliates exceed \$7.403 billion. In 2004, only BellSouth, Qwest, SBC, and Verizon remained subject to full Class A reporting requirements. The results for the 28 carriers affiliated with these firms appear in Table 2.8. The amount of state-by-state information varies from company to company. Ameritech, now a subsidiary of SBC, has historically maintained a separate operating company in each state served and consequently files information for each one. In contrast, Qwest, formerly U S WEST, has consolidated its operations into a single company servicing 14 states, for which it files aggregated information.

Where a company's revenues from all its affiliated ILECs total less than \$7.403 billion, each of the affiliated ILECs earning revenues over the reporting threshold is eligible for Class B (streamlined) reporting treatment. Summary tabulations for these mid-sized companies are included in Tables 2.9 through 2.17.

The USOA applies to telephone operating companies. It is not designed to capture the activities of parent holding companies or subsidiaries. Where activities have been transferred from telephone companies to holding companies or subsidiaries, the revenues from those activities cease to be reported by the operating companies. For this reason, along with several other differences between financial and regulatory accounting systems, the results contained in reports to the FCC may differ markedly from reports to the Securities and Exchange Commission (SEC).

### **Timing of the *SOCC***

Most companies report information for the prior calendar year to stockholders and to the SEC by April 1. At the same time, they provide annual reports on their domestic operations to the FCC. The basic raw data are made available to the public as soon as received. This statistical summary is produced after the data have been checked, inquiries on suspect items sent to the carriers, corrected submissions received, and the industry tables compiled. Unlike data for domestic operations, corrected data for international services are typically not received until at least ten months after the end of the year being reported. Summaries of the international data are usually prepared and released by the end of the year.

We have shortened the production cycle in order to reduce the delay in publication and we now complete the production within a six-month timeframe. This has been done by lagging the publication of international data

## Statistics of Communications Common Carriers

by one year. Thus, this edition of the *SOCC* contains the international statistics *only through 2003*. International data for 2004 will be available via the Internet, from duplicating contractors, and in the FCC's public reference center, but it will not be published in the *SOCC* until next year.

### Other Information Sources

The United States Telecom Association represents most local telephone companies. Like many trade associations, it collects information from each of its members. Annually, it prepares, publishes and sells statistical publications such as *Phone Facts*.

The Cellular Telecommunications & Internet Association (CTIA) represents the wireless industry. Since January 1985, it has conducted a semi-annual wireless survey, which consists of data on the wireless industry including the number of subscribers, revenues, employees, and average local monthly bill.

The Telecommunications Industry Association's (TIA) members consist of manufacturers and suppliers of the products and services used in telecommunications. TIA publishes annually the *Telecommunications Market Review and Forecast*, which provides an overview of the telecommunications industry.

\* \* \* \* \*

The 2004/2005 volume of the *Statistics of Communications Common Carriers*, was prepared by John Adesalu and Katie Rangos under the supervision and direction of Alan Feldman. All have worked long and hard to expand and improve the publication.

We invite comments and suggestions for further improvements. For your convenience, the survey form on the following page may be used for your response.

## Customer Response

Publication: *Statistics of Communications Common Carriers, 2004/2005 Edition*

You can help us provide the best possible information to the public by completing this form and returning it to the Industry Analysis and Technology Division of the FCC's Wireline Competition Bureau.

1. Please check the category that best describes you:

- press
- current telecommunications carrier
- potential telecommunications carrier
- business customer evaluating vendors/service options
- consultant, law firm, lobbyist
- other business customer
- academic/student
- residential customer
- FCC employee
- other federal government employee
- state or local government employee
- Other (please specify)

2.	Please rate the report:	Excellent	Good	Satisfactory	Poor	No opinion
	Data accuracy	( )	( )	( )	( )	( )
	Data presentation	( )	( )	( )	( )	( )
	Timeliness of data	( )	( )	( )	( )	( )
	Completeness of data	( )	( )	( )	( )	( )
	Text clarity	( )	( )	( )	( )	( )
	Completeness of text	( )	( )	( )	( )	( )

3.	Overall, how do you rate this report?	Excellent	Good	Satisfactory	Poor	No opinion
		( )	( )	( )	( )	( )

4. How can this report be improved?

5. May we contact you to discuss possible improvements?

Note: Carriers controlled by other companies are indicated by indentations from the margin. In some cases, an intermediate level of control has been omitted. The information shown is primarily from annual reports filed with the Commission

<sup>1</sup> WilTel Communications has been engaged primarily in non-common carrier activities, but it is required to report to the FCC because of its long distance operations.

<sup>2</sup> Company requested confidential treatment.

## Statistics of Communications Common Carriers

### Table 1.3 - Changes Affecting Coverage of Table 1.2

No.	Name of Company	Type of Company	Remarks
<b>Additions:</b>			
1	ALLTEL of Kentucky, Inc.	Telephone	Company classified as a carrier subject to the Communications Act of 1934, as amended.
2	CenturyTel of Alabama, LLC	"	Company classified as a carrier subject to the Communications Act of 1934, as amended.
3	Frontier Communications of America, Inc.	Interexchange	Carrier became subject to the Commission's reporting requirements at 47 C.F.R. § 43.21(c).
4	Qwest Interprise America, Inc.	"	Carrier became subject to the Commission's reporting requirements at 47 C.F.R. § 43.21(c).
5	Qwest LD Corp.	"	Carrier became subject to the Commission's reporting requirements at 47 C.F.R. § 43.21(c).
<b>Deletions:</b>			
1	BCSI Inc.	Interexchange	Carrier's revenues fell below the indexed threshold established for reporting purposes.
2	Cincinnati Bell Any Distance, Inc.	"	Carrier's revenues fell below the indexed threshold established for reporting purposes.
3	Equant Operations, Inc.	"	Carrier's revenues fell below the indexed threshold established for reporting purposes.
<b>Mergers and Other Changes:</b>			
1	Broadwing Corporation	Holding	Name change from Corvis Corporation.
2	ITC^DeltaCom, Inc.	Holding	In Oct. 2004, ITC^DeltaCom completed its acquisition (begun in July 2003) of BTI Telecom Corp. outstanding common stock.
3	MCI, Inc.	Holding	Successor company to WorldCom, Inc. d/b/a MCI.
4	Qwest Corporation	Telephone	In the ARMIS 43-01 and 43-08, Qwest Corporation no longer includes El Paso County Telephone Company data for Colorado and Malheur Home Telephone Company data for Idaho and two other study areas (MSID and PNID).
5	SBC Long Distance, Inc.	Interexchange	Name change from Southwestern Bell Communications Svcs., Inc.

p - preliminary

## Statistics of Communications Common Carriers

### Notes for Table 1.4.

The revenue information for the larger long distance telephone companies, shown in Table 1.4, is reported annually to the FCC pursuant to 47 CFR 43.21(c) filings. The revenue information for large local exchange telephone companies is based on the annual filings of ARMIS (Automated Reporting Management Information System) Reports 43-02. The Commission also collects revenue information on FCC Form 499-A (Telecommunications Reporting Worksheet) and, in previous years, on FCC Forms 431 (Telecommunications Relay Service Worksheet) and 457 (Universal Service Worksheet). Revenues for carriers that are not subject to the filing requirements under § 43.21(c), or ARMIS Reports, are estimated by the FCC staff based on carriers' filings of the FCC Forms 431, 457, and 499-A.

### Company Notes

- <sup>1</sup> ACC Long Distance Corp. and Teleport Communications Group merged in April of 1998, and the combined company, Teleport Communications Group, merged with AT&T Communications, Inc., in July of that year. AT&T Communications acquired Alascom, Inc., August 7, 1995 and began filing a consolidated revenue statement in 1996.
- <sup>2</sup> On July 21, 2002, WorldCom and substantially all of its U.S. subsidiaries filed voluntary petitions for relief in the U.S. Bankruptcy Court for the Southern District of New York under Chapter 11 of Title 11 of the U.S. Bankruptcy Code. On April 20, 2004, WorldCom emerged from bankruptcy and merged with and into MCI whereby the separate existence of WorldCom ceased and MCI became the surviving company.
- <sup>3</sup> For the years 1994 - 1999, the RBOC ILEC toll service revenues are included in total ILEC toll revenues.
- <sup>4</sup> Qwest Interprise America, Inc. is a subsidiary for out-of-region DSL (digital subscriber line); and Qwest LD Corp. is a subsidiary for in-region long distance.
- <sup>5</sup> In November 2003, WiTel Communications, LLC became a wholly-owned, indirect subsidiary of Leucadia National Corporation. Thus, it no longer files with the SEC (Securities & Exchange Commission) on a stand-alone basis.
- <sup>6</sup> In October 2004, ITC^DeltaCom completed its acquisition (begun in July 2003) of BTI Telecom Corp. outstanding common stock.
- <sup>7</sup> Frontier was acquired by Citizens Communications Company in June of 2001 and Electric Lightwave on June 20, 2002.
- <sup>8</sup> ILECs' totals are shown separately through 1999 because they primarily carried intraLATA calls due, in part, to the restrictions imposed on the RBOCs by the 1984 Divestiture agreement. By 2000 most local exchange customers could presubscribe to any carrier for intraLATA toll service and some RBOCs began to receive section 271 approval to provide interLATA toll services.
- <sup>9</sup> Includes wireless toll service revenues reported by wireless carriers, toll service revenues reported by CLECs, and toll service revenues reported by non-RBOC ILECs.
- <sup>10</sup> Estimated by the FCC staff.

\* In some cases, the headquarters listed is for the parent company. See Table 1.2 for the intercorporate relations of communication carriers and controlling companies.

@ Some of the companies included non toll-related revenues in their annual submissions filed pursuant to section 43.21(c) of the Commission's rules.

# Includes plant under construction. Figures may also include plant used by some carriers (e.g., Teleport Communications Group, WilTel Communications, and Level 3 Communications) to provide communications services other than long distance toll. See also footnotes to Table 1.2.

<sup>1</sup> Company is basically a reseller; therefore, it reported little or no communications plant.

<sup>2</sup> Company requested confidential treatment.

<sup>3</sup> Revenues exclude \$40.3 million from non-communications operations; plant excludes \$45.8 million.

## Statistics of Communications Common Carriers

### Notes for Tables 2.2 through 2.5

Data for Tables 2.2 through 2.5 were obtained from annual ARMIS (Automated Reporting Management Information System) operating data reports (FCC Report 43-08) of reporting incumbent local exchange carriers. ARMIS Report 43-08 definitions and carrier data can be accessed at [www.fcc.gov/wcb/armis/](http://www.fcc.gov/wcb/armis/).

See Table 2.6 for data of individual carriers. Certain data pertaining to the carriers are unavailable.

Totals by state for some items may be understated because of incomplete data.

Detailed values may not match totals because of necessary rounding.

### Changes to Companies during Year 2004

Qwest no longer includes El Paso County Telephone company data for Colorado and it no longer includes Malheur Home Telephone Company for Idaho and two other Idaho study areas (MSID and PNID)

### *Outside Plant Statistics*

Unless otherwise stated, data include local loop and interoffice facilities. A cable containing only copper, coaxial, or other metallic conductors is classified as metallic, but a cable containing both fiber and copper, coaxial or other metallic conductors is classified as fiber.

Kilometers equal total miles multiplied by 1.6093 and then rounded to the nearest whole number. Non-zero entries the ARMIS reports of less than 1 kilometer are reported as 1 kilometer.

Equivalent number of poles is the number of solely-owned poles plus the sum of the products of the numbers of jointly-owned poles times their ownership percentages.

Kilometers of telephone channel are the number of equivalent analog or digital telephone circuit kilometers that :  
equipped and on radio systems above 890 MHz

Total equipped local loop circuit kilometers are the number of total equivalent voice-grade circuit kilometers in local plant.

### *Access Lines*

Switched access lines connect end-user customers with their end office for switched services. They are classified as analog or digital depending on the type of service. Switched access lines include 800 and 800-like access lines, resold telephone exchange service lines, employee concession lines, but not official/company circuits. They do not include the closed end of WATS, FX, and special access lines. Main access lines include analog switched access lines provided over 4kHz or equivalent facilities, that connect to residential, single and multiline business telephones excluding PBX Trunks, Centrex-CO lines, Centrex-CU Trunks, and Hotel/Motel LD Trunks. Digital switched lines are provided over 64 kbps, 56 kbps, or ISDN B channels or other equivalent communications channels that are circuit-switched and can carry either, voice or data excluding digital access lines connecting to a customer location or PBX. A fully-equipped DS-1 line, for example, corresponds to 24 - 64 kbps equivalents. Other switched access lines and total switched access lines include resold telephone exchange service lines. Special access lines connect an end user's premises to an interexchange carrier or other access customer point of presence. Local private lines originate and terminate within the same LATA.

Central office switches are assemblies of equipment and software designed to establish connections among lines and between lines and trunks, including access tandems, local, class 5 switching machines and associated remote switching machines.

## Statistics of Communications Common Carriers

### Notes for Tables 2.2 through 2.5 -- Continued

#### *Access Lines - Continued*

Figures for switched access lines reported in the ARMIS Report 43-08 for some companies are slightly different from figures for billable access lines reported in the annual summary report (ARMIS Report 43-01) for a variety of reasons, including different reporting requirements, the interpretation of those requirements by the various companies, and the methods different companies use to calculate the number of lines. The majority of the differences come from the fact that derived ISDN channels are included in the count of switched access lines in the ARMIS Report 43-08, but are not treated as billable access lines in the ARMIS Report 43-01.

#### *Telephone Calls and Minutes*

Local calls are the number of originating calls completed or unanswered between points both of which are within the local service area of the calling telephone, or total originating calls minus total originating toll calls. The number of completed toll calls include calls directed to a point outside the local service area of the calling telephone. The number of toll calls is based on originating message volumes and includes outward calls, 800 and 800-like service, directory service, dial-it services (e.g., 900 service), and optional calling plans. IntraLATA toll calls are carried by the reporting local operating company within a given Local Access and Transport Area (LATA). InterLATA toll calls are directed to and carried by interexchange carriers. Billed access minutes are based on bills sent to interexchange carriers and include total originating and terminating minutes-of-use, including call set-up time, holding time, and conversation time.

## Statistics of Communications Common Carriers

### Notes for Table 2.6.

Name of Company	Code
BellSouth Corporation	BS
Qwest Corporation	Q
SBC Communications Inc.	SBC
Verizon Communications Inc.	VZ
ALLTEL Corporation	AL
Citizens Communications Company	C
Sprint Corporation	S

Source: Annual ARMIS (Automated Reporting Management Information System) operating data reports (ARMIS Report 43-08) of reporting incumbent local exchange carriers. ARMIS Report 43-08 definitions and carrier data can be accessed at [www.fcc.gov/wcb/armis/](http://www.fcc.gov/wcb/armis/).

Note -- Certain data pertaining to the carriers included in this table are unavailable.

- Detail may not match totals because of necessary rounding.
- Unless otherwise stated, outside plant statistics include local loop and interoffice facilities. A cable containing only copper, coaxial or other metallic conductors is classified as metallic, but a cable containing both fiber and copper, coaxial or other metallic conductors is classified as fiber.
- Kilometers equal total miles multiplied by 1.6093 and then rounded to the nearest whole number. Non-zero entries in the ARMIS reports of less than 1 kilometer are reported as 1 kilometer.
- Equivalent number of poles is the number of solely-owned poles plus the sum of the products of the numbers of jointly-owned poles times their ownership percentages.
- Access lines include 800 and 800-like access lines, resold telephone exchange service lines, and employee concession lines, but do not include official/company circuits. Analog access lines are shown in 4kHz equivalents and include access lines from digital switches if the lines themselves are not terminated at the customer's premises as digital lines. ISDN and other digital access lines are shown in 64 kbps equivalents. To be classified as digital, the access lines must be terminated at the customer end as digital lines or be available for use by the customer as digital lines.
- Other switched access lines and total switched access lines include resold telephone exchange service lines.
- Figures for switched access lines reported in the ARMIS Report 43-08 report differ slightly from figures reported for billable access in the ARMIS Report 43-01. There are several reasons including different reporting requirements, the interpretation of these requirements by the various companies, and the methods different companies use to calculate the lines. The majority of the differences come from the fact that 800 and 800-like and derived ISDN channels are included in the count of switched access lines in the ARMIS 43-08, but are not treated as billable access lines in the ARMIS Report 43-01.
- The number of toll calls is based on completed originating message volumes and includes outward calls, 800 and 800-like service, directory service, dial-it services (e.g., 900 service), and optional calling plans. Completed intraLATA toll calls are carried by the reporting local operating company within a given Local Access and Transport Area (LATA). Completed interLATA toll calls are directed to and carried by interexchange carriers. Billed access minutes are based on bills sent to interexchange carriers and include total originating and terminating access minutes of use including call set-up time, holding time, and conversation time.

## Statistics of Communications Common Carriers

### Notes for Table 2.8

Source: Annual ARMIS (Automated Reporting Management Information System) USOA Reports (FCC Report 43-02) of reporting local exchange carriers.

**Note: Detail may not match totals because of necessary roundings.**

-- In the account number column, four-digit numbers are used when there is a corresponding account number in the Uniform System of Accounts (USOA). Three-digit numbers correspond to items defined in the ARMIS USOA report (FCC Report 43-02). Information on the accounts can be found in 47 C.F.R. part 32 which can be accessed on the Internet at [www.fcc.gov/wcb/iatd/47cfr.html](http://www.fcc.gov/wcb/iatd/47cfr.html).

-- Individual carrier ARMIS 43-02 filing instructions, forms, data as well as footnotes can be found on the Internet at [www.fcc.gov/wcb/armis](http://www.fcc.gov/wcb/armis).

Code letters are shown above the name of each company owned or controlled by a holding company as of December 31, 2004.

<b>Name of Company</b>	<b>Code</b>
BellSouth Corporation	BS
Qwest Communications International, Inc.	Q
SBC Communications Inc.	SBC
Verizon Communications Inc.	VZ

### Company Notes

Notes and footnotes submitted by individual carrier with the ARMIS 43-02 filing explaining any differences in the current data compared with the past can be found in the "Preset Reports" on the Internet at [www.fcc.gov/wcb/armis](http://www.fcc.gov/wcb/armis).

## Statistics of Communications Common Carriers

### Notes for Tables 2.9 through 2.17

NA - Not Applicable.

Data for these tables were obtained from the ARMIS (Automated Reporting Management Information System) reports (ARMIS Report 43-01) filed by incumbent local exchange companies with operating revenues for the year 2004 equal to or in excess of \$125 million. The FCC's Phase 1 Accounting Review Order, 14 Rcd 11396 (1999), established streamlined reporting requirements for mid-sized incumbent local exchange carriers (ILECs) beginning in the 1999 reporting year. A mid-sized carrier is a carrier whose annual operating revenues either individually or when aggregated with those of any ILEC it controls, is controlled by, or which it is under common control, are less than \$7.403 billion.

Individual carrier ARMIS Report 43-01 filing instructions, forms, data as well as footnotes can be found on the Internet at [www.fcc.gov/wcb/armis/](http://www.fcc.gov/wcb/armis/).

The reports are filed on a study-area basis and include financial and operational data on revenues, expenses, investment, access lines and minutes of use.

Information presented in these tables was received from 13 companies for 124 study areas representing 49 states (excluding Alaska) plus the District of Columbia and the Commonwealth of Puerto Rico. Data for all tables are derived from the 2004 calendar-year submissions by the companies.

Detail may not match totals because of necessary rounding.

Detail and totals shown may not match detail or totals shown elsewhere in this publication or from sources which have similar data element names for these reasons:

1. Some companies may interpret the Commission's instructions differently.
2. Some companies may use different internal databases to compile data for different ARMIS reports.
3. Some companies may discover discrepancies in their data and refile data for one ARMIS report but not for others.

Both the Commission and company personnel are working to detect and correct discrepancies in the data and to clarify the reporting requirements.

The thirteen companies or groups of companies that filed ARMIS 43-01 data from which these tables were derived are:

#### **Regional Bell Operating Companies and Codes for Table 2.8**

1. BellSouth Corporation (BS)
2. Qwest Corporation (Q)
3. SBC Communications Inc. (SBC)
4. Verizon Communications Inc. (VZ)

#### **Mid-Sized Incumbent LECs and Codes for Table 2.9**

5. ALLTEL Subsidiaries (AL)
6. CenturyTel
7. Cincinnati Bell Telephone Co.
8. Citizens Communications Company Subsidiaries (C)
9. Commonwealth Telephone Company
10. Iowa Telecommunications
11. Sprint Subsidiaries (S)
12. SureWest Telephone
13. Valor Telecommunications

## Statistics of Communications Common Carriers

### Notes for Tables 2.9 through 2.17 - Continued

#### Financial Data

The total column reflects the operating results for each of the rows itemized in these tables, and it includes all regulated and nonregulated company operations for each row. These amounts are presented prior to separation between state and interstate jurisdictions.

Subtracting all non-regulated and adjustments from the total column gives the subject-to-separations column, which reflects that portion of each row that must be allocated between state and interstate jurisdictions pursuant to part 36 of the Commission's rules.

The state and interstate columns reflect the allocation of the amount in the subject-to-separations column into its state and interstate components pursuant to those rules. In some instances, the interstate column also reflects Commission-prescribed adjustments made after the separations process. These adjustments are made only at the interstate level; consequently, the state and interstate columns may not necessarily add up to the subject-to-separations column.

All the remaining columns concern the further sub-division of the interstate column amount into various elements pursuant to part 69 of the Commission's rules.

The common line access element columns reflect costs that are recovered through subscriber line charges and a carrier common line charge assessed upon all interexchange carriers that use local exchange common line facilities for the provision of interstate or foreign telecommunications services.

The traffic-sensitive access element columns reflect costs associated with traffic-sensitive plant engineered to handle the anticipated volume of calls. The switching column reflects that portion of each row associated with the connection of toll lines to toll lines, or toll lines to local central offices, exclusive of equal access costs if the exchange carrier has a separate equal access element. The transport column reflects that portion of each line item applicable to charges assessed upon all interexchange carriers who use switching or transport facilities that are apportioned to the transport element or elements for purposes of apportioning net investment. The total traffic sensitive column reflects those amounts that are assigned to the traffic sensitive element and sub-elements pursuant to part 69 of the Commission's rule: (The total traffic sensitive column equals the total of the switching column plus the transport column plus the traffic-sensitive information: charges assessed upon all interexchange carriers who are connected to assistance boards through interexchange directory assistance trunks.)

The special access column reflects that portion of each row applicable to the total of all sub-elements that have been established for the use of equipment or facilities assigned to the special access element for purposes of apportioning net investment pursuant to part 69 of the Commission's rules.

The total access column reflects the sum of the common line total column, the traffic-sensitive total column, and the special access column.

The billing and collection column reflects that portion of each row applicable to billing and collection services.

The interexchange column reflects that portion of each row applicable to interexchange services.

The mid-sized ILECs do not file rows 1410, 1420, 1490, and 1590 for taxes, but do file row 1595, federal, state, and other. This is reflected in Tables 2.9, 2.10, and 2.13.

## Statistics of Communications Common Carriers

### Notes for Tables 2.9 through 2.17 - Continued

#### **Billable Access Lines**

Billable access lines are access lines that are billed either the end-user common line charge (EUCL) or the special access surcharge. Billable access lines as reported in the ARMIS Report 43-01 will differ slightly from switched access lines as reported in the ARMIS Report 43-08. There are several reasons for this, including different reporting requirements, the interpretation of those requirements by various companies, and the methods different companies use to calculate the number of lines. The majority of the differences come from the fact that 800 and "800 like" access lines and derived ISDN channels are not treated as billable access lines in the ARMIS Report 43-01, but are included in the count of access lines in the ARMIS Report 43-08.

For terms and definitions of the billable access lines' columns in the table, see 47 CFR § 54.401(a), and § 69.114, respectively, which can be found on the Internet at [www.fcc.gov/wcb/iatd/47cfr.html](http://www.fcc.gov/wcb/iatd/47cfr.html).

#### **Company Notes**

Notes and footnotes submitted by individual carrier with the ARMIS 43-01 filing explaining any difference in the current data compared with the past can be found in the "Preset Reports" on the Internet at [www.fcc.gov/wcb/eafs](http://www.fcc.gov/wcb/eafs).

#### **Traffic-Sensitive Minutes of Use**

Total premium traffic-sensitive Minutes-of-Use (MOU) are calculated using premium local switching revenues and the appropriate rates. MOU are calculated pursuant to § 69.205. All reseller minutes are included.

Total non-premium traffic-sensitive MOU are calculated using non-premium local switching revenues and the appropriate rates. MOU are calculated pursuant to § 69.113.

\* U.S. billed revenues represent the amount billed to customers by U.S. carriers.

\*\* Total for all U.S. points includes \$550 million billed revenues for eighteen carriers requesting confidential treatment in the above categories.

## Statistics of Communications Common Carriers

### Notes for Tables 3.1 through 3.3.

Data shown were combined from reports submitted to the FCC by international carriers pursuant to section 43.61(a) of the Commission's rules and regulations. Detail may not add to totals due to rounding.

The data are for all U.S. points. The total for U.S. points shown in the tables represents not only the total traffic between the domestic United States (the conterminous U.S., Alaska, Hawaii and Puerto Rico) and other U.S. points (American Samoa, Guam, the Northern Mariana Islands, Wake Island, and the U.S. Virgin Islands), but also, the total traffic between other U.S. points.

In Table 3.1, figures between -500 and 0 are denoted (\*). Figures between 0 and 500 are denoted \*.

Data for individual United States points (including small points such as American Samoa, Guam, the Northern Mariana Islands, and the U.S. Virgin Islands), and data for individual carriers, are included in the *Section 43.61 International Telecommunications Data* report, published annually by the Federal Communications Commission.

Carriers have requested confidential treatment for transiting minutes by country.

Carriers report the number of leased circuits as of year end and the number of 64 kilobits per second (64 Kbps) equivalent bearer circuits.

\* Beginning in 1984, excludes AT&T Communications and Alascom, each of which reported small amounts of local service revenues for some of the years prior to 1989.

<sup>#</sup> Beginning in 1999, the figures in italics are totals for the large local exchange carriers for which detailed individual company data are presented in Table 2.8. The figures in roman type, which include revenues reported by the mid-sized carriers, are from Table 2.9.

<sup>®</sup> For changes in row/account numbers and names implemented by FCC accounting order released Dec. 17, 2003 (18 FCC Rcd 25759), see listing of accounts in Table 2.8.

See additional notes following Table 4.9.

## Statistics of Communications Common Carriers

\* Beginning in 1984, excludes AT&T Communications and Alascom.

# Beginning in 1999, the figures in italics are for the large local exchange carriers for which detailed individual company data are presented in Table 2.8. The figures in roman type, which include revenues reported by the mid-sized carriers, are from Table 2.9.

<sup>x</sup> The breakdown of long distance revenues by class of service was eliminated by FCC accounting order released Dec. 17, 2003 (18 FCC Rcd 25759).

See additional notes following Table 4.9.

\* Beginning in 1984, excludes AT&T Communications and Alascom.

# Beginning in 1999, the figures in italics are for the large local exchange carriers for which detailed individual company data are presented in Table 2.8. The figures in roman type, which include plant data reported by the mid-sized carriers, are from Table 2.9.

x In 2003, account 2425 was deleted; data are now included in account 2424.

See additional notes following this table.

## Statistics of Communications Common Carriers

**Table 4.9 - Communications Plant of Reporting Incumbent Local Exchange Carriers, 1960-2004 -- Continued**

(Dollar Amounts Shown in Thousands)

Dec. 31	Station Apparatus (231)	Station Connections <sup>5</sup> (232)	Large Private Branch Exchanges (234)	Public Telephone Equipment <sup>6</sup> (235)	Other Communications Equipment <sup>7</sup> (262)	Subtotal (231, 232, 234, 235, 262)
1960	\$2,187,471	\$2,028,098	\$715,600	-	-	\$4,931,169

## Statistics of Communications Common Carriers

### Notes to Tables 4.1 through 4.9

The historical data presented in these tables were compiled from previous editions of *Statistics of Communications Common Carriers* (SOCC), formerly known as *Statistics of the Communications Industry in the United States*. For the most part, the original data were gathered from the annual reports of Class A telephone carriers and, beginning in 1957, include the voluntary submissions of selected large telephone companies not subject to the Commission's reporting requirements.

Over the years, the number of carriers reporting to the Commission has varied because of mergers, carrier reclassification, and changes in the reporting criteria. In 1985, the annual operating revenue requirement for telephone carrier reporting was changed from \$1 million to \$100 million. As a result, twenty-one companies that had filed a report for 1984 were relieved of this requirement the following year. These carriers accounted for about \$440 million in total operating revenues in 1984, with two-thirds of them reporting less than \$20 million.

On Jan. 1, 1988, a revised Uniform System of Accounts (USOA) went into effect. As a result of these revisions, data submitted under the new rules may not be comparable on a one-to-one basis with data filed for previous years. In these tables, USOA account numbers are given for each column heading (where applicable). The three-digit numbers refer to Part 31 of the Commission's rules, whereas those with four digits refer to Part 32, the revised USOA that superseded Part 31.

In the 1995/96 edition of this publication, the 1995 data did not include AT&T Communications or Alascom (which had been acquired by AT&T Corp.) because the detailed reporting requirements for these carriers were eliminated after the Commission had decided that AT&T would no longer be considered a dominant carrier. In the 1996/1997 book, these tables were revised to exclude data for the aforementioned carriers for 1984 and subsequent years--the period since AT&T's divestiture of the Bell operating companies. (The double line in the year column of each table marks the time of divestiture, which was effective Jan. 1, 1984.) Therefore, the data for 1984 to the present are not comparable to the data for 1960-83. Historical data that include AT&T Communications and Alascom appear in the 1994/1995 and earlier editions of this publication.

Beginning with the reports filed for 1999, the Commission streamlined the reporting requirements for certain mid-sized incumbent local exchange carriers in Phase 1 of its Accounting Review Report and Order, 14 FCC Rcd 11396 (1999). Further streamlining was undertaken by the FCC's Phase 2 Report and Order, 16 FCC Rcd 19911 (2001), which included the elimination of certain reporting requirements for mid-sized carriers. As a result of these changes, only the large carriers included in Table 2.8 of this publication continue to report much of the financial data that are presented in these historical tables. Such items are indicated by the figures in italics. Because of different data sources for 2001-2003 and prior years (1988-2000), the figures for all reporting carriers for these two periods are not strictly comparable; the differences, however, are for the most part relatively minor.

The annual ARMIS Order that was released on Dec. 17, 2003 (18 FCC Rcd 25759) implemented the revisions to FCC Report 43-01, the Annual Summary Report, and FCC Report 43-02, the USOA Report, that were approved by the Commission in its Phase 2 Report and Order, 16 FCC Rcd 19911 (2001). The two ARMIS reports are the source of the post-1987 data for incumbent local exchange carriers that are presented in these historical tables.

### **Revenues**

In Table 4.3, the toll private line revenue categories used for the 1960-87 period were introduced in the 1981 annual reports, and are not completely comparable to the categories listed in the reports for 1980 and prior years. The revenue breakdown before 1981 was as follows: telephone, teletypewriter, other telegraph, Telpak (beginning in 1961), program transmission - audio, program transmission - video, and other private line services.

<sup>1</sup> Effective Nov. 15, 1999, account 5010, public telephone revenues, was eliminated.

<sup>2</sup> In the 1957 through 1973 *SOCC* books, details of private line revenues were not totaled for carriers that had filed reports on a voluntary basis. In this tabulation, aggregate data for those carriers are included in the other services category of toll private line service revenues.

<sup>3</sup> In 1982 through 1987, some of the non-Bell companies did not provide a breakdown of their toll private line revenues. These revenues were reported as either voice-grade service revenues or other private line service revenues.

<sup>4</sup> Wide area toll service (WATS) began in 1961. During the 1961-75 period, some of the non-Bell companies included WATS revenues in their message toll service revenues. The WATS figures for 1961-65 include revenues for wide area data service, which was offered on a limited developmental basis during that period.

<sup>5</sup> Beginning in 1961, includes earth station revenues.

<sup>6</sup> For 2002, includes reserves recorded for MCI WorldCom.

<sup>7</sup> Includes revenue settlements (row 1050 of ARMIS 43-01 report).

## Statistics of Communications Common Carriers

### Notes to Tables 4.1 through 4.9 -- Continued

#### Expenses

- <sup>1</sup> The plant specific operations expense accounts are used to record the expenses associated with particular kinds of telecommunications plant. For details, see expense accounts in Table 2.8.
- <sup>2</sup> Beginning in 2001, other property, plant and equipment expenses (account 6510) are included with network operations expenses (account 6530).

#### Earnings

- <sup>1</sup> Net operating income for 1960-87 is after the addition and subtraction of rents from and for the lease of operating property from net operating revenues. Beginning in 1988, these rents are included in operating revenues and expenses.
- <sup>2</sup> Beginning in 1970, net income is after extraordinary and delayed items. In earlier years, these items were charged or credited to retained earnings.
- <sup>3</sup> The significant change in nonoperating income and expense and nonoperating taxes that occurred in 1993 is primarily attributable to business restructuring and the adoption of new accounting standards.

#### Assets and Liabilities

- <sup>1</sup> Includes prepaid accounts.
- <sup>2</sup> Includes miscellaneous physical property (account 103), which is reported as nonoperating plant (account 2006) under the revised USOA.
- <sup>3</sup> Includes other jurisdictional assets (account 1500), which were not reported before 1988.
- <sup>4</sup> In 1983, AT&T changed the par value of its common stock from \$16.67 to \$1 per share.

#### Plant

- <sup>1</sup> During the 1960-84 period, detailed plant account data for those carriers that reported to the Commission on a voluntary basis were not included in the *SOCC* tabulations. Accordingly, the number of carriers included in this table for that period differs from the number included in Tables 4.1 through 4.8.
- <sup>2</sup> In 1999, accounts 2114, 2115, and 2116 (special purpose vehicles, garage work equipment, and other work equipment, respectively) were combined into a single new account 2114, tools and other work equipment.
- <sup>3</sup> Includes operator systems (account 2220).
- <sup>4</sup> Includes satellite and earth station facilities (account 2231.1).
- <sup>5</sup> Drop and block wires, formerly included in this column, are included in aerial wire (account 242.1), or buried cable (account 242.3), as appropriate.
- <sup>6</sup> Prior to 1984, public telephone equipment was included in account 231, station apparatus.
- <sup>7</sup> Account 262 includes PBX and station equipment installed for official company use. Under the new rules, such plant is included in account 2123, office equipment.
- <sup>8</sup> Intra-building network cable was called "house cable" under the old rules and was included in the aerial cable account (242.1).
- <sup>9</sup> Includes account 207, right-of-way, which was eliminated as a separate account effective Jan. 1, 1960. From 1960 through 1987, right-of-way was included primarily in the appropriate outside plant account.
- <sup>10</sup> Includes unclassified plant (reported in 1969, 1974, 1975, and 1984).
- <sup>11</sup> Consists of capital leases (account 2681) and leasehold improvements (account 2682). Beginning in 2001, includes intangibles (account 2690).
- <sup>12</sup> Beginning in 2001, included with amortizable tangible assets (account 2680).
- <sup>13</sup> Under the revised USOA, satellite earth stations are included in central office transmission facilities.
- <sup>14</sup> Beginning in 1995, the distinction between short-term and long-term plant under construction was eliminated. Account 2003 now comprises total plant under construction; account 2004 was deleted.

Source: These historical statistics were compiled from previous editions of *Statistics of Communications Common Carriers*. Totals may be understated because certain data pertaining to the carriers included in this table are not available.

Note: Between 1987 and 1988, there were significant changes in the definitions of many of the items in this table. With the implementation of a new Uniform System of Accounts (USOA) in 1988, as indicated in the notes to Tables 4.1 - 4.9, new categories of reporting units of physical plant and network usage were created and defined. In 1992, some of these definitions were further refined when the reporting mechanism of the carriers was changed for the filing of 1991 data. For these reasons, there may be inconsistencies in the data reported for 1984-1987 compared to what was reported for 1988, and also between 1988 and subsequent years, as the carriers were adapting to the new USOA and automated reporting requirements.

In 2003, the analog/digital breakdown of business and residential switched access lines was replaced by a single-line/multiline division of business lines and a lifeline/non-lifeline separation of residential lines.

<sup>1</sup> Beginning in 2003, payphone lines are included with total business lines.

<sup>2</sup> For 1988-1990, miles were converted to kilometers by multiplying the number of miles by 1.6093 and rounding to the nearest whole number.

<sup>3</sup> Beginning in 2001, employee and compensation figures (shown in italics) are for the Bell operating companies only.

<sup>4</sup> Before 1997, referred to as sheath kilometers of copper cable.

NA - Not available at time of publication.

<sup>1</sup> Include end-user switched access lines for competitive local exchange carriers (CLECs) and incumbent local exchange carriers (ILECs) as reported in FCC Form 477. Carriers with greater than 10,000 lines in a state are required to report.

<sup>2</sup> Include end-user switched access lines, resold lines, and UNE-P lines.

<sup>3</sup> Beginning in 2001, a substantial number of ILEC lines provided to CLECs as UNE-P lines are not included in this total.

Source: CLEC and ILEC access lines: Industry Analysis and Technology Division, Wireline Competition Bureau, *Local Telephone Competition: Status as of December 31, 2004* (July 2004).  
 Local loops: National Exchange Carrier Association, Universal Service Fund filings.  
 Access Lines: *Statistics of Communications Common Carriers*, 2003/2004 Edition (October 2004 ), Table 4.10, after inflating access lines of reporting carriers to represent the total industry.  
 The 1996 adjustment factor was used for the years prior to 1996.

Note: Providers with 250 or more lines in a state are required to report.

<sup>1</sup> A high-speed line is a connection to an end-user customer that is faster than 200 kbps in at least one direction. Advanced services lines, which are a subset of high-speed lines, are connections to end-user customers that are faster than 200 kbps in both directions. The speed of the purchased service varies among end-user customers. For example, a high-speed service delivered to the end-user customer over other traditional wireline technology, such as DS1 or DS3 service, or over optical fiber to the end user's premises may be much faster than the ADSL or cable modem service purchased by a different, or by the same, end user. Numbers of lines reported here are not adjusted for the speed of the service delivered over the line or the number of end users able to utilize the lines.

<sup>2</sup> The mutually exclusive types of technology are, respectively: Asymmetric digital subscriber line (ADSL) technologies, which provide speeds in one direction greater than speeds in the other direction; wireline technologies "other" than ADSL, including traditional telephone company high-speed services and symmetric DSL services that provide equivalent functionality; coaxial cable, including the typical hybrid fiber-coax (HFC) architecture of upgraded cable TV systems; optical fiber to the subscriber's premises (e.g., Fiber-to-the-Home, or FTTH); and satellite and terrestrial wireless systems, which use radio spectrum to communicate with a radio transmitter at the subscriber's premises.

<sup>1</sup> See Industry Analysis and Technology Division, Wireline Competition Bureau, *Local Telephone Competition: Status as of December 31, 2004* (July 2005). Carriers with under 10,000 lines in a state are not required to report, so FCC Form 477 data are likely to undercount the total number of wireless lines in service.

<sup>2</sup> See current and previous editions of Industry Analysis and Technology Division, Wireline Competition Bureau, *Numbering Resource Utilization in the United States*.

<sup>3</sup> Includes 818,000 adjusting for landline to cellular/PCS porting activity. See Industry Analysis and Technology Division, Wireline Competition Bureau, *Trends in Telephone Service* (April 2005), Table 8.10.

Source: Cellular Telecommunications & Internet Association (CTIA) and FCC Forms 477 and 502. FCC Form 502 contains assigned wireless numbers.

<sup>1</sup> Includes loops formerly owned by Verizon/GTE and SBC Communications, Inc./ Southern New England Telephone Co. Woodbury Telephone of Connecticut, a subsidiary of SBC, has 25,339 loops and Verizon of the Northern Mariana Islands has 24,407 loops that are not included in the total. These loops are included in the category "All Other Local Exchange Companies."

Note: Universal Service Fund (USF) loops are subscriber or common lines that are jointly used for local exchange service and exchange access for state and interstate interexchange services.

2004	3.3	-2.5	1.1	-8.7	-6.6	0.2 <sup>2</sup>	0.1	-3.9

Note: Data reflect the percent change from December of the previous year through December of the year shown. The CPI for all items measures the impact of inflation on consumers. The CPI index of all telephone services is based on a "market basket" intended to represent the telephone related expenditures of a typical urban based on monthly service charges, message unit charges, leased equipment, installation, enhanced services (such as tone dialing and call waiting), taxes, subscriber line charges, and all other consumer expenditures associated with telephone services except long distance charges. In contrast, the PPI index of local residential services is based only on service charges for residential service, optional touch-tone service, and subscriber line charges. The PPI telephone indices were revised in June 1995. Index values after July 1995 are not comparable to index values published from 1972 through July 1995.

NA - Not available.

\* The CPI telephone service index was revised in December of 1997.

<sup>1</sup> Due to month-to-month variation in the new PPI index, PPI price levels are determined using a five-month weighted average.

<sup>2</sup> Preliminary and subject to revision.

<sup>3</sup> Revised, incorrectly reported as positive number.

## Statistics of Communications Common Carriers

**Table 5.11 - Average Residential Rates for Local Service in Urban Areas, 1994-2004**  
(As of October 15)

	1994	1995	1996	1997	1998	1999	2000	2001	2002	2003 <sup>1</sup>	2004 <sup>2</sup>

Lowest-Cost Inside Wiring Maintenance Plan	\$1.45	\$1.52	\$1.78	\$1.68	\$2.22	\$2.66	\$3.03	\$3.62	\$3.61	3.64	3.98

Note: Detail may not add to total due to rounding.

<sup>1</sup> Revised figures.

<sup>2</sup> Subject to revision.

<sup>3</sup> Rates are based on flat-rate service where available, and measured/message service with 100 five-minute, same-zone, business-day calls elsewhere. As of 2001, all 95 cities' rates reflect flat rate service, which made measuring the cost of such calls unnecessary.

<sup>4</sup> Beginning in 2002, rates include additional monthly charges for touch-tone service.

2003	December	21,108,662	941,520	22,050,182	9,599,818
2004	December	22,159,440	1,145,661	23,305,101	8,344,899

Note: For individual month assignments through June 2003, see Industry Analysis and Technology Division, Wireline Competition Bureau, *Trends in Telephone Service* (August 2003).

\* Toll-free (800) service was initially offered by AT&T in 1967. On May 1, 1993, procedures for routing toll-free calls were changed and 800 numbers were made "portable" so customers who switched service providers could retain their numbers. Due to the growth in toll-free numbers, a new toll-free calling code, 888, was added in March 1996, which made it possible to assign about 8 million new toll-free numbers. A third toll-free calling code, 877, was added in April 1998; and a fourth toll-free code, 866, was added in July 2000.

<sup>1</sup> Miscellaneous numbers include those in the 800, 888, 877, and 866 service management systems maintained by Database Service Management, Inc., and categorized as reserved, assigned but not yet activated, recently disconnected, or suspended.

**Statistics of Communications Common Carriers**

Note: Detail may not add to totals due to rounding.

<sup>1</sup> TRS filers generally reported pay telephone revenues as local service revenues, access revenues or operator toll revenues. The Universal Service and FCC Form 499-A worksheets contain a separate category for payphone coin revenues. Starting in 1997, payphone revenues include payphone compensation received from toll carriers.

<sup>2</sup> TRS Worksheet filers generally reported special access revenues as access revenues. Reporting changes implemented with the Universal Service Worksheet explain the increase in local private line revenues and the fall in access revenues shown for 1997. TRS Worksheet filers included subscriber line charges with other access charges. For the years 1993 - 1996, these revenues have been disaggregated by assuming that the end-user access revenues in Table 4.2 of *Statistics of Communications Common Carriers* represent 93% of industry total subscriber line charge revenues. Universal Service Worksheet filers report subscriber line charges in a separate category. The increase from 1997 to 1998 represents PICC charges levied by ILECs as well as \$1.2 billion of PICC pass-through charges levied by toll carriers.

<sup>3</sup> Significant amounts of enhanced services, billing and collection, CPE and other non-telecommunications revenues were reported in the TRS mobile and other local service categories through 1996. Universal Service Worksheet filers report these revenues in the non-telecommunications category. For prior years, the amounts of non-telecommunications revenues reported as mobile and other local revenues were estimated as 70% of the amounts that Tier 1 ILECs reported in ARMIS as miscellaneous and nonregulated revenues (currently account 5200 + account 5280) and 10% of amounts reported as mobile service revenues.

<sup>4</sup> Charges on end-user bills identified as recovering state or federal universal service contributions are reported separately from local, wireless and toll revenues. Reported amounts are apportioned between local, wireless and toll service based on the proportions of local, wireless and toll intrastate and interstate revenues by type of carrier.

<sup>1</sup> Filers are asked to select for themselves a service provider category that best describes their operations. The choices have changed over the years. For example, most satellite service providers identified themselves as other toll carriers in their 1997 Form 431 TRS worksheets because that worksheet did not contain a separate category for satellite service providers.

<sup>2</sup> Significant amounts of enhanced service, billing and collection, CPE and other non-telecommunications revenues were reported on TRS worksheets by incumbent local exchange carriers (ILECs) and wireless carriers through 1996. Universal Service Worksheet filers report these revenues in the non-telecommunications category. For prior years, the amounts of non-telecommunications revenues reported as mobile and other local revenues were estimated as 70% of the amounts that Tier 1 ILECs reported in ARMIS as miscellaneous and nonregulated revenues (currently account 5200 + account 5280) and 10% of amounts reported as mobile service revenues.

<sup>3</sup> Other adjustments include some amounts withheld to preserve confidentiality and revisions made after the initial publication of the data.

## Statistics of Communications Common Carriers

### General Index

#### 1. By Company

The company index that appeared in previous editions of this publication has been eliminated. Company names appear in the following tables: 1.1 through 1.4, 2.1, 2.6, 2.8, 2.9, and 3.3. Individual company statistical data and other information are presented in each of these tables.
