

## 8. Network Usage

To monitor use of the public switched telephone network, the National Exchange Carrier Association (NECA) provides quarterly reports to the Commission on the volume of interstate access minutes of use (MOU) passing through the local switches. The data reported in this section include new annual data for 2005 as well as revisions of the data that were contained in our previous reports. Also included are the latest quarterly estimates of industry total access minutes, through the fourth quarter of 2005. The minutes reported here are those minutes that pass through the incumbent local exchange carriers' switches.

Table 8.1 presents NECA information on local switching access minutes for interstate traffic that pass through the incumbent LECs' switches. Annual data are shown for totals of the tier 1 carriers, the non-tier 1 carriers, and the industry. These figures do not include the minutes from the closed end of WATS or toll-free (800/888/877/866) calls. Table 8.2 provides quarterly industry total access minutes back to mid-1984.

Table 8.3 shows historical data on the number of local and toll calls and the number of interLATA billed access minutes for the large incumbent LECs reporting to the Commission. Toll calls are further categorized by intraLATA, interLATA interstate and interLATA intrastate. Interstate and intrastate billed access minutes are also shown.

The NECA compilation of interstate access minutes of use data provided at the study area level appears in Table 8.4. This table provides annual data for the years 2001 through 2005. The study areas are sorted by state, and state totals are provided. Within each state's listing, the study areas are arranged in numerical order by their NECA study area code.<sup>1</sup> The third column identifies whether a study area is part of a Tier 1 cost company, a Tier 2 cost company, or an average schedule company (designated by a 1, 2, or A, respectively). The data in these tables are revised and supersede the usage data in previous reports.<sup>2</sup>

Table 8.5 provides a cross-reference table of the NECA state codes that are part of their study area codes.

The following descriptions of minutes of use measures are based on information provided by NECA:

Access MOU are "earned MOU" which are derived by dividing the earned revenues by the

---

1 A study area is usually an operating company's operations in one state. The first two digits of the NECA study area code identify the state, and the remaining four digits identify the study area. The numerical code for each state is shown in Table 8.5.

2 In cases where study areas have merged, the historical data have been restated to reflect the merger.

corresponding rate. This definition of access minutes is in agreement with the tariff review plan and ARMIS reports. Access minutes of use generating revenues have been discounted, which can produce distortions in revenue amounts. Further, revenues are normalized to include changes in terminating/originating and percent interstate use factors, billing adjustments, and the imputations of access charges (where applicable). Revenues are also calendarized, which will change derived minutes.

Access MOU include only the domestic portion of international calls. Similarly, WATS and toll-free (800/888/877/866) calls are counted only on one end of the call.<sup>3</sup> Finally, minutes include time for incomplete calls and setup time.

In 2001, based on a *Recommended Decision* of the Federal-State Joint Board on Separations, the Commission imposed an interim five-year freeze of the Part 36 jurisdictional separations categories and jurisdictional allocation factors. The freeze is in effect from July 1, 2001, until comprehensive separations reform is completed. Under the interim freeze, price-cap carriers were required to freeze their Part 36 categories and jurisdictional allocation factors. Rate-of-return carriers, however, were given the option to not freeze the Part 36 category relationships.<sup>4</sup> In the order adopting the freeze, the Commission also concluded that carriers no longer would be required to perform separations studies, including traffic studies. Consequently, beginning with the data for 2001, the filing of dial equipment minutes (DEM) was voluntary. Very few carriers voluntarily chose to report their DEM data for 2002 and 2003 and, consequently, DEM data are no longer included in this report.

---

3 WATS calls generate access minutes only at the terminating end of the call and toll-free (800/888/877/866) calls generate access minutes only at the originating end of the call; both types of minutes are counted in the terminating minutes.

4 *See Jurisdictional Separations Reform and Referral to the Federal-State Joint Board*, CC Docket No. 80-286, Report and Order, 16 FCC Rcd 11382 (2001) (*Separations Freeze Order*).

NA - Not available.

Source: Industry Analysis and Technology Division, Wireline Competition Division, *Statistics of Communications Common Carriers*, 2004/2005 Edition (November 2005).  
 2005 data are preliminary from the ARMIS 43-08 reports. Totals may be understated because certain data pertaining to the carriers included in this table are not available.

Note: Between 1987 and 1988, there were significant changes in the definitions of many of the items in this table. With the implementation of a new Uniform System of Accounts (USOA) in 1988, new categories of reporting units of network usage were created and defined. In 1992, some of these definitions were further refined when the reporting mechanism of the carriers was changed for the filing of 1991 data. For these reasons, there may be inconsistencies in the data reported for 1985-1987 compared to what was reported for 1988, and also between 1988 and subsequent years, as the carriers were adapting to the new USOA and automated reporting requirements.
