

UNIVERSAL SERVICE
MONITORING REPORT
CC DOCKET No. 98-202

2009

(Data Received Through August 2009)

Prepared by Federal and State Staff for the
Federal-State Joint Board on Universal Service in
CC Docket No. 96-45

This report is available for reference in the FCC's Reference Information Center, Courtyard Level, 445 12th Street SW, Washington, DC 20554. Call Best Copy and Printing, Inc. at (202) 488-5300 to purchase a copy. The report can also be downloaded from the Wireline Competition Bureau Statistical Reports (formerly FCC-State Link) Internet site at <www.fcc.gov/wcb/stats>. It is available in print image (pdf) files and compressed (zip) files in word processor (MS Word) and spreadsheet (MS Excel or Lotus 123 .wk4) formats.

Table of Contents

| | |
|--|--------------|
| Index of Tables and Charts | 2 to 5 |
| Introduction and Summary | 6 to 8 |
| Service List | 9 to 12 |
| 1. Industry Revenues and Contributions | 1-1 to 1-57 |
| 2. Low-Income Support | 2-1 to 2-51 |
| 3. High-Cost Support | 3-1 to 3-254 |
| 4. Schools and Libraries Support | 4-1 to 4-17 |
| 5. Rural Health Care Support | 5-1 to 5-14 |
| 6. Subscribership and Penetration | 6-1 to 6-99 |
| 7. Rates and Price Indices | 7-1 to 7-23 |
| 8. Network Usage | 8-1 to 8-29 |
| 9. Quality of Service | 9-1 to 9-13 |

Universal Service Monitoring Report
CC Docket No. 98-202
2009

Introduction and Summary

This is the thirteenth report in a series of reports prepared by federal and state staff members for the Federal-State Joint Board on Universal Service in CC Docket No. 96-45 (Universal Service Joint Board).¹ This report is based on information available to us as of August 2009. These reports contain information designed to monitor the impact of various universal service support mechanisms, and the methods used to finance them. These mechanisms were adopted by the Federal Communications Commission (Commission), based on recommendations from the Universal Service Joint Board. These reports are part of a monitoring program created by the Commission in 1997 to replace a similar program in CC Docket No. 87-339 that resulted in a series of nineteen *Monitoring Reports*.² The current program incorporates most of the information that was collected under the previous program, and also new materials from the reports of the administrator of the universal service support mechanisms, the Universal Service Administrative Company (USAC). To enhance our monitoring ability, we have created an open docket,³ which allows data, materials, comments, and studies to be submitted by any interested party at any time.

The monitoring program has proven to be valuable, not only as a report on the effects of the Commission's regulatory policies, but also as a complete census of all incumbent local exchange carriers. Because smaller carriers generally are exempt from most Commission reporting requirements, the *Monitoring Report* incorporates data from several sources, including the National Exchange Carrier Association (NECA) and USAC. USAC collects information from all eligible (including competitive) local exchange carriers to administer the universal service support mechanisms. NECA, at the direction of the Commission, collects information in order to administer the access charge pools and also provides information to USAC that is utilized in administering the Universal Service Fund. The *Monitoring Report*, therefore, contains the only available comprehensive data on all incumbent local exchange carriers, including data on such matters as the number of telephone lines, calling volumes, and certain types of costs. It also includes some information on other carriers.

This report presents data for the nine subject categories selected for monitoring. The first section provides information on the contributions to the universal service support mechanisms and industry revenues, on which those contributions are based. The next four sections provide information

1 The last report was released on December 31, 2008. *Universal Service Monitoring Report*, CC Docket No. 98-202, 2008 (Data Received Through June 2008), prepared by the Federal and State Staff for the Federal-State Joint Board on Universal Service in CC Docket No. 96-45.

2 *Federal-State Joint Board on Universal Service*, CC Docket No. 96-45, Report and Order, 12 FCC Rcd 8776, 9218, para. 869 (1997) (*Universal Service First Report and Order*). See 47 C.F.R. § 54.702(i).

3 CC Docket No. 98-202.

on the various support mechanisms: low-income support; high-cost support; schools and libraries support; and rural health care support. The remaining four sections provide information on matters that might be affected by the support mechanisms: subscribership and penetration; rates and price indices; network usage and growth; and quality of service. Two sections that appeared in previous monitoring reports: infrastructure; and revenues, expenses, and investment are no longer included in this report because the Commission has granted forbearance requests from the larger carriers that reported the data therein. The *Monitoring Report* is published once a year.

The following are highlights of some of the material in this report. Section 1 provides an update on industry revenues and the universal service program requirements and contribution factors. Section 2 includes the latest data on the Lifeline and LinkUp programs. Section 3 includes the most recent projected payments for all of the high-cost support mechanisms, based on the quarterly reports from USAC. It also includes information from the latest filing by NECA for the high-cost loop fund. Section 4 includes updated data on the schools and libraries support mechanism. Section 5 includes updated data on the rural health care support mechanism. Section 6 includes the most recent Census data on subscribership from the Current Population Survey and the American Community Survey. It also includes data on telephone penetration by income by state and a discussion of the impact of Lifeline programs on penetration. Section 7 includes updated Consumer Price Index and Producer Price Index data and other updated rate information. Section 8 includes the latest NECA data on access minutes. Section 9 includes updated data on the quality of service from the Commission's Automated Reporting Management Information System (ARMIS) reports.

This entire report is available electronically through the Wireline Competition Bureau Statistical Reports⁴ Internet site, which can be reached at www.fcc.gov/wcb/stats. It is available in both page image (.pdf) format and in a compressed (.zip) format, which, when unzipped yields word processing and spreadsheet files. In addition, information received well in advance of the next *Monitoring Report* will be made available on an interim basis in separate staff reports or in raw data files (such as most NECA filings used in the *Monitoring Report*) on the Wireline Competition Bureau Statistical Reports Internet site. In addition, the ARMIS data are available on the ARMIS Internet site, which can be reached at www.fcc.gov/wcb/eafs/.

For ease of public reference, parties submitting materials for this docket should provide a duplicate copy to the FCC's Reference Information Center,⁵ where copies of all materials filed in the docket are available for public reference.

This report has been prepared by the federal staff listed below and reviewed by the state staff listed below. These staff members can be contacted for further information:

General Information: Alex Belinfante (Federal) (202) 418-0944
Alan Feldman (Federal) (202) 418-0943

4 Formerly FCC-State Link.

5 Courtyard Level, 445 12th Street SW, Washington, DC 20554.

Industry Revenues and Contributions: Jim Lande (Federal) (202) 418-0948
Jim Eisner (Federal) (202) 418-7302
Craig Stroup (Federal) (202) 418-0989
Kay Marinos (Oregon) (503) 378-6730

1. Industry Revenues and Contributions

This section provides a general overview of the revenues of the U.S. telecommunications industry, and the contributions to the universal service support mechanisms that are based on these revenues.¹ Most of the data for 2007 are taken from filings of annual Telecommunications Reporting Worksheets (FCC Form 499-A) made with the Universal Service Administrative Company (USAC) on April 1, 2008.² Revenue data collected on these worksheets are used to administer contributions to the universal service fund (USF), Interstate Telecommunications Relay Service (TRS), North American Numbering Plan (NANP), and local number portability (LNP) programs. Filer revenues also are used to calculate FCC Interstate Telecommunications Service Provider (ITSP) regulatory fees.³ Data presented for 2008 and 2009 are taken from FCC Form 499-Q quarterly filings.

Revenue Information

The Commission has established several universal service mechanisms, governed by section 254 of the Telecommunications Act of 1996, that help ensure that all Americans have access to affordable telecommunications service. In section 254(d) of the Telecommunications Act of 1996,⁴ Congress mandated that "[e]very telecommunications carrier that provides interstate telecommunications services shall contribute, on an equitable and nondiscriminatory basis, to the specific, predictable, and sufficient

-
- 1 Portions of this section are based on Industry Analysis and Technology Division, Wireline Competition Bureau, Federal Communications Commission, *Telecommunications Industry Revenues* (September 2009).
 - 2 Telecommunications providers filed worksheets containing calendar year 2008 revenue data on April 1, 2009. The worksheets are filed with the FCC's Data Collection Agent, which extensively reviews and validates data. Telecommunications providers routinely make revised filings. As a result, the data are not considered reliable enough for publication for several months after the initial filing date. Therefore, the 2009 filings were not available for use in this report and 2008 and 2009 data were based on the more abbreviated and less reliable FCC Form 499-Q quarterly filings. April 2008 FCC Form 499-A filings containing 2007 revenues were used to compile the 2007 data. Compilation was based on a database prepared by the Data Collection Agent as of October 13, 2008. Therefore, revised or new 2007 FCC Form 499-A filings that were received after October 13, 2008, are not reflected herein.
 - 3 Much of the information filed on FCC Form 499-A is proprietary. Publicly available information on individual carriers is contained in Industry Analysis and Technology Division, Wireline Competition Bureau, Federal Communications Commission, *Telecommunications Provider Locator* (September 2007). See also FCC Form 499-A at fjallfos.fcc.gov/cgb/form499/499a.cfm.
 - 4 Pub. L. No. 104-104, 110 Stat. 56 *codified* at 47 U.S.C. §§ 151 *et seq.*

mechanisms established by the Commission to preserve and advance universal service."⁵ The Commission implemented this mandate in a 1997 *Report and Order*.⁶ The Commission subsequently selected USAC as the universal service fund administrator. Telecommunications providers currently file FCC Form 499-A (Telecommunications Reporting Worksheets, due each April) and FCC Form 499-Q (Telecommunications Reporting Worksheets, due one month after the close of each calendar quarter).

Virtually all providers of telecommunications must file FCC Form 499-A each year.⁷ On June 21, 2006, the Commission ruled that providers of interconnected Voice over Internet Protocol (VoIP) service also must file FCC Form 499-A worksheets.⁸ These filers first provided whole year revenue information in their April 2008 FCC Form 499-A filings. Telecommunications Reporting Worksheets are not filed directly with the FCC but rather with USAC, which serves as the data collection agent.

5 47 U.S.C. § 254(d).

6 *See Federal-State Joint Board on Universal Service*, CC Docket No. 96-45, Report and Order, 12 FCC Rcd 8776 (1997) (subsequent history omitted).

7 There are certain exceptions. Providers that offer telecommunications for a fee exclusively on a non-common carrier basis are not required to file if their total annual contribution to universal service would be less than \$10,000. Government entities that purchase telecommunications services in bulk on their own behalf, public safety and local government entities licensed under Subpart B of Part 90 of the Commission's rules, and entities providing interstate telecommunications exclusively to government or public safety entities are not required to file. In addition, broadcasters, non-profit schools, non-profit libraries, non-profit colleges, non-profit universities and non-profit health care providers are not required to file. Finally, systems integrators that derive less than 5% of their systems integration revenues from the resale of telecommunications and entities that provide services only to themselves or to commonly owned affiliates need not file. However, services provided to exempt entities may be subject to contribution requirements and therefore exempt entities may be required to pay USF pass through charges to their underlying services providers.

8 *See Universal Service Contribution Methodology; Federal-State Joint Board on Universal Service, 1998 Biennial Regulatory Review – Streamlined Contributor Reporting Requirements Associated with Administration of Telecommunications Relay Service, North American Numbering Plan, Local Number Portability, and Universal Service Support Mechanisms, Telecommunications Services for Individuals with Hearing and Speech Disabilities, and the Americans with Disabilities Act of 1990, Administration of the North American Numbering Plan and North American Numbering Plan Cost Recovery Contribution Factor and Fund Size, Number Resource Optimization, Telephone Number Portability, Truth-in-Billing and Billing Format*, WC Docket No. 06-122, CC Docket Nos. 96-45, 98-171, 90-571, 92-237, 99-200, 95-116, 98-170, Report and Order and Notice of Proposed Rulemaking and Report and Order, 21 FCC Rcd 7518 (2006) (*2006 Contribution Methodology Reform Order*).

FCC Form 499-A asks each filer to report total, interstate and international revenues in two broad categories: those billed to universal service contributors for resale (carrier's carrier revenues); and those billed to *de minimis* telecommunications providers and end users (end user revenues).⁹ Filers must provide further breakdowns of local, wireless, and toll services. The form also asks each filer to choose the communications business that best describes its operations:¹⁰

- Competitive Access Provider (CAP) or Competitive Local Exchange Carrier (CLEC)
- Cellular, Personal Communications Service (PCS) and Specialized Mobile Radio (SMR) Wireless Telephony Service Provider
- Coaxial Cable
- Incumbent Local Exchange Carrier (ILEC)
- Interconnected VoIP
- Interexchange Carrier (IXC)
- Local Reseller
- Operator Service Provider (OSP)
- Other Local Service Provider
- Other Mobile Service Provider
- Other Toll Service Provider
- Paging and Messaging Service Provider
- Payphone Provider
- Prepaid Calling Card Provider
- Private Service Provider
- Satellite Service Provider
- Shared-Tenant Service Provider
- Specialized Mobile Radio - Dispatch
- Toll Reseller
- Wireless Data Service Provider

The Form 499-A instructs filers to report amounts actually billed to customers. This means that filers are required to report revenues net of discounts, but without making adjustments to reflect uncollectible revenues or international settlement payments and receipts. Most filers are able to report revenues in this manner using information contained in their corporate books of account. Some service

9 Telecommunications providers are considered *de minimis* and thus are not required to contribute to universal service (or file Form 499-Q) if their annual contributions to universal service would be less than \$10,000. For universal service contribution purposes, underlying service providers treat *de minimis* providers as end users.

10 The detailed definitions of the filer categories are contained in section III.A of the *Instructions to the Telecommunications Reporting Worksheet, FCC Form 499-A* available at www.fcc.gov/Forms/Form499-A/499a-2009.pdf. Starting in 2004, carriers were instructed to select up to 5 ranked categories of telecommunications service providers. The 2004 through 2006 forms included a category for All Distance carriers.

providers, however, have no business or regulatory requirements to record intrastate or international revenues separately from interstate revenues, or to use the detailed revenue categories contained in the worksheets. Many wireless providers use the interim safe harbor percentages to estimate the interstate portion of their revenues.¹¹

Form 499-A filings sometimes contain mistakes. Initial examination of the data occasionally reveals carrier types, revenue amounts and/or revenues reported in service categories inconsistent with the known operations of the filer. Some corrections have been made based on supplemental filer information or as a result of audits. Nonetheless, disaggregated data are likely to be less accurate than industry totals.

Table 1.1 shows the major components of telecommunications revenues for 1998 through 2008. This table was created by simply aggregating the revenues in the major classifications designated on Form 499-A.

Tables 1.2 and 1.3 provide a look at annual industry revenues over time. Generally, Form 499-A revenue data can be tabulated in two distinct ways: by type of service provided and by type of business. Table 1.2 categorizes revenues by type of service and shows, for example, that carriers reported \$121.2 billion in wireless service revenues for 2007. This total includes wireless service revenues from some carriers that are not identified as wireless carriers. In contrast, Table 1.3 shows that wireless service providers reported total revenues of \$124.9 billion, including some revenues for fixed local and toll services.

Revenue data for 1997 and 1998 were derived by combining TRS worksheet and Universal Service worksheet data. Since 1999, revenue data came from Form 499-A, which replaced both the TRS and Universal Service worksheets. Because of reporting changes, data since 1999 are not entirely consistent with data for prior years.¹²

11 See *Instructions to the Telecommunications Reporting Worksheet, FCC Form 499-A* section III.C.3., available at <http://www.fcc.gov/Forms/Form499-A/499a-2009.pdf>. In 2001 and 2002, the interim safe harbor for wireless carriers was 15%. In December 2002, the Commission raised the wireless interim safe harbor to 28.5%. Wireless carriers began reporting revenues based on the higher interim safe harbor percent on the FCC Form 499-Q due on February 1, 2003, and began contributing on this basis in April 2003. In the *2006 Contribution Methodology Reform Order*, the Commission raised the wireless interim safe harbor to 37.1%. Wireless carriers began reporting revenues based on this higher interim safe harbor percent in the FCC Form 499-Q due on August 1, 2006.

12 For example, special access revenues were included with other access revenues prior to 1997 but have been included with local private line services since then. Similarly, through 1996, filers reported as other local and mobile revenues substantial amounts of customer premises equipment, billing and collection, and other types of revenues that are excluded from contributions to universal service. These revenues are now reported as non-telecommunications revenues. The spreadsheet versions of both tables contain estimates of non-telecommunications revenues that had been reported in prior years. Based on staff estimates, the 1996 telecommunications revenues

Note also that each year, many filers erroneously report substantial amounts of switched toll revenues as other long distance revenues. The data are examined and some revenues are reclassified based on staff research. Even so, the other long distance category of Table 1.2 probably continues to contain some switched toll revenues, perhaps significant amounts in some years.

Table 1.4 illustrates how data from the Form 499-A are used to develop the funding base for the USF.¹³ As noted above, providers are considered *de minimis* for USF purposes if their annual contribution is expected to be less than \$10,000.

Revenue data for individual filers are not available to the public. However, Tables 1.5 through 1.8 present detailed industry totals by type of revenue and type of filer. Table 1.5 provides a detailed breakout of revenues for each of the Form 499-A revenue categories used to report services provided to other filers for resale. Table 1.6 displays similar detail for each of the revenue categories used to report telecommunications service provided to end users. Table 1.7 combines data from Tables 1.5 and 1.6 with data on non-telecommunications revenues to develop total industry revenues. Table 1.8 provides more aggregated revenue information by type of filers. The revenue categories presented in Tables 1.5 through 1.7 are explained in the Form 499-A filing instructions.

Table 1.9 presents data from quarterly filings of Form 499-Q for 2008 and 2009. Form 499-Q is far less detailed than Form 499-A. Because Form 499-Q filings do not include a business type, filers were categorized based on the primary business type selected on their Form 499-A filings. The quarterly form asks filers to identify revenues as carrier's carrier, contribution base end user, or non-telecommunications and to indicate the interstate and international shares of each category. Unlike Form 499-A, the quarterly form does not require filers to classify revenues by types of service. Also, international-to-international revenues are included with non-telecommunications revenues rather than with end user revenues.¹⁴

reported on TRS Worksheets would have been \$10.5 billion lower if revenues had been reported using current instructions. Some inconsistencies existed in the 1997 - 1998 period. For example, filers were required in 1997 to include inside wiring maintenance revenues as part of local exchange revenues. In 1998, filers were instructed to report these revenues as non-telecommunications service revenues. The local exchange service revenue data in Table 1.2 would show a greater increase from 1997 to 1998 if the same reporting instructions had been used for each year.

13 See *Telecommunications Industry Revenues 2007*, available at <http://www.fcc.gov/wcb/iatd/lec.html> for a comparison with the funding bases used for TRS, NANP, and LNP.

14 Filers record international-to-international revenues for calls that they receive outside the United States and that they carry to points outside the United States where the filer is operating as a U.S. carrier.

The universal service rules prohibit the fund administrator from releasing company-specific information contained in Form 499-A and Form 499-Q worksheets.¹⁵ Revenue data for individual filers are not available to the public.

Program Requirements and Contribution Factors

Contributors make payments into the USF based on their interstate and international end user telecommunications revenues. Contributors report their revenue data to USAC, which tabulates the data, and reports it to the Commission. The Commission reviews program requirements and revenue data, and determines the appropriate contribution factor. The Commission's Office of Managing Director releases a public notice stating the proposed contribution factor for the upcoming quarter. If, after 14 days, the Commission takes no action regarding the proposed contribution factor, the factor becomes final.¹⁶

In February 2002, the Commission issued an order that, in relevant part, eliminated from the contribution base charges identified on the bill as recovering contributions to the universal service support mechanisms, a situation known as "circularity."¹⁷ Specifically, to account for the inclusion of universal service line-item revenues in their contribution bases, service providers would increase their universal service line items above the contribution factor. Before these changes, service providers filed historic revenue information each quarter, including revenue derived from pass through charges on customers' bills, and the Commission would use these revenue totals along with total estimated program requirement to calculate the contribution factor.¹⁸

The elimination of circularity was implemented in the third quarter of 2002, and reduced each carrier's contribution base by the amount that the carrier paid into USF during the prior quarter. The line item "Circularity Adjustment" in Table 1.10 accounts for this change. The "Circularity Adjustment" represents the industry's actual contributions during the prior quarter as reported by USAC. This eliminated circularity as a reason for carriers to inflate pass through charges.

In December 2002, the Commission adopted an order that changed the basis for contribution assessments from historic gross-billed revenues to projected collected revenues.¹⁹ This change addressed

15 47 C.F.R. §54.711(b).

16 47 C.F.R. §54.709(a)(3).

17 *See Federal-State Joint Board on Universal Service, et al*, CC Docket Nos. 96-45, 98-171, 90-571, 92-237, 99-200, 95-116, 98-170, Further Notice of Proposed Rulemaking and Report and Order, 17 FCC Rcd 3752 (2002).

18 The Commission reduces the revenue estimates by 1% to account for uncollectibles.

19 *See Federal-State Joint Board on Universal Service, et al*, CC Docket Nos. 96-45, 98-171, 90-

the reason given by service providers with declining revenue for marking up their pass through charges. These service providers argued that they had to contribute based on historic amounts that were greater than their current period billings, resulting in the need to mark up their pass through charges. This change was fully implemented in the second quarter of 2003.

Having addressed circularity and changing the contribution assessment methodology to address declining revenues, the two main reasons cited by providers for marking up their pass through charges, the Commission adopted a rule requiring those contributors that recover their universal service contributions through a universal service line item to limit their recovery to the interstate portion of the customer's bill times the relevant contribution factor.²⁰

Form 499-Q filers now file information on billed revenues for the previous quarter and both projected billed revenues and projected collected revenues for the upcoming quarter. Projected collected revenues, which are projected billed revenues less an allowance for uncollectible revenues, form the basis for USF contribution assessments. Projected collected revenues are then adjusted to eliminate circularity. Starting with the second quarter of 2003, the "Circularity Adjustment" amounts shown in Table 1.10 (discussed in more detail below) reflect expected USF contributions for the quarter rather than the industry's actual contributions from a prior quarter.

Table 1.10 shows the program funding requirements for 2008 and 2009. For each program and for each quarter, the table lists projected program demand, administrative costs, interest income, and periodic true-ups. The table also shows the revenue base and contribution factors for each quarter. As explained above, the contribution base is 1% less than reported revenues to reflect the fact that some contribution assessments may prove uncollectible.

In accordance with the Consolidated Appropriations Act of 2008 (P.L.110-161), the FCC instructed USAC to transfer \$21.48 million from the USF to the FCC in federal fiscal year 2008 to support USF oversight efforts, including conduct of audits and investigations by the FCC Office of Inspector General.²¹ Because the transfer of funds did not count against any funding caps, USAC recouped the funds by adding the transfer of \$21.48 million to the total required collections. One-half of this amount was included in the 3rd quarter 2008 demand projection for each support mechanism. The remaining half was included in the 4th quarter 2008 demand projection for each support mechanism.

Sprint Nextel Corporation and Cellco Partnership d/b/a Verizon Wireless offered voluntary commitments whereby, at the end of a five-year transition, they would not seek USF support for their

571, 92-237, 99-200, 95-116, 98-170, Report and Order and Second Further Notice of Proposed Rulemaking, 17 FCC Rcd 24952 (2002).

20 47 C.F.R. §54.712.

21 See Letter from the FCC Managing Director to D. Scott Barash, USAC Acting CEO, dated February 29, 2008.

wireless services unless such requests were supported by actual cost analyses.²² The first installment of this voluntary commitment appears in the fourth quarter of 2009 of Table 1.10.

Table 1.11 shows universal service disbursements on a mechanism-by-mechanism basis for 2007 and 2008.²³ Chart 1.1 shows the 2008 information graphically.

Table 1.12 shows, on a state-by-state basis, the total amount of funding disbursements for each of the universal service mechanisms, estimated contributions towards universal service, and the net estimated dollar flow (disbursements less estimated contributions) for 2008.²⁴

22 See Applications of Cellco Partnership d/b/a Verizon Wireless and Atlantis Holdings LLC For Consent to Transfer Control of Licenses, Authorizations, and Spectrum Manager and De Facto Transfer leasing Arrangements and Petition for Declaratory Ruling that the Transaction is Consistent with Section 310(b)(4) of the Communications Act, WT Docket No. 08-95, File Nos. 0003463892, *et al.*, ITC-T/C-20080613-00270, *et al.*, File No. ISP-PDR-20080613-00012, Memorandum Opinion and Order and Declaratory Ruling, 23 FCC Rcd 17444 (2008); Sprint Nextel Corporation and Clearwire Corporation, Applications For Consent to Transfer Control of Licenses, Leases, and Authorizations, WT Docket No. 08-94, File Nos. 0003462540 *et al.*, Memorandum Opinion and Order, 23 FCC Rcd 17570 (2008).

23 Figures in Table 1.11 are lower than those in Table 1.10 due to the difference between projected demand and actual disbursements. The figures used in Tables 1.11 and 1.12 include disbursements that were committed over several years but paid out in the appropriate calendar year. In Sections 4 and 5, figures for the Schools and Libraries program and the Rural Health Care program are reported based on fiscal year rather than calendar year.

24 For a discussion of the methodology used to estimate contributions per state, see the Technical Appendix below and Table 1.13.

Technical Appendix

Carrier revenue information is not reported on a state-by-state basis. Therefore, it is necessary to estimate revenues per state in order to derive contributions made per state.

The nationwide sum of contributions to support universal service is equal to the payments made from USAC to recipients of funds from the universal service mechanisms plus administration costs. Contributions on a per-state basis are computed by multiplying nationwide contributions by the ratio of interstate end user revenues in each state to nationwide interstate end user revenues. Estimates of interstate end user revenues by state are reported in Table 1.13. These estimates of end-user interstate revenue are used as a basis for estimating contributions in Table 1.12.²⁵

The remainder of this appendix provides a detailed description on how revenues are allocated to the states. Tables 1.5 and 1.6 present nationwide data on telecommunications revenues derived from information filed on Form 499-A Telecommunications Reporting Worksheets. Nationwide (cumulative) telecommunications revenues from these tables are divided into categories. These categories are ILECs' local exchange service revenues, CLEC revenues, subscriber line charge (SLC) revenues, access revenues, mobile wireless revenues and toll revenues.²⁶ Table 1.14 presents telecommunication revenues for each of these categories at the nationwide level.

As set forth below, once the revenues are divided into categories, we use data from several sources to estimate each state's telecommunications revenues. Data from ARMIS²⁷ are used to estimate on a state-by-state basis ILECs' local exchange service revenues, access revenues, and toll revenues.²⁸ Data from tariff access filings with the FCC are used to estimate SLC revenues. CLEC and mobile wireless revenues are estimated on a state-by-state basis using data from FCC Form 477.

Table 1.15 shows intrastate carrier's carrier, end user and total telecommunications revenues by category for ILECs' local exchange service, CLECs, wireless, access, ILEC toll, and non-ILEC

25 Each state's share of interstate end user revenues and contributions are reported under the heading "estimated contributions percent of total."

26 The notes in Table 1.14 discuss how revenues from Tables 1.5 and 1.6 are assigned to categories in Table 1.14.

27 Automated Reporting Management Information System (ARMIS). ARMIS data are available on the ARMIS Internet site, which can be reached at www.fcc.gov/wcb/eafs/.

28 Revenues for Alaska, American Samoa, Guam, the Northern Mariana Islands, and the Virgin Islands are not estimated using data from ARMIS because these jurisdictions have no telephone companies subject to the FCC's ARMIS 43-01 and 43-08 reporting requirements.

toll.²⁹ Components of interstate carrier's carrier, end user and total telecommunications revenues are presented in Table 1.16. These components include ILECs, CLECs, wireless, SLCs, access, and toll.³⁰

Data from ARMIS are adjusted prior to allocating nationwide revenues to the states. ARMIS data include those ILECs with annual operating revenues over \$134 million for 2006 and revenues over \$138 million in 2007. The ARMIS revenue data represent approximately 93 percent of the local telephone industry based on USF loops. Here, data from ARMIS are expanded to include the entire ILEC industry based on USF loops. Column 1 of Table 1.17 shows USF loops at year-end 2007. Column 2 shows the percent of the ILEC industry that reported in the ARMIS filings. It is the average for year-end 2006 and 2007 data.³¹ The adjustment formula in Column 3 is $(100/\text{Column 2})$.

In Table 1.18, ILECs' state local exchange revenues are allocated based on local exchange service and state miscellaneous revenues from ARMIS Report 43-01 filings. Local exchange revenues for allocation are the product of reported ILECs' local exchange service and miscellaneous revenues and the adjustment formula in Table 1.17. Allocation percentages in each state are the ratio of the state's allocation revenues to nationwide revenues. Local exchange revenues by type are determined by multiplying the allocation factor by the type of revenues (see Table 1.14).

In Table 1.19, we allocate interstate and intrastate CLEC revenues on a state-by-state basis by multiplying national revenues (see Table 1.14) by an allocation percentage. The allocation percentage is determined by dividing the number of CLEC lines in a state, as reported in FCC Form 477, by nationwide CLEC lines.³²

In Table 1.20, we allocate interstate and intrastate mobile wireless revenues on a state-by-state basis by multiplying national revenues (see Table 1.14) by an allocation percentage. The allocation percentage is determined by dividing the number of wireless subscribers in a state by nationwide wireless

29 Estimated intrastate telephone revenues for Alaska, American Samoa, Guam, the Northern Mariana Islands, and the Virgin Islands are determined by multiplying the nationwide average intrastate telephone revenues per loop by number of loops in the jurisdiction.

30 Estimated interstate telephone revenues for Alaska, American Samoa, Guam, the Northern Mariana Islands, and the Virgin Islands are determined by multiplying the nationwide average interstate telephone revenues per access minute by number of access minutes in the jurisdiction.

31 The staff estimate is based on the share of USF loops that are associated with carriers that file ARMIS reports.

32 See *Local Telephone Competition: Status as of June 30, 2008* at <http://www.fcc.gov/wcb/iatd/comp.html> for CLEC lines as of June 2007.

subscribers using data from FCC Form 477.³³

SLC revenues are allocated by state in Table 1.21. The sum of residential non-Lifeline lines (including both primary and non-primary lines) and single-line business lines are estimated by multiplying residential non-Lifeline lines and single-line business lines from ARMIS Report 43-01 by the adjustment factor from Table 1.17. Column 1 shows primary residential lines and single-line business lines which is the difference between total residential and single-line business lines, and non-primary lines. Non-primary residential lines are from ARMIS Report 43-08. Multi-line business lines (Column 3) are estimated for the industry by multiplying the number of lines in ARMIS Report 43-01 by the adjustment factor in Table 1.17.

Primary residential and single-line business lines SLC rates per month, shown in Column 4, are the rates filed in the Tariff Review Plan (TRP) for price-cap carriers from July 2007 filings and from National Exchange Carrier Association (NECA) pool and rate-of-return carriers.³⁴ Non-primary SLC revenues per line per month for price-cap companies, shown in Column 5, are the rates filed in the TRPs from the July of 2007 filings. Multiline business SLC rates per line per month in each state, shown in Column 6, are estimated based on the rates in the July 2007 TRP filings for price-cap companies and from NECA pool and rate-of-return carriers.³⁵

Revenues used for allocating SLC revenues by state are determined by the following formula: $12 * [\text{primary residential and single-line business SLC per line per month} * (\text{primary residential lines and single-line business lines}) + \text{multiline business SLC per line per month} * (\text{multiline business lines}) + \text{non-primary lines} * \text{non-primary SLC per line per month}]$. Allocation percentage in each state is the ratio of the state's allocation revenues to nationwide revenues. SLC revenues are determined by multiplying the allocation factor by the type of revenues (see Table 1.14).

In Table 1.22, interstate access revenues and private line revenues are allocated on a state-by-state basis based on net access revenues. Gross access revenues for allocation are the product of interstate access revenues from ARMIS Report 43-08 and the adjustment formula presented in Table 1.17. Revenues for allocation are the difference between gross access revenues for allocation and subscriber line charge revenues. Allocation percentages in each state are the ratio of the state's allocation revenues to nationwide revenues. Access revenues by type are determined by multiplying the allocation factors by the revenues of each type (see Table 1.14).

33 See *Local Telephone Competition: Status as of June 30, 2008* at <http://www.fcc.gov/wcb/iatd/comp.html> for wireless subscribers as of June 2007.

34 Carrier USF loop counts are used as weights. We assume that the residential SLC for NECA pool and rate-of-return carriers during the relevant time period was \$6.50.

35 The rates of NECA pool carriers and rate-of-return carriers are assumed to be \$9.20 per line per month for multiline business.

In Table 1.23, intrastate access revenues are allocated between states based on intrastate access revenues from ARMIS Report 43-08. Intrastate access revenues for allocation are the product of these access revenues and the adjustment formula in Table 1.17. Allocation percentage in each state is the ratio of the state's allocation revenues to nationwide revenues. Access revenues by type are determined by multiplying the allocation factor by the type of revenues (see Table 1.14).

Table 1.24 shows ILEC toll revenues of large ILECs reported in ARMIS Report 43-08, and ILEC intrastate toll revenues.³⁶ ILEC intrastate toll revenues are the product of ILEC reported revenues and the adjustment formula in Table 1.17.

Table 1.25 shows how non-LECs' intrastate toll revenues are allocated between states based on intrastate access minutes and intrastate access revenues.³⁷ Non-LEC toll is the difference between intrastate toll revenues and LEC toll revenues.³⁸ Intrastate toll revenues are reported in Table 1.14, and LEC toll revenues are reported in Table 1.24. Column 1 shows access minutes for allocation. Access minutes for allocation are the product of intrastate-interLATA access minutes from ARMIS Report 43-01 and the adjustment formula in Table 1.17. Column 2 shows each state's percentage of intrastate access minutes. Column 3 shows each state's percentage of intrastate access revenues.³⁹ The allocation percentages for non-LECs' intrastate toll revenues, presented in Column 4, are $(75\% * \text{Column 2}) + (25\% * \text{Column 3})$. Intrastate toll revenues by type presented in Columns 5 and 6 are determined by multiplying the allocation percentage by the type of revenues.

In Table 1.26, interstate toll revenues are allocated on a per state basis by interstate access minutes. Interstate access minutes are from Table 8.4. The allocation percentages are each state's percentage of interstate access minutes. Interstate toll revenues by type presented are determined by multiplying the allocation percentage by the type of revenues. (see Table 1.14).

36 ILECs' toll revenues as reported in ARMIS are treated as intrastate revenues for allocation purposes.

37 Intrastate access revenues are a proxy for intrastate toll rates.

38 We assume that all LEC toll revenues are end user revenues.

39 Intrastate access revenues are reported in Table 1.23. Non-LEC toll is the difference between intrastate toll revenues and LEC toll. LEC toll is assumed to be end user toll. Intrastate toll revenues are reported in Table 1.14 and LEC toll in Table 1.24.

Note: Detail may not add to totals due to rounding. Preliminary 2008 data revised since original publication

1/ Data include revenues for *de minimis* filers as well as for other carriers that are exempt from universal service contribution requirements.

2/ Carrier's carrier revenues are reported on the FCC Form 499-A as sales to other universal service contributors for resale. This includes, for example, access services that local exchange carriers provide to toll carriers. Sales to *de minimis* resellers, end-user customers, governments, non-profits, and any other non-contributors are treated as end-user revenues. Filers contribute to the universal service funding mechanisms based on their end-user revenues. See Table 1.4 for further details on contribution bases.

3/ Payphone revenues are included with local service revenues in this table.

4/ Revenues from calls that both originate and terminate in foreign points are reported as end-user revenues, and are included in this table through 2007, but are not included in the universal service contribution base. These revenues are not included in preliminary 2008 data.

5/ Preliminary 2008 data are based on FCC Form 499-Q quarterly filings through February 28, 2009. Companies that do not contribute to universal service are not required to make these filings. The quarterly filings include preliminary data for the just closed quarter and projections for the coming quarter, and therefore are not as accurate as the subsequent annual filings. Also, FCC Form 499-Q filers do not separate revenue by type of service. Therefore, revenue totals by service type for 2008 are based on type of filer rather than on data filed by service.

See notes on next page.

Notes for Table 1.2

Note: Detail may not add to totals due to rounding. Some data for prior years have been revised.

- 1/ TRS filers generally reported pay telephone revenues as local service revenues, access revenues or operator toll revenues. The Universal Service and FCC Form 499-A worksheets contain a separate category for payphone coin revenues. Starting in 1997, payphone revenues include payphone compensation received from toll carriers.
- 2/ TRS Worksheet filers generally reported special access revenues as access revenues. Reporting changes implemented with the Universal Service Worksheet explain the increase in local private line revenues and the fall in access revenues shown for 1997. TRS Worksheet filers included subscriber line charges with other access charges. Through 1996, these revenues have been disaggregated by assuming that the end-user access revenues in Table 4.2 of *Statistics of Communications Common Carriers* represents 93% of industry total subscriber line charge revenues. Universal Service Worksheet filers report subscriber line charges in a separate category. The increase from 1997 to 1998 represents PICC charges levied by ILECs as well as \$1.2 billion of PICC pass-through charges levied by toll carriers.
- 3/ Charges on end-user bills identified as recovering state or federal universal service contributions are reported separately from local, wireless and toll revenues. Reported amounts are apportioned between local, wireless and toll service based on the proportions of local, wireless and toll intrastate and interstate revenues by type of carrier.

Source: Industry Analysis and Technology Division, Wireline Competition Bureau, *Telecommunications Industry Revenues* (September 2009). Data for 1997 and 1998 primarily based on FCC Form 457 Universal Service Worksheets. Starting in 1999, data summarized from FCC Form 499-A Telecommunications Reporting Worksheets, which replaced both FCC Form 431 and FCC Form 457.

| Total Telecommunications Revenues | \$231,168 | \$246,392 | \$268,505 | \$292,762 | \$301,799 | \$292,341 | \$291,123 | \$291,734 | \$297,921 | \$295,742 | \$299,451 |

^{1/} Filers are asked to select for themselves a service provider category that best describes their operations. The choices have changed over the years. For example, most satellite service providers identified themselves as other toll carriers in their 1997 FCC Form 431 TRS worksheets because there was no separate category for satellite service providers. For 2003 through 2006, some filers identified themselves as all distance carriers. These filers have been reclassified to be consistent with prior classifications. Starting with the 2007 FCC Form 499-A filing, which reported 2006 revenue data, some filers identified themselves as interconnected VoIP providers and some filers first began reporting revenues for these services.

Table 1.4
Contribution Base Revenues By Program 1/: 2007
(Dollar Amounts Shown in Millions)

| | | 2007 |
|---|---|------------|
| Revenues subject to universal service contribution | | |
| | Billed interstate and international end-user revenues [Line 412(e) + Line 420(d) + Line 420(e)] | \$80,349 |
| less | revenues for international - to - international services [Line 412(e)] | 886 |
| less | international revenues of international-only filers and international revenues that were excluded because of the 12% rule 2/ | 3,978 |
| less | interstate and other international revenues for 3,615 filers who are de minimis or otherwise exempt from universal service support requirements | 50 |
| less | uncollectible contribution base revenues [Line 422(d) + Line 422(e)] (Does not include uncollectible amounts associated with revenues excluded above.) | 1,301 |
| equals | | \$74,133 |
| Revenues subject to TRS contribution | | |
| | Interstate and international end-user revenues | \$80,349 |
| less | interstate and international revenues for 150 filers who identify themselves as private service providers or as shared tenant service providers and who therefore are exempt from telecommunications relay service (TRS) contribution requirements if they provide no carrier services | 799 |
| less | interstate and international revenues for services provided for resale but reported as end user because it was provided to carriers that do not contribute to universal service support mechanisms [Line 511(b)] | <u>230</u> |
| equals | | \$79,320 |
| Revenues subject to NANPA and LNP contribution | | |
| | Total telecommunications service end-user revenues (including intrastate, interstate and international) | \$239,615 |
| less | telecommunications revenues for 745 filers who identify themselves as private service providers, shared tenant service providers or payphone service providers and who therefore are exempt from North American Numbering Plan Administration (NANPA) and local number portability administration (LNP) contribution requirements if they provide no carrier services | 786 |
| less | telecommunications revenues for services provided for resale but reported as end user because it was provided to carriers that do not contribute to universal service support mechanisms [Line 511 (a)] | <u>279</u> |
| equals | | \$238,551 |

1/ This table shows how contribution bases differ for different programs and provides relative magnitudes, but does not provide the actual amounts used for determining contribution amounts. Amounts shown represent the amounts contained in the FCC Form 499-A database as of October 13, 2008. The universal service administrator continues to receive additional and corrected filings. Based on revenues and the filer type information contained in the FCC Form 499-A filings. The fund administrators may use carrier type, revenue type, line 603 exemption certifications and additional information requested from filers to determine which filers must contribute. The universal service fund administrator bills delinquent filers based on estimated revenues and may, in some instances, include estimated revenue amounts in contribution base amounts. Note also that universal service contribution factors are set quarterly based on FCC Form 499-Q filings. FCC Form 499-A data are used for true-up and auditing purposes. Also note that local number portability contribution amounts are determined by region of the country rather than on a nationwide basis. As a result of these factors, actual contribution bases have been based on slightly different amounts than those shown.

2/ International revenues are excluded from the contribution base if the total amount of interstate end-user revenues for the filing entity consolidated with all affiliates is less than 12% of the total of interstate and international end-user revenues for the filing entity consolidated with all affiliates. See 47 C.F.R. § 54.706(c). The threshold was increased from 8% to 12% in 2002. See *Federal-State Joint Board on Universal Service*, et al., CC Docket Nos. 96-45, 98-171, 90-571, 92-237, 99-200, 95-166, 98-170, Further Notice of Proposed Rulemaking and Report and Order, 17 FCC Rcd 3752, 3806, para. 125 (2002). In addition, filers that provide only international services are exempt regardless of services offered by affiliates.

Note: Amounts may not add to totals due to rounding.

* Denotes values greater than \$0 but less than \$500,000.

1/ Revenues are classified by the primary carrier type of each reporting entity. For example, revenues reported by an RBOC affiliate that identifies itself as an IXC are included in the table as IXC revenues. Many LECs provided both local and long distance services as part of package plans. Most of the revenues for the toll portion of these bundles were reported as toll revenues on FCC Form 499-A filings of LEC toll affiliates. Filers identified as All Distance or Coaxial Cable Service Providers have been re-categorized for the purpose of creating summary statistics

2/ Telecommunications and interconnected VoIP service provided for resale consists of services provided to other contributors to federal universal service support mechanisms for resale. Revenues from services provided to firms that are *de minimis* under or exempt from federal universal service support mechanisms are reported as end-user service and are subject to contribution requirements.

1/ Revenues are classified by the primary carrier type of each reporting entity. For example, revenues reported by an RBOC affiliate that identifies itself as an IXC are included in the table as IXC revenues. Many LECs provided both local and long distance services as part of package plans. Most of the revenues for the toll portion of these bundles were reported as toll revenues on FCC Form 499-A filings of LEC toll affiliates. Filers identified as All Distance or Coaxial Cable Service Providers have been re-categorized for the purpose of creating summary statistics

2/ Telecommunications and interconnected VoIP service provided for resale consists of services provided to other contributors to federal universal service support mechanisms for resale. Revenues from services provided to firms that are de minimis under or exempt from federal universal service support mechanisms are reported as end-user service and are subject to contribution requirements.

3/ Universal service contribution base revenues consist of all interstate and international end-user telecommunications revenues except for international-to-international revenues reported on Line 412. The totals include revenues from filers who are *de minimis* or otherwise exempt from contributing. This table also includes international revenues that were exempt from contribution because of the 12 percent rule. See Table 1.4 for details on exempt amounts. Contribution base amounts reported as uncollectible on Line 422 have been removed.

4/ Carriers report non-telecommunications service revenues on Line 418. This category includes enhanced services, inside wiring maintenance, billing and collection, customer premises equipment, published directory, dark fiber, Internet, foreign carrier and other non-U.S. telecommunications service revenues.

Notes for Table 1.9

Note: Amounts may not add to totals due to rounding.

- 1/ Each quarter, telecommunications providers that are required to contribute to universal service support mechanisms must to file an FCC Form 499-Q. The FCC Form 499-Q collects total, interstate and international billed revenues for the most recently completed calendar quarter (historic revenues) and also collects projected interstate and international -- but not total -- revenues for the upcoming calendar quarter (projected revenues.) Some telecommunications providers file the form even though they are not required to contribute. USAC estimates revenues for most non-filers.
- 2/ The FCC Form 499-Q collects historic revenues divided into three categories: telecommunications service provided for resale (carrier's carrier); telecommunications service provided to end-users (end user); and other revenues. Telecommunications providers that contribute directly to federal universal service support mechanisms are referred to as "contributors". Telecommunications provided for resale refers to contributors provided to contributors for resale as. Underlying carriers do not contribute based on these revenues. Revenues from services provided to firms that are *de minimis* or otherwise exempt from federal universal service support mechanisms are reported as end-user service. The other revenue filing category consists of international-to-international revenues and revenues from goods and services that are not classified as U.S. telecommunications. International-to-international service refers to calls that originate in a foreign point, traverse the United States, and terminate in a foreign point. These revenues, which are exempt from universal service contribution, are reported in a separate end-user telecommunications revenue category in the FCC Form 499-A. These revenues are included in telecommunications relay service, local number portability and number administration contribution bases.
- 3/ Filers contribute based on the interstate and international telecommunications revenues that they collect from end-users. On the FCC Form 499-Q, filers project the amount of contribution base they expect to bill in the upcoming quarter and then project the amount of contribution base revenues that they expect to collect. The difference between projected billed revenues and projected collected revenues is amount of revenue that the filer expects to be uncollectible (the implied uncollectible rate). Filers contribute in a quarter based on the end user revenues that they project collecting in that quarter. Filers report actual billings and uncollectibles in their April 1 FCC Form 499-A filings. This information is used to true-up contributions, and provides more accurate information on billings and collections for the year. FCC Form 499-A data for 2008 and 2009 is not yet available for publication.
- 4/ Interconnected Voice over Internet Protocol (Interconnected VoIP) providers were required to file FCC Form 499Q worksheets starting August 1, 2006, but were not required to include historic data until the February 2, 2007 filing.
- 5/ The amounts actually used to calculate contribution factors in 2008 and 2009 are shown below. The totals for the year do not match the totals shown above. One reason is that amounts in the table reflect all amounts shown in the FCC Form 499-Q data base, including some estimated amounts for non-filers and amounts reported by filers that are *de minimis* or do not contribute because they provide only international services. Finally, some difference may be explained by late filings and corrections made to the data base after the Commission calculated contribution factors.

| Contribution bases used to calculate Factors | Calendar 2008 (\$millions) | Calendar 2009 (\$millions) |
|---|----------------------------------|----------------------------------|
| First Quarter | \$19,193.8 | \$18,871.0 |
| Second Quarter | \$18,978.0 | \$18,714.7 |
| Third Quarter | \$19,039.4 | \$18,032.8 |
| Fourth Quarter | \$19,011.9 | \$17,164.4 |
| <u>Total Projected Collected</u> | <u>\$76,223.1</u> | <u>\$72,782.9</u> |

See notes at end of Table.

Notes for Table 1.9

Note: Amounts may not add to totals due to rounding.

- 1/ Each quarter, telecommunications providers that are required to contribute to universal service support mechanisms must to file an FCC Form 499-Q. The FCC Form 499-Q collects total, interstate and international billed revenues for the most recently completed calendar quarter (historic revenues) and also collects projected interstate and international -- but not total -- revenues for the upcoming calendar quarter (projected revenues.) Some telecommunications providers file the form even though they are not required to contribute. USAC estimates revenues for most non-filers.
- 2/ The FCC Form 499-Q collects historic revenues divided into three categories: telecommunications service provided for resale (carrier's carrier); telecommunications service provided to end-users (end user); and other revenues. Telecommunications providers that contribute directly to federal universal service support mechanisms are referred to as "contributors". Telecommunications provided for resale refers to contributors provided to contributors for resale as. Underlying carriers do not contribute based on these revenues. Revenues from services provided to firms that are *de minimis* or otherwise exempt from federal universal service support mechanisms are reported as end-user service. The other revenue filing category consists of international-to-international revenues and revenues from goods and services that are not classified as U.S. telecommunications. International-to-international service refers to calls that originate in a foreign point, traverse the United States, and terminate in a foreign point. These revenues, which are exempt from universal service contribution, are reported in a separate end-user telecommunications revenue category in the FCC Form 499-A. These revenues are included in telecommunications relay service, local number portability and number administration contribution bases.
- 3/ Filers contribute based on the interstate and international telecommunications revenues that they collect from end-users. On the FCC Form 499-Q, filers project the amount of contribution base they expect to bill in the upcoming quarter and then project the amount of contribution base revenues that they expect to collect. The difference between projected billed revenues and projected collected revenues is amount of revenue that the filer expects to be uncollectible (the implied uncollectible rate). Filers contribute in a quarter based on the end user revenues that they project collecting in that quarter. Filers report actual billings and uncollectibles in their April 1 FCC Form 499-A filings. This information is used to true-up contributions, and provides more accurate information on billings and collections for the year. FCC Form 499-A data for 2008 and 2009 is not yet available for publication.
- 4/ Interconnected Voice over Internet Protocol (Interconnected VoIP) providers were required to file FCC Form 499Q worksheets starting August 1, 2006, but were not required to include historic data until the February 2, 2007 filing.
- 5/ The amounts actually used to calculate contribution factors in 2008 and 2009 are shown below. The totals for the year do not match the totals shown above. One reason is that amounts in the table reflect all amounts shown in the FCC Form 499-Q data base, including some estimated amounts for non-filers and amounts reported by filers that are *de minimis* or do not contribute because they provide only international services. Finally, some difference may be explained by late filings and corrections made to the data base after the Commission calculated contribution factors.

| Contribution bases used to calculate Factors | Calendar 2008 (\$millions) | Calendar 2008 (\$millions) |
|---|----------------------------------|----------------------------------|
| First Quarter | \$19,193.8 | \$18,871.0 |
| Second Quarter | \$18,978.0 | \$18,714.7 |
| Third Quarter | \$19,039.4 | \$18,032.8 |
| Fourth Quarter | \$19,011.9 | \$17,164.4 |
| <u>Total Projected Collected</u> | <u>\$76,223.1</u> | <u>\$72,782.9</u> |

Source: Appendix M02 from pertinent filings as shown at <http://www.usac.org/about/governance/fcc-filings/2009/>

¹ Interest income is shown as negative because it is subtracted from expenses to yield the total.

² The recovery of support for Sprint and Verizon Wireless is consistent with the support phase-down discussion whereby USAC recovers 20% of CETC support over five years until such time Sprint and Verizon Wireless no longer receive any High Cost support. A discussion of the support phase-downs can be found in DA 08-258 and DA 08-259 released in November 2008.

³ For the schools and libraries mechanism, periodic true-ups include applications of unused fund balance from prior periods.

Table 1.11
Universal Service Support Mechanisms: 2007 & 2008
(Dollars in Millions)

| Mechanism | 2007 | | 2008 | |
|--------------------------------------|----------------|------------------|----------------|------------------|
| | Disbursements | Percent of Total | Disbursements | Percent of Total |
| High-Cost Support | \$4,287 | 61.6 % | \$4,478 | 63.0 % |
| High-Cost Loop Support | 1,402 | 20.2 | 1,457 | 20.5 |
| Safety Net Additive Support | 38 | 0.6 | 48 | 0.7 |
| Safety-Valve | 3 | 0.0 | 2 | 0.0 |
| High-Cost Model Support | 346 | 5.0 | 351 | 4.9 |
| Long Term Support | 0 | 0.0 | 0 | 0.0 |
| Interstate Common Line Support | 1,392 | 20.0 | 1,621 | 22.8 |
| Interstate Access Support | 645 | 9.3 | 585 | 8.2 |
| Local Switching Support | 460 | 6.6 | 416 | 5.9 |
| Low-Income Support | 823 | 11.8 | 819 | 11.5 |
| School and Libraries | 1,808 | 26.0 | 1,760 | 24.8 |
| Rural Health Care | 37 | 0.5 | 49 | 0.7 |
| All Universal Service Support | \$6,955 | 100.0 % | \$7,106 | 100.0 % |

Notes: Figures may not add due to rounding. The figures used in this table are for the calendar year and include disbursements that were committed over several years but paid out in the respective calendar year (2007 or 2008). In Sections 4 and 5, figures for the Schools and Libraries program and the Rural Health Care program are reported based on fiscal year rather than calendar year.

Notes: Figures may not add due to rounding. Support payments do not include quarterly true-ups. USF is an abbreviation for the Universal Service Fund.

¹ Data from USAC's Annual Report.

² Estimated contributions include administrative cost of approximately \$170 million, as shown in USAC's Annual Report.

Allocation of contributions among states is an FCC staff estimate.

³ Net dollar flow is positive when payments from USF to carriers exceed contributions to USF. Total is negative because of administrative expenses.

1/ Excludes subscriber line charges.

2/ Intrastate subscriber line charges are included under access.

3/ Interstate access includes switched access, special access and local private line.

4/ Intrastate toll includes both incumbent local exchange carrier (LEC) toll and non-ILEC toll.

Source: Industry Analysis and Technology Division, Wireline Competition Bureau, *Telecommunications Industry Revenues: 2007* (September 2009).

Notes: Interstate revenues include both interstate and international revenues.

End-user revenues are from Table 1.6. CLEC revenues include telecommunication revenues provided to end users by CLECs (including local exchange service, mobile wireless, subscriber line charge, access and toll revenues). Revenues in the other categories (incumbent local exchange service, mobile wireless, subscriber line charge, access and toll) include revenues from all filers other than CLECs. Intrastate incumbent local exchange service revenues include fixed local service revenues provided to end users. Interstate incumbent local exchange revenues include interstate revenues from Form 499-A, Telecommunications Reporting Worksheets, lines 404, 407 and 408. Mobile wireless revenues include mobile wireless revenues provided to end users. Subscriber line charge revenues include revenues from line 405 and 428. Toll revenues include toll service revenues provided to end users.

Carrier's carrier revenues are from Table 1.5. CLEC revenues include telecommunications revenues provided for resale by CLECs (including local exchange service, mobile wireless, access and toll). Revenues in the other categories (incumbent local exchange service, mobile wireless, access and toll) include revenues for all filers other than CLECs. Intrastate Incumbent local exchange service revenues include revenues from lines 303, 305, 306, 307 and 308. Interstate incumbent local exchange service revenues include revenues from lines 303, 306, 307 and 308. Mobile wireless revenues include mobile service revenues provided for resale. Intrastate access revenues include revenues in line 304. Interstate access revenues include revenues in lines 304 and 305. Toll revenues include toll service revenues for resale.

2. Low-Income Support

In 1984, the Commission established a Lifeline program designed to promote universal service by providing low-income individuals with discounts on the monthly cost of telephone service.¹ The Commission expanded that program in 1985.² In 1987, the Commission adopted Link Up America (Link Up), designed to help low-income households pay the initial costs of commencing service.³ After passage of the Telecommunications Act of 1996 (1996 Act),⁴ the Commission adopted expanded universal service low-income rules.⁵ In June 2000, the Commission further expanded the Lifeline and Link Up programs to address the particularly dire needs of those living on tribal lands.⁶ In April 2004, the Commission released an Order expanding the federal default eligibility criteria to include an income-based criterion and additional means-tested programs.⁷ The Order adopted federal certification and verification procedures that require states, under certain circumstances, to establish procedures to minimize potential abuse in the program. To target low-income consumers more effectively, the Commission adopted outreach guidelines and issued a voluntary survey to gather data and information from states regarding the

administration of Lifeline/Link Up programs. The Order also contained a Further Notice which proposed adding a broader income-based standard than the one adopted in the Order to further increase penetration rates.

In March 2008, the nationwide telephone penetration rate among low-income households⁸ was 89.7 percent. The nationwide telephone penetration rate for all households at the same time was 95.2 percent. Since 1984, the year before the Federal Communications Commission first established Lifeline to help low-income households afford the monthly cost of telephone service, penetration rates among low-income households have grown from 80.1% to 89.7%. States that have provided a full or high level of Lifeline support for telephone service for low-income consumers experienced an average growth in penetration rates for low-income households of 4.0% from March 1997 to March 2008.⁹ In contrast, states that provided a basic or low level of Lifeline support experienced an average increase in telephone penetration rates for low-income households between March 1997 and March 2008 of only 1.4%.¹⁰ As shown in Table 2.1, nearly 6.9 million subscribers paid reduced local rates under the Lifeline program in 2008, whereas the Link Up program, which supports affordable connections to the network, connected about 1.6 million telephone beneficiaries.

The Commission's rules are designed to satisfy the 1996 Act's mandates that rates be "affordable" and access be provided to "low-income consumers" in all regions of the nation. The rules require low-income support to be competitively and technologically neutral through equitable and nondiscriminatory contributions from all providers of interstate telecommunications services, and by allowing all eligible telecommunications carriers, including wireless carriers, to receive support for offering Lifeline and Link Up service.¹¹

Eligibility for Lifeline and Link Up

In states that provide state Lifeline and Link Up support, Lifeline and Link Up are available to all subscribers who meet state eligibility requirements. Although states have some latitude in selecting means tests, state commissions must establish narrowly targeted qualification criteria that are based solely on income or factors directly related to income for low-income residents to be eligible for Lifeline and

8 Low income households, as defined in section 6 of this report, are households with an income below \$10,000 in March 1984 dollars. This is equivalent to \$20,812 in March 2008 dollars.

9 Under the federal low-income program, eligible consumers in states that establish their own supplemental Lifeline programs received additional federal discounts. Under Tier 3 support, one-half of the state low-income discount is matched up to \$1.75 in additional federal low-income discounts. 47 C.F.R. § 54.403(a)(3).

10 Industry Analysis and Technology Division, Wireline Competition Bureau, Federal Communications Commission, *Telephone Penetration by Income by State* (Aug. 6, 2009). See Table 2 of the *Telephone Penetration* report or Table 6.7 of this report for details.

11 *1997 Universal Service Order*, 12 FCC Rcd at 8968-73. See 47 U.S.C. § 254(d), (e).

Link Up. In addition, states with eligible residents of tribal lands must ensure that their qualification criteria are reasonably designed to apply to low-income residents of tribal lands, if applicable.¹² To receive Lifeline and Link Up in a state that does not mandate state Lifeline support, consumers must certify that their household income is at or below 135% of the Federal Poverty Guidelines, or that they participate in one of the following seven federal programs: Medicaid, Food Stamps, Supplemental Security Income (SSI), Federal Public Housing Assistance (Section 8), the Low-Income Home Energy Assistance Program (LIHEAP), the National School Lunch Program's free lunch program, or Temporary Assistance for Needy Families (TANF).¹³ In such states, carriers must obtain signed statements from the consumer certifying that he or she receives benefits from one of these programs, or that the consumer's household meets the income requirement, identifying the particular program and agreeing to notify the carrier if he or she ceases to participate in the program or programs or if the consumer's income exceeds the income requirement.¹⁴

Subscribers living on tribal lands qualify to receive federal Lifeline support if: (1) they qualify under state criteria in a state that provides Lifeline support; (2) they certify that their household income is at or below 135% of the Federal Poverty Guidelines; (3) they certify that they receive benefits from one of the seven federal programs listed above; or (4) they certify that they participate in one of the following additional federal assistance programs: Bureau of Indian Affairs General Assistance (GA), Tribally-administered Temporary Assistance for Needy Families (Tribal TANF), or Head Start (meeting the income-qualifying standard).¹⁵

Lifeline Support

Under the Commission's rules, there are four tiers of federal Lifeline support that are available monthly. All eligible subscribers receive Tier 1 support, which provides a discount equal to the incumbent carrier's subscriber line charge.¹⁶ Tier 2 support provides an additional \$1.75 per month in federal support, if all relevant state regulatory authorities approve such a reduction.¹⁷ (All fifty states have approved.)

Tier 3 of federal support is based on the amount of additional state support mandated by the relevant state or otherwise provided by carriers. Federal support is available to match one half of the non-federal support provided, up to a maximum of \$1.75 in federal support, assuming that the carrier has all

12 47 C.F.R. § 54.409(a).

15 47 C.F.R. § 54.409(a)-(d).

16 47 C.F.R. § 54.403(a)(1).

17 47 C.F.R. § 54.403(a)(2).

necessary approvals to pass on the full amount of this total support in discounts to subscribers.¹⁸ Only eligible residents in states that have established their own Lifeline/Link Up programs receive Tier 3 support.

Eligible subscribers living on tribal lands also qualify to receive Tier 4 support if they meet the eligibility standards described above. Tier 4 support provides up to an additional \$25 per month towards reducing basic local service rates. Eligible subscribers living on tribal lands that receive Tier 4 support must pay at least \$1 a month for local phone service, after the discount.

The Commission's Link Up program provides qualified low-income individuals with a federally-financed 50% discount (up to a maximum \$30 discount) on initial connection charges.¹⁹ In addition, these subscribers can choose to schedule deferred payments of up to \$200 over a one-year period, with the customary interest charges paid by federal support.²⁰

Eligible residents of tribal lands can receive additional Link Up support to fully cover any charges between \$60 and \$130, representing up to a maximum of \$100 in discounts on initial connection charges of \$130 or more.²¹

Services

Basic local service must include, at a minimum: single-party service, voice grade access to the public switched telephone network, Dual Tone Multifrequency signaling or its functional digital equivalent, access to emergency services, access to operator services, access to interexchange service, access to directory assistance, and toll limitation. The federal program compensates eligible telecommunications carriers for toll-limitation based on the carrier's incremental cost of providing toll-limitation services.²²

Advertising

Carriers offering Lifeline and Link Up are required to publicize the availability of those programs using media of general distribution "in a manner reasonably designed to reach those most likely to qualify for support."²³

Support Mechanism

The federal portion of the program is funded by the federal universal service support mechanisms, which include contributions from providers of interstate and international telecommunications, including payphone aggregators and private network operators that offer service to others for a fee on a non-common-carrier basis. These carriers and service providers may pass on contribution expenses to their customers.

The FCC monitors subscriber participation and telephone usage to determine program benefits and costs.²⁴ Historical tables for subscribership and carrier payments by state can be downloaded from the Monitoring Report's Low-Income Support section of the Wireline Competition Bureau Statistical Reports website at www.fcc.gov/wcb/iatd/stats.html.

Table 2.1 reports tribal and non-tribal Lifeline subscriber and Link Up beneficiary data for years 1987 through 2008.

Table 2.2 and Chart 2.1 report annual low-income support payments for years 1988 through 2008.

Table 2.3 reports Lifeline monthly support by state or jurisdiction for both federal and state support as of March 2008, and indicates the additional contribution from the federal program to reduce local rates where states have authorized statewide or carrier-specific intrastate local rate reductions. The table indicates the minimum, maximum and average non-tribal support provided by carriers in each state or jurisdiction.

Table 2.4 reports low-income support payments by state or jurisdiction for Lifeline and Link Up for years 2003 through 2008. American Indian and Native American tribal Lifeline Tier 4 and Link Up data are also reported. Total carrier payments data include the carrier's incremental cost of providing toll-limitation services (TLS) in each state or jurisdiction.

Table 2.5 reports total Lifeline, Link Up, and TLS payments for each study area by state or jurisdiction for years 2007 and 2008. American Indian and Native American tribal Lifeline Tier 4 and Link Up data are also reported.

Table 2.6 reports annual Lifeline subscribership data by state or jurisdiction for years 1998 through 2008. For historical data for years 1987 through 1997, refer to previous Monitoring Reports on the Wireline Competition Bureau Statistical Reports website at <http://www.fcc.gov/wcb/iatd/monitor.html>.

¹ Effective in 1998, the federal Lifeline support mechanism was expanded so that a basic level of assistance would be provided in all states. Additional federal support is also provided wherever a state chooses to provide matching assistance. Prior to the expansion, states were required to match all federal support with their own state support, and if the state provided no support, then no federal support was available in that state. The basic level of federal support was also increased in 1998.

² Tribal support is Tier 4 support only. Tiers 1 to 3 support for tribal beneficiaries is included under General.

³ TLS is an abbreviation for toll limitation service.

⁴ Carriers no longer charge a residential Presubscribed Interexchange Carrier Charge (PICC) as of July 1, 2000.

Notes: This table reflects only non-tribal support. All averages are weighted averages.

¹ Basic federal support includes both Tier 1 and Tier 2 support. See text for definitions.

² Includes only state support that is matched by federal support.

Note: These dollars represent submitted claims to USAC for the time period January 2003 through December 2003, including true-ups reported to date. General Lifeline support is Tier 1 to 3 support for all subscribers, including tribal subscribers. Tribal Lifeline support is Tier 4 support only. For Lifeline, "general" payments are made to all Lifeline subscribers and "tribal" payments are additional payments to tribal Lifeline subscribers only. For Link Up, the payments and subscribers for the two categories of recipients are kept separate.

Note: These dollars represent submitted claims to USAC for the time period January 2005 through December 2005, including true-ups reported to date. General Lifeline support is Tier 1 to 3 support for all subscribers, including tribal subscribers. Tribal Lifeline support is Tier 4 support only. For Lifeline, "general" payments are made to all Lifeline subscribers and "tribal" payments are additional payments to tribal Lifeline subscribers only. For Link Up, the payments and subscribers for the two categories of recipients are kept separate.

¹ Dollars reported are for companies requesting reimbursement. Approximately 99% have reported at this time. Data includes true-ups submitted through March 2009. Lifeline dollars, starting in 1998, include toll-limitation services (TLS) and presubscribed interexchange carrier charges (PICCs). PCCC charges were valid only through July 2000.

² Cumulative total reflects data collected from 1987, the inception of the Lifeline program, through 2008. For historical Lifeline assistance annual payment data, refer to earlier publications of the Monitoring Report at <http://www.fcc.gov/wcb/iatd/monitor.html>.

Source: Lifeline payments (Table 2.4) divided by subscribers (Table 2.7) and divided by 12 (months).
Link Up payments (Table 2.4) divided by beneficiaries (Table 2.10).

Notes: 1) Rates and benefits vary by company within each state or jurisdiction. Tribal Lifeline rates are just for Tier 4 payments. Tribal Lifeline subscribers also qualify for Tier 1 to 3 support, which is included in General. 2) These calculations exclude TLS.
3) For Lifeline, "general" payments are made to all Lifeline subscribers and "tribal" payments are additional payments to tribal Lifeline subscribers only. For Link Up, the payments and subscribers for the two categories of recipients are kept separate.

3. High-Cost Support

The high-cost support mechanisms enable areas with very high costs to recover some of these costs from the federal universal service fund, leaving a smaller remainder of the costs to be recovered through end-user rates or state universal service support mechanisms. In this manner, the high-cost support mechanisms are intended to hold down rates and thereby further one of the most important goals of federal and state regulation -- the preservation and advancement of universal telephone service. This section of the report outlines the high-cost support mechanisms and provides data for these mechanisms. The high-cost support mechanisms include embedded high-cost loop support (HCLS),¹ safety net additive support, safety valve support, forward-looking non-rural high-cost model support (HCMS), interstate common line support (ICLS)² for rate-of-return carriers, interstate access support (IAS) for price-cap carriers, and local switching support (LSS) for carriers that serve 50,000 or fewer access lines. Table 3.1 summarizes the annual amounts for the high-cost support mechanisms for 1986 through 2009. It is based on information provided by the National Exchange Carrier Association (NECA) through 1997 and the Universal Service Administrative Company (USAC) since 1998. Support amounts for 2009 are projected, based on USAC's fourth quarter filing, and the numbers for prior years reflect actual payments.³ Support amounts are subject to adjustment if data are corrected in future periods.

Eligible telecommunications carriers (ETCs) are eligible to receive support from the universal service support mechanisms provided that they provide service using their own facilities, either partially or completely. Thus, pure resellers are not eligible. To be eligible to receive support, a carrier must be designated as an ETC by the state regulatory commission of

-
- 1 This was formerly referred to as the Universal Service Fund, and still bears that name in the Commission rules. It is now referred to as high-cost loop support to avoid confusion with the new, more comprehensive universal service support mechanisms that the Commission developed to implement the 1996 Act. *See* 47 C.F.R. § 36.601. *See also* 47 C.F.R. Part 54.
 - 2 Effective July 1, 2004, long term support (LTS) was merged into ICLS. Any LTS amounts reported in subsequent years are out-of-year adjustments for prior payments. Such adjustments occurred for ILECs only in 2005, but continued for some CETCs through 2008.
 - 3 Universal Service Administrative Company, *Federal Universal Service Support Mechanism Fund Size Projections (USAC Filing) for the Fourth Quarter 2009* (July 31, 2009). Except for ICLS and LSS, for which final true-ups are available through 2007, the actual support amounts for a given year contain adjustments for prior years. USAC now makes these amounts available on their website on a monthly basis, beginning with 2003. Actual support amounts for earlier years were provided to us by special request.

the state in which it operates, or by the FCC where the state commission lacks jurisdiction.⁴ A competitive carrier that is designated as an ETC (a CETC) will receive high-cost support that is determined by the number of lines it serves, the support per line received by the incumbent local exchange carrier (ILEC) against which it is competing, and the degree to which it uses its own facilities to provide its services.⁵ On May 1, 2008, the Commission released an order adopting an interim, emergency cap on the amount of high-cost support available to CETCs.⁶ Specifically, as of the effective date of the *Interim Cap Order*, total annual CETC support for each state is capped at the level of support that CETCs in that state were eligible to receive during March 2008 on an annualized basis.⁷ Table 3.2 compares the annual amounts of support received by ILECs and by CETCs for each support mechanism since the first CETC started receiving support in 1999.⁸

Historically, HCLS was provided to all ILECs based on their embedded costs. Such support provides assistance for non-traffic sensitive (NTS) local loop costs -- a term that refers to the costs of outside telephone wires, poles, and other facilities that link each telephone customer's premises to the public switched telephone network. NTS costs are allocated between the state and interstate jurisdictions because all local loops can be used for making and receiving both intrastate and interstate telephone calls. Historically, the interstate allocation was made using the Subscriber Plant Factor (SPF).⁹ This factor is now 25% for all companies. Today, only rural carriers¹⁰ receive HCLS. Non-rural carriers receive HCMS instead of HCLS.

4 47 U.S.C. § 214(e); *see also* 47 C.F.R. §§ 54.201, 54.202.

5 47 C.F.R. § 54.307.

6 *High-Cost Universal Service Support; Federal-State Joint Board on Universal Service*, WC Docket No. 05-337, CC Docket No. 96-45, Order, 23 FCC Rcd 8834 (2008) (*Interim Cap Order*).

7 *Id.* at 8834, para. 1.

8 The data for 2009 are projections. USAC's quarterly filings include projections of support for competitive carriers that have applied for, but not yet received, ETC status. These support amounts have been removed from the 2009 data reported here if the carrier failed to attain ETC status by the time of the filing for the Fourth Quarter 2009.

9 The SPF was formerly a multiple of the proportion of a study area's traffic that was interstate. It was frozen in 1981 and then transitioned to 25% between 1985 and 1993.

10 *See* 47 C.F.R. § 51.5 for the definition of a rural carrier. Generally, they either have fewer than 100,000 lines or serve predominantly rural areas.

If an ILEC is deemed a rural carrier, it continues to receive high-cost support based on embedded costs. The expense adjustment allows those study areas¹¹ with an average unseparated cost per loop that exceeds 115% of the national average to allocate an additional portion of their NTS costs to the interstate jurisdiction and to have those costs recovered by HCLS.¹² Table 3.3 shows the percentages of additional NTS costs recovered by HCLS.¹³ HCLS was implemented during a period in which the basic interstate allocation of loop costs was shifted from a level based on the historical SPF to the present flat allocation factor of 25%. Both of these changes were phased in between 1985 and 1993, during which time the HCLS was increased by one-eighth of the formula amount each year.

In December 1993, the Commission, at the recommendation of the Joint Board in CC Docket 80-286, imposed a cap on HCLS payments.¹⁴ The cap was indexed to the rate of growth in the national total of working exchange loops. It is implemented by adjusting the national average cost per loop used to calculate each study area's high-cost assistance (using the current formula from Table 3.3) from the average value to whatever base value is required to achieve the cap. For example, in 2003, the cap was achieved by adjusting the base value 2001 cost per loop from the national average of \$240.00 to \$267.15. In addition, when exchanges are sold or transferred to another company, the new owner is limited to the same support for those exchanges that they had under the old owner.¹⁵

-
- 11 A study area is usually an operating company's operations in one state. Holding companies may own multiple operating companies and thus have multiple study areas in a state. Study area boundaries were frozen as of November 15, 1984. Any subsequent change requires a Commission waiver of this freeze.
- 12 In January 1988, high-cost assistance was retargeted to increase benefits to small and medium sized LECs. The old and new high-cost formulas are compared in Table 3.1 of the *Monitoring Reports* in CC Docket No. 87-339. The last report in that docket was released May 30, 1997.
- 13 For example, suppose the national average cost per loop is \$240 and a company with 10,000 loops has a cost per loop of \$420, or 175% of the national average. Then for the portion of their costs between \$276 (115% of the national average) and \$360 (150% of the national average) they would receive 65% of those costs [.65 times (\$360 - \$276) = \$54.60], plus they would receive 75% of their costs over \$360 [.75 times (\$420 - \$360) = \$45], resulting in HCLS totaling \$99.60 per loop, or \$996,000 total support.
- 14 *Amendment of Part 36 of the Commission's Rules and Establishment of a Joint Board*, CC Docket No. 80-286, Report and Order, 9 FCC Rcd 303 (1993).
- 15 47 C.F.R. § 54.305(b). This applies to sales and transfers initiated after May 7, 1997. In August 2000, the Common Carrier Bureau adopted an order removing similar older caps for individual study areas that were subject to them at that time, effective January 1, 2000. *Petitions for Waiver Concerning the Definition of "Study Area" Contained in Part*

The Commission modified the high-cost support mechanism to provide additional support to rural carriers on May 23, 2001.¹⁶ Implementation of the modified support mechanism began July 1, 2001 and was extended in 2006 beyond the originally anticipated five year period.¹⁷ The Commission rebased the HCLS fund for rural carriers, revised the corporate operations expense limitation formula,¹⁸ and modified the indexed cap. Accordingly, beginning July 1, 2001, the caps for non-rural hold-harmless and rural HCLS were calculated separately.¹⁹ For rural carriers, the national average annual loop cost is now frozen at \$240.00 (the 2001 national average) and the cap is indexed to the rate of growth in working loops of rural carriers plus the rate of inflation as measured by the Gross Domestic Product – Chained Price Index (GDP-CPI).²⁰ The Commission adjusted the rural HCLS cap by changing the base year for the calculations to 2000 for purposes of recalculating the cap for 2002 and subsequent years.²¹

36 Appendix-Glossary of the Commission's Rules, CC Docket No. 96-45, Order, 15 FCC Rcd 23491 (2000).

- 16 *See Federal-State Joint Board on Universal Service, Multi-Association Group (MAG) Plan for Regulation of Interstate Services of Non-Price Cap Incumbent Local Exchange Carriers and Interexchange Carriers*, Fourteenth Report and Order, Twenty-Second Order on Reconsideration, and Further Notice of Proposed Rulemaking in CC Docket No. 96-45, and Report and Order in CC Docket No. 00-256, 16 FCC Rcd 11244 (2001) (*Rural Task Force Order*).
- 17 *See Federal-State Joint Board on Universal Service*, CC Docket No. 96-45, WC Docket No. 05-337, Order, 21 FCC Rcd 5514 (2006) (extending rules until the Commission adopts new high-cost support rules for rural carriers).
- 18 Previously, in 1997, the Commission had adopted limitations on the amount of allowed corporate operations expense. The limitations are specified in section 36.621(a)(4) of the Commission's rules. 47 C.F.R. § 36.621(a)(4).
- 19 47 C.F.R. §§ 36.602 and 36.603. See page 3–6 below for a discussion of hold-harmless. As noted there, non-rural carriers are no longer receiving hold-harmless payments; however USAC still computes them in accordance with the rules.
- 20 This replaces the indexing of the cap to the rate of growth of the national total of working exchange loops.
- 21 *See Rural Task Force Order*, at paras. 40-43; *Federal-State Joint Board on Universal Service, Multi-Association Group (MAG) Plan for Regulation of Interstate Services of Non-Price Cap Incumbent Local Exchange Carriers and Interexchange Carriers*, CC Docket Nos. 96-45, 00-256, Order on Reconsideration, 17 FCC Rcd 11472 (2002) (*Rebasing Order*).

To encourage new investment in rural infrastructure, safety net additive support was made available for rural carriers whose telephone plant in service per loop increased by over 14% in one year.²² In such cases, this additional loop support equals the difference between what the rural carrier's HCLS would have been uncapped and what it is capped in the qualifying year, less the difference between the uncapped and capped amounts in the base year. For new sales or transfers of rural exchanges, the acquiring carrier is required to keep separate cost information for the acquired exchanges to determine the eligible support for those exchanges. Safety valve support is available for new investments in infrastructure made in the acquired exchanges.²³

If an ILEC is deemed to be a non-rural carrier, it now receives high-cost support based on forward-looking costs, as estimated by an FCC cost model. The Commission adopted a high-cost model support mechanism for non-rural carriers on October 21, 1999, based on recommendations from the Joint Board.²⁴ This HCMS mechanism is based on the forward-looking costs of providing supported services²⁵ as determined by the Commission's cost model.²⁶ For each state, the cost model calculates the wire center forward-looking cost per line incurred by non-rural carriers to provide supported services. The statewide average cost per line is then

22 See 47 C.F.R. § 36.605.

23 See 47 C.F.R. § 54.305(d)-(f).

24 See *Federal-State Joint Board on Universal Service*, CC Docket No. 96-45, Ninth Report and Order and Eighteenth Order on Reconsideration, 14 FCC Rcd 20432 (1999) (*High-Cost Methodology Order*), *rev'd in part and remanded*, *Qwest Corp. v. FCC*, 258 F.3d 1191 (10th Cir. 2001), *Federal-State Joint Board on Universal Service*, CC Docket No. 96-45, Order on Remand, Further Notice of Proposed Rulemaking, and Memorandum Opinion and Order, 18 FCC Rcd 22559 (2003) (*Order on Remand*), *remanded*, *Qwest Communications Int'l, Inc. v. FCC*, 398 F.3d 1222 (10th Cir. 2005).

25 The services eligible for federal universal service support are listed in section 54.101 of the Commission's rules. 47 C.F.R. § 54.101.

26 The high cost model consists of: (1) a model platform, which contains a series of fixed assumptions about network design and engineering; and (2) input values for the model platform, such as the cost of network components, *e.g.*, cables and switches, as well as various capital cost parameters. See *Federal-State Joint Board on Universal Service, Forward-Looking Mechanism for High-Cost Support for Non-Rural LECs*, CC Docket Nos. 96-45, 97-160, Fifth Report and Order, 13 FCC Rcd 21323 (1998) (*Platform Order*); *Federal-State Joint Board on Universal Service, Forward-Looking Mechanism for High-Cost Support for Non-Rural LECs*, CC Docket Nos. 96-45, 97-160, Tenth Report and Order, 14 FCC Rcd 20156 (1999) (*Inputs Order*).

compared to the national average cost per line to determine eligibility for support. The forward-looking support mechanism provides support to non-rural carriers in those states that have a statewide average forward-looking cost per line greater than the national benchmark, which initially was set at 135 percent of the national average forward-looking cost per line.²⁷ Beginning in 2004, this benchmark is now two standard deviations above the national average.²⁸

After determining the total amount of forward-looking support provided to non-rural carriers in a particular state, the support is then targeted to individual wire centers that have forward-looking costs in excess of the benchmark.²⁹ Under the targeting approach, the amount of support provided to a non-rural carrier serving a particular wire center depends on the relative costs in that wire center and the number of lines served by the carrier. By comparing the relative costs in various above-benchmark wire centers, the targeting approach enables the Commission to provide greater amounts of support to carriers serving lines in wire centers with costs further above the benchmark. Thus, unlike providing a uniform per line statewide support amount, the targeting approach provides support in an amount commensurate with the cost of service, thereby encouraging carriers to serve high-cost areas.

The Commission also adopted a transitional “hold-harmless” measure to prevent rate shocks and disruptions in state rate designs when the new mechanism took effect.³⁰ As adopted, no non-rural telephone company would receive less support than it received under the embedded HCLS mechanisms during the transition period. On December 8, 2000, the Commission adopted measures to phase down interim hold-harmless support, through \$1.00 reductions in average monthly per-line embedded HCLS, beginning January 1, 2001, and every year thereafter until there was no more interim embedded hold-harmless HCLS.³¹ That point was reached in 2004.

LTS was related to interstate non-traffic sensitive costs. LTS provided support to the members of the NECA common line pool, allowing them to charge a below-cost carrier common line (CCL) rate that was uniform for all companies in the pool. Prior to 1989, all ILECs were required to be part of the NECA common line (CL) pool, and CCL rates were uniform nationwide. On April 1, 1989, companies were permitted to withdraw from the NECA CL pool

27 The forward-looking support mechanism provides support for all intrastate costs that exceed the benchmark. *High-Cost Methodology Order*, at paras. 53-63.

28 In October 2003, the Commission adopted an order modifying the national benchmark. *Order on Remand*, at paras. 49-69.

29 *High-Cost Methodology Order*, at paras. 68-76.

30 *Id.*, at paras. 77-88.

31 *Federal-State Joint Board on Universal Service*, CC Docket No. 96-45, Thirteenth Report and Order and Further Notice of Proposed Rulemaking, 15 FCC Rcd 24422 (2000).

and provide jurisdictionally specific CCL access charges; however, carriers had to remain in the pool to receive LTS.

Nationwide pool results provided by NECA for 2008 are shown in Tables 3.4 and 3.5. Table 3.4 summarizes the CL pool revenues and expenses for the year 2008, as well as a comparison with the corresponding figures for 2007. Table 3.5 has comparable figures for NECA's traffic sensitive pool.

To reduce disparities in CCL rates among ILECs after companies were permitted to withdraw from the CL pool, LTS was set up. LTS originally consisted of payments to the NECA CL pool from companies that withdrew from the NECA CL pool. Companies remaining in the NECA pool charge CCL rates, pursuant to the NECA tariff, which were formerly equal to the average CCL rate of the price-cap companies. Effective January 1, 1998, the funds for LTS came from the federal universal service support mechanisms, and LTS was portable to CETCs. At the same time, the NECA pool rate no longer was made equal to the average price-cap rate. Rather, the amount of LTS that a NECA pool member was eligible to receive in 1998 was the 1997 level of LTS (the difference between 1997 CCL revenue requirements and the sum of 1997 CCL revenues using the NECA pool rate and 1997 subscriber line charge revenues) multiplied by the rate of growth of the national average NTS cost per loop. The 1999 level of LTS was similarly adjusted from the 1998 level by the national average loop cost growth rate. Beginning January 1, 2000, LTS was adjusted for inflation to reflect the annual percentage change in the GDP-CPI.³² After the implementation of ICLS (see below), the Commission determined that it was necessary to reduce LTS for some carriers to prevent over earning by those carriers whose ICLS would otherwise have fallen below zero.³³ Effective July 1, 2004, LTS was merged into ICLS.³⁴

In response to the 1996 Act, the Commission also removed implicit support from interstate access charges. In November 2001, the Commission created the ICLS mechanism for rate-of-return carriers to convert implicit support in the access rate structure to explicit, portable

32 See 47 C.F.R. § 54.303.

33 See *Multi-Association Group (MAG) Plan for Regulation of Interstate Services of Non-Price Cap Incumbent Local Exchange Carriers and Interexchange Carriers, Federal-State Joint Board on Universal Service*, CC Docket Nos. 00-256, 96-45, Order and Second Order on Reconsideration, 17 FCC Rcd 11593 (2002) (*MAG Reconsideration Order*).

34 See *Multi-Association Group (MAG) Plan for Regulation of Interstate Services of Non-Price Cap Incumbent Local Exchange Carriers and Interexchange Carriers, Federal-State Joint Board on Universal Service*, CC Docket Nos. 00-256, 96-45, Report and Order and Second Further Notice of Proposed Rulemaking, 19 FCC Rcd 4122 (2004).

support.³⁵ ICLS recovers any shortfall between the allowed common line revenues of rate-of-return carriers and their subscriber line charge revenues and gradually replaces the carrier common line charge. Under the *MAG Order*, the ICLS mechanism was implemented beginning on July 1, 2002.

On May 31, 2000, the Commission established an explicit interstate access support (IAS) mechanism for price-cap carriers to replace the implicit support previously collected through interstate access charges.³⁶ Like ICLS, the purpose of this mechanism is to provide explicit support to ensure reasonably affordable interstate rates. This is in contrast to the Commission's other high-cost support mechanisms, which provide support to enable states to ensure reasonably affordable and comparable intrastate rates. The IAS mechanism provides support to carriers serving lines in areas where they are unable to recover their permitted revenues from the subscriber line charges. The support total is an aggregate annual amount of approximately \$650 million. Support is targeted to the density zones that have the greatest need for it, and is provided on a portable, per-line basis. It is available on a competitively neutral basis to any ETC serving a supported customer, regardless of the technology used by that carrier.

LSS provides support for traffic sensitive local switching costs. LSS provides support to ILECs with study areas of 50,000 or fewer access lines, to help defray the higher switching costs of small ILECs. The LSS is recovered through the universal service support mechanisms, rather than through higher traffic-sensitive access charges. Until the end of 1997, this support was implicitly included in those access charges, based on dial equipment minute (DEM) weighting.³⁷ The portion of these costs that were normally allocated to interstate was determined by the ratio of interstate to total dial equipment minutes, known as the DEM factor. However, ILEC study

35 *Multi-Association Group (MAG) Plan for Regulation of Interstate Services of Non-Price Cap Incumbent Local Exchange Carriers and Interexchange Carriers, Federal-State Joint Board on Universal Service, Second Report and Order and Further Notice of Proposed Rulemaking in CC Docket No. 00-256, Fifteenth Report and Order in CC Docket No. 96-45, 16 FCC Rcd 19613 (2001) (MAG Order).*

36 *Access Charge Reform, Price Cap Performance Review for Local Exchange Carriers, Low-Volume Long Distance Users, Federal-State Joint Board on Universal Service, Sixth Report and Order in CC Docket Nos. 96-262 and 94-1, Report and Order in CC Docket No. 99-249, Eleventh Report and Order in CC Docket No. 96-45, 15 FCC Rcd 12962 (2000) (CALLS Order), rev'd and remanded, Texas Office of Public Utility Counsel v. FCC, 265 F. 3d 313 (5th Cir. 2001), and Access Charge Reform, CC Docket No. 96-262, Price Cap Performance Review for LECs, CC Docket No. 94-1, Low-Volume Long Distance Users, CC Docket No. 99-249, Federal-State Joint Board on Universal Service, CC Docket No. 96-45, Order on Remand, 18 FCC Rcd 14976 (2003).*

37 Table 3.7 of the *2003 Universal Service Monitoring Report* provides estimates of DEM weighting impacts from 1993 to 1997.

areas with 50,000 access lines or fewer had that portion multiplied by a weighting factor, which was determined by the number of access lines in the study area.³⁸ The resulting weighted DEM factor (which was not permitted to exceed .85) allowed these study areas to recover a greater portion of their local switching costs from interexchange carriers in the form of higher access charges.³⁹

Since 1998, the LSS factor has been calculated as the difference between the 1996 weighted DEM factor and the 1996 unweighted DEM factor. It is subject to the limit that the sum of the DEM factor and the LSS factor shall not exceed .85. Also, if the number of lines has increased since 1996 across one of the limit values of 10,000 or 20,000 or 50,000 lines, the 1996 weighted DEM factor used for computing the LSS factor is adjusted to reflect the weighting factor appropriate for the new number of lines. The LSS is the product of a carrier's annual unseparated local switching revenue requirement multiplied by its LSS factor. The Commission's rules require that the LSS be trued-up with actual costs no later than 15 months after the end of the calendar year for which historical data are submitted.⁴⁰

All of the universal service support mechanisms are administered by USAC, an independent subsidiary of NECA. As part of its administration of these support mechanisms, USAC files quarterly reports with the Commission, at least 60 days prior to the start of each quarter. These reports include quarterly projections of the amounts to be paid for each program, along with true-ups (differences between actual payments and projections) for prior periods, administrative expenses and interest income. The report for the fourth quarter of 2009, filed on July 31, 2009, was the one used to compile the 2009 projections for the tables in this section. Information on actual support payments since 2003 can be found on the USAC website,⁴¹ and data provided to us by USAC on annual support payments between 1998 and 2002 were used for those years. Tables 3.6 through 3.14 provide a summary by state of the total amounts of these

38 The weighting factors, which became effective in 1993, are shown in Table 3.6 of the December 1998 and June 1999 *Monitoring Reports*.

39 The weighted and unweighted DEM factors were shown in section 8 of this report in 2003 and prior years. The DEM factors were frozen in 2001 for a five year period, which has since been extended. See *Jurisdictional Separations Reform and Referral to the Federal-State Joint Board*, CC Docket No. 80-286, Report and Order, 16 FCC Rcd 11382 (2001); *Jurisdictional Separations Reform and Referral to the Federal-State Joint Board*, CC Docket No. 80-286, Order and Further Notice of Proposed Rulemaking, 21 FCC Rcd 5516 (2006); *Jurisdictional Separations Reform and Referral to the Federal-State Joint Board*, CC Docket No. 80-286, Report and Order, 24 FCC Rcd 6162 (2009). Because the factors are frozen, they are no longer being reported.

40 47 C.F.R. § 54.301(e)(2)(iv).

41 The monthly payment information for each study area can be found at <http://www.universalservice.org/hc/disbursements/default.aspx>.

support payments. Each table summarizes the annual amounts for the high-cost programs for those years the program existed between 1998 and 2009. Table 3.6 summarizes HCLS payments, Table 3.7 summarizes safety net additive support payments, Table 3.8 summarizes safety valve support payments, Table 3.9 summarizes HCMS payments,⁴² Table 3.10 summarizes LTS payments, Table 3.11 summarizes ICLS payments, Table 3.12 summarizes IAS payments, and Table 3.13 summarizes LSS payments. Table 3.14 summarizes the total of these seven payments. Table 3.15 shows the amounts of these payments by state going to ILECs and CETCs for each year since 1999. Table 3.16 shows, by support mechanism by state, for 2008, the monthly support payments per loop to carriers.⁴³ The 1998 amounts in Tables 3.6, 3.10, and 3.13 are the trued-up payments for 1998.⁴⁴ Table 3.11 has the final ICLS true-ups for 2002 through 2007.⁴⁵ Table 3.13 has the final LSS true-ups for 1999 through 2007.⁴⁶ The other

-
- 42 The payments for the forward-looking high-cost model support only include payments actually made based on the model. In cases where the HCL hold-harmless payment was made because it exceeded the model amount, the model amount was not counted and the hold-harmless payments were included in HCLS.
- 43 Loops or lines from USAC's Fund Size Projection for the Fourth Quarter 2008 were used because USAC's files showing actual payments do not include the number of loops or lines on which those payments are based. For ILECs, the maximum of loops or access lines for the various support mechanisms were used, and for CETCs, rural and non-rural components were considered separately, and IAS and ICLS access lines were added. Only those CETC loops or lines that were reported as eligible for support in the Fourth Quarter filing or received support payments in 2008 were included.
- 44 These are from Universal Service Administrative Company, *Federal Universal Service Support Mechanism Fund Size Projections (USAC Filing) for the First Quarter 2002* (November 2, 2001), Appendix HC7.
- 45 These are from the *USAC Filing for the Fourth Quarter 2004* (August 2, 2004), Appendix HC22; *USAC Filing for the Fourth Quarter 2005* (August 2, 2005), Appendix HC22; *USAC Filing for the Fourth Quarter 2006* (August 2, 2006), Appendix HC22; *USAC Filing for the Fourth Quarter 2007* (August 2, 2007), Appendix HC22; *USAC Filing for the Fourth Quarter 2008* (August 1, 2008), Appendix HC22; and *USAC Filing for the Fourth Quarter 2009* (July 31, 2009), Appendix HC22.
- 46 These are from the *USAC Filing for the Third Quarter 2001* (May 2, 2001), Appendix HC6; *USAC Filing for the Fourth Quarter 2002* (August 2, 2001), Appendix HC17; *USAC Filing for the Third Quarter 2003* (May 2, 2003), Appendix HC18; *USAC Filing for the Third Quarter 2004* (May 13, 2004), Appendix HC22; *USAC Filing for the Third Quarter 2005* (May 2, 2005), Appendix HC22; *USAC Filing for the Third Quarter 2006* (May 2, 2006), Appendix HC22; *USAC Filing for the Third Quarter 2007* (May 2, 2007), Appendix HC22; *USAC Filing for the Third Quarter 2008* (May 2, 2008), Appendix HC22; and *USAC Filing for the Third Quarter 2009* (May 1, 2009), Appendix HC22.

numbers (except for 2009 data) are based on the actual payments, as reported by USAC, and include out-of year adjustments for prior years. In all cases the 2009 total is based on the fourth quarter projection.

Pursuant to Part 36 of the Commission's rules, NECA collects certain cost data from ILECs that provide service to approximately 98% of the nation's ILEC subscribers.⁴⁷ Each year NECA collects NTS cost and loop data from the previous year, and files all such data with USAC and the Commission. USAC, as administrator of the high-cost support mechanism, uses that information to distribute high-cost assistance in the following year. On September 30, 2008, NECA reported new data for 2007, and revised data for the four previous years. State totals, based on that report, covering cost data for 2007, are presented in Table 3.17. This table shows unseparated NTS costs (revenue requirement), the number of loops, and costs per loop. It also shows the expected HCLS payments for 2009, based on 2007 data, using the high-cost formula and the cap discussed above. The costs shown are embedded costs for all companies.⁴⁸ The final column shows the percentage of the total payments going to companies in the state.

Table 3.18 shows the changes, from the revised data for 2006 to the newly reported data for 2007, for state totals, of the unseparated NTS revenue requirement, the number of loops, the revenue requirement per loop, and the HCLS payments. The phrase, "payments in later year" in the last column refers to the fact that these are projections of payments to be made two years after the costs are incurred; in this case, in the years 2008 and 2009.

Tables 3.19 through 3.21 present state summaries of the revised historical information filed for 2003 through 2007 in the 2008 filing. Table 3.19 shows the unseparated NTS revenue requirements for each year. Table 3.20 shows the number of loops. Table 3.21 shows the unseparated NTS revenue requirement per loop.

The next several tables in this section are data for individual study areas. Tables 3.22 through 3.30 are derived from the USAC data. In each table, only payments made in 2005 through projections for 2009 are included. Also, only those study areas that received payments for the support mechanism covered by the table for those years are included in the table. Payments for 1998 through 2001 can be found in the 2006 *Universal Service Monitoring Report*, payments for 2002 and 2003 can be found in the 2007 *Universal Service Monitoring Report*, and

47 These are the carriers that settle on a cost basis. Costs for the remaining ILECs, which settle on an average schedule basis, are attributed by NECA on the basis of those carriers' average number of loops per exchange.

48 The data submitted by NECA include payments that would have been made to non-rural carriers if the forward-looking high cost model had not been implemented, which form the basis of the hold-harmless calculations. Consequently the amounts shown in Table 3.6 are a better indication of the actual HCLS payments.

payments for 2004 can be found in the 2008 *Universal Service Monitoring Report*. Table 3.22 has HCLS payments. Table 3.23 has safety net additive support payments. Table 3.24 has safety valve support payments. Table 3.25 provides, by non-rural study area, the high cost support using the forward-looking high-cost model support mechanism. Table 3.26 has LTS payments. Table 3.27 has ICLS payments. Table 3.28 has IAS payments for price-cap companies. Table 3.29 has LSS payments. Table 3.30 has the total support payments for all seven programs. Each of these tables contains the annual amounts for only those years for which a support mechanism was in place. Table 3.27 has the final ICLS true-ups for 2005 through 2007, and Table 3.29 has the final LSS true-ups for 2005 through 2007.⁴⁹ The other numbers (except for 2009 data) are based on the actual payments, as reported by USAC, and include out-of-year adjustments for prior years. In all cases the 2009 total is based on the fourth quarter projection. CETC study areas listed in the *USAC Filing for the Fourth Quarter of 2009* as being ineligible for support (because they applied for, but have not yet received, ETC status) have been excluded from these tables.

Tables 3.31 through 3.35 are derived from NECA's 2008 filing.⁵⁰ Table 3.31 contains individual study area data for 2007 for unseparated NTS costs (Revenue Requirement), the number of loops, and costs per loop. It also shows the expected HCLS payments for 2009, based on 2007 data, and the percentage of the national total HCLS that goes to the study area. For study areas that acquired exchanges from another study area and had to report the amounts for the acquired exchanges separately, the study area code is appended with an A or B for the data for the acquired exchanges. In the second column of Table 3.31, the types are cost (C) and average schedule (A), indicating the form of settlements used by that study area. The third column indicates whether the study area has been designated as rural (R) or non-rural (N). In addition to the name of the study area, the name of the holding company (if any) is also shown. The costs shown are embedded costs for all companies, and the payments shown include potential payments to non-rural companies that form the basis of hold-harmless calculations.⁵¹ Table 3.32 shows the percentage changes from the previous year for each of these amounts for individual study areas. In the payments column in this table, the entry "INFINITE" indicates that the payment was zero in the first year and positive in the second year.

Tables 3.33 through 3.35 present individual study area data for the historical information filed for 2003 through 2007 in the 2008 filing. Table 3.33 shows the unseparated NTS revenue

49 Final true-ups are completed about two years after the initial payments are made. See footnotes 45 and 46 for citations to the final true-up filings.

50 National Exchange Carrier Association, Inc., *Universal Service Fund 2008 Submission of 2007 Study Results* (sent September 30, 2008, received October 1, 2008).

51 The data submitted by NECA include payments that would have been made if the forward-looking high cost model had not been implemented. Consequently, Table 3.22 is a better indication of actual HCLS payments.

requirements for each year. Table 3.34 shows the number of loops. Table 3.35 shows the unseparated NTS revenue requirement per loop.

In compiling the historical data, it is necessary to account for changes that have occurred in the study areas over time. These changes are noted in Table 3.36.⁵² In cases where study areas have merged, the pre-merger data for all of the merged study areas have been combined and reported as the data for the surviving study area in Tables 3.33 through 3.35. In cases where there has been an ownership change resulting in a code number change, the pre-change data is reported under the new code number and name. In the case of newly created study areas, pre-creation data is reported as 0. In Table 3.32, percentage changes in the case of mergers are comparisons of the surviving study area data with the consolidated pre-merger data. In the case of sales of exchanges, for comparison purposes the data for the sold exchanges are consolidated with the data for the study area that divested them.

Each year NECA submits detailed account data used to calculate the unseparated revenue requirement per loop for each study area that settles on a cost basis, and total attributed revenue requirements for study areas that settle on an average schedule basis. In its filings since 1993, in addition to submitting such information for the latest year, NECA also submitted revised information for the four preceding years. The detailed account data are not reported here, but the most recent revision of the data for each year since 1988 is available in electronic form on the Wireline Competition Bureau Statistical Reports website www.fcc.gov/wcb/stats.

52 Because the study areas were matched between years by study area code number, changes in only the name of the company are not included in this list. However, for name changes between 2006 and 2007, Table 3.32 shows the old name in parentheses.

Table 3.1
High-Cost Support Fund Payment History
(In Millions of Dollars)

| Year | High-Cost Loop Support | Safety Net Additive Support | Safety Valve Support | High-Cost Model Support | Long-Term Support | Interstate Common Line Support | Interstate Access Support | Local Switching Support | Total Support |

Chart 3.2
Total High-Cost Support Fund Payments - ILECs and CETCs
(In Millions of Dollars)

Table 3.3
Embedded High-Cost Loop Fund Formulas

| Cost Range as % of National Average | % Expense Adjustment within Range |
|-------------------------------------|-----------------------------------|
|-------------------------------------|-----------------------------------|

Study Areas with Over 200,000 Loops

| | |
|----------------|-----|
| 0% - 115% | 0% |
| 115% - 160% | 10% |
| 160% - 200% | 30% |
| 200% - 250% | 60% |
| 250% and above | 75% |

Study Areas with 200,000 Loops or Fewer

| | |
|----------------|-----|
| 0% - 115% | 0% |
| 115% - 150% | 65% |
| 150% and above | 75% |

Notes: These values have been used since 1988.

Beginning January 1, 2000, these are only applicable to rural companies and to hold-harmless support for non-rural companies.

Table 3.4
National Exchange Carrier Association, Inc.
Pool Results - Common Line Summary

| Line Item (Note 1) | Pool Year (Note 2) | | Percentage Change (Note 3) |
|---|--------------------|-----------------|----------------------------|
| | 2007 | 2008 | |
| Carrier Common Line (CCL) Earned Revenues | | | |
| Special Access Surcharge | \$142,316,367 | \$123,787,489 | -13.02% |
| CCL Net Realized Uncollectibles | \$3,817,893 | \$3,179,424 | -16.72% |
| CCL Net Earned Revenues | \$138,498,474 | \$120,608,065 | -12.92% |
| End-User Net Earned Revenues (Note 4) | \$896,475,728 | \$740,620,248 | -17.39% |
| Total Common Line Net Earned Revenues | \$1,034,974,202 | \$861,228,313 | -16.79% |
| ICLS | \$977,611,254 | \$960,891,708 | -1.71% |
| Total Common Line Revenues | \$2,012,585,456 | \$1,822,120,021 | -9.46% |
| NECA Administrative Costs | \$30,751,739 | \$30,838,645 | 0.28% |
| Average Schedule Company Settlements | \$324,854,199 | \$295,659,784 | -8.99% |
| Common Line Expenses and Other Taxes | \$1,350,453,170 | \$1,218,648,870 | -9.76% |
| Common Line Adjusted Federal Income Tax | \$71,081,380 | \$63,406,316 | -10.80% |
| Total Common Line Expenses | \$1,777,140,488 | \$1,608,553,615 | -9.49% |
| Common Line Residue for Distribution (Note 5) | \$235,444,968 | \$213,566,406 | -9.29% |
| Common Line Average Net Investment | \$2,210,757,078 | \$2,080,457,551 | -5.89% |
| Common Line Residue Ratio (Note 6) | 10.65% | 10.27% | -3.61% |

Note 1: All of the individual line items include some estimates and are subject to further adjustments under current NECA procedures.

Note 2: The pool year is the calendar year. The 2007 pool year data are reported as of February 2008. The 2008 pool year data are reported as of February 2009.

Note 3: Year-to-year changes are affected by changes in the number of companies participating in NECA tariffs, sales and acquisitions of assets by participating companies, average schedule to cost conversions, and mid-year tariff changes in rate levels.

Note 4: Amount includes end-user SLC waiver revenues for NECA tariff participants.

Note 5: Residue for distribution is total revenues less total expenses.

Note 6: Residue ratio is calculated by dividing the amount of residue for distribution by the amount of average net investment and multiplying by 100.

Table 3.5
National Exchange Carrier Association, Inc.
Pool Results - Traffic Sensitive Summary

| Line Item (Note 1) | Pool Year (Note 2) | | Percentage Change (Note 3) |
|---|--------------------|-----------------|----------------------------|
| | 2007 | 2008 | |
| Traffic Sensitive Earned Revenues | \$869,757,818 | \$889,981,517 | 2.33% |
| Local Switching Support | \$302,173,941 | \$276,278,650 | -8.57% |
| Traffic Sensitive Net Realized Uncollectibles | \$161,034 | \$197,654 | 22.74% |
| Traffic Sensitive Net Earned Revenues | \$1,171,770,725 | \$1,166,062,513 | -0.49% |
| Total Traffic Sensitive Revenues | \$1,171,770,725 | \$1,166,062,513 | -0.49% |
| NECA Administrative Costs | \$19,118,562 | \$20,610,924 | 7.81% |
| Average Schedule Company Settlements | \$331,018,323 | \$298,349,251 | -9.87% |
| Traffic Sensitive Expenses & Other Taxes | \$638,948,366 | \$643,082,945 | 0.65% |
| Traffic Sensitive Adjusted Federal Income Tax | \$35,954,976 | \$40,611,645 | 12.95% |
| Total Traffic Sensitive Expenses | \$1,025,040,227 | \$1,002,654,765 | -2.18% |
| Traffic Sensitive Residue for Distribution (Note 4) | \$146,730,498 | \$163,407,748 | 11.37% |
| Traffic Sensitive Average Net Investment | \$1,159,492,893 | \$1,150,606,029 | -0.77% |
| Traffic Sensitive Residue Ratio (Note 5) | 12.65% | 14.20% | 12.23% |

Note 1: All of the individual line items include some estimates and are subject to further adjustments under current NECA procedures.

Note 2: The pool year is the calendar year. The 2007 pool year data are reported as of February 2008. The 2008 pool year data are reported as of February 2009.

Note 3: Year-to-year changes are affected by changes in the number of companies participating in NECA tariffs, sales and acquisitions of assets by participating companies, average schedule to cost conversions, and mid-year tariff changes in rate levels.

Note 4: Residue for distribution is total revenues less total expenses.

Note 5: Residue ratio is calculated by dividing the amount of residue for distribution by the amount of average net investment and multiplying by 100.

Note: Payments for 1998 to 2007 are final trueups that include adjustments made in subsequent years.
Payments for 2008 are actual disbursements made in that year and may include out-of-year adjustments to payments made for previous years.
Payments for 2009 are projections based on the filing for the 4th quarter of 2009.

**Table 3.16
Monthly Support per Loop for High-Cost Support Mechanisms: 2008**

Source: Universal Service Administrative Company filings to the FCC.

Note: Payments for 2005 to 2007 are final trueups that include adjustments made in subsequent years. Payments for 2008 are actual disbursements made in that year and may include out-of-year adjustments to payments made for previous years. Payments for 2009 are projections based on the filing for the 4th quarter of 2009.

Note: Payments for 2005 to 2007 are final trueups that include adjustments made in subsequent years.
Payments for 2008 are actual disbursements made in that year and may include out-of-year adjustments to payments made for previous years.
Payments for 2009 are projections based on the filing for the 4th quarter of 2009.

4. Schools and Libraries Support

Eligible schools, school districts, libraries, and consortia that include schools and libraries may receive discounts for eligible telecommunications services, Internet access, and internal connections under the schools and libraries universal service support mechanism, also known as the E-rate program. The discounts range from 20 percent to 90 percent. The level of the discount is based on the percentage of students in the school or school district that are eligible for the national school lunch program (or a federally approved alternative mechanism), and location in a rural area. By Commission rule, the E-rate program is capped at \$2.25 billion annually.¹

In order to receive discounts on eligible services, the Commission's rules require that the applicant submit to the universal service fund administrator (Administrator or USAC) a completed FCC Form 470, which sets forth the technological needs and the services for which the applicant seeks discounts. This submission initiates the required competitive bidding process. Generally, the FCC Forms 470 are posted on the USAC Schools and Libraries Division (SLD) website for at least 28 days so that providers have an opportunity to submit competing bids to perform the services.² After the eligible applicant has complied with the Commission's competitive bidding requirements and contracted for eligible services, it must file an FCC Form 471 to request discounts for services that have been ordered.

The Administrator reviews the FCC Forms 471 that it receives and issues funding commitment decisions indicating discounts that the applicant may receive in accordance with the Commission's rules. Subsequently, the applicant either: (1) pays the after-discount portion of the service cost to the service provider, which, in turn, seeks payment from the Administrator for the discounted amount (using the FCC Form 472), or (2) pays the entire bill (the pre-discounted amount) to the service provider, and seeks reimbursement from the Administrator for the discounted amount (using the FCC Form 474). In the latter instance, the Administrator disburses the money to the service provider who, in turn, reimburses the applicant.

The Administrator acts on these requests in accordance with Commission rules and decisions. If the Administrator denies a request for funding, the applicant may either appeal directly to the Commission or appeal to the Administrator. If rejected on appeal by the Administrator, the applicant may appeal to the Commission. Since inception, the program has experienced a tremendous expansion of both the number of applicants and recipients, and the number of appeals regarding decisions.

Frequently, the total amount of funding requested exceeds the \$2.25 billion cap. Under

1 47 C.F.R. §54.507(a).

2 The posted forms can be viewed at <http://www.usac.org/sl/tools/search-tools/form470-search-posted.aspx>.

the Commission's rules of priority, when the filing window closes, the Administrator will calculate total requests for support submitted during the filing window. If the total amount requested exceeds the total support available in that funding year, the Administrator will: (1) calculate the requests for telecommunications services and Internet access for all discount categories (these services receive first priority for funding), (2) allocate the remaining funds to the requests for support for internal connections, beginning with the most disadvantaged schools and libraries (those eligible for a 90 percent discount), and (3) commit remaining funds for internal connections to the applicants at each descending discount level until there are no funds remaining (i.e. 89%, 88%, etc).

If the remaining funds are not sufficient to support all of the eligible discount requests within a particular discount level, the Administrator will divide the total amount of remaining support available by the amount of support requested within that discount level to produce a pro-rata factor. That is, each of the schools and libraries within that discount level will receive the same proportion of the support they requested.

In 2002, the Commission concluded that, beginning with the second quarter of 2003, any unused funds from the schools and libraries support mechanism would, consistent with the public interest, be carried forward for disbursement in subsequent funding years.³ The Commission determined that the Administrator shall report to the Commission, on a quarterly basis, funding that is unused from prior years of the schools and libraries support mechanism. On an annual basis, in the second quarter of each calendar year, all funds that are collected and that are unused from prior years shall be available for use in the next full funding year in accordance with the public interest and notwithstanding the annual cap. In the *Schools and Libraries Third Report and Order*, the Commission directed USAC to carry forward \$420 million of unused prior year funds to increase the amount of funds available for pending Funding Year 2003 requests.⁴ On June 11, 2007, the Wireline Competition Bureau announced that \$650 million in unused funds will be carried forward from Funding Years

3 See *Schools and Libraries Universal Service Support Mechanism*, CC Docket No. 02-6, First Report and Order, 17 FCC Rcd 11521, para. 3 (2002) (*Schools and Libraries Order*). In the *Schools and Libraries Order*, the Commission decided that it was in the public interest to take immediate action to stabilize the contribution factor while the Commission considered whether and how to reform the way in which contributions to the universal service mechanism were assessed. The Commission determined that unused funds periodically would be applied to reduce the contribution factors.

4 See *Schools and Libraries Universal Service Support Mechanism*, CC Docket No. 02-6, Third Report and Order and Second Further Notice of Proposed Rulemaking, 18 FCC Rcd 26912, para. 52 (2003) (*Schools and Libraries Third Report and Order*), and *Carryover of Unused Funds for Funding Year 2004*, CC Docket No. 02-6, Public Notice, 19 FCC Rcd 20420 (Wireline Comp. Bur. 2004).

2001, 2002, 2003 and 2004 to increase disbursements to schools and libraries in Funding Year 2007 in excess of the annual cap.⁵ On June 23, 2008, the Wireline Competition Bureau announced that \$600 million in unused funds would be carried forward from Funding Years 2002, 2003 and 2004 to increase disbursements to schools and libraries in Funding Year 2008 in excess of the annual cap.⁶

As of June 30, 2009, USAC had committed more than \$1.97 billion and disbursed nearly \$1.52 billion of Funding Year 2006 funds. USAC had also committed nearly \$2.44 billion, and disbursed nearly \$1.73 billion of Funding Year 2007 funds. As of the same date, USAC had committed nearly \$2.33 billion, and disbursed nearly \$1.07 billion of Funding Year 2008 funds.⁷

USAC supplies the Commission with funding commitments and disbursements information for the E-rate program for all active funding years. USAC provided the Commission with data as of June 30, 2009. Table 4.1 summarizes commitments and disbursements by applicant type and by service type for each funding year. Because of the appeals process, funding commitments and disbursements can be made after the end of the program year. Also, disbursements may continue beyond the end of the program year in the event of delayed internal connections installation. Thus, disbursements for the two most recent funding years will rise substantially.

Table 4.2 summarizes commitments and disbursements by state and by type of applicant for Funding Years 2006, 2007 and 2008. Table 4.3 is based on the same data as Table 4.2 and shows, on a state-by-state basis, funding commitments and disbursements for the three major types of services: internal connections, Internet access, and telecommunications. The lists of individual funding commitments and disbursements are too lengthy to include in this report, but are available online from USAC's website.⁸ Information for earlier funding years can be found in earlier editions of the *Universal Service Monitoring Report*.⁹

Table 4.4 summarizes, for Funding Years 2006 through 2008, fund disbursements by type of service provider entity that provides the underlying service to the school or library, and by the

5 See *Schools and Libraries Universal Service Support Mechanism*, CC Docket No. 02-6, Public Notice, 22 FCC Rcd 10795 (Wireline Competition Bureau 2007).

6 *Carryover of Unused Federal Universal Service Funds for Funding Year 2008*, CC Docket No. 02-6, Public Notice, 23 FCC Rcd 9960 (Wireline Comp. Bur. 2008) (*2008 Carryover Public Notice*).

7 See Table 4.1

8 See *Data Retrieval Tool* at www.sl.universalservice.org/funding/OpenDataSearch.

9 Earlier editions of the Monitoring Reports are available at www.fcc.gov/wcb/iatd/monitor.html.

way USAC was billed (whether from the school/library using the FCC Form 472, or by the service provider directly using the FCC Form 474).¹⁰ Unlike the other tables in this section, this table is based on information in USAC's *Federal Universal Service Support Mechanism Fund Size Projections for the Fourth Quarter 2009*, and reflects disbursements as of June 30, 2009.

Table 4.5 shows, for Funding Years 2006 and 2007, commitments and disbursements on a per-student basis. Although both public and private schools are eligible for schools and libraries support, only public school enrollment data were available on a state-by-state basis from the Department of Education, so the amounts per student may be slightly inflated. Unused funding commitments have been used to offset collections for later years.

Tables 4.6 and 4.7 show, on an aggregated national level, commitments and disbursements per student for each category of eligible service: 1) internal connections, 2) Internet access, 3) telecommunications, and 4) total funding, for Funding Years 2005 through 2008. The figures for Funding Year 2008, particularly disbursements, should be viewed as preliminary and likely subject to adjustment in the future.

10 In both cases, the service provider receives the money. Where the applicant paid the entire bill up front, the service provider then reimburses the applicant.

Source: Raw data provided by the Universal Service Administrative Company, rollups performed by Industry Analysis and Technology Division, Wireline Competition Bureau, FCC. Activity through June 30, 2009. Because of the appeals process, funding commitments and disbursements can be made after the end of the program year. Also, disbursements may continue beyond the end of the program year in the event of delayed internal connections installation. Other adjustments and corrections may also be made.

Table 4.2
Schools and Libraries Funding Commitments and Disbursements by State and by Type of Applicant
Funding Year 2008: July 1, 2008 through June 30, 2009

Source: Raw data provided by the Universal Service Administrative Company, rollups performed by Industry Analysis and Technology Division, Wireline Competition Bureau, FCC. Activity through June 30, 2009. Because of the appeals process, funding commitments and disbursements can be made after the end of the program year. Also, disbursements may continue beyond the end of the program year in the event of delayed internal connections installation. Other adjustments and corrections may also be made.

Table 4.3
Schools and Libraries Funding Commitments and Disbursements by State and by Type of Service
Funding Year 2006: July 1, 2006 through June 30, 2007

| State/Territory | Internal Connections | | Internet Access | | Telecommunications | | Totals | |

Source: Raw funding data provided by the Universal Service Administrative Company, rollups performed by Industry Analysis and Technology Division, Wireline Competition Bureau, FCC.

Activity through June 30, 2009. Because of the appeals process, funding commitments and disbursements can be made after the end of the program year. Also, disbursements may continue beyond the end of the program year in the event of delayed internal connections installation. Other adjustments and corrections may also be made.

¹ Estimate of the students enrolled in fall of 2006. Although private schools are eligible for funding, state-by-state enrollment data were not available. Figures do not include any students in Defense Department or Bureau of Indian Affairs schools. Data from the U.S. Department of Education at nces.ed.gov/ccd/bat.

Table 4.5
Schools and Libraries Funding Commitments and Disbursements per Student by State

Funding Year 2007: July 1, 2007 through June 30, 2008

| State/Territory | Students in Public Schools¹ | Funds Committed | Funds Committed per Student | Funds Disbursed | Funds Disbursed per Student | Unused Funding Commitments | Unused Commitments per Student |
|------------------------|---|------------------------|------------------------------------|------------------------|------------------------------------|-----------------------------------|---------------------------------------|
| Alabama | 743,632 | \$41,724,860 | \$56.11 | \$36,318,104 | \$48.84 | \$5,406,757 | \$7.27 |

5. Rural Health Care Support

The portion of the 1996 Telecommunications Act that covers universal service support for rural health care providers states that “[a] telecommunications carrier shall ... provide telecommunications services . . . to any public or non-profit health care provider ... at rates that are reasonably comparable to rates charged for similar services in urban areas in that state.”¹ The Commission's universal service rules permit eligible health care providers² to receive support for any telecommunications service.³

In December 2004, the Commission released a *Second Order*⁴ that modified the Commission’s rules for rural health care support. In this *Second Order*, the Commission changed its definition of “rural” for the purposes of the rural health care support mechanism.⁵ Now a “rural area” is an area that is not located within or near a large population base. Specifically, a “rural area” is an area that (a) is entirely outside of a Core Based Statistical Area (CBSA); (b) is within a CBSA that does not have any urban area with a population of 25,000 or greater; or (c) is in a CBSA that contains an urban area with a population of 25,000 or greater, but is within a specific census tract that itself does not contain any part of a place or urban area with a population of greater than 25,000.⁶ This new definition was effective as of Funding Year 2005 (July 1, 2005 – June 30, 2006). Several other rules also were changed. The Commission expanded funding for mobile rural health care providers by subsidizing the difference between the rate for the satellite service and the rate for an urban wireline service with a similar bandwidth.⁷ June 30 is now the final deadline for applications for support for health care providers seeking discounts for a specific funding year under

1 47 U.S.C. § 254(h)(1)(A).

2 47 C.F.R. § 54.601.

3 A 1.544 Mbps (T1) maximum bandwidth cap was employed in Funding Years 1 and 2. *See Federal-State Joint Board on Universal Service*, CC Docket No. 96-45, Report and Order, 12 FCC Rcd 8776, 9101-04 (1997), paras. 620-624. The Commission removed the bandwidth cap for year three and beyond. *See Federal-State Joint Board on Universal Service*, CC Docket Nos. 97-21 and 96-45, Sixth Order on Reconsideration in CC Docket No. 97-21, Fifteenth Order on Reconsideration in CC Docket No. 96-45, 14 FCC Rcd 18756, 18767-72 (1999) (*Fifteenth Order on Reconsideration*).

4 *See Rural Health Care Support Mechanism*, WC Docket No. 02-60, Second Report and Order, Order on Reconsideration, and Further Notice of Proposed Rulemaking, 19 FCC Rcd 24613 (2004) (*Second Order*).

5 *See Second Order* at 24619-20, paras. 11-12.

6 47 C.F.R. § 54.5.

7 *See Second Order* at 24626, para. 28.

the rural health care support mechanism.⁸ In addition, a rural health care provider in a state that is entirely rural may now receive support for advanced telecommunications and information services.⁹

To receive funding under the Rural Health Care Program, an eligible rural health care provider seeking funding must first submit FCC Form 465 (description of services requested and certification form) to the Rural Health Care Division (RHCD) of the Universal Service Administrative Company (USAC).¹⁰ If the RHCD determines that the health care provider is eligible, it posts the Form 465 on its website.¹¹ Twenty-eight days thereafter, the rural health care provider may contract with the most cost-effective bidder. The health care provider then fills out FCC Form 466 (Funding Request and Certification Form) and/or 466-A (Internet Service Funding Request and Certification Form), and submits it to the RHCD. Upon receipt and approval of FCC Form 466, the RHCD sends a Funding Commitment Letter to the rural health care provider. The letter explains that the request has received preliminary approval, and provides an estimate of the amount of support that can be expected. The rural health care provider must respond by submitting FCC Form 467 (receipt of service confirmation form) to verify that the service has begun. RHCD then sends a Support Schedule to the carrier and the health care provider. The carrier provides service to the rural health care provider, and then invoices the RHCD for the support amount. Upon approval of the invoice, USAC reimburses the carrier.

In September 2006, the FCC established the Rural Health Care Pilot Program to provide funding to stimulate deployment of the broadband infrastructure necessary to support innovative telehealth and telemedicine services to those areas of the country where the need for these benefits is most acute.¹² Specifically, the Pilot Program will provide funding to support the design and construction of state or regional broadband networks dedicated to health care and the advanced services provided over those networks, as well as connecting those networks to Internet2, National LambdaRail, Inc. (both dedicated nationwide backbones), or the public Internet.¹³

13 *Rural Health Care Support Mechanism*, WC Docket No. 02-60, Order, 22 FCC Rcd 20360

On November 19, 2007, the Commission released the *Rural Health Care Pilot Program Selection Order*, which selected 69 applicants covering 42 states and three U.S. territories to participate in the Pilot Program.¹⁴ The *Rural Health Care Pilot Program Selection Order* makes available to these participants approximately \$139 million in rural health care support per funding year for three years, beginning with Funding Year 2007 of the existing Rural Health Care program.¹⁵ The *Rural Health Care Pilot Program Selection Order* further provides instructions to selected participants concerning submission of FCC forms to the RHCD and on Pilot Program administration.¹⁶ For more information on the Pilot Program, visit the Pilot Program website.¹⁷

By rule, the Commission has established a \$400 million per funding year cap for the rural health care mechanism.¹⁸ For more information on the Universal Service Program for Rural Health Care providers, visit the RHCD website.¹⁹

USAC supplied the Commission with funding commitments and disbursements information as of June 30, 2009.²⁰ Table 5.1 summarizes funding disbursements for all funding years by service speed. Tables 5.2 and 5.3 show details for Funding Years 2006 through 2008. Table 5.4 shows details for Funding Years 2006 and 2007. For details on the preceding funding years, see the previous editions of

(2007) (*Rural Health Care Pilot Program Selection Order*), para. 2.

- 14 *Rural Health Care Pilot Program Selection Order*. Due to mergers, there are now 62 projects in the Pilot Program. See <http://www.fcc.gov/cgb/rural/rhcp.html>.
- 15 See *id.* at para. 33. USAC did not issue a Pilot Program funding commitment for the first funding year (Funding Year 2007 of the existing Rural Health Care program). Unused Pilot Program support, however, is carried over to the next Pilot Program funding year. See Letter from Dana Shaffer, FCC, to Scott Barash, USAC, CC Docket No. 02-60 (Jan. 17, 2008). USAC reported that it rolled forward the Funding Year 2007 demand estimate and commitment cap of \$139.26 million to Funding Year 2008, except for \$0.53 million, which was committed and invoiced for Funding Year 2007. Universal Service Administrative Company, *Federal Universal Service Support Mechanisms Fund Size Projections for the Fourth Quarter 2009* at 21.

- 20 Because of the appeals process, funding commitments and disbursements may be made after the program year ended.

the *Monitoring Report*.²¹ Table 5.2 summarizes funding commitments and disbursements on a state-by-state basis.

Funding Year 2006 was July 1, 2006, through June 30, 2007. USAC reports that 5,225 Form 466 and 466-A packets have been completely processed.²² As of June 30, 2009, over \$46.34 million had been committed, and nearly \$43.53 million had been disbursed.²³ USAC states that Funding Year 2006 demand will be \$45.38 million.²⁴

Funding Year 2007 was July 1, 2007, through June 30, 2008. USAC reports that it completely processed 5,919 Form 466 and 466-A packets. Additionally, 484 packets were withdrawn by the applicant and 237 were denied. USAC estimates Funding Year 2007 demand will be approximately \$54.99 million.²⁵ As of June 30, 2009, over \$55.92 million had been committed, and nearly \$50.16 million had been disbursed.²⁶

Funding Year 2008 was July 1, 2008, through June 30, 2009. As of June 30, 2009, more than \$42.56 million had been committed, and more than \$22.65 million had been disbursed.²⁷ USAC estimates Funding Year 2008 demand will be \$60.95 million.²⁸

Table 5.3 shows state-by-state disbursements by service speed for Funding Years 2006 through 2008. In some instances, such as with frame relay service, the service speed was not clearly identifiable. Whenever possible, the most likely speed for each service was assumed. For example, Frame Relay theoretically could be provided at voice grade speeds, but the vast majority of it is

21 Earlier editions of the *Monitoring Reports* are available at www.fcc.gov/wcb/iatd/monitor.html.

6. Subscribership and Penetration

The number and percentage of households that have telephone service represent the most fundamental measures of the extent of universal service. Continuing analysis of telephone penetration statistics allows us to examine the aggregate effects of Commission actions on households' decisions to maintain, acquire or drop telephone service. This section presents comprehensive data on telephone penetration statistics from the Current Population Survey (CPS) collected three times a year by the Bureau of the Census under contract with the Federal Communications Commission.¹ Along with telephone penetration statistics for the United States and each of the states from November 1983 to March 2009, data are provided on penetration based on various demographic characteristics. This section also presents historical data from the decennial census and annual data from the American Community Survey (ACS) collected by the Bureau of the Census. This section also updates information on telephone penetration by income by state.² This information is designed to help evaluate the degree of success of making telephone service available to low-income households in each state.

The most widely used measure of telephone subscribership is the percentage of households with telephone service, sometimes called a measure of telephone penetration. Prior to 1980, precise measurements of telephone subscribership received little attention. Historical estimates of telephone penetration were based on a comparison of the number of residential main stations to the number of households or housing units. Measures of penetration based on the number of residential lines, however, became subject to a large margin of error as more and more households added second telephone lines and more consumers acquired second homes. By 1980, the traditional measure of penetration (residential lines divided by the number of households) reached 96%, while the proportion of households reporting that they had telephones in the 1980 census was 92.9%.

Recognizing the need for more precise periodic measurements of subscribership, the Commission requested that the Census Bureau include questions on telephone availability as part of its CPS, which monitors demographic trends between the decennial censuses. This survey is a staggered panel survey in which the people residing at particular addresses are included in the survey for four consecutive months in one year and the same four months in the following year. Use of the CPS has several advantages: it is conducted every month by an independent and expert agency; the sample is large; and the questions are consistent. Thus, changes in the results can be compared over time with a reasonable degree of confidence.

1 This information was included in Industry Analysis and Technology Division, Wireline Competition Bureau, Federal Communications Commission, *Telephone Subscribership in the United States* (August 13, 2009). That report is updated three times a year.

2 This information was included in Industry Analysis and Technology Division, Wireline Competition Bureau, Federal Communications Commission, *Telephone Penetration by Income by State* (August 6, 2009). That report contains information on the number of households in each state as well as the percentages reported here.

In the 1980 decennial census, the question "Do you have a telephone?" was added to the long-form questionnaire. The same question was used in 1990. With the telephone companies no longer owning the telephone instruments beginning in 1984, it is possible for someone to have a telephone but not have service. Therefore, the question was changed in 2000 to avoid the possible bias from having a phone but no service. In the 2000 decennial census, the question was changed to "Is there telephone service available in this [housing unit] from which you can both make and receive calls?" The question also allows for the possibility of the substitution of wireless service for wireline service. Beginning in 2001 the Census Bureau introduced the ACS, which was designed to replace the long form of the decennial census. Unfortunately, the results of the CPS cannot be directly compared with the penetration figures contained in the 1980, 1990, and 2000 decennial censuses or the ACS. This is due to differences in sampling techniques and survey methodologies, and because of differences in the context in which the questions were asked. Also, the CPS uses households as the basis of measurement, while the decennial census and the ACS use occupied housing units instead. For example, the 2000 decennial census reported 97.6% of all occupied housing units in the United States had telephone service available, whereas the CPS data showed a penetration rate of 94.6% of households for March 2000. This difference is statistically significant and appears to indicate that the CPS value may be on the low side and the decennial census value may be on the high side, with the most probable value lying somewhere in between.

The decennial census data have the advantage of using much larger samples than the CPS because they are based on a sample of one-in-six households that filled out the Census Bureau's long form. This makes it possible to look at long-run trends for small minority groups. For example, statistics from the 2000 census estimated that 67.9% of all American Indian households living on federally recognized reservations and trust lands had telephone service, as compared with 46.6% estimated from the 1990 census.³

The specific questions asked in the CPS are: "Does this house, apartment, or mobile home have telephone service from which you can both make and receive calls? Please include cell phones, regular phones, and any other type of telephone."⁴ And, if the answer to the first question

3 For more information, see the report Industry Analysis and Technology Division, Wireline Competition Bureau, Federal Communications Commission, *Telephone Subscribership on American Indian Reservations and Off-Reservation Trust Lands* (May 5, 2003).

4 The questions are intended to be neutral as to whether the household has wireline or wireless phones. Through November 2004, this question had been worded: "Is there a telephone in this house/apartment?" Because of the increasing number of households that have wireless only, there was some concern that some of these households may not think of their cell phones when asked if they have a telephone. Consequently, beginning in December 2004, CPS changed its telephone question to the wording given above. It is possible that some of the drop in the penetration rate between November 2004 and March 2005 is for households who had a phone, but did not have service.

is "no," this is followed up with, "Is there a telephone elsewhere on which people in this household can be called?" If the answer to the first question is "yes," the household is counted as having a telephone "in unit." If the answer to either the first or second question is "yes," the household is counted as having a telephone "available." The "in unit" data and the "available" data are reported in Tables 6.9 through 6.13 and 6.15 through 6.19, and Charts 6.1 and 6.8. All of the remaining tables and charts of this section just report the "in unit" data.

Although the survey is conducted every month, not all questions are asked every month. The telephone questions are asked once every four months: in the month that a household is first included in the sample and in the month that the household reenters the sample a year later. Since the sample is staggered, the reported information for any given month actually reflects responses over the preceding four months. Aggregated summaries of the responses are reported to the Commission, based on the surveys conducted through March, July, and November of each year. The CPS later provides the Commission with the raw data files containing all of the responses to all of the questions on the CPS questionnaires in those months.⁵

The CPS data are based on a nationwide sample of about 50 to 60 thousand households in the 50 states and the District of Columbia. (The CPS does not cover outlying areas that are not states, such as Puerto Rico, Guam, American Samoa, the Virgin Islands, and the Northern Mariana Islands.) Because a sample is used, the estimates are subject to sampling error. For the nationwide totals, changes in telephone penetration between consecutive reports of less than or equal to 0.7% may be due to sampling error and cannot be regarded as statistically significant.⁶ As explained below, when comparing the same month in two consecutive years, changes of less than 0.6% are not statistically significant. When comparing annual averages, changes of less than or equal to 0.4% are not statistically significant. The annual averages are the average of the three surveys of the year in question. For individual states or other subgroups of the U.S. population, the amount of sampling variability is much greater, because the sample sizes are smaller. This will require larger changes to yield statistical significance at the same confidence level.

The data in this section are not seasonally adjusted. Because there is a fifty percent overlap in the sample with the sample for the same month in the previous year, there is a high correlation between values a year apart. However, after accounting for this, there has been no significant systematic seasonal variation.

Once a year, in March, the CPS supplements its survey with additional questions, which include detailed information about income, and augments its sample with about 2,500 additional Hispanic households. Starting in 2001, the sample was further augmented with about 20,000

5 Tables 6.3 through 6.5, 6.11, and 6.17 of this section are derived from these raw data files.

6 The determination of the statistical significance of a change over time is discussed below. The critical value is dependent on the sizes of the samples from which the change is computed and by the confidence level, which is 95% here.

additional households with children.⁷ The more detailed information from the March surveys makes it possible to adjust the income categories for inflation, and therefore make the purchasing power within each category stable over time. In the July and November surveys, only broad income categories are reported. (These are the categories that appear in Table 6.10.)

The Commission's Lifeline support mechanism was instituted in 1984 to help low-income households afford the monthly cost of telephone service. Under the federal Lifeline support mechanism, telephone companies offer reduced rates to qualifying households and receive reimbursement from the federal universal service support mechanisms. Initially, Lifeline was available only in those states that chose to participate by providing matching assistance.

Effective in 1998, the federal Lifeline support mechanism was revised so that a basic level of assistance would be provided in all states.⁸ Additional federal support is also provided wherever a state chooses to provide matching assistance, at a rate of \$1 in federal support for each \$2 of state matching support, up to a maximum of \$1.75 federal support (corresponding to \$3.50 of state matching support). States may provide further support without further matching federal assistance.⁹

Results and Statistical Analysis

Census Bureau figures for March 2009 show that the percentage of households subscribing to telephone service is 95.6%. This is an increase of 0.4% from the 95.2% of March 2008. The average penetration rate for the year 2008 was 95.2%, which is an increase of 0.4% from the 2007 average of 94.8%.

This section includes figures showing subscribership percentages by state, by the head of the household's age and race¹⁰, by household size, by income, and for adult individuals by labor force

7 The responses from the additional Hispanic households and households with children are not included in Tables 6.1, 6.3, and 6.7 through 6.11. Thus, in some cases, there may be small discrepancies between the percentages in those tables and the percentages in Tables 6.4 through 6.6 and 6.12.

8 The basic federal Lifeline support level is the subscriber line charge plus \$1.75 per line per month. Eligible subscribers living on tribal lands may receive up to \$25 additional Lifeline support as long as they pay at least \$1 a month for local phone service, after the discount.

9 A few states provide state Lifeline support that generally exceeds \$3.50. In addition, in other states the amount of state support is whatever is required to bring the local service cost to a certain price level, which could mean support in excess of \$3.50 for customers of companies with high local rates.

10 The racial categories reported in the CPS are white, black, and other. The "other"

status. The March 2009 data show that 96.2% of adult individuals in the civilian non-institutionalized population have a telephone in their household. This is an increase of 0.3% from the 95.9% of March 2008. The average penetration rate for 2008 was 95.8% for adult individuals, which is an increase of 0.3% from the 2007 average of 95.5%.

This section contains twenty tables and nine charts presenting penetration statistics for various geographic and demographic characteristics. The charts and the first eight tables present summaries of the available information. Tables 6.9 through 6.14 present more detailed information. In Tables 6.9 through 6.13, only the annual averages are included for the years 1984 through 2006. March, July, and November data for those years are available in previous Monitoring Reports in CC Docket Nos. 87-339 or 98-202. Tables 6.15 through 6.20 provide information necessary to determine the statistical significance of changes in the penetration rates over time.

Table 6.1 summarizes the CPS telephone penetration data for the United States, combining information on the number of households with the penetration rates.

Chart 6.1 graphically depicts the nationwide penetration rates for households over time using annual average CPS data.

Table 6.2 shows the historical estimates for the United States based on AT&T data through 1970, the decennial censuses for 1980 through 2000, and the ACS for 2001 through 2008. It also shows per capita wire lines and wireless subscribers.

Further information from the ACS is shown in Tables 6.3 and 6.4. Table 6.3 shows characteristics including housing unit tenure, age of the householder, and race and ethnicity of the householder and Table 6.4 shows state data. Data for Puerto Rico were included for the first time in 2005. The Puerto Rico data are not included in the U.S. national totals.

Table 6.5 summarizes the CPS telephone penetration rates by state, showing the average rates for 1984 and 2008, the change between those two years, and an indication as to whether the change is statistically significant. The statistical significance of a change is determined not only by the magnitude of that change, but also by the sizes of the samples used to estimate the change.

Chart 6.2 depicts the states with average 2008 penetration rates (as shown in Table 6.5) more than 1% below the national average, within 1% of the national average, or more than 1% above the national average.

category (which includes Asians, Native Americans, and anyone else who does not consider himself or herself to fall into the “white” or “black” categories) is not included in the tables and charts in this report because the sample size is too small. The ethnic category Hispanic, however, is included in the tables and charts. Hispanics can be of any race for purposes of the categories reported in the CPS.

Chart 6.3 depicts changes in household penetration rates by state (as shown in Table 6.5) between the average 1984 and 2008 rates. States with statistically significant increases or decreases are shown, along with other states with increases or decreases.

Chart 6.4 depicts the relationship between telephone penetration and household income, using average 2008 penetration rates for all households and for households headed by white, black, and Hispanic persons.¹¹ It is based on data in Table 6.10.

Chart 6.5 depicts the relationship between telephone penetration and household size, using average 2008 penetration rates for all households and for households headed by white, black, and Hispanic persons. It is based on data in Table 6.11.

Chart 6.6 depicts the relationship between telephone penetration and the head of the household's age, using average 2008 penetration rates for all households and for households headed by white, black, and Hispanic persons. It is based on data in Table 6.12.

Chart 6.7 depicts the relationship between telephone penetration and labor force status for civilian non-institutionalized adults, using average 2008 penetration rates for all adults and for white, black, and Hispanic adults. It is based on data in Table 6.13.

Chart 6.8 graphically depicts the nationwide penetration rates for civilian non-institutionalized adults over time using annual average data. It is also based on data in Table 6.13.

Chart 6.9 shows the telephone penetration rates in March of each year through 2008 for each of five income categories, adjusted for inflation, for the entire United States. It is based on data in Table 6.14. The income categories (expressed in March 1984 dollars) are: \$9,999 or less; \$10,000 - \$19,999; \$20,000 - \$29,999; \$30,000 - \$39,999; and \$40,000 or more. These categories were chosen because they are of approximately equal size, both in terms of income ranges and the number of households in each category. The upper limit of the lowest category is also approximately equal to the federal poverty line for a family of four. Between 1984 and 2008, there was a statistically significant increase in the penetration rate for all households. There also were statistically significant increases in penetration rates in the two lowest income categories over this time period.¹² For the middle income category the penetration rate was a small but not statistically significant increase between 1984 and 2008. For the two highest income categories there were decreases in the penetration rate that were not statistically significant between 1984 and 2008. Not all of the increases in the national total penetration rate can be explained by increases in real income, because

11 The CPS includes three racial categories: white, black, and other. Others, which include Native Americans, Asians, and Pacific Islanders, are not reported separately because of small sample sizes, but they are included in the totals. Hispanics are reported as an ethnic group, and can be of any race.

12 See footnote 20 for the critical values for these significance tests.

real income increases are reflected in the movement of households between categories. Thus, penetration changes within each income category represent changes holding real income constant.

To help evaluate the effect of the federal Lifeline support mechanism, Table 6.6 focuses on changes in telephone penetration rates from just before the program was established to just before it was substantially expanded in 1998, by comparing penetration rates for states with and without state Lifeline programs prior to 1998.¹³ Briefly, penetration rate increases were greater, on average, in states with Lifeline programs than in states without Lifeline programs.¹⁴ The effect is especially apparent for low-income households,¹⁵ which are the households primarily affected by the federal and state Lifeline programs. Between March 1984 and March 1997, the increase in the average penetration rate in states with Lifeline programs was 6.5% for low-income households. During this period, the increase in subscribership among low-income households in those states that adopted Lifeline programs was double that of states that did not adopt such programs, although there may have been other factors besides Lifeline that contributed to this result.

Information on all households is also included in Table 6.6. Overall penetration rates are more generally available and more commonly cited as measures of penetration than are rates only for low-income households. Penetration rate increases were again greater, on average, in states that established Lifeline programs. The increase for states with Lifeline programs was statistically significant,¹⁶ but the increase for states without state Lifeline programs was not. States that adopted Lifeline programs before 1998 generally had lower penetration rates in 1984 than those that did not adopt such programs. By 1997, the difference in the penetration rates for the two groups diminished significantly.

-
- 13 The expanded program was adopted in 1997, and took effect on January 1, 1998. States with Lifeline programs prior to 1998 are identified in Table 6.8 by showing that the year that Lifeline began was before 1998. Prior to the expansion, states participating in the federal Lifeline program were required to match the federal support with their own state support.
- 14 The averages for the groups of states were computed as weighted averages of the states in the groups, using the total number of households in each state as weights. This was calculated as the total number of households with telephone service in each group of states divided by the total number of households in that group.
- 15 Low-income households are those with incomes under \$10,000 expressed in March 1984 dollars, which is equivalent to \$20,812 in March 2008 dollars.
- 16 See the paragraph describing Tables 6.15 through 6.19 for a discussion of the determination of the statistical significance of a change over time. The critical value is dependent on the sizes of the samples from which the change is computed.

Table 6.7 focuses on the change in penetration rates between March 1997 (before the expansion of the federal Lifeline program) and March 2008. The states are divided into three groups:

- “Full or High Assistance” states providing at least \$3.00 of state support to get federal matching support of at least \$1.50 per line per month;
- “Intermediate Assistance” states providing between \$0.50 and \$3.00 of state support, and receiving between \$0.25 and \$1.50 federal matching support per line per month;
- “Basic or Low Assistance” states providing less than \$0.50 of state support, and receiving less than \$0.25 federal matching support per line per month.

On average, for low-income households in those states where full or high assistance is provided, telephone penetration increased by 4.0%, between March 1997 and March 2008. This increase is statistically significant. In this group of states there was a statistically significant increase of 1.1% in the overall penetration rate for all households. For states with intermediate assistance, there was a statistically significant increase of 3.8% in the low-income penetration rate and a statistically significant increase of 1.6% in overall penetration. For states with basic or low assistance, the average penetration for low-income households increased by 1.4% and the average penetration for all households increased by 0.3%. The changes in the two lower categories were not statistically significant.

Data on individual states are provided in Table 6.8. The support amounts shown in Table 6.8 are the average state support plus federal matching support for all lifeline subscribers in March 2008.¹⁷ They do not include state support in excess of the \$3.50 limit that is eligible for federal matching support.¹⁸ Thus, they range from zero to a maximum of \$5.25.

Table 6.9 shows the CPS penetration rates for the United States and for each state beginning with November 1983. Because the CPS began collecting this data only in 1983, comparable values are not available prior to November 1983. For each of the surveys, the column headed "Unit" indicates the percentage of households for which there is a telephone in the housing unit. The column headed "Avail." indicates the percentage of households which have telephone service available for incoming calls, either in the housing unit or elsewhere (such as at work or at a neighbor's home).

Table 6.10 shows the nationwide penetration rates for households by income and the race of the head of the household. It shows a strong relationship between income and penetration. Caution should be used in comparing these figures over time, because these income levels are not adjusted

17 These support amounts are from Table 2.3.

18 Any state support over \$3.50 per line is not matched by further federal support. The federal support includes half of the state support up to the \$3.50 limit. Thus the maximum federal matching support is \$1.75 per line per month.

for inflation. Thus, the same nominal income level at two points in time will reflect different real incomes in terms of purchasing power. Also, the income categories have changed over time due to the changing value of the dollar. Consequently, when evaluating penetration changes by income levels over time, Table 6.14 should be used.

Table 6.11 shows the nationwide penetration rates for households by the size of the household and the race of the householder. It shows that penetration is higher for households of 2 to 5 people than it is for single-person households or those with 6 or more people.

Table 6.12 shows the nationwide penetration rates for households by the age and race of the head of the household. It shows that the penetration rate is lowest for young and non-white households.

Table 6.13 shows the nationwide penetration rates for all persons that are at least 15 years old in the civilian non-institutionalized population by their race and employment status. Since this table is for individual adults rather than households, the total penetration rates are different from those in the previous tables. It shows that penetration is lowest among the unemployed.

Table 6.14 shows the penetration rates for each of the income categories, adjusted for inflation, shown in Chart 6.9, for each state for March of each year. The table shows only five categories, rather than the more numerous categories of the nationwide data in Table 6.10, because the small sample sizes caused by a larger number of categories would result in unreliably large sampling variability for the individual states. The relative levels of the March Consumer Price Index for all items (as reported in Table 7.4) were used to make the inflation adjustment. Thus, for example, \$10,000 in March 1984 dollars had the same purchasing power as \$20,812 in March 2008 dollars. The precise current dollar values in each year are reported at the end of Table 6.14.

Tables 6.15 through 6.19 present the critical values at the 95% confidence level for testing the statistical significance of changes in penetration rates over time in the earlier tables.¹⁹ These critical values are relevant because changes less than or equal to the values shown are likely to be due to sampling error, and thus cannot be regarded as demonstrating that a change in telephone penetration has occurred. In some cases, these critical values are very large because the sample sizes are very small for these subcategories, rendering the changes in estimated penetration rates unreliable. Because there is an overlap of half of the sample from year to year, but no overlap in the sample between surveys that are four months apart, annual changes are less subject to variations in sampling error. Consequently, the critical values should be multiplied by 0.8 when making a comparison for the same month in two consecutive years. When comparing the annual averages, the critical values should be multiplied by 0.5774, since these averages are based on three surveys, and hence have a lower standard error. When comparing annual averages of two consecutive years, the critical values should be multiplied by .46, taking into account both of the above factors.

19 At the end of 2007, the Census Bureau revised their variability estimates upward, probably reflecting the increased variability in the penetration rates in recent years.

Table 6.20 shows the sample sizes on which the estimates of Table 6.14 are based. The sampling variability is inversely related to the square root of the sample size. The critical values for individual income categories in Table 6.14 can therefore be estimated by taking the critical value for the state "In Unit" total and multiplying it by the square root of the ratio of the sample size for the state total to the sample size for the income category. In most cases, the critical value for an individual income category will be between two and three times the critical value for the state total.²⁰ In some cases, these critical values are very large because the sample sizes are very small for these subcategories, thereby rendering the estimated penetration rates unreliable.

20 For example, using this methodology to calculate critical values for comparing the 1984 and 2008 values for the United States Total, the critical values are 1.5% for the \$10,000 - \$19,999 and the \$40,000 or more categories, 1.6% for the \$9,999 or less category, 1.7% for the \$20,000 - \$29,999 category, and 2.0% for the \$30,000 - \$39,999 category. These compare with 0.7% for all households.

Table 6.1
Household Telephone Subscribership in the United States

| Date | Households (millions) | Households with Telephones (millions) | Percentage with Telephones | Households without Telephones (millions) | Percentage without Telephones |
|---------------|-----------------------|---------------------------------------|----------------------------|--|-------------------------------|
| November 1983 | 85.8 | 78.4 | 91.4% | 7.4 | 8.6% |
| March 1984 | 86.0 | 78.9 | 91.8% | 7.1 | 8.2% |

| 2005 | 94.8 | 60.1 | 65.8 |
| 2006 | 94.1 | 57.7 | 73.6 |
| 2007 | 94.6 | 54.2 | 80.8 |
| 2008 | 98.2 | 50.9 | 86.4 |

Sources: Percentage data for 1920 to 1970 from the U.S. Census Bureau, *Historical Statistics of the United States, Colonial Times to 1970*, Part 2, page 783. Percentage data for 1980 to 2000 from the decennial censuses. Percentage data for 2001 to 2007 from the Census Bureau's American Community Survey. Telephone line data for 1920 through 1970 are estimated by multiplying the number of telephones by the proportion of main plus equivalent main stations to total telephones for the Bell System. Prior to 1950, the 1950 proportion is used. For 1980 and 1990, ILEC local loops are used; see Table 7.1 of Industry Analysis and Technology Division, Wireline Competition Bureau, *Trends in Telephone Service* (August 2008). For 2000 to 2008, June ILEC and CLEC lines are used from Table 1 of Industry Analysis and Technology Division, Wireline Competition Bureau, *Local Telephone Competition: Status as of June 30, 2008* (July 2009). June wireless subscribers reported by CTIA are from Table 11.1 of Industry Analysis and Technology Division, Wireline Competition Bureau, *Trends in Telephone Service* (August 2008). For 1920 to 2000, the population from the decennial census is used. For 2001 to 2008, Census Bureau population estimates for July 1 are used.

† Households with income under \$10,000 expressed in March 1984 dollars.

* Increase is statistically significant at the 95% confidence level.

Decrease is statistically significant at the 95% confidence level.

Note: Changes may not appear to be the same as calculated differences due to rounding.

7. Rates and Price Indices

This section contains information on telephone price indices and rate levels.¹ It describes and presents a series of price indices maintained by the Bureau of Labor Statistics (BLS). It also discusses rate levels and changes in average rate levels.

Telephone Service Price Indices

The BLS collects a variety of information on telephone service as part of three separate programs -- the Consumer Price Index (CPI), the Producer Price Index (PPI), and the Consumer Expenditure Survey. They can be found on the Internet at www.bls.gov/data. The monthly price indices represent prices sampled in the middle of the month.

A Consumer Price Index for telephone services was first published in 1935.² Since that time, telephone prices have tended to increase at a slower pace than most other prices. Table 7.1 shows long-run changes in the Consumer Price Indices for all items, all services, telephone services, each of the seven major categories that currently constitute the overall CPI, and several services that are often characterized as public utilities. The price of telephone service has increased less rapidly than the prices of most of these categories when viewed over a long period of time. Chart 7.1 shows the levels of the overall CPI and the CPI for telephone services over time.

The CPI index of telephone services is based on a "market basket" intended to represent the telephone-related expenditures of a typical urban household. It includes both local and long distance services. The annual rate of change during recent years is shown in Table 7.2 for the overall CPI (which measures the impact of inflation on consumers), and the CPI for telephone services. In addition, Table 7.2 shows the Gross Domestic Product chain-type price index (which reflects inflation throughout the economy) prepared by the Bureau of Economic Analysis. Chart 7.2 shows the changes in the overall CPI and the CPI for telephone services over time.

For 2008 the nation's overall level of prices (measured by the CPI for all items) rose by 0.1%. The CPI for telephone services rose by 2.9% during 2008. The CPI for telephone services is composed of three subindices. During 2008, the local service component (including subscriber line charges) rose by 3.0%; the price index for interstate toll calls rose by 9.1%, and the price index for intrastate toll calls increased by 9.5%. The levels of these subindices over time are shown in Chart 7.3.

-
- 1 For more detailed information, see Industry Analysis and Technology Division, Wireline Competition Bureau, Federal Communications Commission, *Reference Book of Rates, Price Indices, and Household Expenditures for Telephone Service* (August 2008). Much, but not all, of the material in this section is based on that report.
 - 2 BLS publishes two sets of Consumer Price Indices. The CPI-U, used herein, is based on expenditures of all urban consumers. The CPI-W series is based on expenditures of urban wage earners and clerical workers.

The Bureau of Labor Statistics publishes a number of price indices related to local telephone service, two of which are important to the monitoring program. The CPI index of local telephone charges is based on a broadly defined "market basket" of local services that includes monthly service charges, message unit charges, leased equipment, installation, service enhancements (such as tone dialing and call waiting), taxes, subscriber line charges, and all other consumer expenditures associated with local telephone services except long distance charges. In contrast, the PPI index of monthly residential rates is much more narrowly defined. It is based only on monthly service charges for residential service, optional tone dialing service, and subscriber line charges. It excludes taxes and all other telephone service charges. The annual rates of change for these two indices are presented in Table 7.3.

CPI data are available for intrastate toll and interstate toll services since December 1977. Table 7.3 also presents the annual changes in these series for recent years.

Price indices are less reliable when industries are changing rapidly. For example, in 1992, long distance carriers began to increase basic long distance rates while at the same time greatly expanding their range of discount offerings aimed at medium and heavy users of long distance service. The fixed market basket of toll calls measured for the CPI did not fully reflect these discounts. In 1998, the CPI for telephone services was altered to include cellular telephone services, making the new index not directly comparable to prior years. In 1995, BLS made major changes to the PPI telephone series, and there are no data after July 1995 comparable with prior data. At that time the BLS introduced revenue-weighted telephone price indices. The new indices categorize the telephone industry into much finer detail, though the new series are not comparable to the old in many categories. Monthly data for the new CPI telephone indices are shown in Table 7.4.

With the release of data for January 2004, the Producer Price Index program changed its basis for industry classification from the 1987 Standard Industrial Classification (SIC) system to the North American Industry Classification System (NAICS). Developed in cooperation with Canada and Mexico, NAICS represents a profound change for statistical programs focusing on emerging economic activities. The system was developed using a production-oriented conceptual framework, grouping establishments into industries based on the activity in which they are primarily engaged. While many NAICS industries directly compare with SIC industries, a number of SIC industries were split or combined to form a new NAICS industry. The PPI treats the SIC-to-NAICS comparison as continuous if 80 percent or more of the weight of the SIC-based index comprises at least 80 percent of the weight of the NAICS-based index. All index series that have passed this test are published under the NAICS structure using the index base date and price index history established by the SIC-based index. Documentation of the NAICS to SIC concordance for all subsectors, industry groups, and products may be found at <http://www.bls.gov/ppi/ppinaics.htm>.³

3 Several telecommunications PPIs published by the BLS under the SIC classification system are no longer published following the conversion to NAICS. These include "Other Local Service" (SIC pcu4813#114), "Other Local Service except Directory Assistance" (SIC pcu4813#11409), "LEC Intrastate Private Line Service" (SIC pcu4813#311), "Directory Advertising" (SIC pcu4813#91), and "Other Telephone Services" (SIC pcu4813#99). In addition, "Directory Assistance" (SIC pcu4813#11401) is now classified as "Other Local Service" (NAICS 517110114) and "Telephone Communications except Radiotelephone" is

The current PPI indices are shown in Table 7.5.

Information on Rate Levels

Because of the sorts of difficulties mentioned above related to constructing price indices, measures of average revenues are sometimes used as alternatives to price indices. Table 7.6 contains average revenue per minute for interstate calls. These estimates show that billed revenue per minute has declined over time for both international and domestic services.

The FCC survey of local rates reported in previous Monitoring Reports was not conducted in 2008. Therefore, the rates reported in Tables 7.6 and 7.7 of the 2008 Monitoring Report are the most recent ones available.

Subscriber Line and Access Charges

Long distance companies rely on the loops, switches, and transport facilities of local telephone companies for access to their customers. As a result, local telephone companies recover a portion of their costs from long distance companies accessing their networks. Both the manner in which these access charges have been assessed and the proportion of the costs they have recovered have varied considerably over time.

Prior to 1984, AT&T provided almost all interstate long distance service while its local telephone companies provided about three-quarters of the nation's local telephone service. Under the regulatory oversight of the FCC and state public utilities commissions, for many years AT&T set long distance charges above cost and shared part of its revenues with Bell System and independent local companies. This system reduced pressures on the local companies to raise monthly local rates, but the high long distance rates suppressed demand for long distance calls and induced large corporations to bypass the public switched network. Moreover, while such revenue sharing arrangements were sustainable in an industry where one firm monopolized both long distance and local service, they were not compatible with a competitive long distance industry.

In mid-1984, the FCC, in cooperation with a Federal-State Joint Board comprised of both federal and state regulators, introduced sweeping changes to the way that local companies charged for their services. The historic method of sharing revenues was replaced with a new system of access charges that provided a uniform method for local telephone companies to charge for the origination and termination of interstate traffic on their local networks. In particular, monthly subscriber line charges (SLCs) were introduced to recover a portion of the fixed costs of the local telephone companies' loops directly from end users on a per-line basis. Since local telephone companies were required to reduce their charges to long distance carriers -- dollar for dollar -- the introduction of SLCs permitted reductions in implicit subsidies from long distance service to local service. The rebalancing of prices between local service and interstate long distance calls during the 1980s had a fundamental impact on the telephone industry as the price of long distance service fell and the volume of long distance calling surged.

now referred to as "Wired Telecommunications Carriers".

In mid-1997, as part of its implementation of the 1996 Telecommunications Act, the FCC introduced further interstate access charge reform. Presubscribed interexchange carrier charges (PICCs) were created in order to allow local carriers to recover the remaining portion of their fixed loop costs from long distance carriers on a per-line, instead of a per-minute, basis. A further access charge reform was adopted on May 31, 2000, which eliminated the PICC and consolidated it with the SLC. This took effect on July 1, 2000.⁴

Average monthly SLCs and PICCs are shown in Table 7.7 and average per-minute rates charged to long distance carriers are shown in Table 7.8. Both tables report historical averages for all local exchange carriers (LECs) that file access tariffs subject to price-cap regulation and LECs in the National Exchange Carrier Association (NECA) pool. These LECs control over 98% of the telecommunications industry's access lines regulated under Title II of the Telecommunications Act of 1996.⁵ Current per-line charges and per-minute charges are reported for each of the carriers in Tables 7.9 and 7.10, respectively.

The averages in Table 7.8 clearly illustrate the effectiveness of access reform in reducing the prices long distance carriers pay per minute for access to the local telephone companies' networks. The reductions in per-minute access prices over time have been a major contributing factor to reductions in long distance prices.

4 *Access Charge Reform*, CC Docket No. 96-262, Sixth Report and Order, 15 Rcd. 12962 (*CALLS Order*).

5 Telecommunications Act of 1996, Pub. L. No. 104-104, 110 Stat. 56 (1996) (*1996 Act*). The 1996 Act amended the Communications Act of 1934. 47 U.S.C. §§ 151 *et seq.*

Note: Data reflect the percent change from December of the previous year through December of the year shown.

* The CPI toll indices represent rates for households. Through 1994, PPI toll indices represent rate changes for both business and residential consumers. Since 1995, PPI indices reflect rates for residential customers.

** The PPI telephone indices were revised in June of 1995. The series are not comparable.

¹ This table shows average rates (weighted by access lines) for all local exchange carriers (LECs) that file access tariffs subject to price-cap regulation and all LECs in the National Exchange Carrier Association (NECA) pool.

² Prior to 1/01/1998, carriers did not charge separate subscriber line charge (SLC) rates for primary and non-primary residential lines. Therefore, the residential and single-line business average SLCs reported prior to 1/01/1998 include all residential SLC charges. The average residential and single-line business SLC rate as of 1/01/98 excludes non-primary residential SLCs. Non-primary SLCs are now reported separately, except for the LECs in the NECA pool, which continue to charge a single residential SLC. Under price-cap regulation, as of 7/1/2003, the caps on SLCs for primary residential and single-line business, non-primary residential, and multiline business and Centrex lines equal \$6.50, \$7.00, and \$9.20, respectively. For NECA pool companies, the residential SLC cap is \$6.50, while the multiline business and Centrex SLC cap equals \$9.20.

³ On 1/01/98, price-cap carriers began to charge presubscribed interexchange carrier charges (PICCs). The reported PICCs are averages per line including both price-cap and NECA pool lines. While carriers did not charge different rates for Centrex and multiline business SLCs, they did charge different PICC rates for these lines. Therefore, the average multiline business and Centrex PICC rates are reported separately. However, multiline business line counts, used to compute average PICC rates, include Centrex lines for LECs in the NECA pool, which do not charge PICCs or distinguish in access filings between the two line types. On 7/01/2000, residential and single-line business PICCs was eliminated. Since then the PICCs cap for multiline business lines equal \$4.31 for price cap carriers. Centrex groups of 9 or fewer lines are capped at the multiline business PICC rate of \$4.31 per group. Centrex groups with more than 9 lines are capped at \$0.48 per line (1/9th the multiline business rate).

⁴ Although the charges took effect on 7/1/2000, some companies made adjustments to the tariffs which did not take effect until 8/11/2000.

¹ This table shows average rates (weighted by minutes of use) for all local exchange carriers (LECs) that file access tariffs subject to price-cap regulation and all LECs in the National Exchange Carrier Association (NECA) pool. The average rates reported here do not include revenues from subscriber line charges (SLCs) or primary interexchange carrier charges (PICCs), both of which are reported in Table 1.1. Effective 07/01/03, the carrier common line (CCL) rates for NECA carriers were eliminated.

² Non-traffic-sensitive charges include charges assessed on a per-month, per-unit basis. Prior to 07/01/94, these charges were included in the average traffic-sensitive rates.

³ The total charge per conversation minute consists of charges on the originating end of the call, which are adjusted for dialing and call setup time, plus charges on the terminating end. Originating charges per conversation minute equal the carrier common line charge per originating access minute plus the traffic-sensitive charge per switched minute, both multiplied by 1.07 to account for dialing and call setup time, plus the non-traffic-sensitive charge per switched minute. Terminating charges per conversation minute equal carrier common line charges per terminating access minute plus both traffic-sensitive and non-traffic-sensitive charges per switched minute.

⁴ Although the charges took effect on 7/1/2000, some companies made adjustments to the tariffs which did not take effect until 8/11/2000.

NA - Not Applicable.

¹ This table shows average rates (weighted by access lines) for all local exchange carriers (LECs) that file access tariffs subject to price-cap regulation and all LECs in the National Exchange Carrier Association (NECA) pool. Rates are composites of all regions and subsidiaries of each local exchange carrier. For example, non-primary residential SLCs can be less than primary residential SLCs due to weighting by access lines. Note that at the disaggregated level, non-primary rates are always greater than or equal to non-primary rates. The primary line rate is weighted by the number of primary residential lines and the non-primary residential rate is similarly weighted by the number of non-primary access lines. Because the weight on primary lines versus non-primary lines is not constant, the primary rate is not necessarily lower than the non-primary rate at the holding company level. No information is available for those carriers that are not in the NECA pool, but are subject to rate-of-return regulation.

² PICC is an abbreviation for Presubscribed Interexchange Carrier Charge.

³ Access line counts measure lines that companies report as qualified to receive subscriber line charges (SLCs). ISDN-BRI lines, which are charged non-primary SLC and PICC rates, are included in the non-primary residential line counts. ISDN-PRI lines, which are charged rates equal to five times the multiline business SLC and PICC rates, are multiplied by five and added to multiline business counts.

¹ This table shows average rates (weighted by minutes of use) for all local exchange carriers (LECs) that file access tariffs subject to price-cap regulation and all LECs in the National Exchange Carrier Association (NECA) pool. Rates are composites of all regions and subsidiaries of each local exchange carrier. No information is available for those carriers that are not in the NECA pool, but are subject to rate-of-return regulation. The average rates reported here do not include the average revenue per minute from subscriber line charges (SLCs) or primary interexchange carrier charges (PICCs), both of which are reported in Table 1.1.

² Non-traffic sensitive charges include charges assessed on a per-month, per-unit basis.

³ The total charge per conversation minute consists of charges on the originating end of the call, which are adjusted for dialing and call setup time, plus charges on the terminating end. Originating charges per conversation minute equal the carrier common line charge per originating access minute plus the traffic-sensitive charge per switched minute, both multiplied by 1.07 to account for dialing and call setup time, plus the non-traffic-sensitive charge per switched minute. Terminating charges per conversation minute equal carrier common line charges per terminating access minute plus both traffic-sensitive and non-traffic-sensitive charges per switched minute.

8. Network Usage

To monitor use of the public switched telephone network, the National Exchange Carrier Association (NECA) provides quarterly reports to the Commission on the volume of interstate access minutes of use (MOU) passing through the local switches. The data reported in this section include new annual data for 2008 as well as revisions of the data that were contained in our previous reports. Also included are the latest quarterly estimates of industry total access minutes, through the second quarter of 2009. The minutes reported here are those minutes that pass through the incumbent local exchange carriers' switches.

Table 8.1 presents NECA information on local switching access minutes for interstate traffic that pass through the incumbent LECs' switches. Annual data are shown for totals of the tier 1 carriers, the non-tier 1 carriers, and the industry. These figures do not include the minutes from the closed end of WATS or toll-free (800/888/877/866) calls. Table 8.2 provides quarterly industry total access minutes back to mid-1984.

The NECA compilation of interstate access minutes of use data provided at the study area level appears in Table 8.3. This table provides annual data for the years 2004 through 2008. The study areas are sorted by state, and state totals are provided. Within each state's listing, the study areas are arranged in numerical order by their NECA study area code.¹ The third column identifies whether a study area is part of a Tier 1 cost company, a Tier 2 cost company, or an average schedule company (designated by a 1, 2, or A, respectively). The data in these tables are revised and supersede the usage data in previous reports.²

Table 8.4 provides a cross-reference table of the NECA state codes that are part of their study area codes.

The following descriptions of minutes of use measures are based on information provided by NECA:

Access MOU are "earned MOU" which are derived by dividing the earned revenues by the corresponding rate. This definition of access minutes is in agreement with the tariff review plan and ARMIS reports. Access minutes of use generating revenues have been discounted, which can produce distortions in revenue amounts. Further, revenues are normalized to include changes in terminating/originating and percent interstate use factors, billing adjustments, and the imputations of access charges (where applicable). Revenues are also

1 A study area is usually an operating company's operations in one state. The first two digits of the NECA study area code identify the state, and the remaining four digits identify the study area. The numerical code for each state is shown in Table 8.4.

2 In cases where study areas have merged, the historical data have been restated to reflect the merger.

calendarized, which will change derived minutes.

Access MOU include only the domestic portion of international calls. Similarly, WATS and toll-free (800/888/877/866) calls are counted only on one end of the call.³ Finally, minutes include time for incomplete calls and setup time.

The table showing historical data on the number of local and toll calls and the number of interLATA billed access minutes for the large incumbent LECs reporting to the Commission (Table 8.3 in previous Monitoring Reports) cannot be updated from last year's report because the largest companies have had their forbearance petitions regarding reporting this information to ARMIS approved.

In 2001, based on a *Recommended Decision* of the Federal-State Joint Board on Separations, the Commission imposed an interim five-year freeze of the Part 36 jurisdictional separations categories and jurisdictional allocation factors. On May 15, 2006, the Commission extended the interim freeze for an additional three years,⁴ and on May 15, 2009, this freeze was further extended until June 30, 2010.⁵ Under the interim freeze, price-cap carriers were required to freeze their Part 36 categories and jurisdictional allocation factors. Rate-of-return carriers, however, were given the option to not freeze the Part 36 category relationships.⁶ In the order adopting the freeze, the Commission also concluded that carriers no longer would be required to perform separations studies, including traffic studies. Consequently, beginning with the data for 2001, the filing of dial equipment minutes (DEM) was voluntary. Very few carriers voluntarily chose to report their DEM data since then and, consequently, DEM data have not been included in this report since 2003.

3 WATS calls generate access minutes only at the terminating end of the call and toll-free (800/888/877/866) calls generate access minutes only at the originating end of the call; both types of minutes are counted in the terminating minutes.

4 *Jurisdictional Separations Reform and Referral to the Federal-State Joint Board*, CC Docket No. 80-286, Order and Further Notice of Proposed Rulemaking, 21 FCC Rcd 5516 (2006).

5 *Jurisdictional Separations Reform and Referral to the Federal-State Joint Board*, CC Docket No. 80-286, Report and Order, 24 FCC Rcd 6162 (2009).

6 *See Jurisdictional Separations Reform and Referral to the Federal-State Joint Board*, CC Docket No. 80-286, Report and Order, 16 FCC Rcd 11382 (2001) (*Separations Freeze Order*).

9. Quality of Service

Introduction

This section summarizes various kinds of service quality data filed by the regional Bell operating companies, Embarq (formerly Sprint) and other price-cap regulated incumbent local exchange carriers for calendar year 2008.¹ The data track the quality of service provided to both retail customers (business and residential) and access customers (interexchange carriers).

The Commission does not impose service quality standards on communications common carriers. Rather, the Commission annually monitors quality of service data submitted by incumbent local exchange carriers that are regulated as price-cap carriers. The Commission summarizes these data and periodically publishes a report on quality of service trends.² The tables included in this section present comparative data on key company performance indicators. These include objective indicators of installation and maintenance performance, switch outages and trunk blocking performance. The tables also present data on customer perceptions of service, as well as the level of consumer complaints.

Background

At the end of 1983, anticipating AT&T's imminent divestiture of its local operating companies, the Commission directed the Common Carrier Bureau³ to establish a monitoring

-
- 1 In February 1992, United Telecommunications Inc. became Sprint Corporation (Local Division); and in March 1993, Sprint Corporation acquired Centel Corporation. Recently Sprint spun off its Local Division as a new company named Embarq. Bell Atlantic and NYNEX merged in August 1997, and then merged with GTE in 2000. Verizon Communications is shown separately for GTE, Verizon North (the former NYNEX companies), and Verizon South (the former Bell Atlantic Companies). Pacific Telesis, Ameritech, and SNET are shown separately despite the merger of SBC and Pacific Telesis in April 1997, SBC and SNET in October 1998, and SBC and Ameritech in October 1999. Following the merger of SBC and AT&T, the name SBC was changed to AT&T. More recently AT&T acquired BellSouth.
 - 2 The latest report, which covers data for 2007, was released March 13, 2009. See Industry Analysis and Technology Division, Wireline Competition Bureau, Federal Communications Commission, *Quality of Service of Incumbent Local Exchange Carriers* (March 2009). This report includes data revisions that were received after the cutoff date for data in this Monitoring Report. It also includes an analysis of the quality of the data and the significance of changes over time. That report (as a PDF file) and previous reports can be found on the Commission's website at www.fcc.gov/wcb/stats.
 - 3 As the result of a reorganization in March 2002, the Wireline Competition Bureau now performs Common Carrier Bureau functions described in this section. In this section, references to the Common Carrier Bureau apply to activities prior to the above date.

program that would provide a basis for detecting adverse trends in Bell operating company network service quality. Subsequently, the Bureau modified the service quality reporting requirements to reduce unnecessary paperwork and to ensure that needed information would be provided in a uniform format. Initially, the data were received twice yearly. The data collected for 1989 and 1990 formed the basis for FCC summary reports published in June 1990 and July 1991, respectively, highlighting five basic elements of quality of service data collected at that time.

With the implementation of price-cap regulation for certain local exchange carriers, the Commission made several major changes to the service quality monitoring program beginning with reports filed in 1991. First, the Commission expanded the class of companies filing reports to include non-Bell carriers that have elected to be subject to price-cap regulation.⁴ These carriers are known as non-mandatory price-cap carriers and most of them are much smaller than the Bell operating companies. Second, it included service quality reports in the Automated Reporting Management Information System (ARMIS).⁵ Finally, the Commission ordered significant changes to the kinds of data these carriers had to report.⁶ Following these developments, the Commission released service quality summary reports annually starting in February 1993 incorporating the ARMIS data.⁷ This section summarizes current year data from all reporting price-cap companies used in preparation of the summary reports.⁸

4 *Policy and Rules Concerning Rates for Dominant Carriers*, CC Docket No. 87-313, Second Report and Order, 5 FCC Rcd 6786, 6827-31 (1990) (*LEC Price-Cap Order*) (establishing the current service quality monitoring program and incorporating the service quality reports into the ARMIS program), Erratum, 5 FCC Rcd 7664 (1990), *modified on recon.*, 6 FCC Rcd 2637 (1991), *aff'd sub nom.*, *Nat'l Rural Telecom Ass'n v. FCC*, 988 F.2d 174 (D.C. Cir. 1993). The incumbent local exchange carriers that are rate-of-return regulated are not subject to federal service quality reporting requirements.

5 *LEC Price-Cap Order*, 5 FCC Rcd at 6827-30. The ARMIS database includes a variety of mechanized company financial and infrastructure reports in addition to the quality-of-service reports. Most data are available disaggregated to a study area level which generally represents operations within a given state.

6 *Id.*; *Policy and Rules Concerning Rates for Dominant Carriers*, CC Docket No. 87-313, Memorandum Opinion and Order, 6 FCC Rcd 2974 (1991) (*Service Quality Order*), *recon.*, 6 FCC Rcd 7482 (1991). Previously the Common Carrier Bureau had collected data on five basic service quality measurements from the Bell operating companies. These were customer satisfaction levels, dial tone delay, transmission quality, on time service orders, and percentage of call blocking due to equipment failure.

7 The reports have included data from the mandatory price-cap companies and the largest non-mandatory carriers, GTE and Embarq (formerly Sprint). GTE is now a part of Verizon, a mandatory price-cap carrier. Non-mandatory carriers are not required to file customer satisfaction data that appears in the ARMIS 43-06 report.

8 The following smaller non-mandatory price-cap companies that file ARMIS 43-05 data are included in this summary: Century Tel., Cincinnati Bell, Citizens, Citizens Frontier,

In 1996, pursuant to requirements in the Telecommunications Act of 1996,⁹ the Commission reduced the frequency of data reporting for all reports to annual submissions.¹⁰ In May 1997, relevant definitions were clarified further. These changes have been reflected in filed data starting with the 1997 calendar year. The raw data are now filed annually in April of each year. However, in 2008, the Commission granted forbearance from carriers' obligations to file ARMIS Reports 43-05 and 43-06, which provide the source data for the service quality report, subject to the commitment of all price-cap carriers "to continue collecting service quality and customer satisfaction data and to filing those data publicly through ARMIS Report 43-05 and 43-06 filings for twenty four months from the effective date of this order" (September 6, 2008).¹¹

Iowa Telecom, and Windstream Communications (spun off from Alltel Corp. and merged with Valor Telecommunications). Embarq (formerly Sprint), the largest of the non-mandatory price-cap companies, has been included in prior summaries.

9 Telecommunications Act of 1996, Pub. L. No. 104-104, 110 Stat. 56.

10 Orders implementing filing frequency and other reporting requirement changes associated with implementation of the Telecommunications Act of 1996 are as follows: Implementation of the Telecommunications Act of 1996: Reform of Filing Requirements and Carrier Classifications, CC Docket No. 96-193, Order and Notice of Proposed Rulemaking, 11 FCC Rcd 11716 (1996); Revision of ARMIS Quarterly Report (FCC Report 43-01) et al., CC Docket No. 96-193, Order, 11 FCC Rcd 22508 (1996); Policy and Rules Concerning Rates for Dominant Carriers, CC Docket No. 87-313, Memorandum Opinion and Order, 12 FCC Rcd 8115 (1997); Revision of ARMIS Annual Summary Report (FCC Report 43-01) et al., AAD No. 95-91, Order, 12 FCC Rcd 21831 (1997).

11 See Service Quality, Customer Satisfaction, Infrastructure and Operating Data Gathering; Petition of AT&T Inc. for Forbearance Under 47 U.S.C. § 160(c) From Enforcement of Certain of the Commission's ARMIS Reporting Requirements; Petition of Qwest Corporation for Forbearance from Enforcement of the Commission's ARMIS and 492A Reporting Requirements Pursuant to 47 U.S.C. § 160(c); Petition of the Embarq Local Operating Companies for Forbearance Under 47 U.S.C. § 160(c) From Enforcement of Certain of ARMIS Reporting Requirements; Petition of Frontier and Citizens ILECs for Forbearance Under 47 U.S.C. § 160(c) From Enforcement of Certain of the Commission's ARMIS Reporting Requirements; Petition of Verizon for Forbearance Under 47 U.S.C. § 160(c) From Enforcement of Certain of the Commission's Recordkeeping and Reporting Requirements; Petition of AT&T Inc. For Forbearance Under 47 U.S.C. § 160 From Enforcement of Certain of the Commission's Cost Assignment Rules, WC Docket Nos. 08-190, 07-139, 07-204, 07-273, 07-21, Memorandum Opinion and Order and Notice of Proposed Rulemaking, 23 FCC Rcd 13647 (2008) (ARMIS Forbearance Order paragraph 12), pet. for recon. pending, pet. for review pending, NASUCA v. FCC, Case No. 08-1353 (D.C. Cir. filed Nov. 4, 2008).

The Data

The data presented in this section summarize the most recent ARMIS 43-05 and 43-06 carrier reports.¹² Tables in this year's summary include data from the regional Bell operating companies, Embarq (formerly Sprint), and all other reporting incumbent local exchange carriers. Tables 9.1(a), 9.2(a), 9.3(a), 9.4 and 9.5 cover data for the Bell operating companies, or mandatory price cap companies, and Tables 9.1(b), 9.2(b) and 9.3(b) cover data for smaller non-mandatory price-cap companies. These companies report quality of service data at a study area level which generally represents operations within a given state. Although the companies provide selected company aggregate data, the tables of this section contain summary data recalculated by FCC staff as the composite aggregate of all study areas for each listed entity. This section also includes a fairly extensive summary of data about individual switching outages, including outage durations and numbers of lines affected, for which no company calculated summaries are provided. Switch outage data have also been aggregated to the company level for inclusion in the tables.

The company-level quality of service data included in the tables of this section are derived by calculating sums or weighted averages of data reported at the study area level. In particular, where companies report study area information in terms of percentages or average time intervals, this section presents company composites that are calculated by weighting the percentage or time interval figures from all study areas within that company. For example, we weight the percent of commitments met by the corresponding number of orders provided in the filed data.¹³

In the case of outage data summarized in Tables 9.2, and 9.3, we calculate a number of useful statistics from raw data records for individual switches with outages lasting more than two minutes. These statistics include the total number of events lasting more than two minutes, the average outage duration, the average number of outages per hundred switches, the average number

12 Source data used in preparing this section may be useful for further investigation and can be readily extracted from the ARMIS 43-05 and 43-06 tables on the online database maintained on the FCC website at www.fcc.gov/wcb/eafs. The data are also available from Best Copy and Printing, Inc. at (202) 488-5300. A number of prior-year data summary reports are available through the FCC's Reference Information Center (Courtyard Level) at 445 12th Street, SW, Washington, D.C. 20554.

13 Although companies have prepared their own company composites, we have recalculated a number of them from study area data for presentation in the tables to assure that company averages are calculated in a consistent manner. We weight data involving percentages or time intervals in order to arrive at consistent composite data shown in the tables. Parameters used for weighting in this section were appropriate for the composite being calculated and were based on the raw data filed by the carriers but are not necessarily shown in the tables. For example, we calculate composite installation interval data by multiplying the average installation interval at the individual study area level by the number of orders in that study area, summing the results for all study areas, and then dividing that sum by the total number of orders.

of outages per million access lines, and the average outage line-minutes per thousand access lines and per event. The outage line-minutes parameter is a measure that combines both duration and number of lines affected in a single parameter. We derive this parameter from the raw data by multiplying the number of lines involved in each outage by the duration of the outage and summing the resulting values. We then divide the resulting sum by the total number of thousands of access lines or of events to obtain average outage line-minutes per access line and average outage line minutes per event respectively.

The tables contained in this section cover data for 2008. Table 9.1 provides installation, maintenance and customer complaint data. The installation and maintenance data are presented separately for local services provided to end users and access services provided to interexchange carriers. Table 9.2 shows switch downtime and trunk servicing data. Table 9.3 shows outage data by cause. Table 9.4 presents the percentages of residential, small business and large business customers indicating dissatisfaction with BOC installations, repairs and business offices, as determined by BOC customer perception surveys.¹⁴ Table 9.5 shows the underlying survey sample sizes.

More detailed information on the raw data from which this section has been developed may be found on the Commission's ARMIS web page cited earlier. Tables 9.4 and 9.5 were prepared from data filed only by the Bell operating companies in the ARMIS 43-06 report. The statistics presented in Tables 9.4 and 9.5 are straightforward and reflect the data in the format filed. Complete data descriptions are available in several Commission orders.¹⁵

14 Customer satisfaction data, collected in the 43-06 report and summarized in Tables 9.4 and 9.5, are required to be reported only by the mandatory price-cap carriers.

Customer Response

Publication: 2009 Universal Service Monitoring Report

You can help us provide the best possible information to the public by completing this form and returning it to the Industry Analysis Division of the FCC's Common Carrier Bureau.

1. Please check the category that best describes you:

- press
- current telecommunications carrier
- potential telecommunications carrier
- business customer evaluating vendors/service options
- consultant, law firm, lobbyist
- other business customer
- academic/student
- residential customer
- FCC employee
- other federal government employee
- state or local government employee
- Other (please specify)

2. Please rate the report: Excellent Good Satisfactory Poor No opinion

- | | | | | | |
|----------------------|-----|-----|-----|-----|-----|
| Data accuracy | () | () | () | () | () |
| Data presentation | () | () | () | () | () |
| Timeliness of data | () | () | () | () | () |
| Completeness of data | () | () | () | () | () |
| Text clarity | () | () | () | () | () |
| Completeness of text | () | () | () | () | () |

3. Overall, how do you rate this report?

- | | | | | | |
|--|-----------|------|--------------|------|------------|
| | Excellent | Good | Satisfactory | Poor | No opinion |
| | () | () | () | () | () |

4. How can this report be improved?

5. May we contact you to discuss possible improvements?
